OpenDoor UI Reference

Features, modules, components and screens for every user role

A reference for the team that designs and presents the OpenDoor user interface. It shows what the working system does today, after the restyle to the team's Figma design (October 13, 2026): every screen of every role, what is on it, what the user can do there, the messages it shows and the API it uses. Screenshots were taken from the running application with the seeded demo data.

Prepared	October 14, 2026
Built from	commit `2f0b38d` (branch `main`), local stack with the seeded demo data
Contents	4 user roles · 13 modules · 37 screens · 70 screenshots · 24 shared components
Status	Backup reference for the team's UI work. The running application and `docs/openapi.yaml` stay the source of truth.

SIA 1 and IPT final project · PWD job-matching platform

1 About this document

A reference for the team that designs and presents the OpenDoor user interface. It shows what the working system does today, after the restyle to the team's Figma design (October 13, 2026): every screen of every role, what is on it, what the user can do there, the messages it shows and the API it uses. Screenshots were taken from the running application with the seeded demo data.

How to read the screen pages

- Every screen has the same blocks: **Route** (address in the app), **Who** (roles that can open it), **Purpose**, **On the screen**, **Actions**, **Messages and states** and **API** (calls made through the gateway, base `/api`).
- Labels in quotes are the exact texts used today. A later change can alter the look, but keep the meaning of the texts, the order of steps and the accessibility behaviour described in sections 10–11 and Appendix D.
- NEW marks features and screens added after the first SIA screen list (October 10–14, 2026).
- Screenshots are 1,440 px wide (desktop, the width of the Figma frames) unless the caption says otherwise. Long pages are cut into parts. The demo people and companies are fictional.

System in one paragraph

OpenDoor matches persons with disabilities (PWDs) with employers by the **workplace accommodations** a job offers and the job seeker needs, and lets hired employees confirm 30 days later whether those accommodations were really provided (the employer's **trust score**). The React app talks only to the API gateway; behind it the Laravel Core Service holds the data, the Insights Service builds the Workplace Accessibility Snapshot from public map and place data, and a SOAP business registry checks employer registrations.

2 Users, modules and what is new

User roles

Guest

Not logged in

Browses and searches open jobs, reads job details with the Accessibility Snapshot and public employer pages, reads how trust scores work, logs in or creates an account.

Navigation: Home · Find jobs | OpenDoor logo | Log in · Create account

Job seeker

Role `candidate` – person with a disability looking for work

Saves accommodation needs and profile, finds jobs ranked by the needs they meet, applies, follows applications, saves jobs, reports postings, rates the promised accommodations 30 days after being hired.

Navigation: Dashboard · Find jobs · Applications · Saved jobs | logo | Profile · Notifications · Account · Log out

Employer

Role `employer` – company that hires

Creates the company profile (checked against the DTI/SEC registry), posts jobs with structured accommodations, reviews applicants, hires or declines, follows its trust score.

Navigation: Dashboard · Job postings | logo | Company · Trust score · Notifications · Account · Log out

Administrator

Role `admin` – OpenDoor staff

Verifies employers with the business registry, approves or removes postings, suspends users, handles reports, moderates feedback, maintains categories and accommodation types, sees analytics.

Navigation: Dashboard · Employers · Postings · Users | logo | Reports · Feedback · Data · Account · Log out

Modules and features

#	Module	Features	Users	Screens
M1	Authentication and accounts	Create an account in 3 steps (role, details, privacy consent), log in, log out, change password, forgot password with an emailed reset link NEW, session expiry. Login and reset requests limited to 5 per minute; suspended accounts are refused.	All	Log in, Forgot password, Reset password, Create account, Account
M2	Job seeker profile and needs	Accommodation needs (grouped checklist), headline, skills, experience, home location (PSGC), optional disability type with a separate "show to employers" choice, PDF résumé (5 MB) – in three tabs.	Job seeker	Profile and needs
M3	Company profile and verification	Company details, DTI/SEC registration number, office location, logo. An administrator checks the registration with the SOAP business registry and approves or rejects with a reason.	Employer, Admin	Company profile, Employers, Employer verification
M4	Job postings	Post a job in 4 steps with a review, save as draft, submit for approval, edit, close, reopen, delete. Each posting lists accommodations with optional details. Admin approves, rejects with a reason or removes.	Employer, Admin	Job postings, Post a new job, Edit posting, Postings

#	Module	Features	Users	Screens
M5	Search and matching	Keyword, category, "must offer" accommodations, sort (best match, newest, closing soon). "Matches my needs" ranks jobs by how many of the job seeker's needs they meet.	Guest, Job seeker	Find jobs, Job details
M6	Applications	Apply with a cover note and an interview accommodation request; statuses Submitted → Reviewed → Hired / Not selected, or Withdrawn by the job seeker; "Where it stands" timeline with dates.	Job seeker, Employer	Job details, My applications, Application details, Applicants, Application review
M7	Feedback and trust score	30 days after a hire the employee rates each promised accommodation (delivered, partly, not delivered). The employer's trust score is published from 3 responses.	Job seeker, Employer, public	Rate your accommodations, Trust score, Employer page, How trust scores work
M8	Dashboards	Summary tiles per role that link to the matching lists.	All signed-in roles	Dashboards
M9	Notifications	In-app notices for application changes, admin decisions and the rating reminder, unread count in the header; each notice is also emailed (M13).	Job seeker, Employer	Notifications
M10	Moderation	Suspend and reactivate users, handle posting reports, hide abusive feedback.	Admin (reports filed by job seekers)	Users, Reports, Feedback
M11	Master data	Job categories and accommodation types (5 groups). In-use items are retired instead of deleted.	Admin	Master data
M12	Saved jobs NEW	Save jobs from the result cards or the job page; list them, remove them with Undo.	Job seeker	Find jobs, Job details, Saved jobs
M13	Accessibility settings NEW	Display bar on every page: text size, high contrast and reduced motion (saved to the account), Quiet mode and compact menu (this device). Notices also sent by email, with an on/off switch, and a rating reminder on day 30.	All	Display bar, Account
–	Accessibility Snapshot (Insights mashup)	On every job page: employer claims, community verification and wheelchair-accessible places within 500 m (OpenStreetMap), official place names (PSGC).	Everyone	Job details
–	Read aloud and Voice input NEW	Browser text-to-speech on job and application pages; browser speech-to-text on search and long text fields (privacy notice first).	Everyone	Job details, Application details, forms
–	Information pages NEW	Privacy, Accessibility statement and How trust scores work, linked from the footer and the trust score cards.	Everyone	Privacy, Accessibility statement, How trust scores work

What is new since the first screen list

Date (2026)	Feature	What changed for the UI
Oct 10	Saved jobs (M12)	"Save job" toggle on the job page and a Saved jobs page.

Date (2026)	Feature	What changed for the UI
Oct 10	Moderation (M10)	Admin Users (suspend/reactivate), Reports (dismiss / take action with a note) and Feedback (hide / show again) screens.
Oct 10	Dashboards (M8) and notifications (M9)	Real numbers on all three dashboards; notices for admin decisions on verification and postings.
Oct 10	Admin removal of postings	"Remove" on any posting, with a reason that the employer receives.
Oct 10	Suspended employers	Postings of a suspended employer are hidden from job seekers until the account is reactivated.
Oct 11	Display settings follow the account (M13)	Text size, contrast and motion saved with the account and applied at login on any device.
Oct 11	Read aloud	"Read this job aloud" / "Read this application aloud" with pause, resume and stop.
Oct 11	Voice input	"Speak" button under the search keyword and long text fields, with a one-time privacy notice.
Oct 11	WCAG 2.1 AA audit fixes	Result counts announced also when zero, scrollable trust-score table, autocomplete on personal fields, unique page titles.
Oct 11–12	Snapshot reliability	Second map server and background retry; the snapshot says when it shows an older saved copy.
Oct 12	Email notifications (M13)	Every notice is also emailed (on by default); switch in Account; rating reminder when the feedback form opens (section 9).
Oct 13	Forgot password (M1)	"Forgot your password?" on Log in, a page that emails a reset link (the same answer for every email), and a page to choose a new password.
Oct 13	New look (Figma design)	Every screen restyled to the team's Figma design: purple palette, Lexend and Atkinson Hyperlegible fonts, pill buttons, icon tiles, cards, status badges with icons.
Oct 13	Display bar and header	Bar on every page with Text size, High contrast, Quiet mode and Compact menu; role menus left and right of the centred logo; a Menu button when the full menu does not fit.
Oct 13	Step-by-step forms	Create account in 3 steps; Post a new job in 4 steps with a review page.
Oct 13	Tabs	Profile (Accommodations you need / About you / Résumé) and Account (Display / Password / Email notifications).
Oct 13	Save from the results, Undo	"Save" / "Saved" on every job card for job seekers; Saved jobs offers "Undo" after "Remove".
Oct 13	"Where it stands"	Application details show Submitted → Reviewed → Decision with their dates.
Oct 13	Information pages	Privacy, Accessibility statement and How trust scores work.
Oct 14	Reflow fixes	Job cards stack at 200 % text and on 320 px screens instead of making the page scroll sideways.

Business rules that shape the screens

- Postings appear in search only when **open, approved, not deleted and the employer is not suspended**. Drafts and postings waiting for approval are visible only to their owner and admins.
- Applications: Submitted → Reviewed (employer opens it) → Hired or Not selected (employer); the job seeker can withdraw while Submitted or Reviewed and can confirm "I was hired" while Reviewed. One application per job.
- Applying closes on the "Apply by" date (Philippine time); a daily job closes expired postings at 00:05.

- Feedback opens on calendar day 30 after the hire, once per hire, and rates the accommodations the posting listed at the time of hire. That morning the job seeker gets a reminder (in-app and email).
- Trust score = delivered ÷ rated, partly delivered counts as half, shown as a whole percent, published from 3 responses.
- Needs are used only for matching; employers see them only for applications to their own jobs. Disability type is optional, never used for matching and shown to employers only if the job seeker allows it.
- The business registry result is advice: an administrator always decides. Changing the registration number removes the Verified badge until checked again.

3 Public screens (guest)

Open to everyone. Header: "Home" and "Find jobs" on the left of the logo, "Log in" and "Create account" on the right. The display bar and footer are on every page.

3.1 Home

Route	`/`
Who	Everyone
Purpose	Explains OpenDoor in one sentence and sends visitors to the jobs or to registration.

ON THE SCREEN

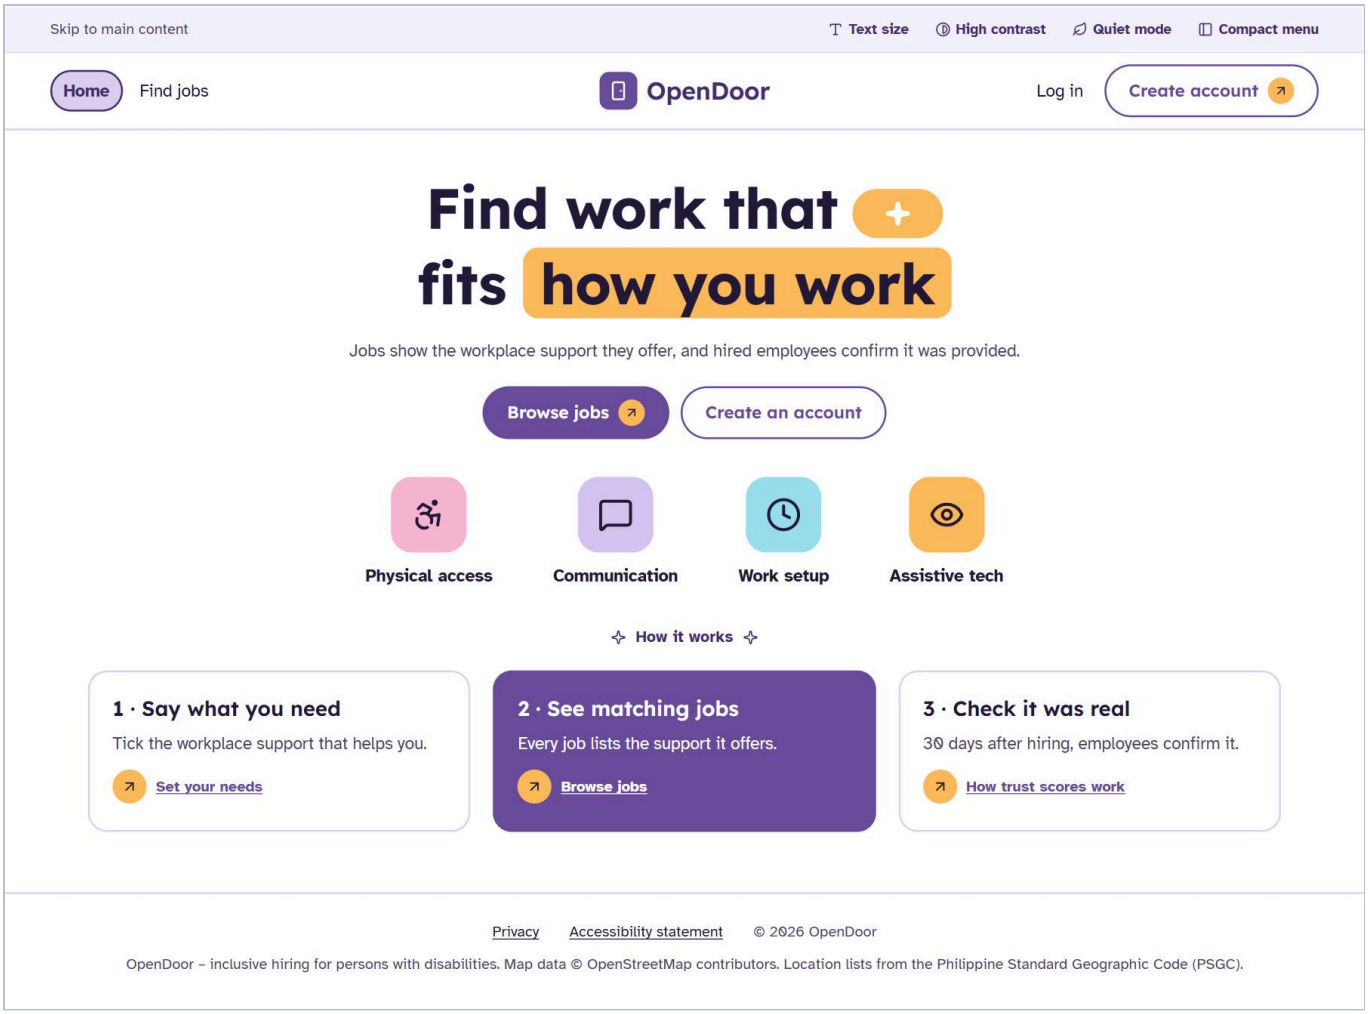

- h1 "Find work that fits how you work" (decorative sparkle pill and highlight)
- Lead "Jobs show the workplace support they offer, and hired employees confirm it was provided."
- Buttons "Browse jobs" (primary) and "Create an account" (secondary); four decorative icon tiles
- "How it works": "1 · Say what you need" (Set your needs), "2 · See matching jobs" (Browse jobs), "3 · Check it was real" – "30 days after hiring, employees confirm it." (How trust scores work)

ACTIONS

- Browse jobs → Find jobs
- Create an account → Create account
- How trust scores work → 3.12

MESSAGES AND STATES

- Quiet mode: no sparkles, plain colours (section 8)

3.2 Find jobs

Route	`/jobs (guest), /candidate/jobs (job seeker – see 4.3)`
Who	Everyone
Purpose	Search and filter open, approved jobs.

ON THE SCREEN

- Subtitle "Search open jobs and filter by the support you need."
- Panel "Filter jobs" (left on wide screens): Keyword (hint "Job title, description or company name.", Speak button), Category ("All categories"), Sort by (Best match, Newest, Closing soon), box "Must offer these accommodations" that opens with a turning chevron and shows the count, "Clear filters" link and "Results update as you type."
- Results: announced count "3 jobs found", job cards, pagination

ACTIONS

- Typing filters after a short pause (300 ms) – no search button; focus stays in the field
- Every filter is kept in the address, so a search can be shared or bookmarked; the job page's back link returns to it
- Open a job card title → Job details

MESSAGES AND STATES

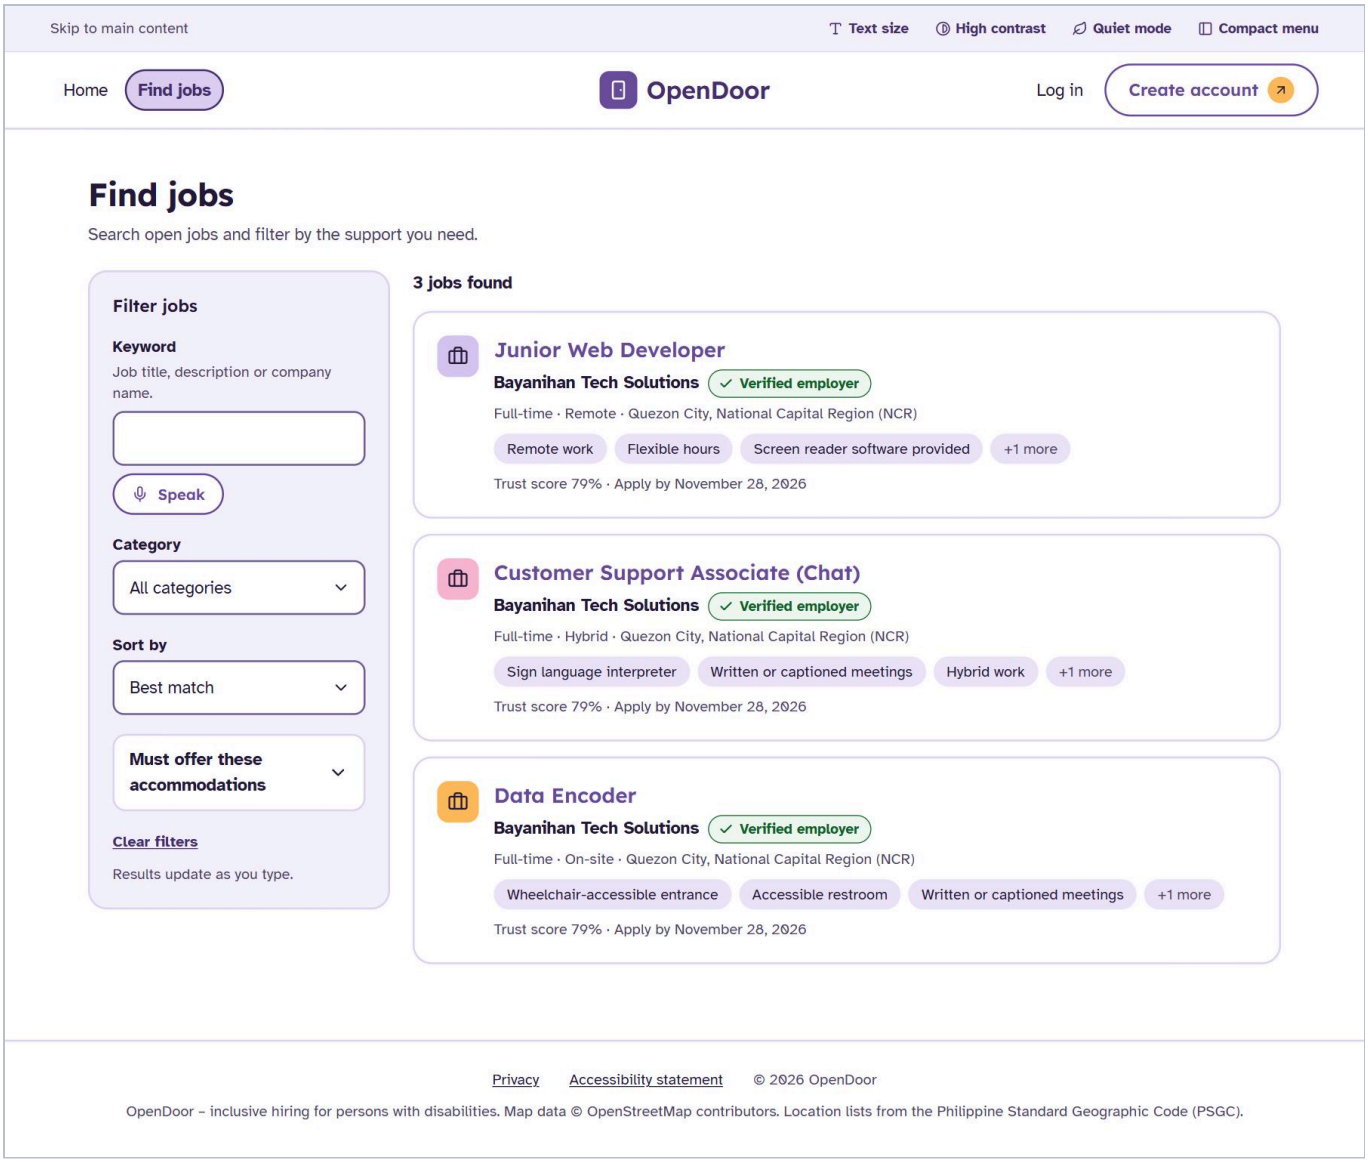

- "Searching jobs…" on first load
- Empty: "No jobs match these filters – Try fewer filters or a different keyword."
- Error: "Jobs could not be loaded" with reference id

API

`GET /job-postings?q=&category=&accommodations[]=&sort=&page=`

`GET /categories`

`GET /accommodations`

Screenshot `/jobs`

3.3 Job details

Route	`/jobs/{id}`
Who	Everyone (job seekers see their own version – 4.4)
Purpose	Everything about one job: the offer, the accommodations, the employer's trust score and the Accessibility Snapshot.

ON THE SCREEN

- "‹ Back to job results" (or to the employer page or saved jobs, wherever the user came from)
- h1 job title; employer name (link to the employer page) + Verified badge; "Read this job aloud" on the right; status badge only when the job is not open
- Main column: card "Details" (Category, Employment, Work setup, Interview, Address, Apply by), card "About the job", card "Accommodations offered" (tags with the employer's notes), closed card "Workplace Accessibility Snapshot" with "Show Workplace Accessibility Snapshot"
- Side column: Trust score card with "How trust scores work"; guest card "Interested?" – "Log in to apply, or create an account. It takes about 2 minutes." with "Log in to apply" (returns to this job after login) and "Create an account"

ACTIONS

- Log in to apply
- Read aloud
- Open the employer page
- Show / Hide the snapshot

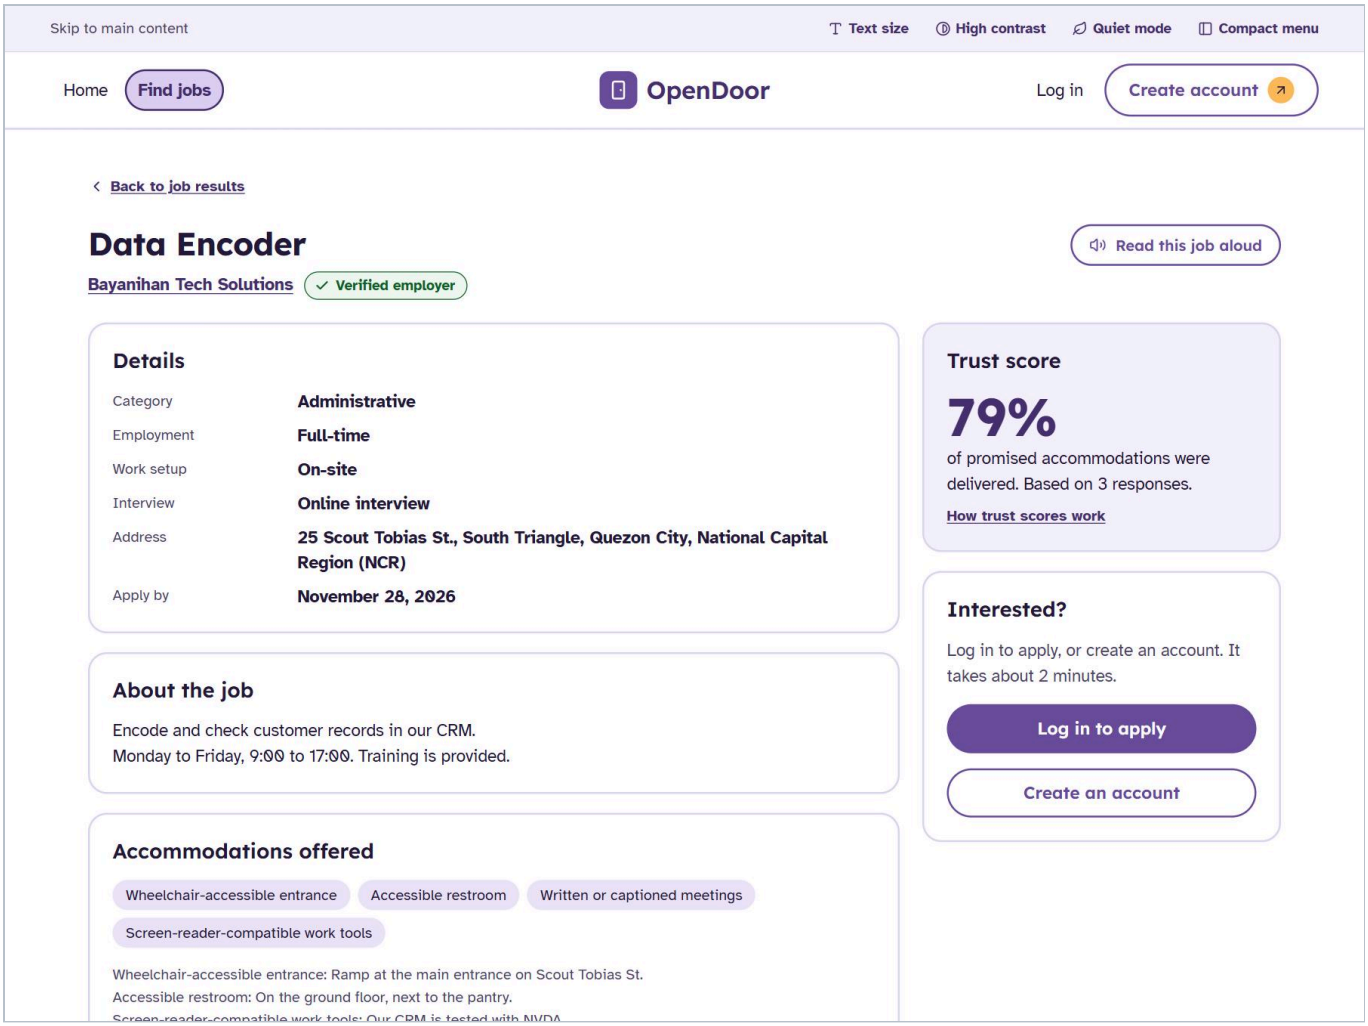

MESSAGES AND STATES

- Snapshot loads when opened: "Loading the accessibility snapshot…"
- Snapshot failed: warning "The accessibility snapshot is not available right now. The job details above are complete."
- Partial data notes, e.g. "Nearby places could not be loaded right now." or "Some map information is from an older saved copy…"
- Unknown or unpublished job: "This job could not be loaded"

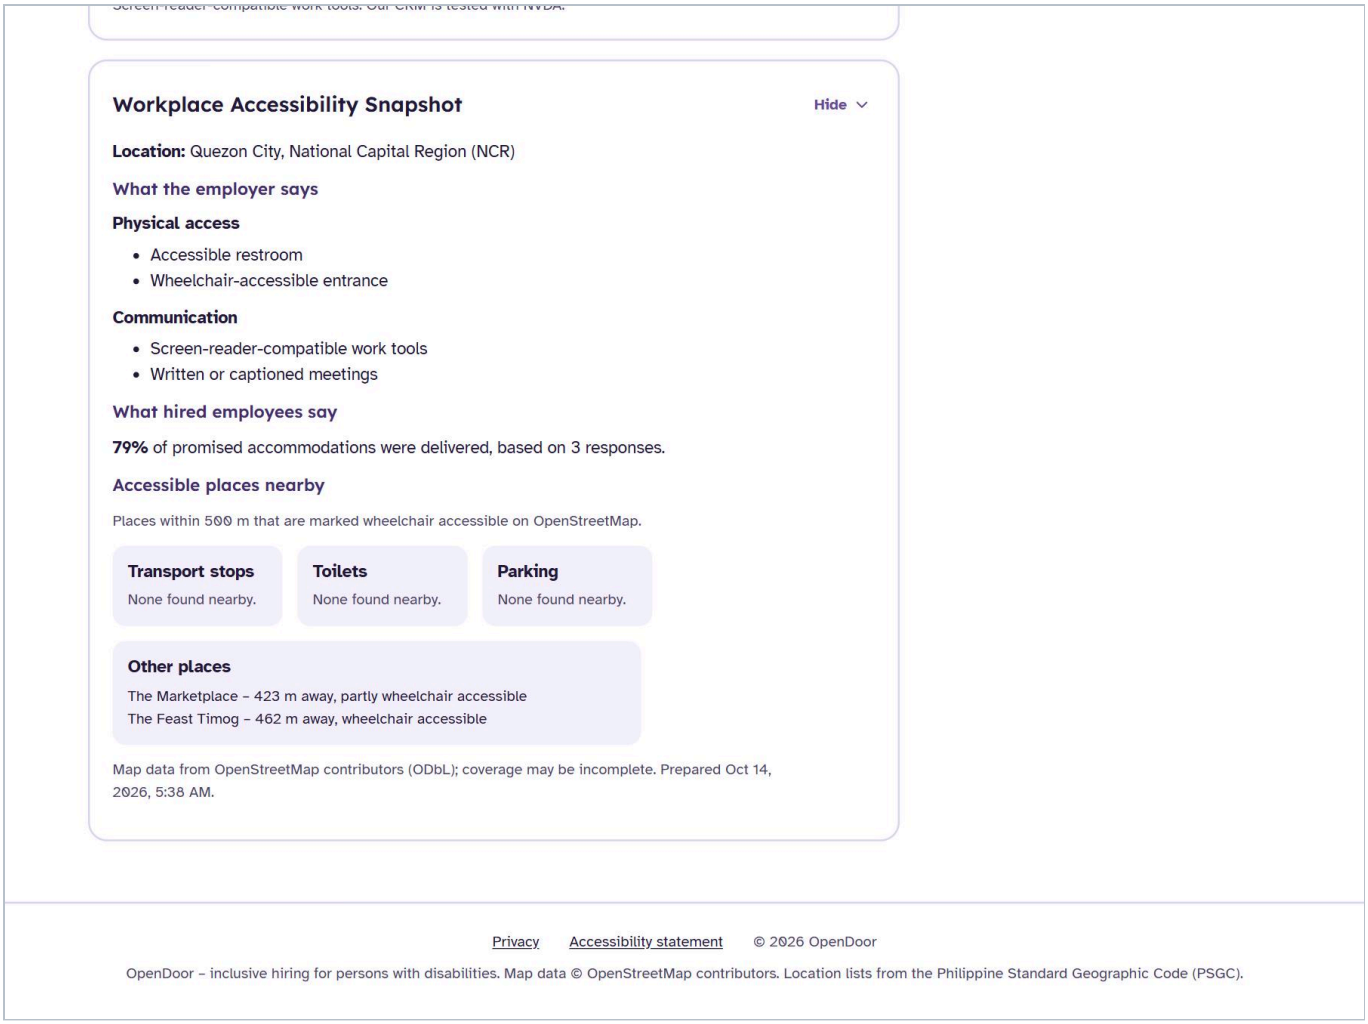

API

`GET /job-postings/{id}`

`GET /insights/job-postings/{id} (Insights mashup: Core summary + PSGC + Nominatim + Overpass), only when the snapshot is opened`

The Accessibility Snapshot opened – part 1 of 2 `/jobs/1`

The Accessibility Snapshot opened – part 2 of 2 `/jobs/1`

3.4 Employer page

Route	`/employers/{id}`
Who	Everyone
Purpose	Public profile of a company with its trust score and open jobs.

ON THE SCREEN

- Back link to where the user came from (e.g. "‹ Back to Data Encoder")
- h1 company name with the Verified badge on the same line, logo, "industry · location", about the company
- Side by side: Trust score card with the table "Each accommodation" (rows "Accessible restroom (2 of 2 delivered)") and "Open jobs" as job cards

ACTIONS

- Open a job

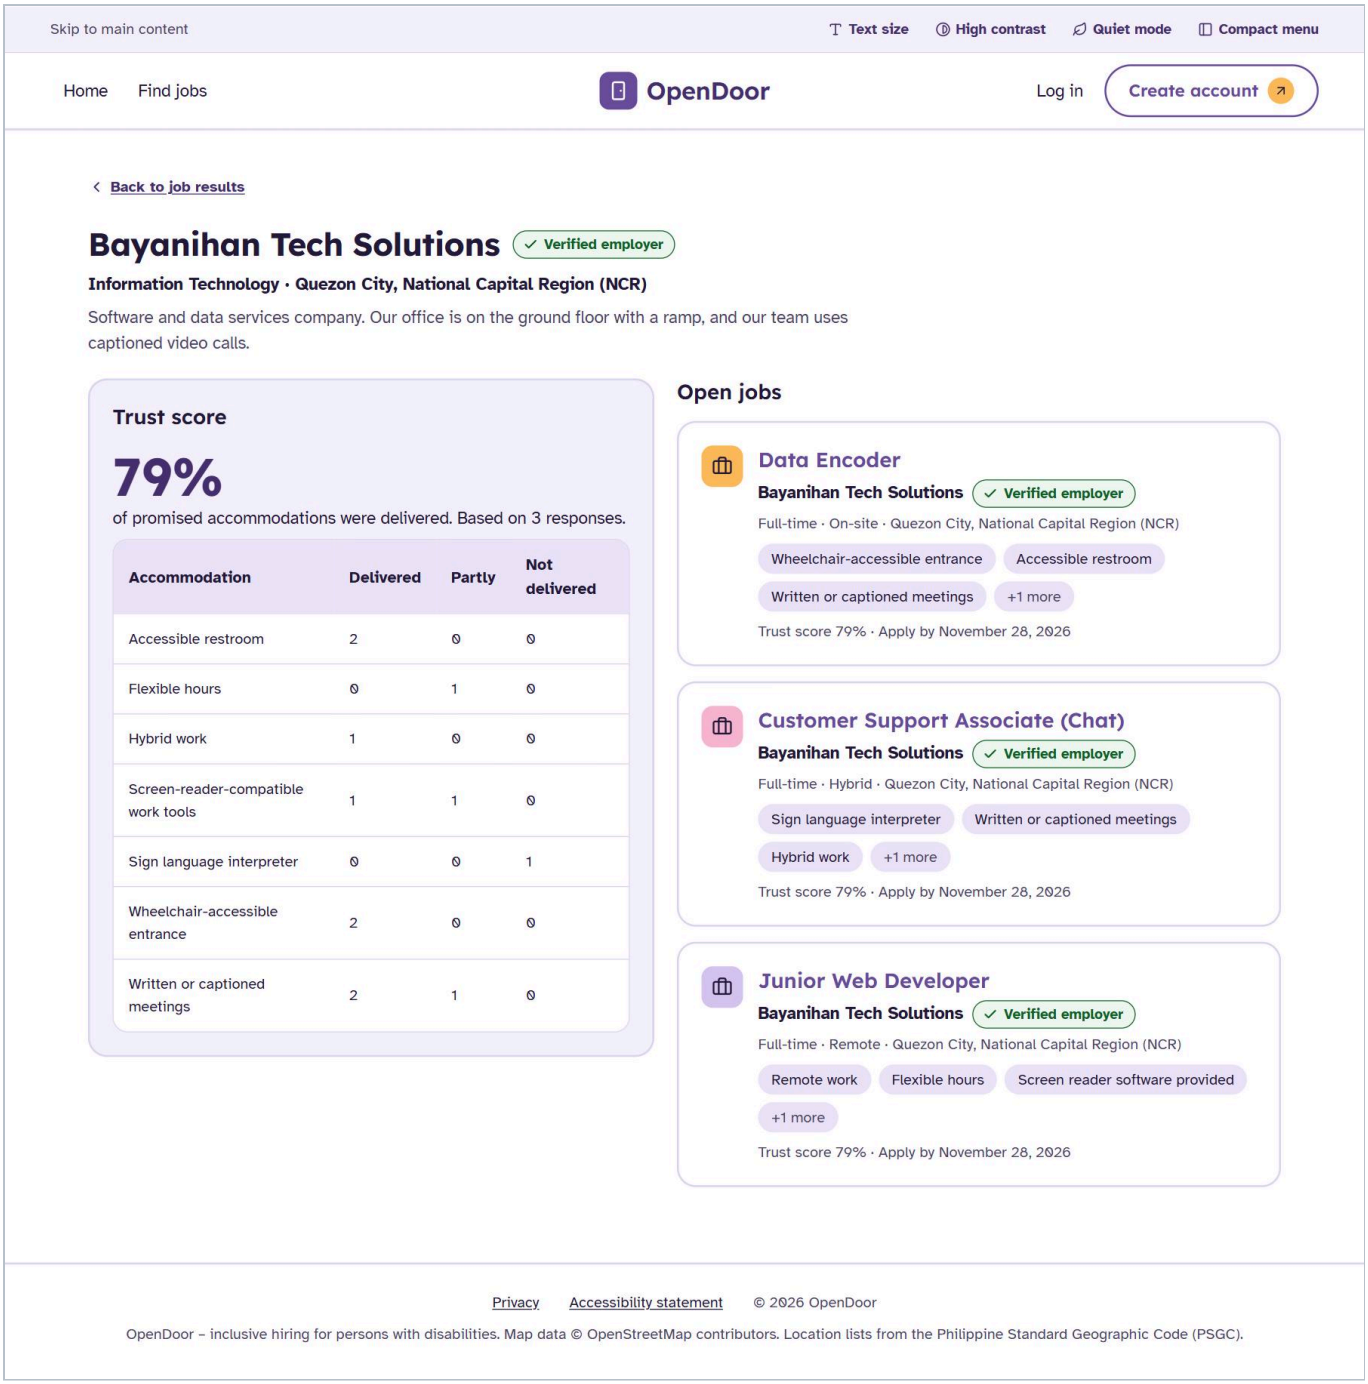

MESSAGES AND STATES

- No jobs: "No open jobs right now"
- Unpublished score: "Not published yet. A score appears after 3 hired employees have rated this employer (2 of 3 so far)."
- A wide table scrolls inside its box instead of widening the page

API

`GET /employers/{id}`

`GET /employers/{id}/trust-score`

Screenshot `/employers/1`

3.5 Log in

Route	`/login`
Who	Guests (signed-in users are sent to their dashboard)
Purpose	Sign in with email and password.

ON THE SCREEN

- Subtitle "Use your email and password."
- Card: Email address (required), Password (required), "Show password" checkbox and "Forgot your password?" NEW on one row, full-width "Log in" ("Logging in…" while busy), "New to OpenDoor? Create an account"

ACTIONS

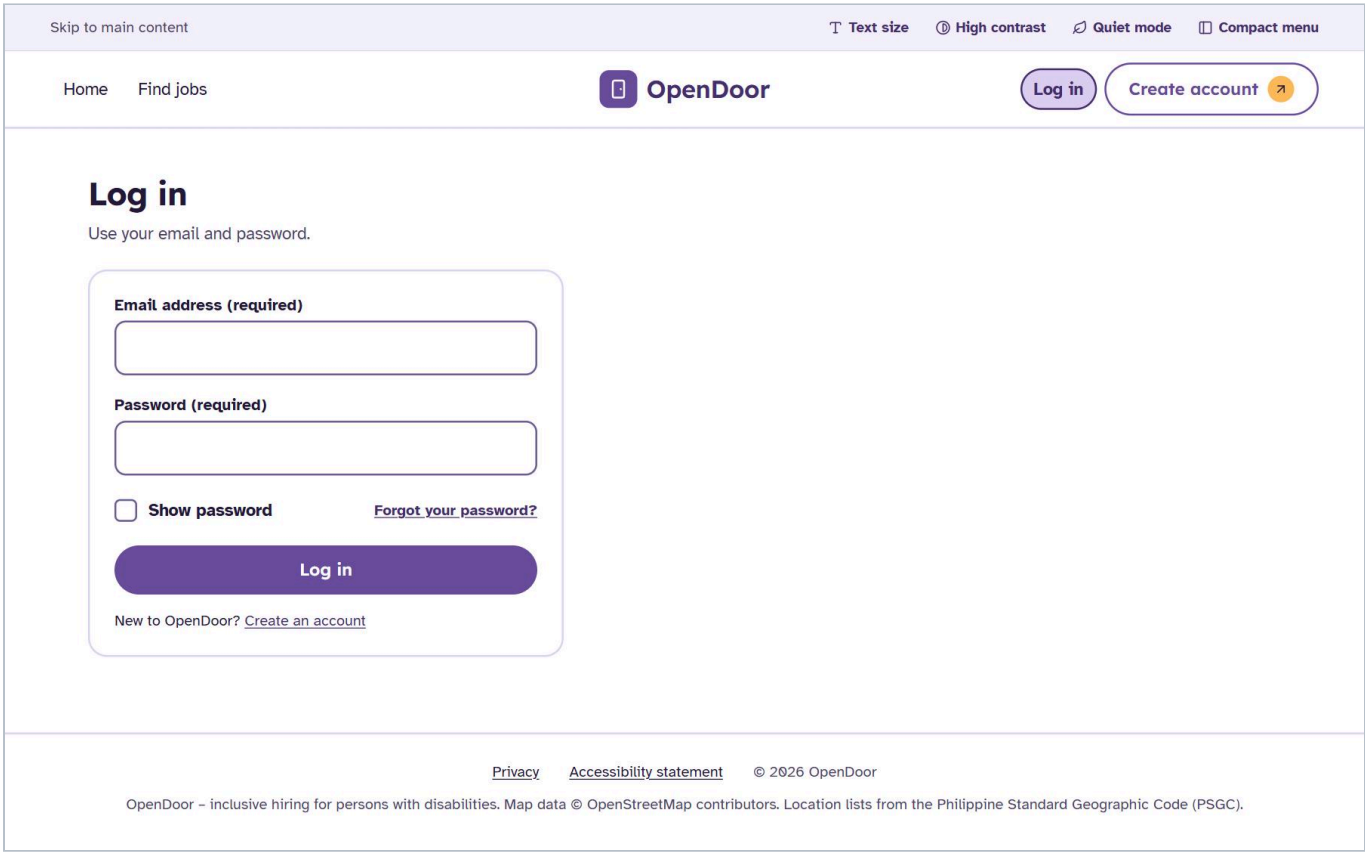

- Log in → the role's dashboard, or back to the page the user was sent from (only inside their own portal)
- Forgot your password? → 3.6

MESSAGES AND STATES

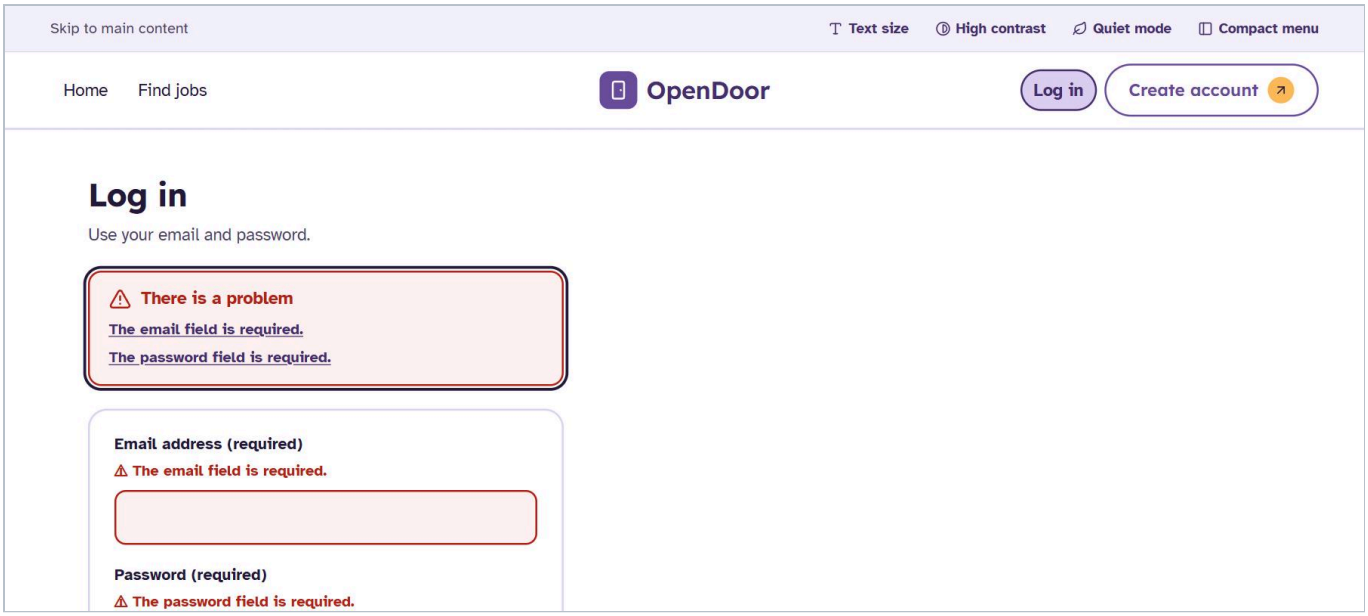

- "Your session has ended – Please log in again to continue." (expired token)
- After a password reset: success "Your password is changed – Log in with your new password."
- Wrong email or password: error under Email
- "Your account is suspended – Please contact the OpenDoor administrator…"
- "Too many login attempts – For your security, please wait one minute and try again." (5 per minute)

API

`POST /login`

Screenshot `/login`

After "Log in" with empty fields: error summary and field errors `/login`

3.6 Forgot password NEW

Route	`/forgot-password`
Who	Guests
Purpose	Ask for a link to choose a new password, without revealing whether an email has an account.

ON THE SCREEN

- h1 "Reset your password", subtitle "Enter the email address of your OpenDoor account. We will send you a link to choose a new password."
- Card: Email address (required), "Send reset link" ("Sending…"), "Remembered it? Back to log in"

ACTIONS

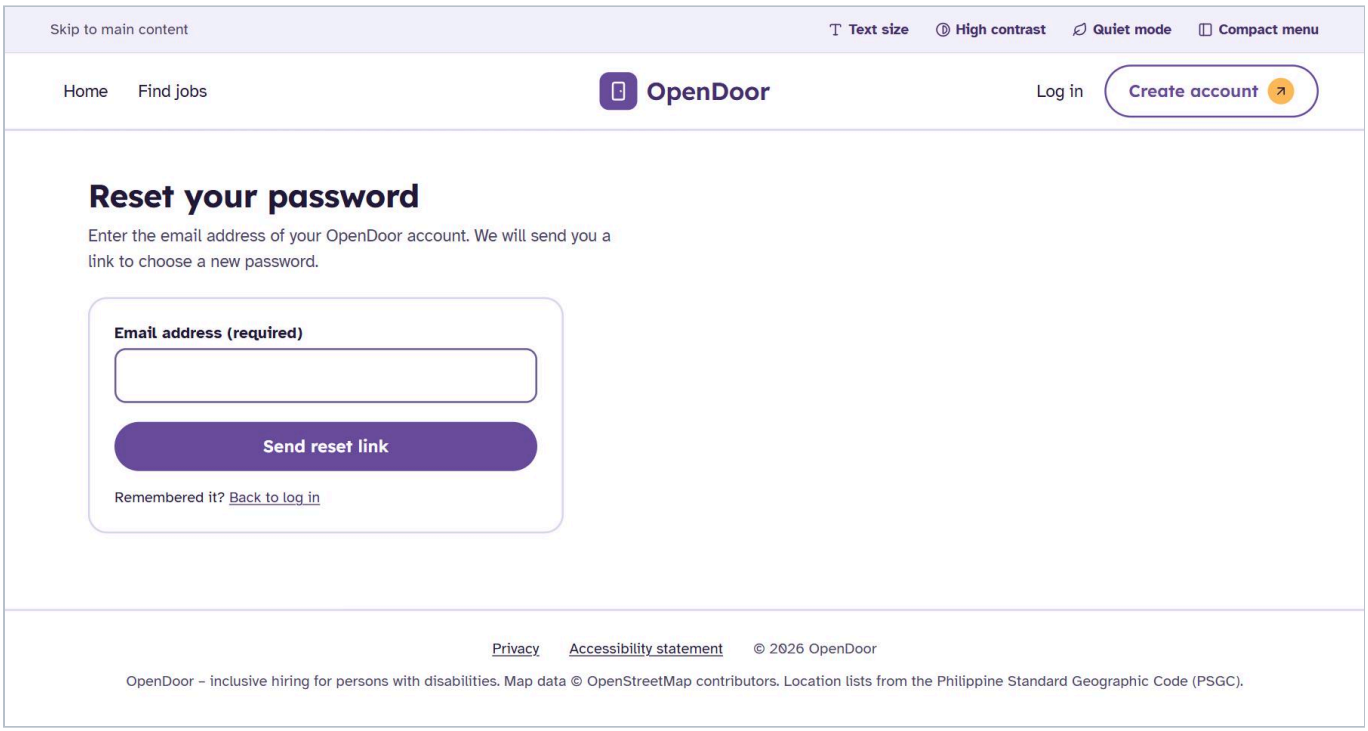

- Send reset link → "Check your email – If an OpenDoor account exists for {email}, we sent it a link to choose a new password. The link works for 60 minutes." with "Back to log in" and "Send another link"
- The email ("Reset your OpenDoor password", button "Choose a new password") goes only to active accounts and also when notification emails are turned off

MESSAGES AND STATES

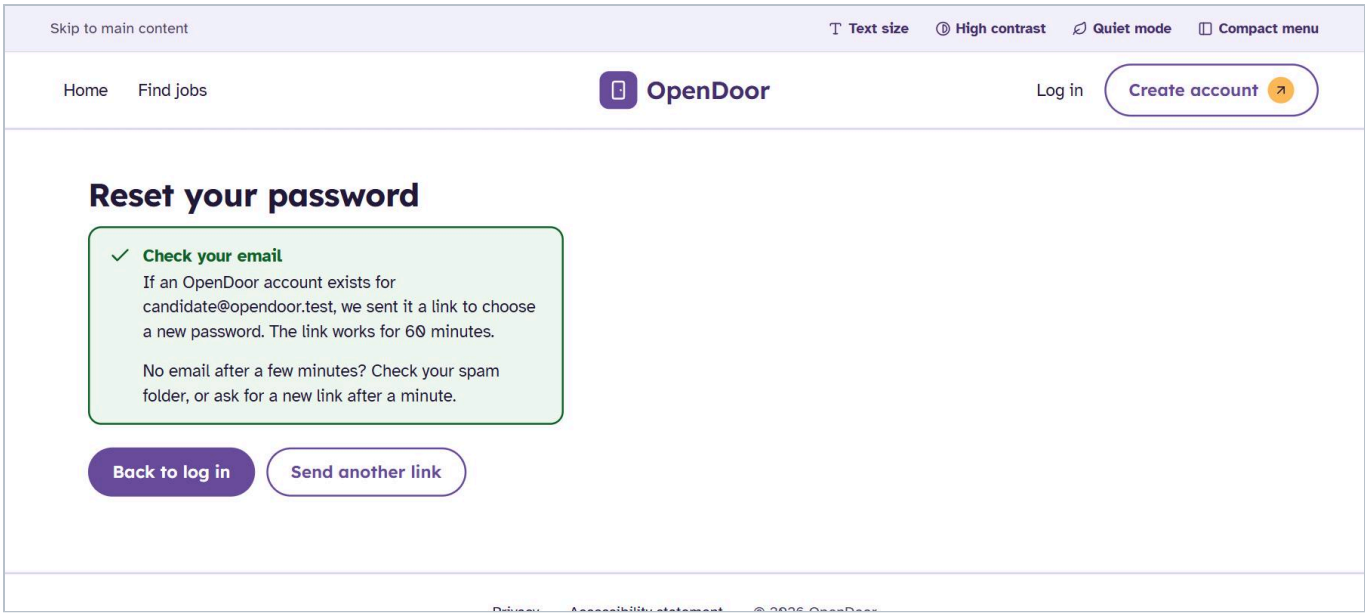

- Wrong email format: error summary linked to the field
- "Too many requests – For your security, please wait one minute and try again." (5 per minute)
- One new link per account per minute; the link works once, for 60 minutes

API

`POST /forgot-password {email} → always 200 with the same message`

Screenshot `/forgot-password`

After "Send reset link": the same answer for every email `/forgot-password`

3.7 Reset password NEW

Route	`/reset-password?token=…&email=…`
Who	Guests (opened from the email)
Purpose	Choose a new password with the emailed link.

ON THE SCREEN

- h1 "Choose a new password", subtitle "… You will be signed out on all devices."
- Card: Email address (filled in from the link), New password ("At least 8 characters."), Confirm new password, "Show passwords", "Save new password" ("Saving…")

ACTIONS

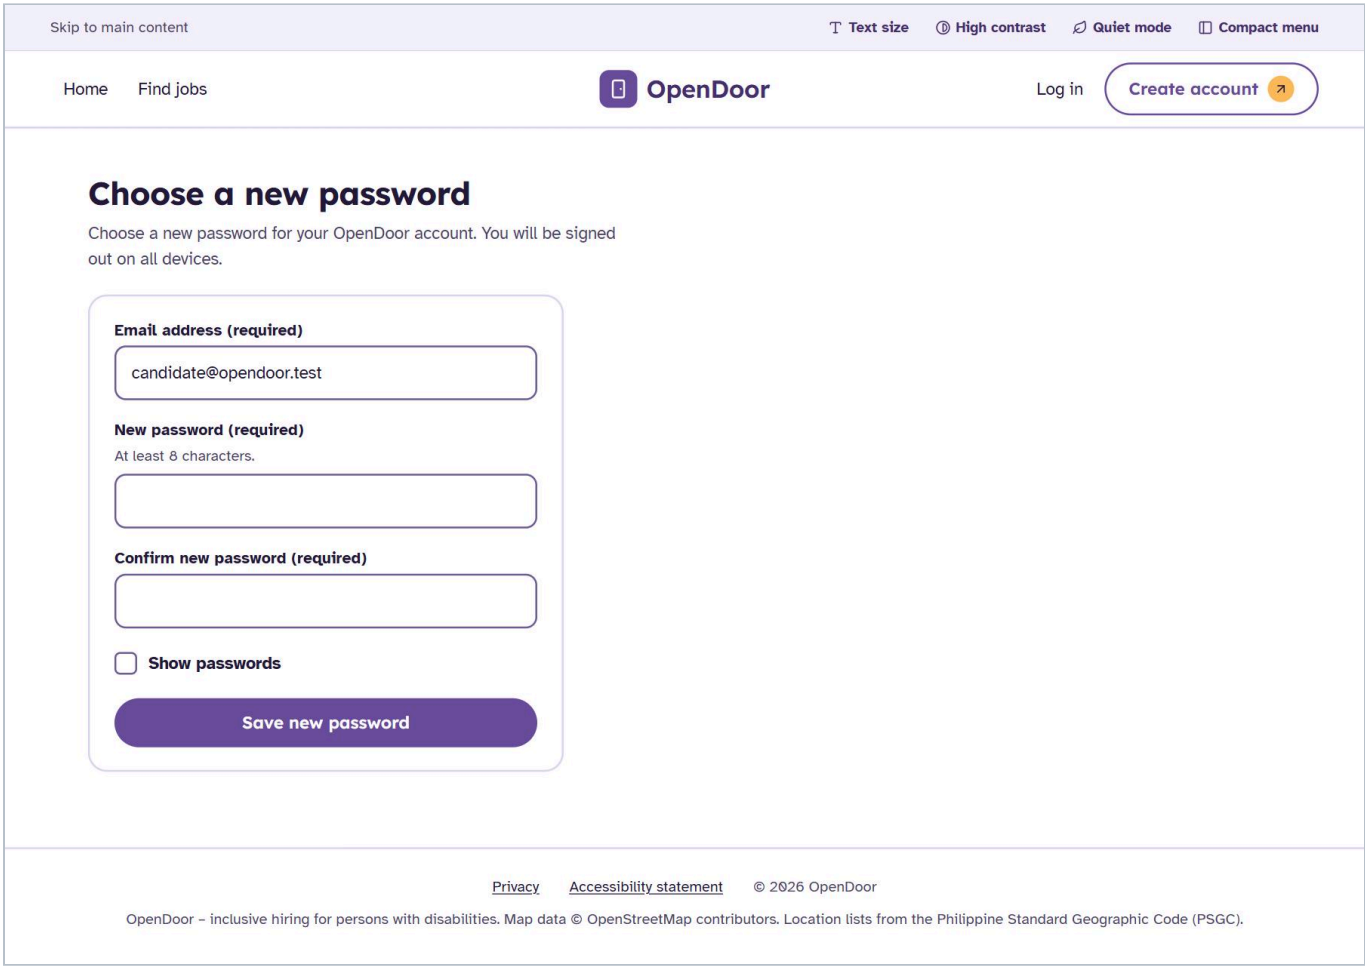

- Save → back to Log in with "Your password is changed – Log in with your new password."; every device is signed out

MESSAGES AND STATES

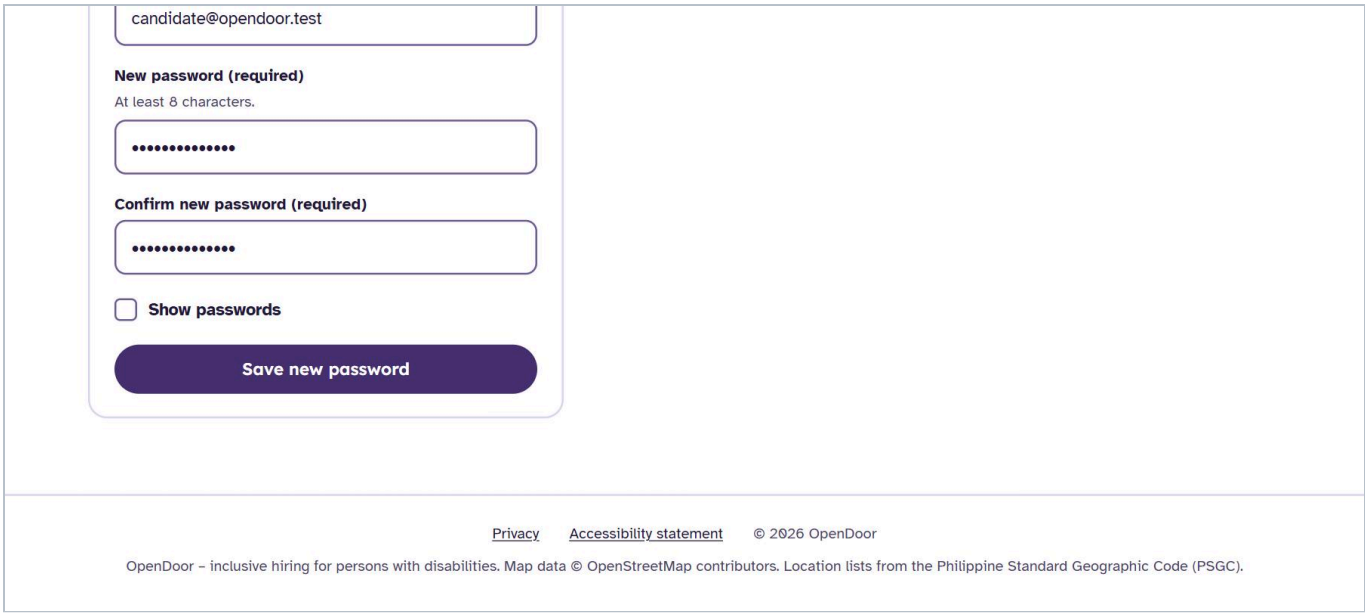

- Used, expired or wrong link: "This link cannot be used – This reset link is invalid or has expired. Ask for a new one." with a link "Ask for a new link"
- Link without a token: "This link is incomplete – Open the link from the email again, or ask for a new link."
- Weak or mismatched password: error summary linked to the field

API

```
POST /reset-password {token, email, password, password_confirmation}
```

Opened from the emailed link `/reset-password?token=example-token&email=candidate%40opendoor.test`

A used or expired link `/reset-password?token=example-token&email=candidate%40opendoor.test`

3.8 Create account (3 steps)

Route	`/register`
Who	Guests
Purpose	Create a job seeker or employer account with data-privacy consent.

ON THE SCREEN

- h2 "Step n of 3 · …" with progress bars; the subtitle changes per step ("Three short steps.", "Tell us how to reach you.", "Almost done.")
- Step 1 "Your role": "What brings you to OpenDoor?" as two whole-card choices – "I am looking for a job" ("Find postings that offer the accommodations you need.") / "I am hiring" ("Post jobs and show the accommodations your workplace provides.")
- Step 2 "Your details": Full name, Email address ("We never share it."), Password ("At least 8 characters."), Confirm password, "Show password"
- Step 3 "Privacy and consent": card "Your privacy" (needs used only for matching, seen by employers only when you apply, disability type optional and never used for matching – "This follows the Data Privacy Act of 2012 (RA 10173).") and the checkbox "I agree that OpenDoor may process my personal data as described above."
- Buttons "Back", "Next", and on the last step "Create account" ("Creating account…"); "Already have an account? Log in" on step 1

ACTIONS

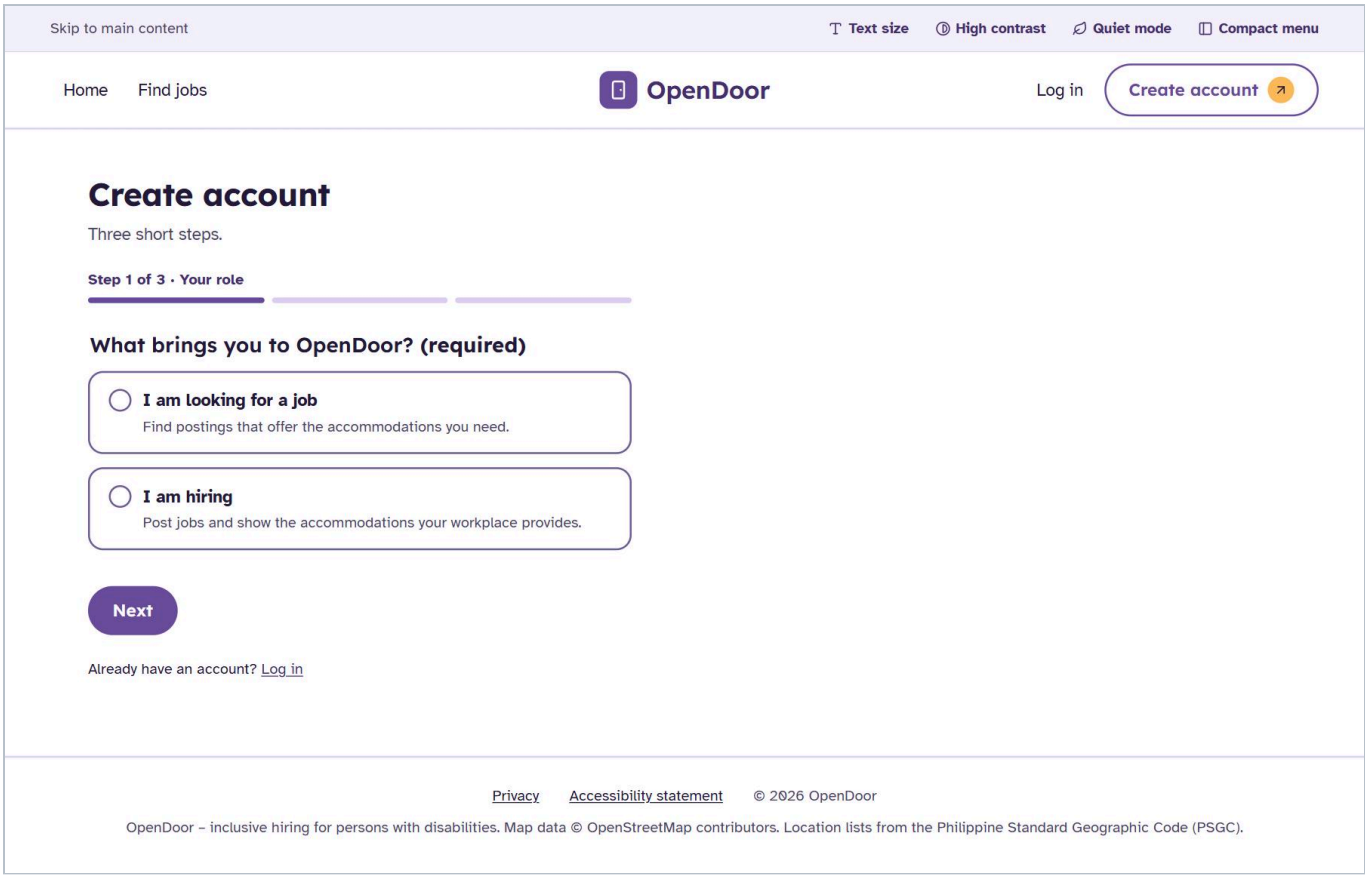

- Create account → job seekers go to Profile and needs, employers to Company profile, each with a "Welcome to OpenDoor" message

MESSAGES AND STATES

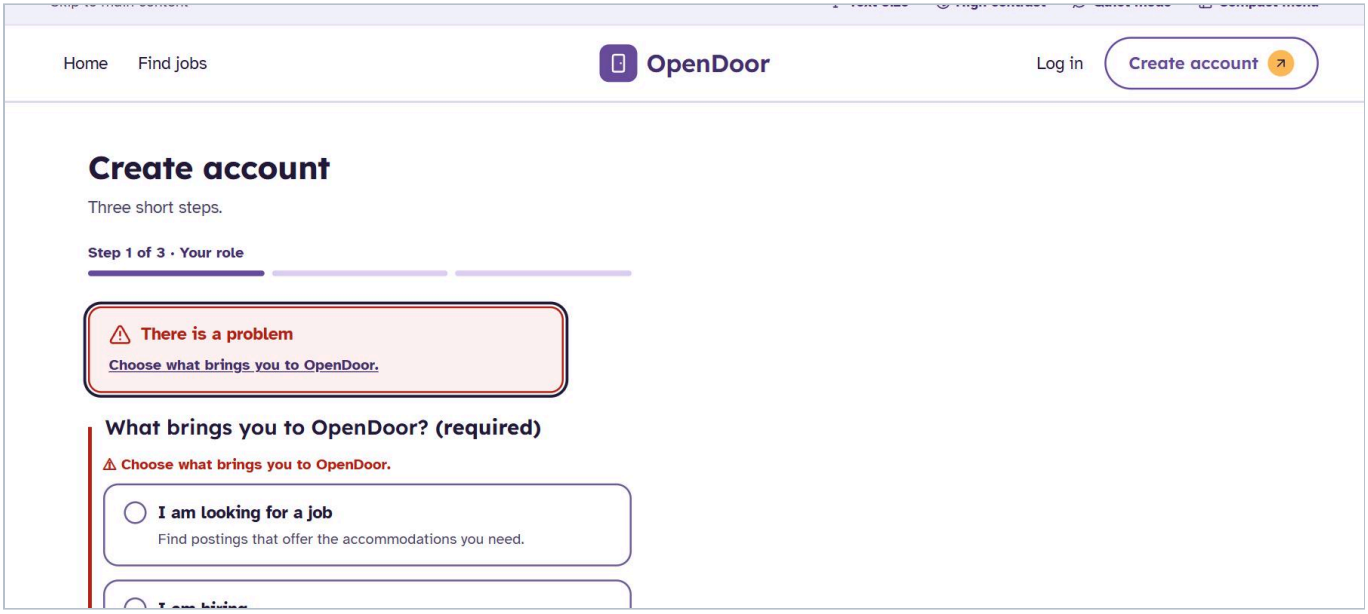

- Each step shows only its own errors in an error summary
- Server errors (e.g. email already used) send the user back to the first step with an error
- Tab title "Create account (step n of 3) – OpenDoor"

API

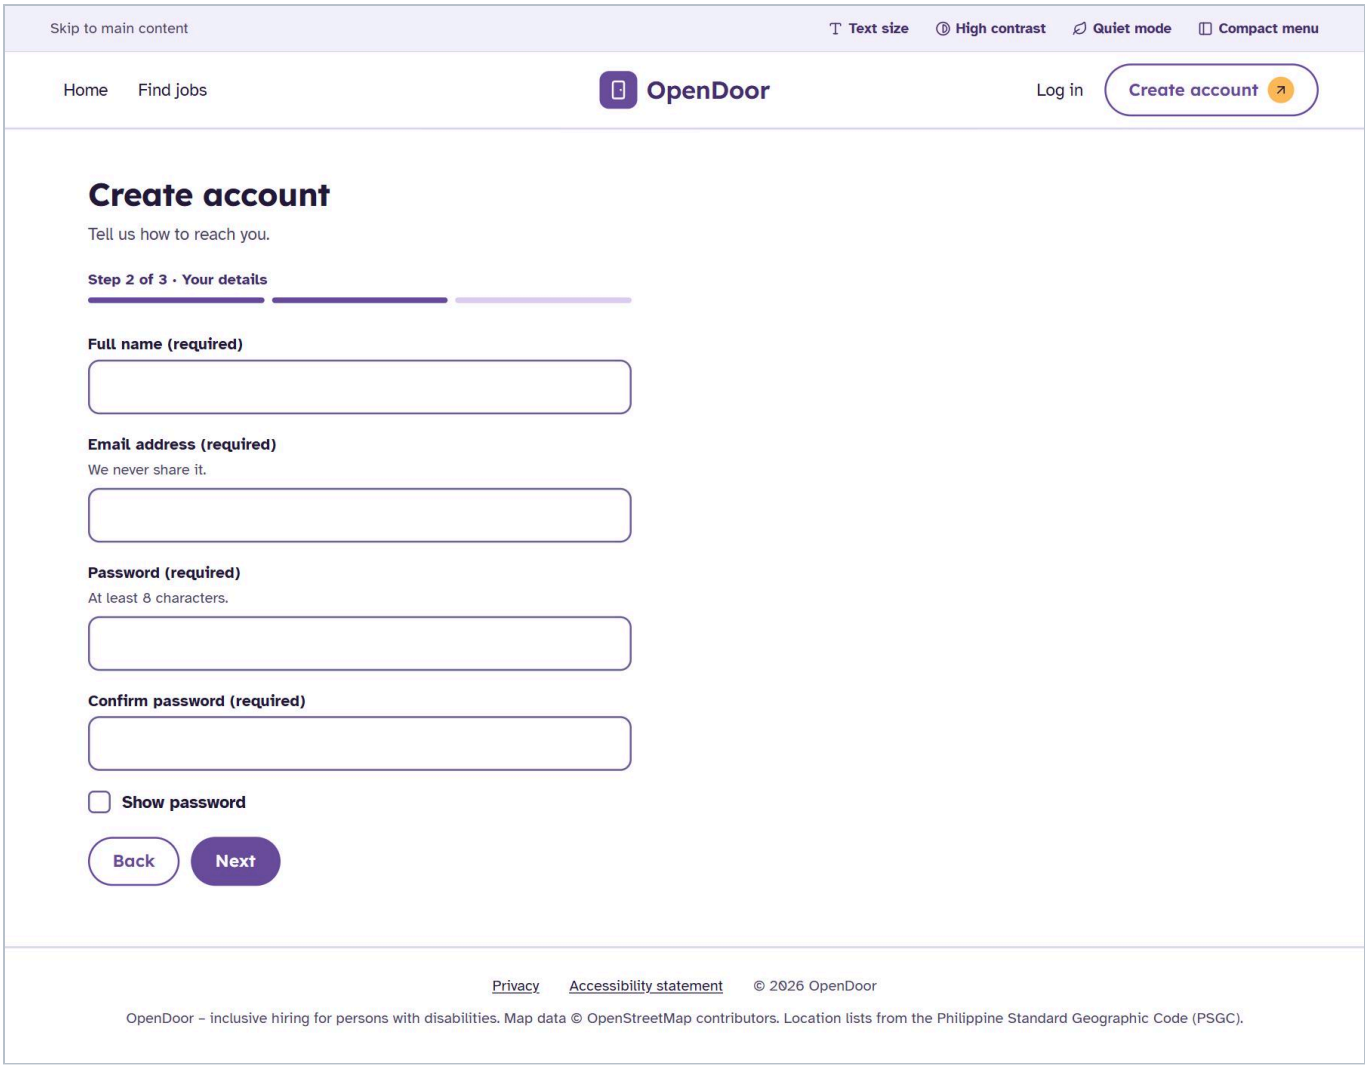

`POST /register (once, at the end)`

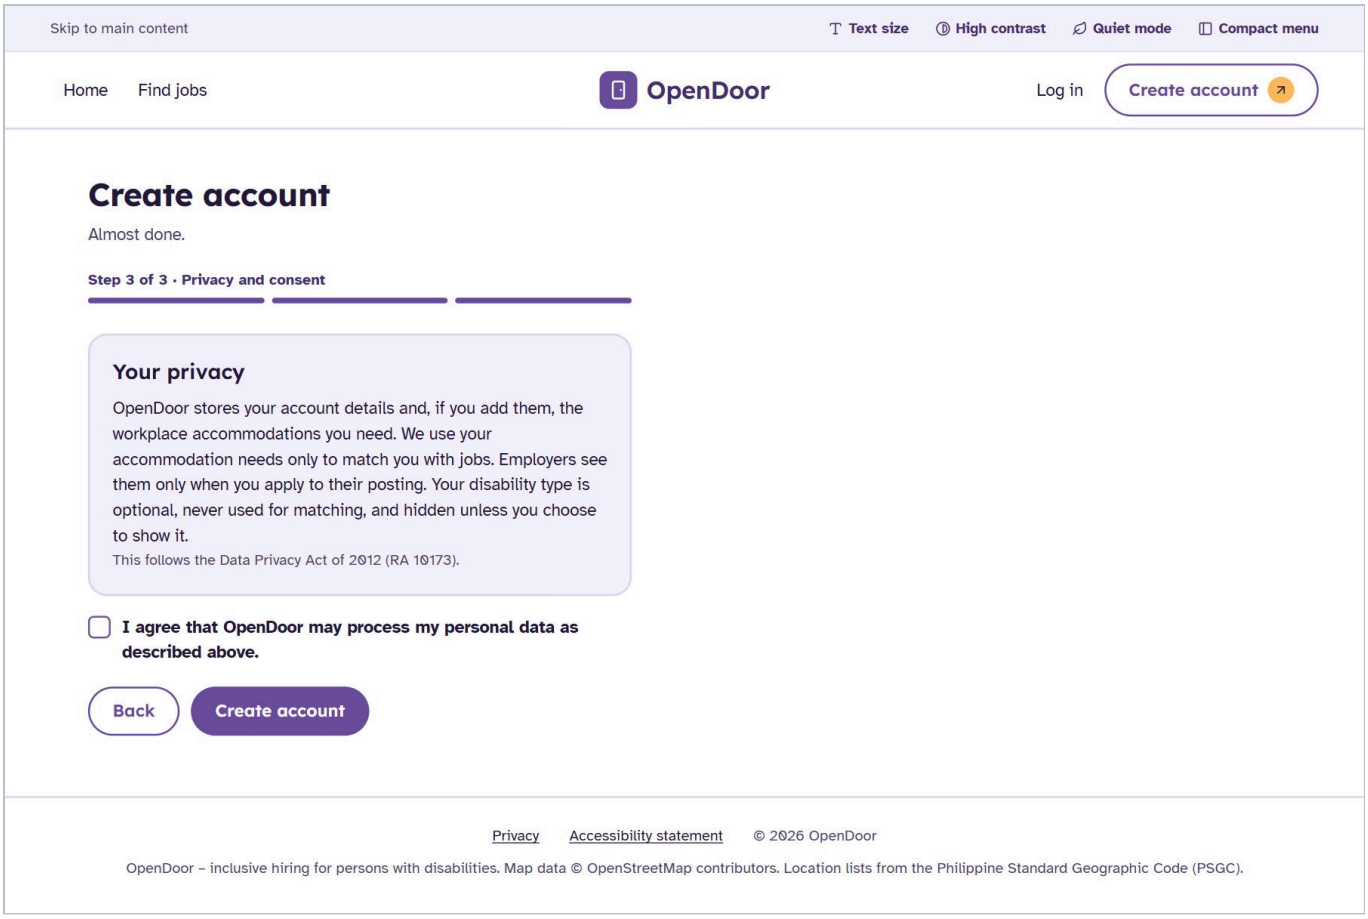

Step 1 · Your role `/register`

"Next" without a choice: the step is checked before moving on `/register`

Step 2 · Your details `/register`

Step 3 · Privacy and consent `/register`

3.9 Page not found

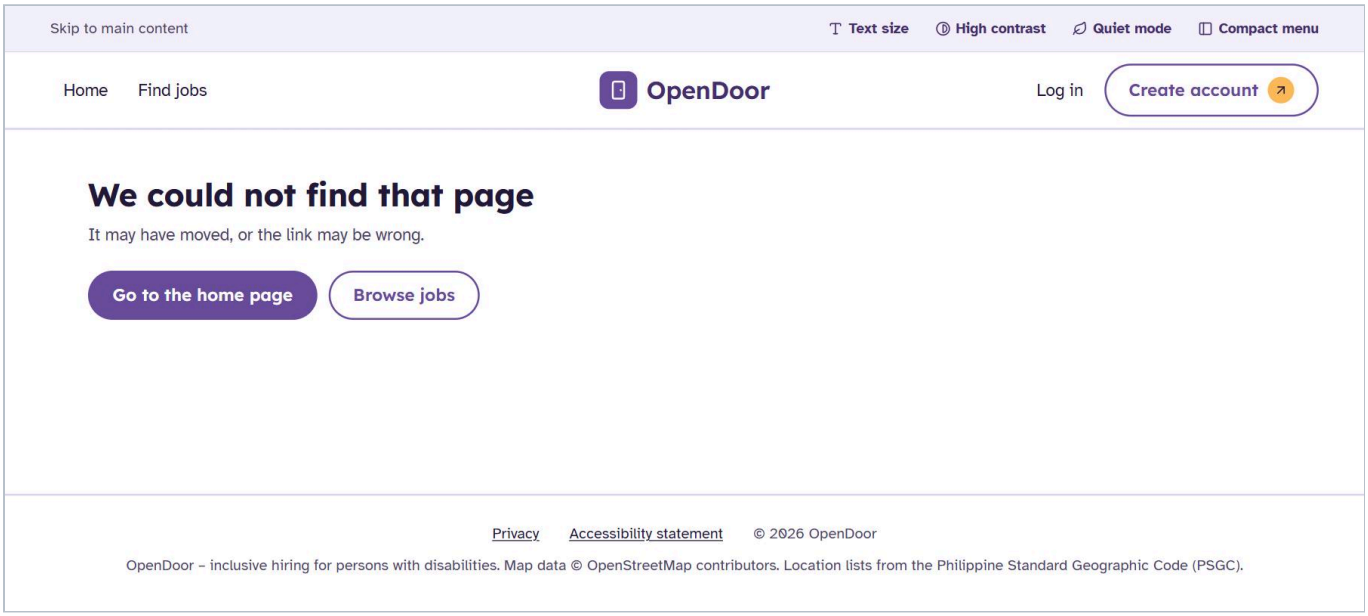

Route	`any unknown address`
Who	Everyone
Purpose	Friendly 404.

ON THE SCREEN

- h1 "We could not find that page", subtitle "It may have moved, or the link may be wrong."
- Buttons "Go to the home page" (the role's dashboard when signed in) and "Browse jobs"

MESSAGES AND STATES

- Tab title "Page not found – OpenDoor"

Screenshot `/no-such-page`

3.10 Privacy NEW

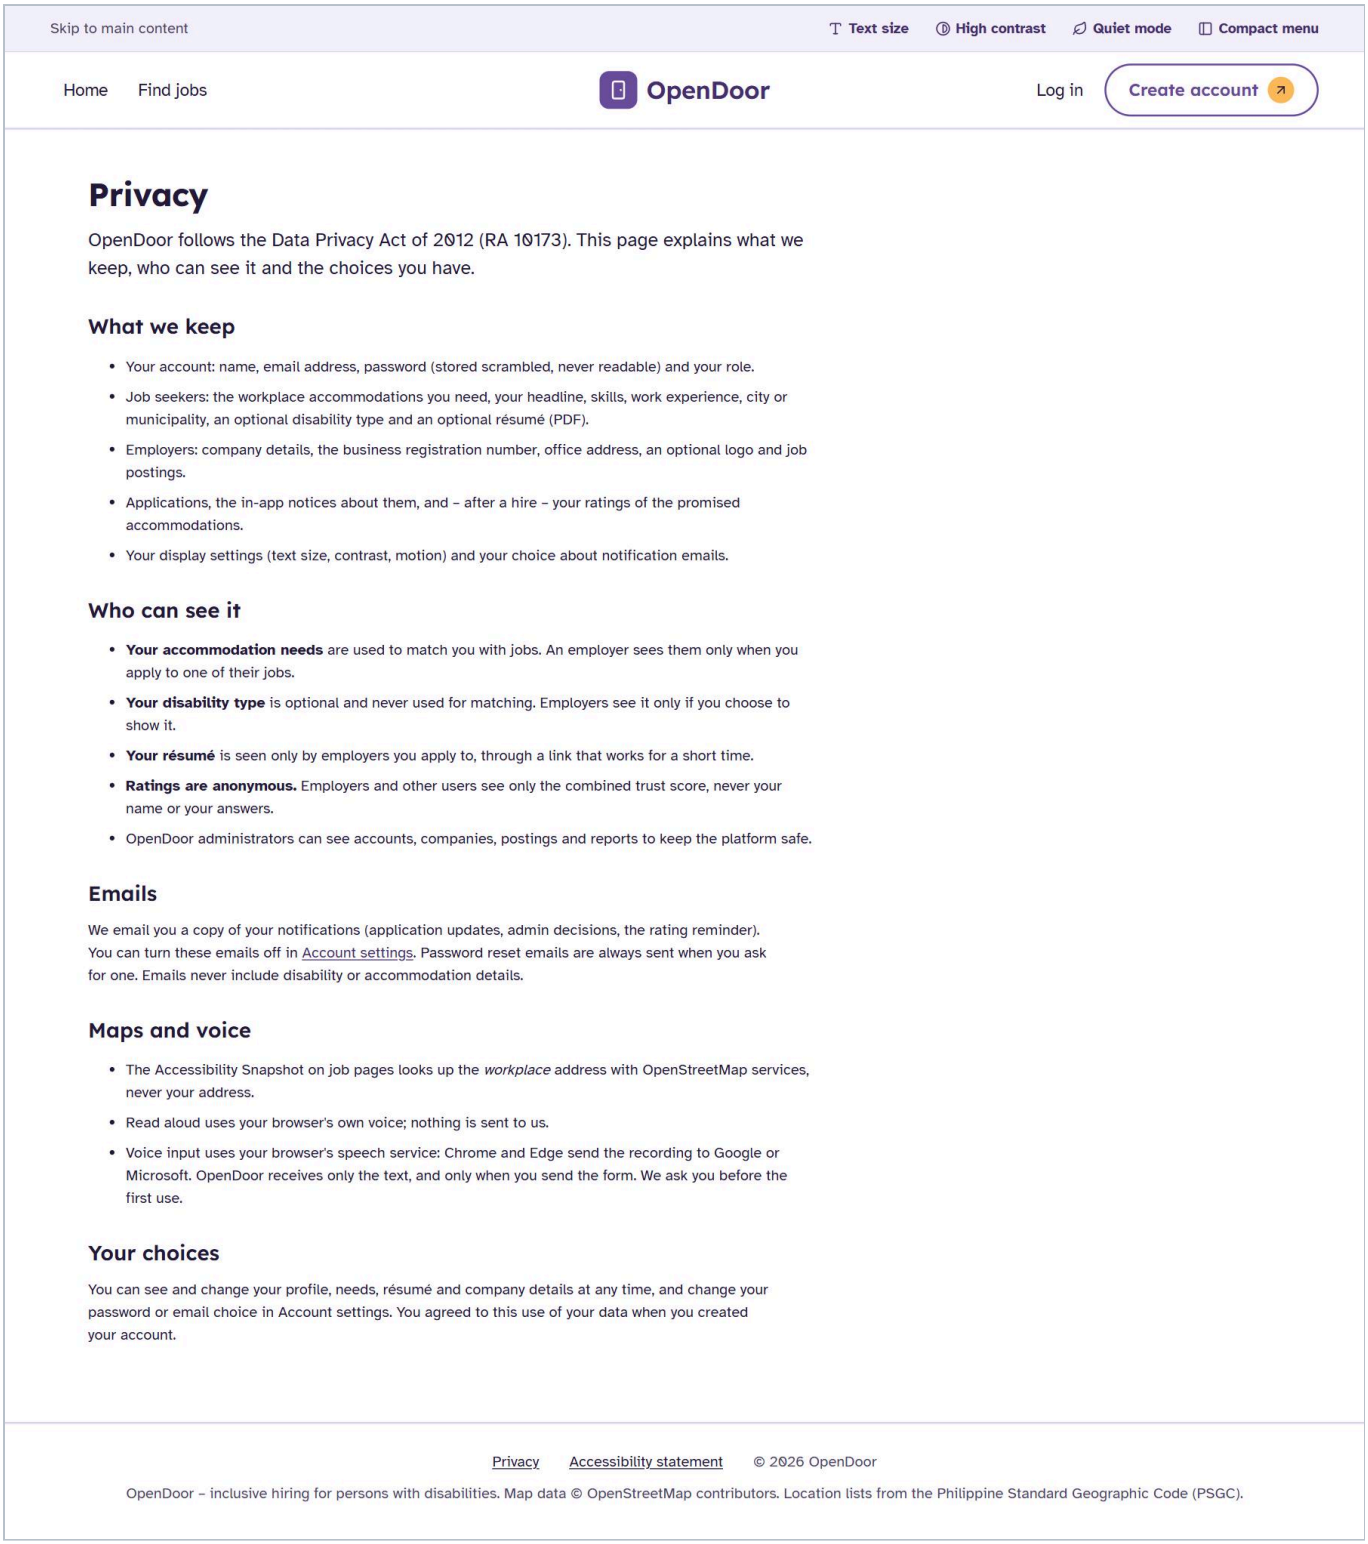

Route	`/privacy`
Who	Everyone (footer link)
Purpose	Plain-language privacy notice under the Data Privacy Act of 2012 (RA 10173).

ON THE SCREEN

- Sections "What we keep", "Who can see it", "Emails", "Maps and voice", "Your choices"
- Facts from the running system only (e.g. needs are seen by employers only through an application; Read aloud uses the browser's own voice)

ACTIONS

- Link to Account settings (email choice)

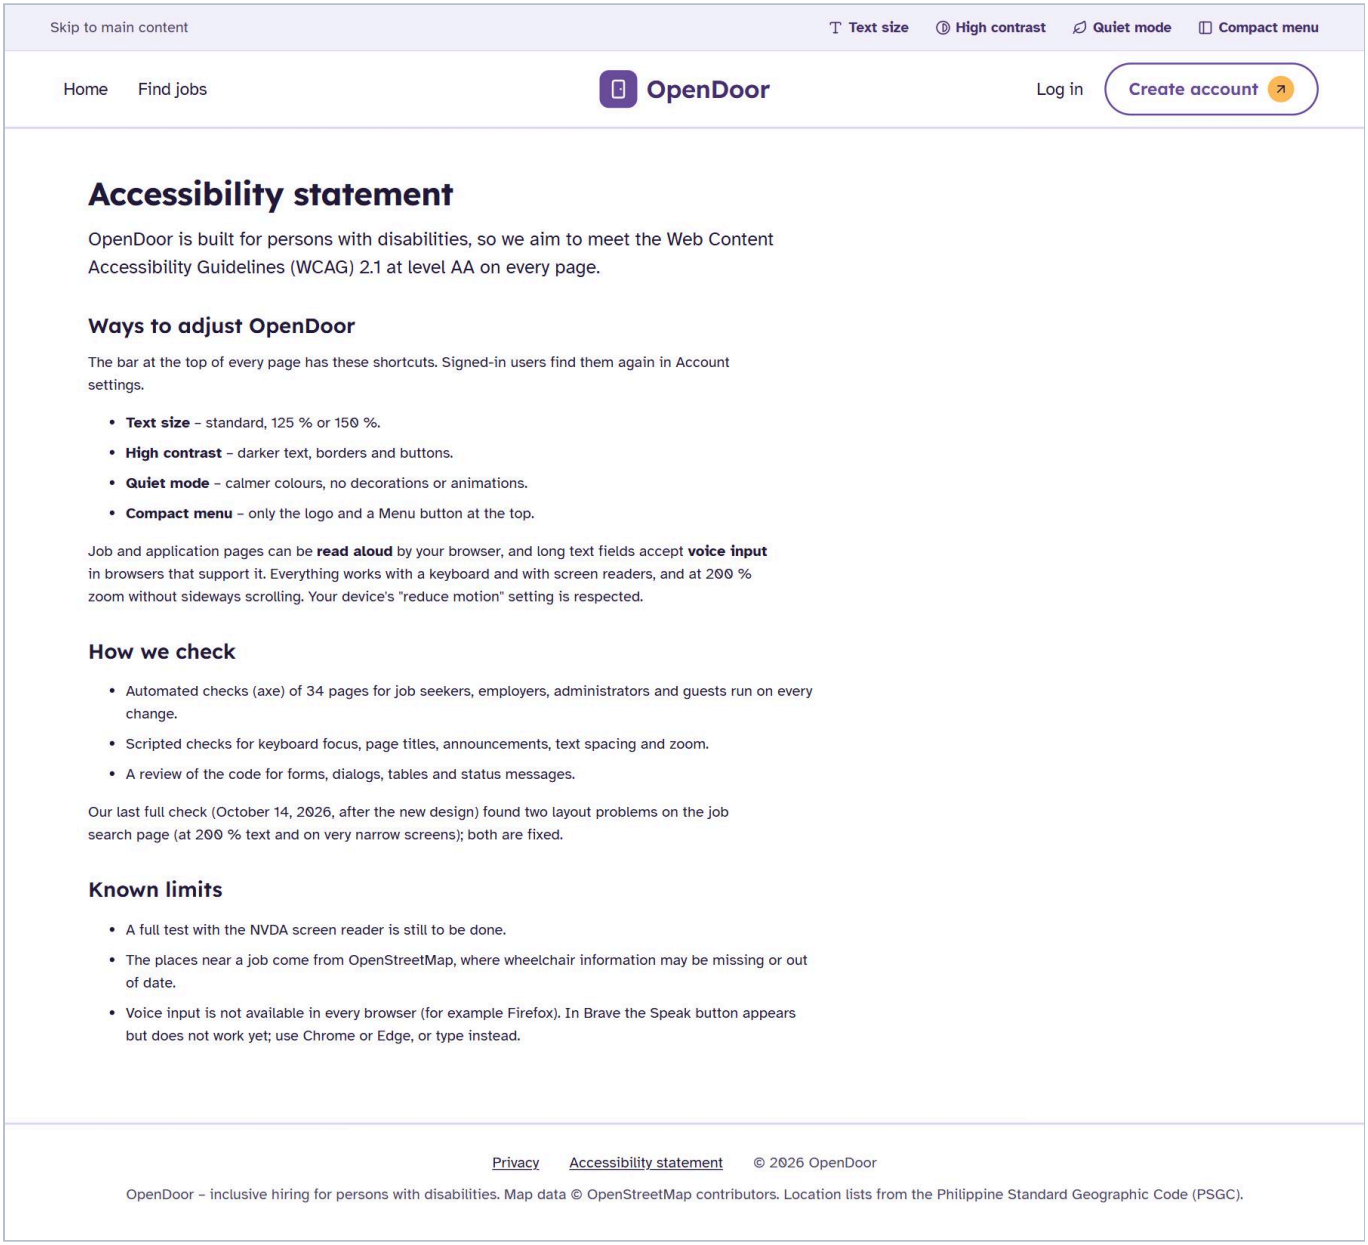

Screenshot `/privacy`

3.11 Accessibility statement NEW

Route	`/accessibility`
Who	Everyone (footer link)
Purpose	States the WCAG 2.1 AA goal, the ways to adjust OpenDoor, how it is checked and the known limits.

ON THE SCREEN

- "Ways to adjust OpenDoor" – the four display-bar shortcuts, Read aloud and voice input
- "How we check" – automated axe checks of 33 pages, scripted checks, code review; date of the last full audit
- "Known limits" – NVDA screen-reader test still to do, OpenStreetMap data may be incomplete, voice input not in every browser

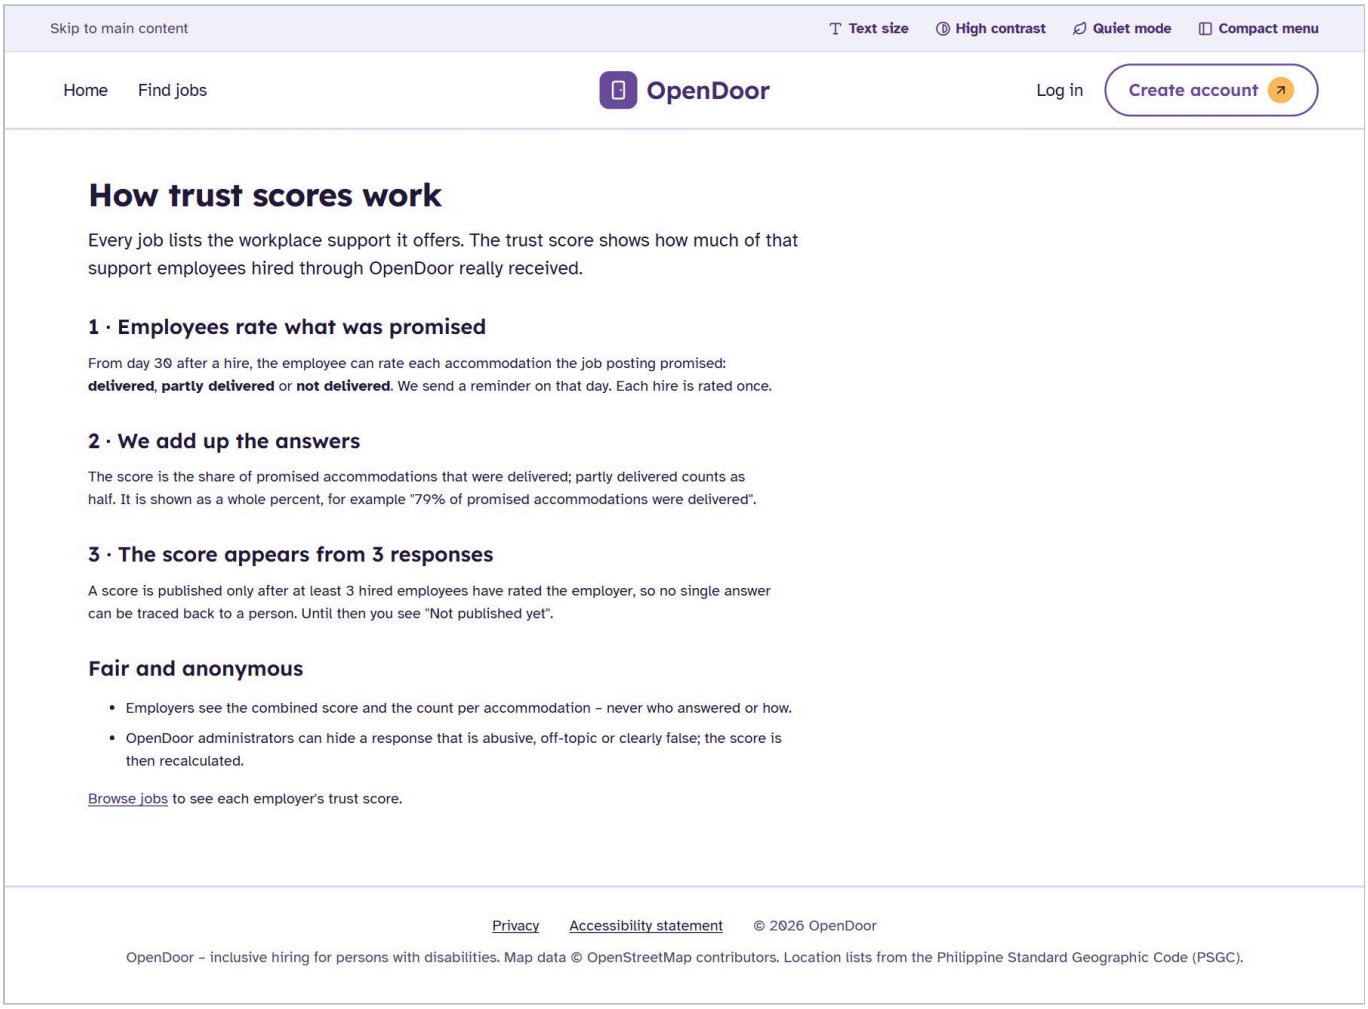

Screenshot `/accessibility`

3.12 How trust scores work NEW

Route	`/trust-scores`
Who	Everyone (linked from every trust score card and the home page)
Purpose	Explains the trust score in three steps.

ON THE SCREEN

- "1 · Employees rate what was promised" (from day 30, delivered / partly / not delivered, reminder, once per hire)
- "2 · We add up the answers" (partly counts as half, whole percent)
- "3 · The score appears from 3 responses"
- "Fair and anonymous"; link "Browse jobs"

Screenshot `/trust-scores`

4 Job seeker screens

Demo: Maria Santos (`candidate@opendoor.test`, needs saved) and Juan Dela Cruz (`candidate2@opendoor.test`, hired, can rate). Menu: Dashboard · Find jobs · Applications · Saved jobs | logo | Profile · Notifications · Account · Log out.

4.1 Dashboard

Route	`/candidate/dashboard`
Who	Job seeker
Purpose	Start page after login: where my applications stand and what to do next.

ON THE SCREEN

- h1 "Welcome, {name}", subtitle "Where your applications stand and what to do next."
- Left: tiles "Your applications" – Submitted, Reviewed, Hired, Not selected, Withdrawn, each with an icon and "View" (opens My applications filtered by that status)
- Right: "Jobs for you" (tinted card: "1 open job offers all the accommodations you need." + "See matching jobs"), "Your needs" (tags + "Change your needs"; without needs a prompt with "Add my needs"), "Ratings to give" ("Nothing to rate yet. You can rate 30 days after being hired.")
- When a rating is due, "Ratings to give" moves to the top as a tinted card per hire: "{job} at {company}" and "Rate the accommodations now"

ACTIONS

- Jump to filtered applications, matching jobs, profile or the feedback form

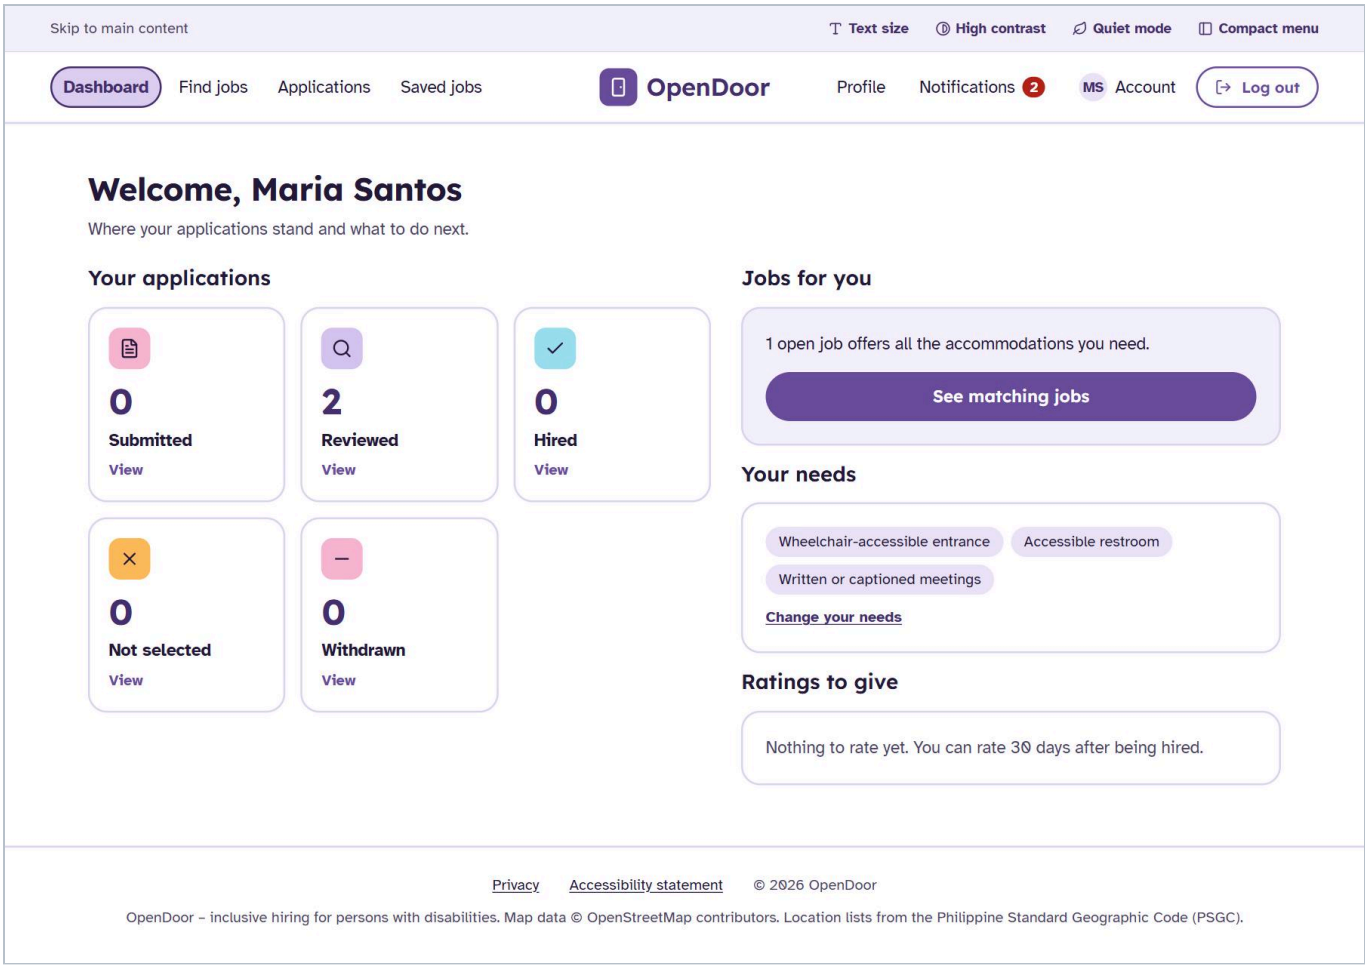

MESSAGES AND STATES

- "Loading your summary…"

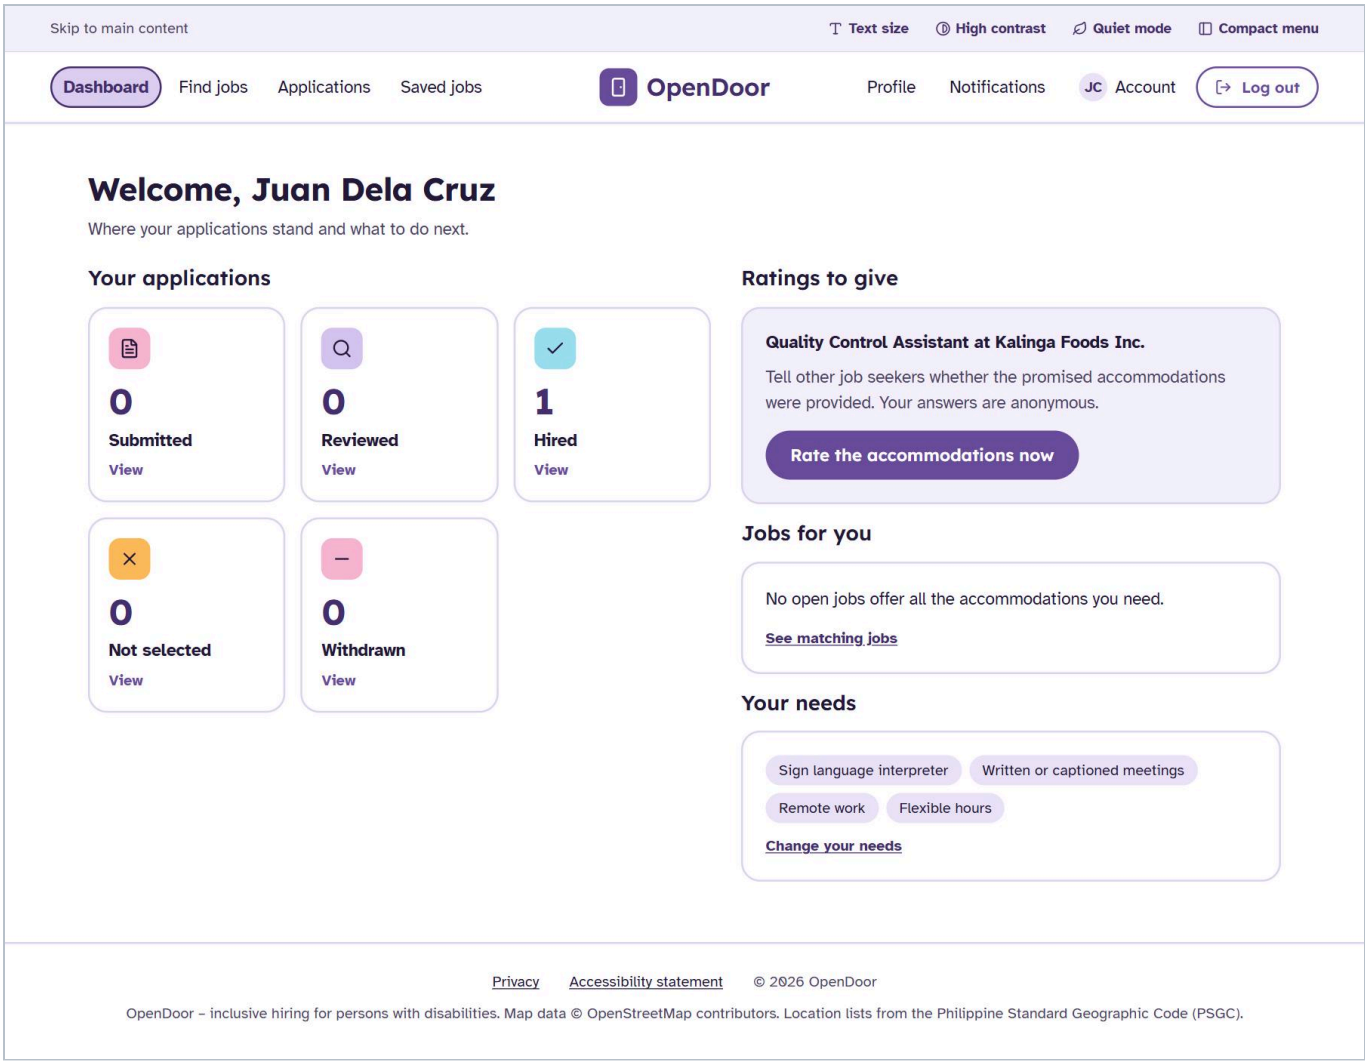

API

`GET /candidate/dashboard`

`GET /candidate/profile (needs)`

Screenshot `/candidate/dashboard`

A hired job seeker: "Ratings to give" comes first `/candidate/dashboard`

4.2 Profile and needs

Route	`/candidate/profile (?tab=about, ?tab=resume)`
Who	Job seeker
Purpose	The data used for matching and shown to employers when applying.

ON THE SCREEN

- Subtitle "Used only for matching. Employers see your needs only when you apply."; tabs "Accommodations you need", "About you", "Résumé"
- Accommodations you need: explanation, "Choose all that apply" with "3 selected." and the grouped checklist, "Save my needs"
- About you: Headline ("For example: Data encoder with 3 years of experience."), Skills ("Separate skills with commas."), Work experience (Speak), "Where you live" (saved place + "Change location"), box "Disability (optional)" ("You do not have to tell us. It is never used for matching…") with Disability type and – only when filled – "Show my disability type to employers I apply to"; "Save profile"
- Résumé: "View your current résumé (PDF, opens in a new tab)" or "You have not uploaded a résumé yet."; "Upload résumé" with a "Choose file" button ("PDF only, up to 5 MB."); "Upload"

ACTIONS

- Each tab saves on its own and confirms below its button ("Your needs are saved.", "Your profile is saved.", "Your résumé is uploaded.")

MESSAGES AND STATES

- First visit after registering: success "Welcome to OpenDoor – Start by choosing the accommodations you need…"
- Résumé checks before upload: "Choose a PDF file.", "The file is larger than 5 MB."

API

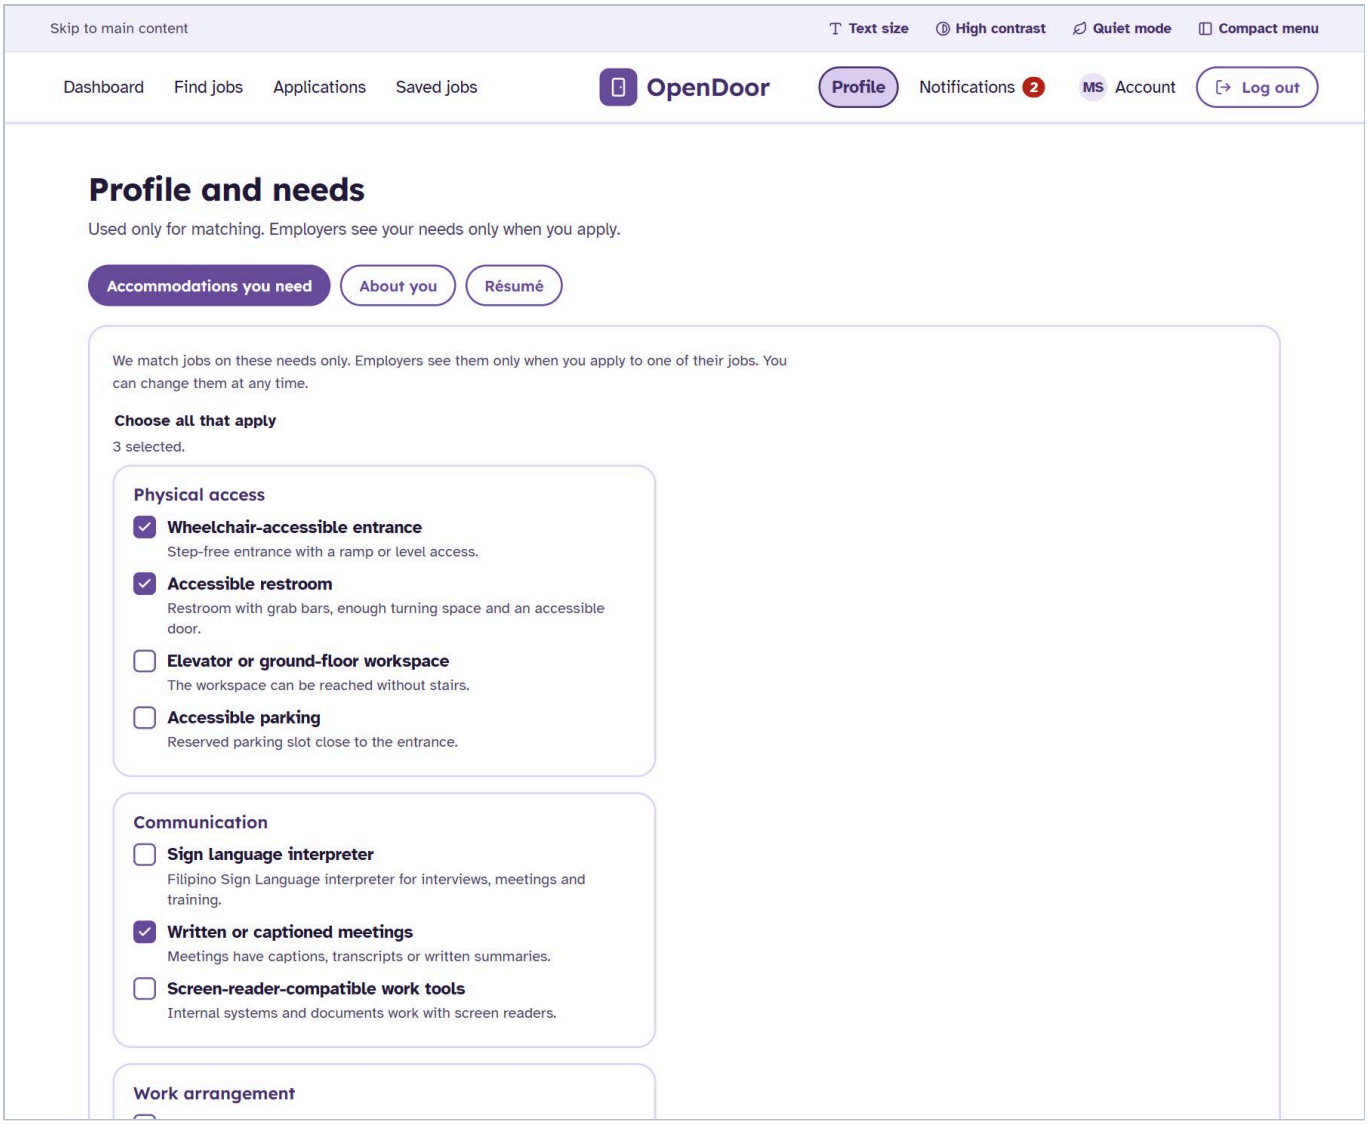

`GET, PUT /candidate/profile`

`PUT /candidate/accommodations {accommodation_ids}`

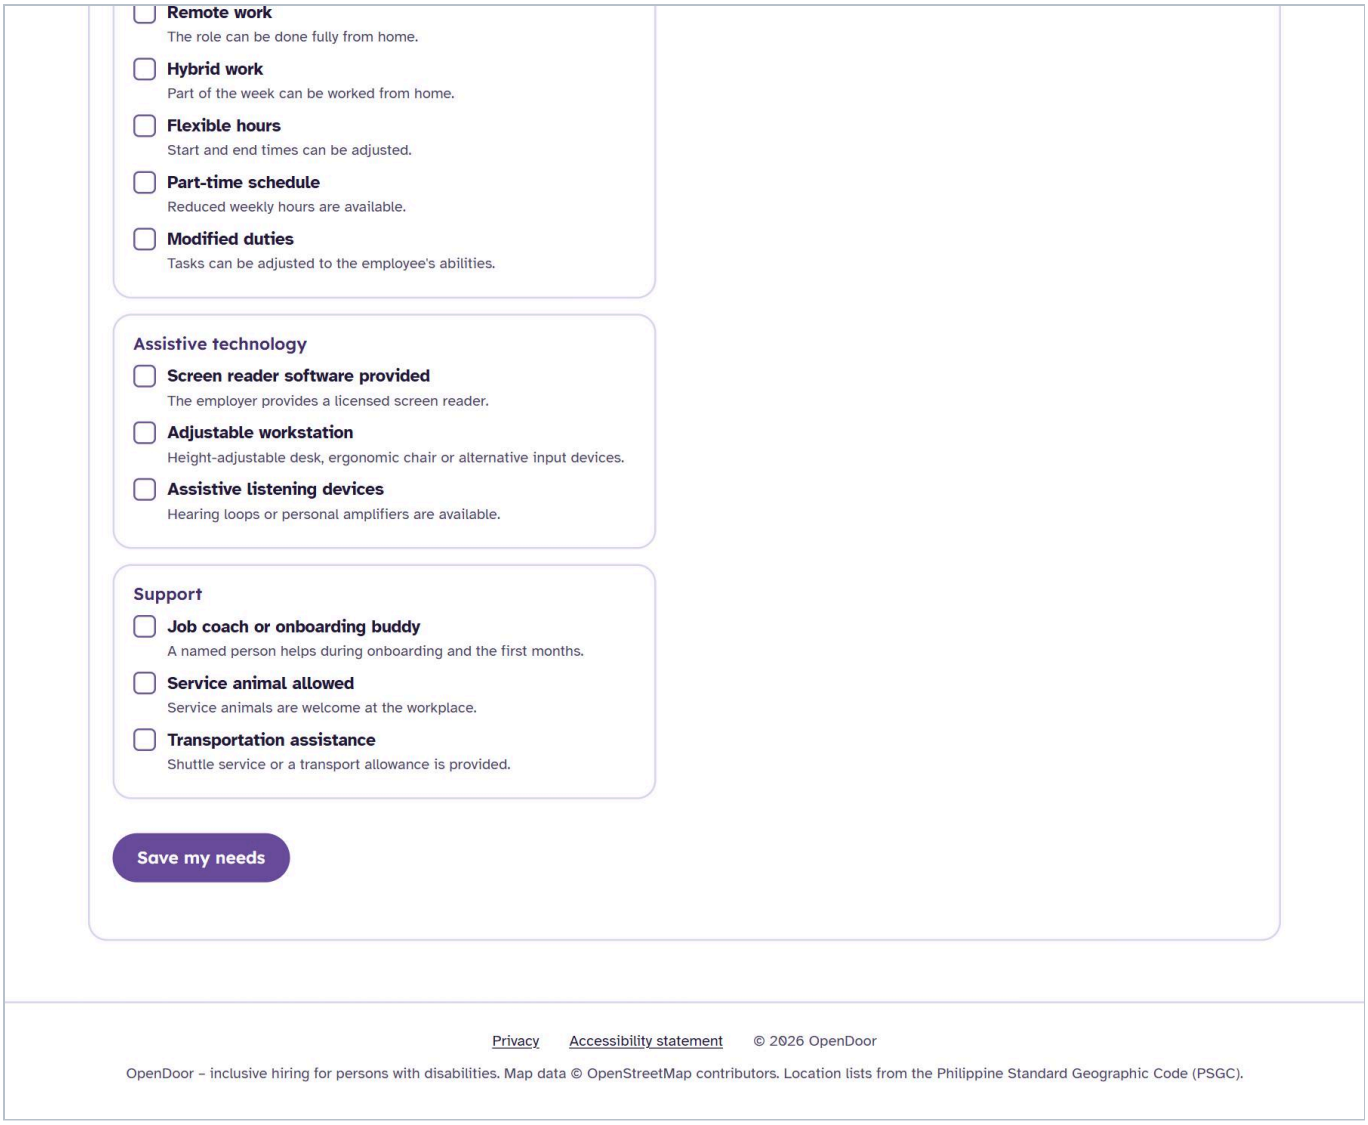

`POST /candidate/resume (multipart)`

`GET /accommodations`

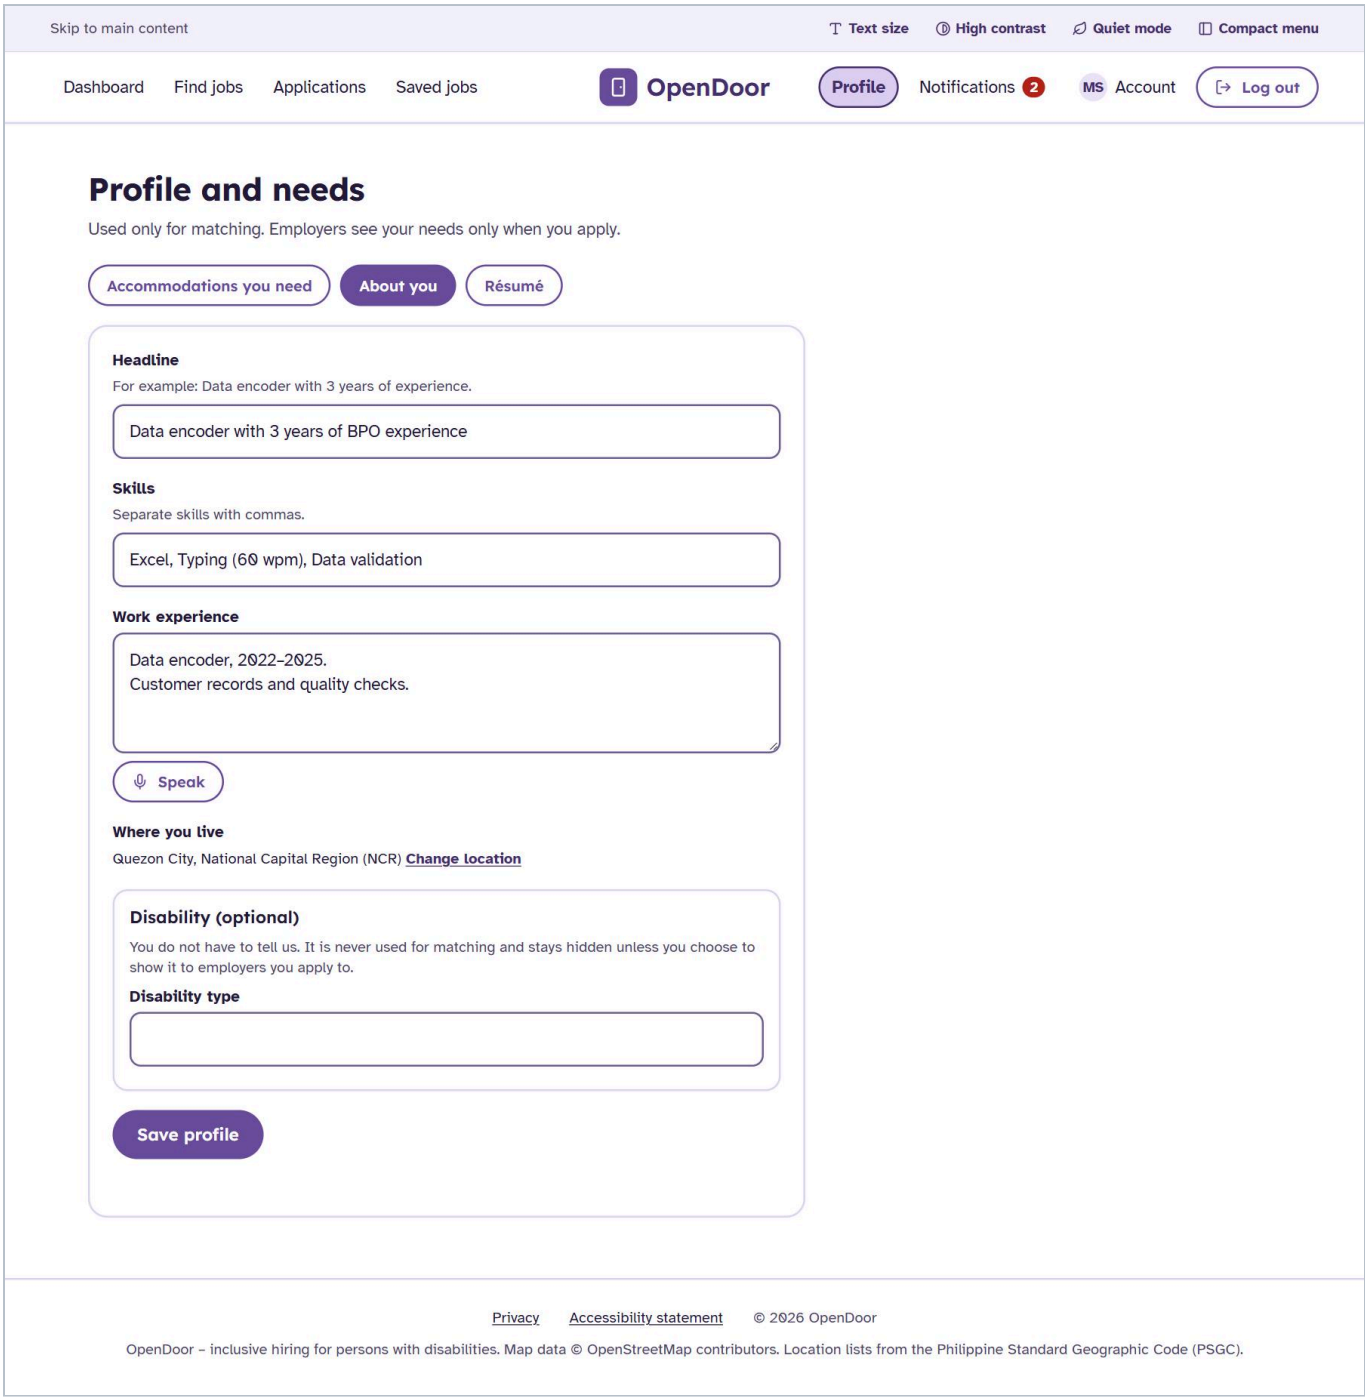

`GET /insights/locations/{regions|provinces|cities}`

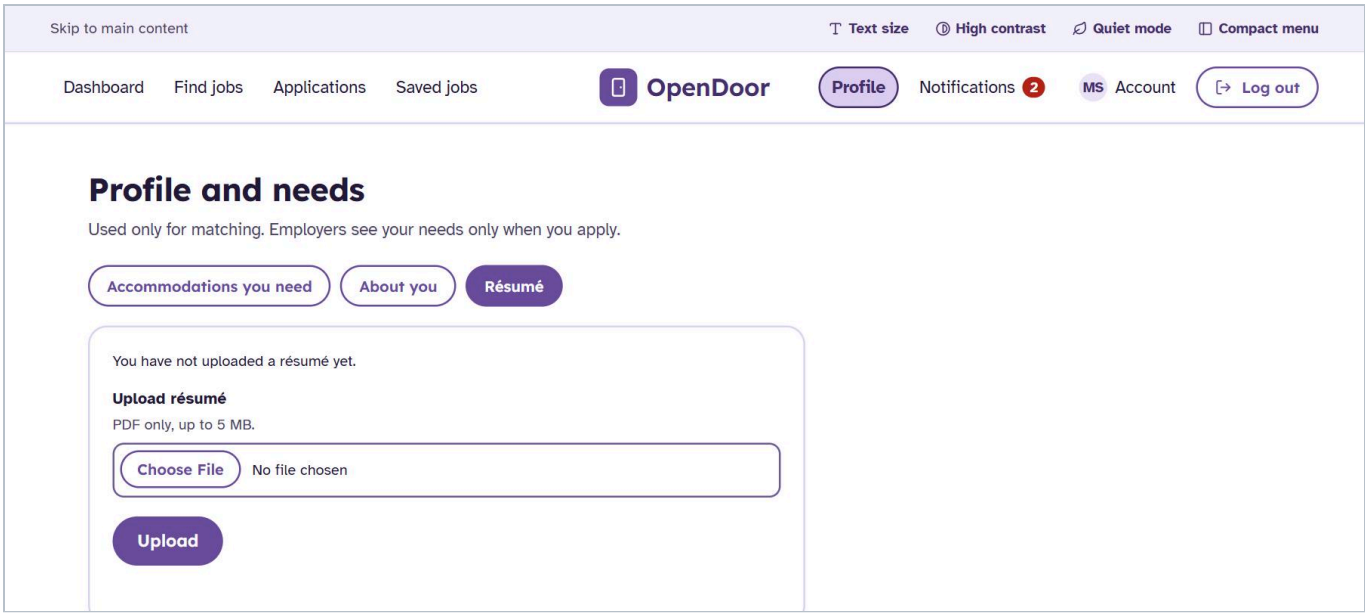

Tab "Accommodations you need" – part 1 of 2 `/candidate/profile`

Tab "Accommodations you need" – part 2 of 2 `/candidate/profile`

Tab "About you" `/candidate/profile?tab=about`

Tab "Résumé" `/candidate/profile?tab=resume`

4.3 Find jobs with "Matches my needs"

Route	`/candidate/jobs`
Who	Job seeker
Purpose	The guest search plus ranking by the job seeker's needs and saving from the results.

ON THE SCREEN

- Everything from 3.2, subtitle "Jobs that offer what you need come first."
- First in the panel: checkbox "Matches my needs" (on by default; hint "Show jobs that offer the accommodations in your profile first.")
- Match badge on each card
- "Save" / "Saved" button on each card NEW

ACTIONS

- "Best match" sorts by needs met, then newest
- Untick "Matches my needs" for a plain search
- Save / unsave a job without leaving the results

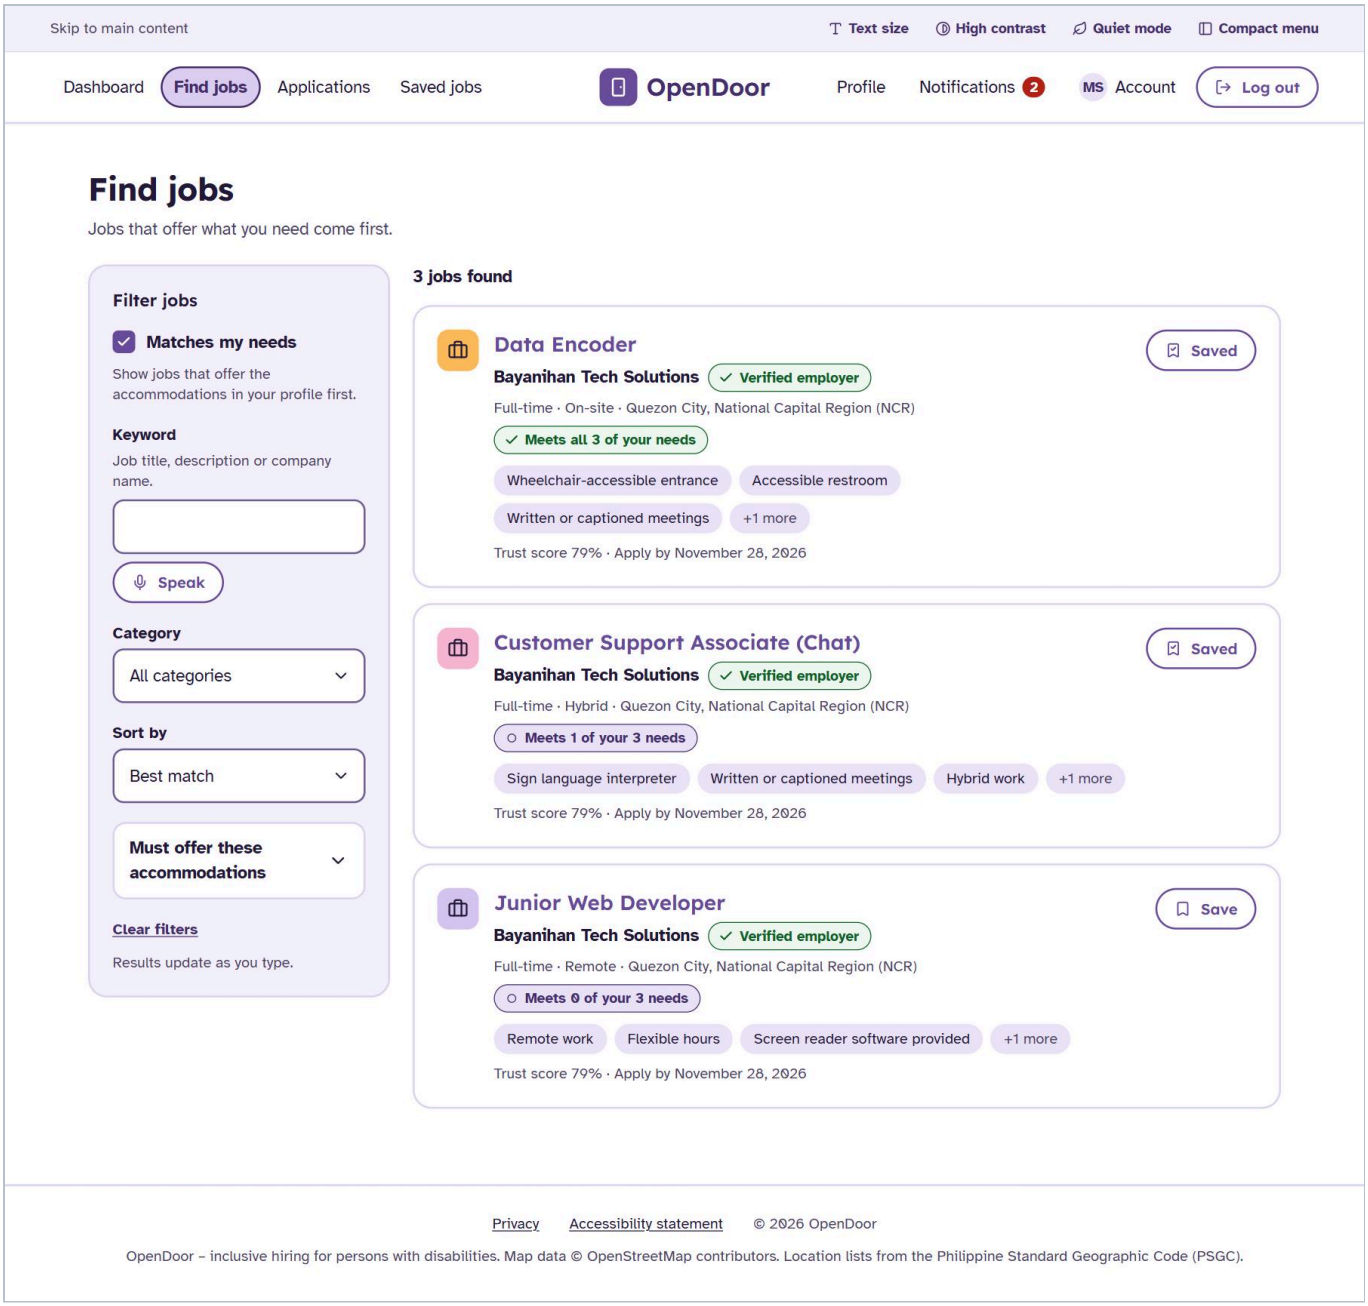

MESSAGES AND STATES

- No needs saved: info "Add the accommodations you need to your profile to see which jobs match them."

API

`GET /job-postings?…&match=1 (results include saved)`

`POST, DELETE /candidate/saved-jobs/{id}`

Screenshot `/candidate/jobs`

4.4 Job details – apply, save, report

Route	`/candidate/jobs/{id}`
Who	Job seeker
Purpose	Decide, apply, bookmark or report.

ON THE SCREEN

- Everything from 3.3; the match badge under the title and an info box "Not mentioned in this posting: … You can ask the employer about these when you apply."; "Accommodations offered" comes first
- Side card "Apply for this job": Cover note (optional, 2,000 characters, Speak, counter), Interview accommodation request (optional, 1,000 characters; hint "On-site interview. Optional. For example: sign language interpreter, extra time, captions."), "Send application"
- Already applied: card "Your application" – "You applied on {date}. Status: {badge}" and "View your application"
- "Save job" / "Saved" toggle NEW and "Report this job"

ACTIONS

- Send application → success "Application sent – The employer will review it. You can follow its status in My applications." (focus moves to it) and the card becomes "Your application"
- Save job / Saved (announced: "Saved. Find it under Saved jobs.")
- Report → dialog "What is wrong with this posting?" (required, 1,000 characters; hint "For example: misleading accommodations, discriminatory wording, or a scam.") → "Send report"; the button becomes "Reported – thank you"

MESSAGES AND STATES

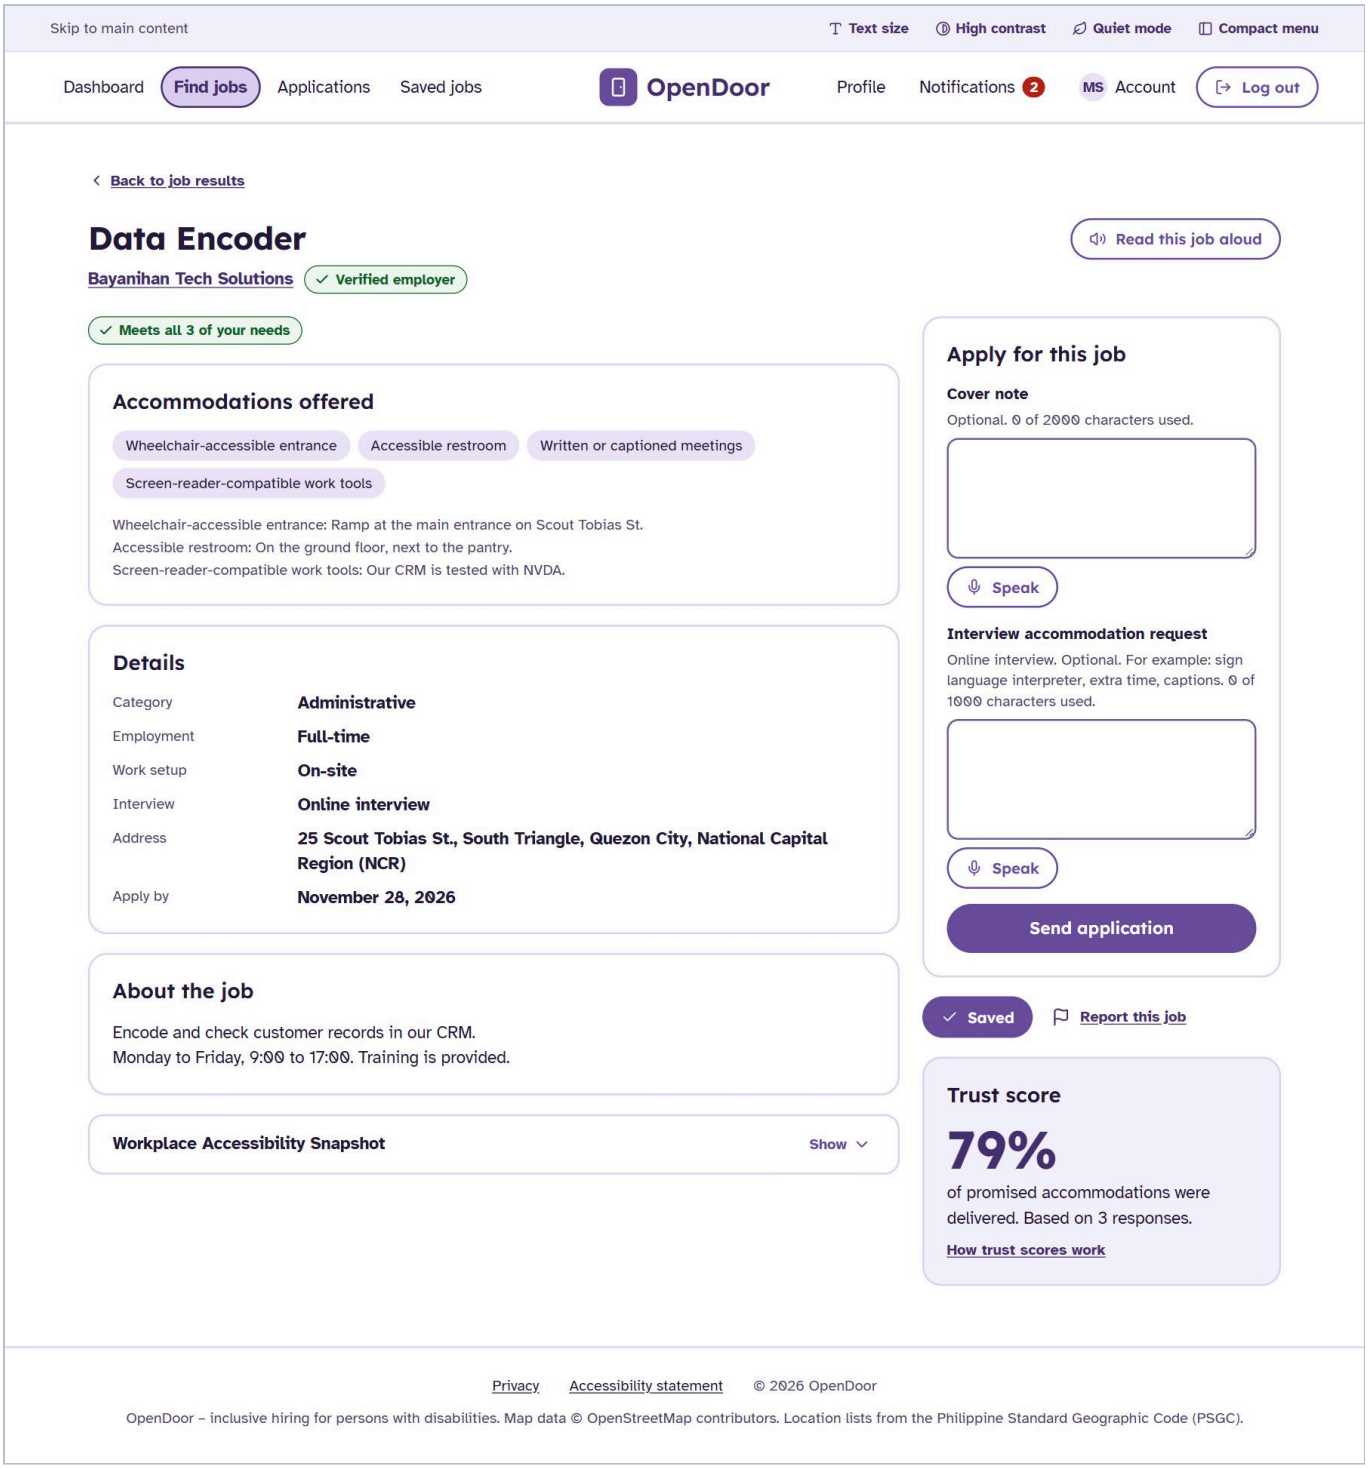

- "This job is no longer accepting applications."
- Only one open report per job seeker and job

API

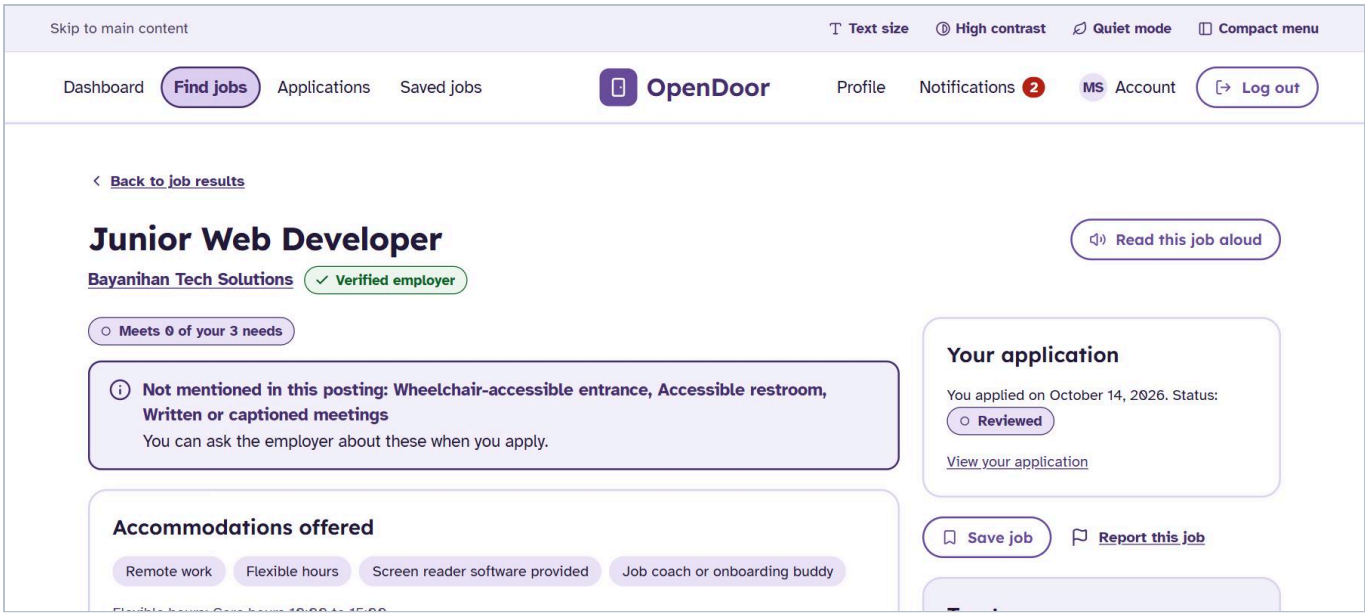

`POST /job-postings/{id}/applications`

`POST, DELETE /candidate/saved-jobs/{id}`

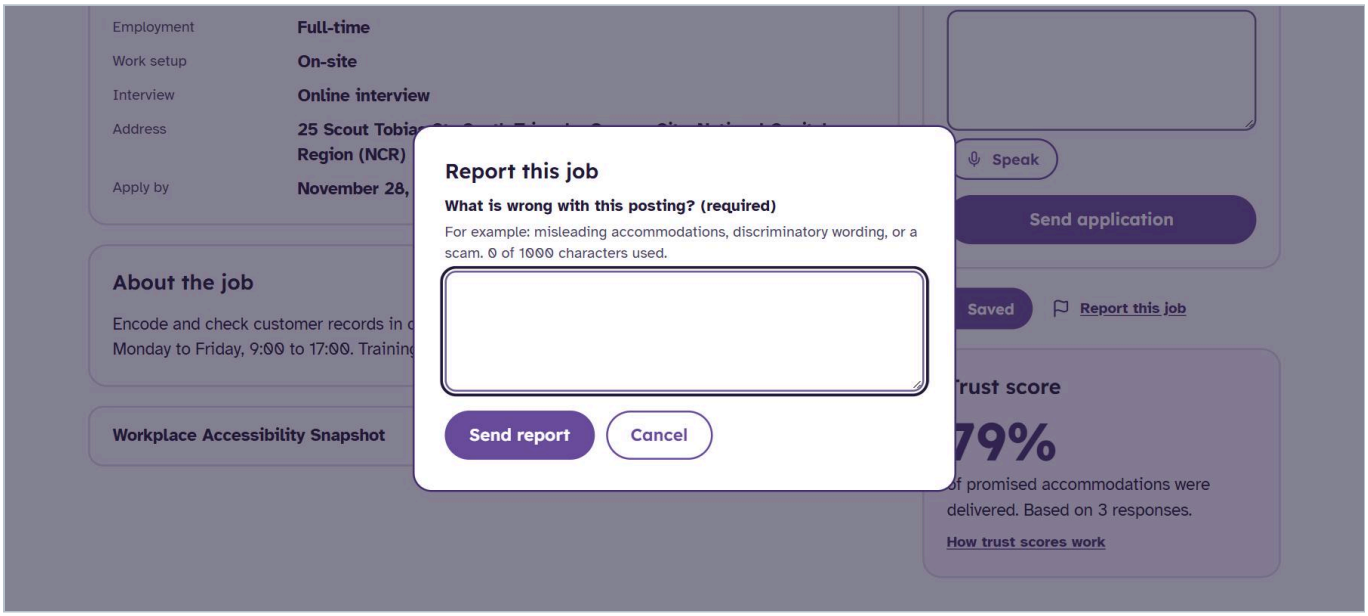

`POST /job-postings/{id}/reports {reason}`

Screenshot `/candidate/jobs/1`

A job that meets only part of the needs: the info box lists what is missing `/candidate/jobs/3`

"Report this job" dialog `/candidate/jobs/1`

4.5 My applications

Route	`/candidate/applications`
Who	Job seeker
Purpose	All applications with their status.

ON THE SCREEN

- Subtitle "Every job you applied to and where it stands."
- Filter bar: "Show" (All applications or one status) with the announced count beside it ("2 applications")
- Table with a tinted header row: Job (bold link) · Employer · Applied · Status badge
- Pagination

ACTIONS

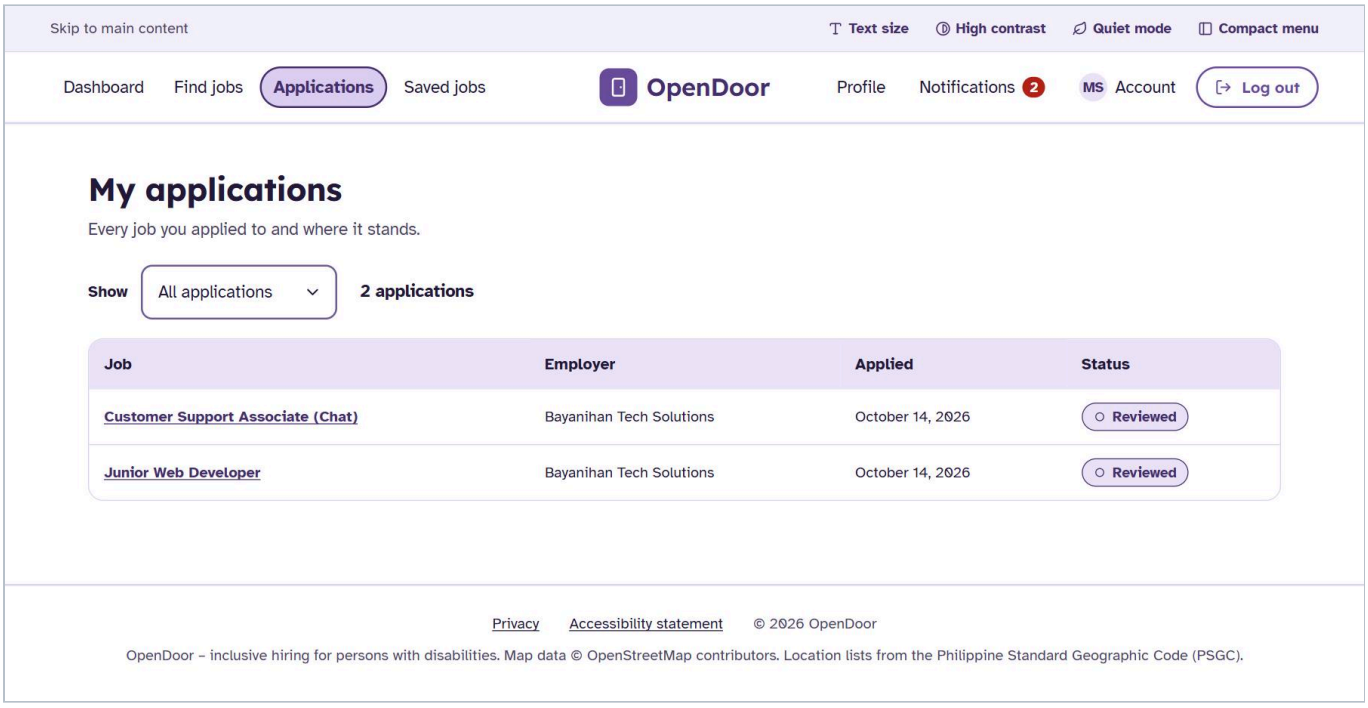

- Open an application
- Filter by status (also from the dashboard tiles)

MESSAGES AND STATES

- "You have not applied to any jobs yet" + "Find jobs that match your needs"
- "No applications with this status"

API

```
GET /applications?status=&page=
```

Screenshot `/candidate/applications`

4.6 Application details

Route	`/candidate/applications/{id}`
Who	Job seeker (own applications)
Purpose	Follow one application and act on it.

ON THE SCREEN

- "‹ Back to my applications"; h1 job title; "View the job · {company}" and the status badge; "Read this application aloud"
- "Where it stands" NEW: Submitted → Reviewed → Decision with dates, or "Waiting for employer"
- Details card: Applied, Cover note, Interview request
- "I was hired" (Reviewed) and "Withdraw application" (danger outline), with a hint
- Hired: success alert and a tinted card "Rate your accommodations" with "Rate accommodations" (or the date it opens)

ACTIONS

- "Withdraw application" (Submitted or Reviewed) → confirm "Withdraw this application? The employer will no longer consider you for this job. You cannot undo this."
- "I was hired" (Reviewed) → confirm "30 days after today you will be asked to rate whether the promised accommodations were provided."
- Rating card: before day 30 "You can rate the accommodations from {date} (30 days after your hire date)."; from day 30 "Rate accommodations"; afterwards "You have rated … Thank you – your answers are anonymous."

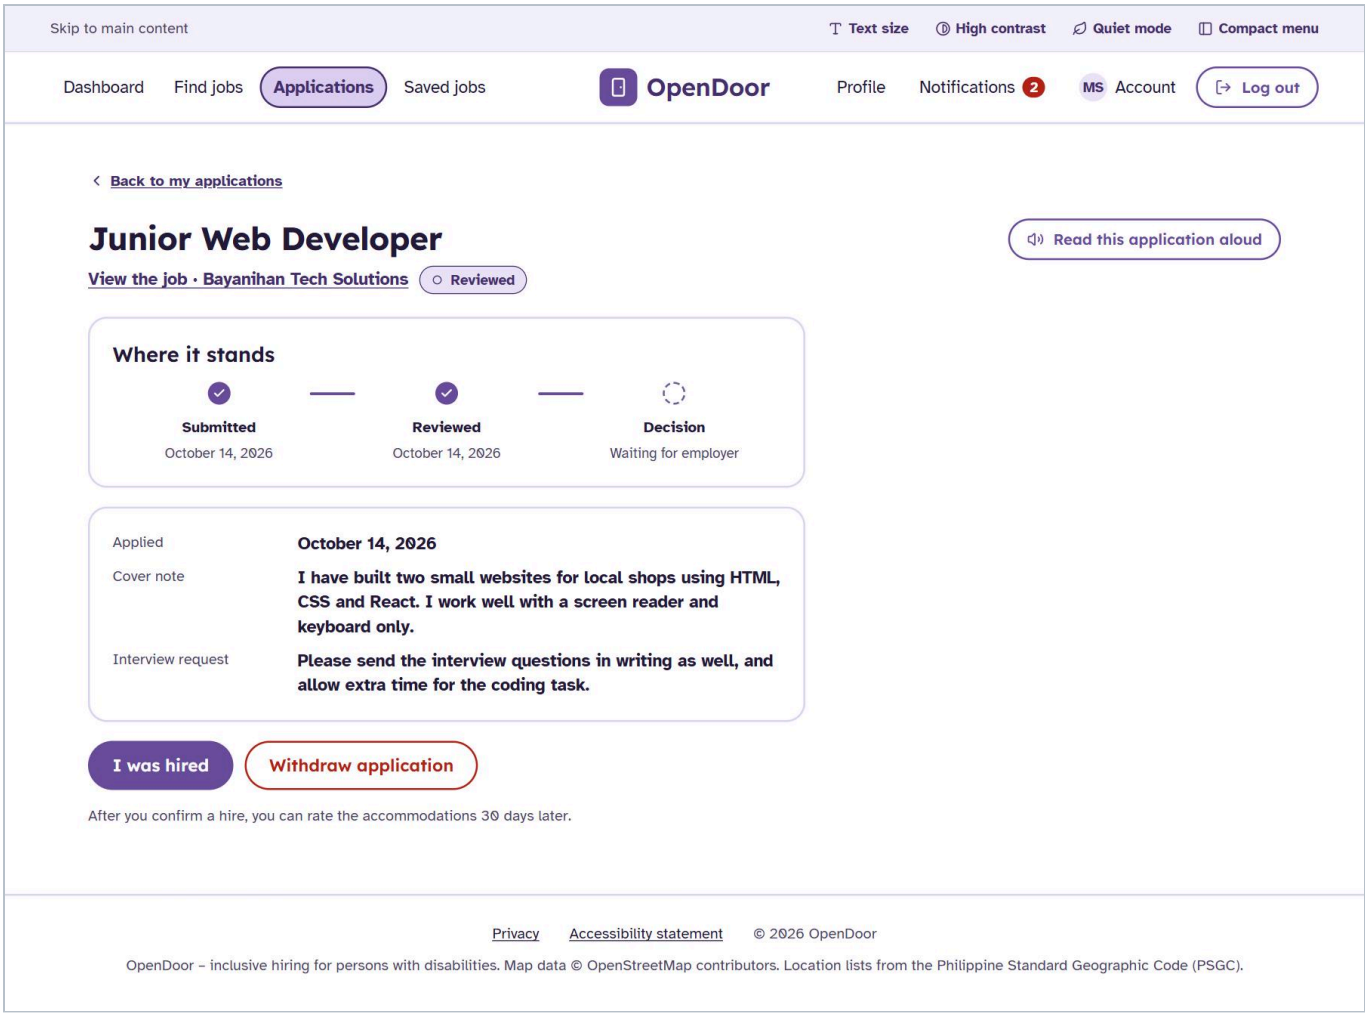

MESSAGES AND STATES

- "Congratulations! Your hire is recorded." / "Your application was withdrawn."
- Error "The status was not changed"

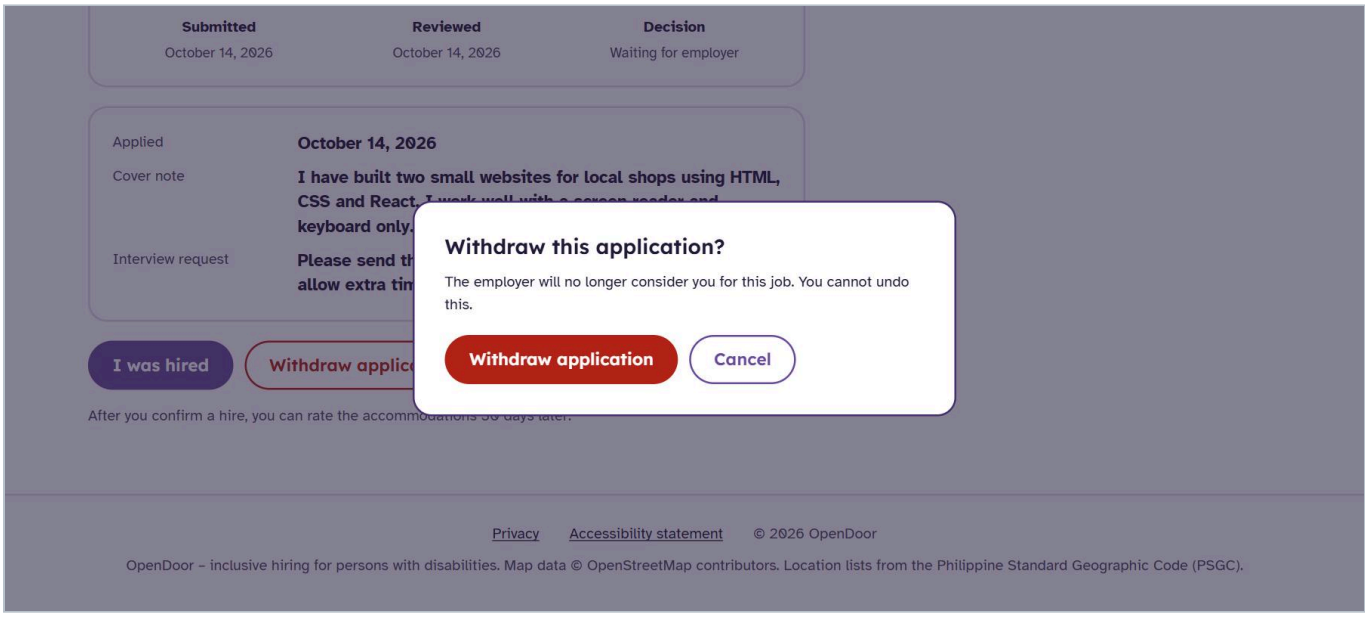

API

`GET /applications/{id} (with reviewed_at)`

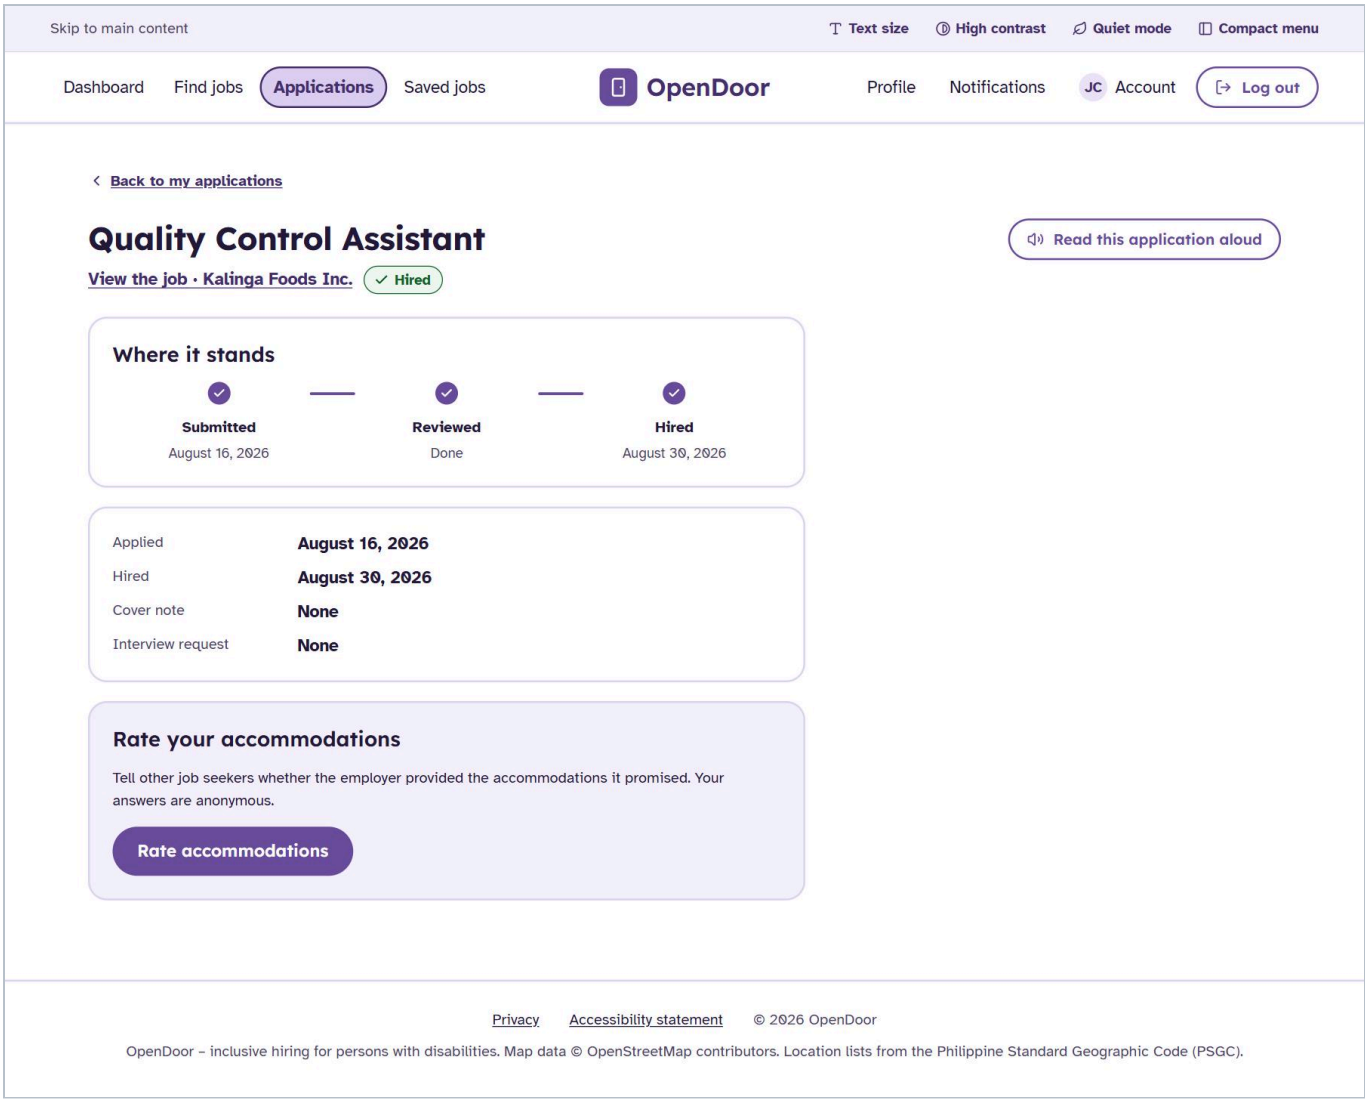

`PATCH /applications/{id}/status {withdrawn|hired}`

Screenshot `/candidate/applications/7`

Confirm dialog for withdrawing (focus starts on Cancel) `/candidate/applications/7`

A hired application: the rating card `/candidate/applications/6`

4.7 Rate your accommodations

Route	`/candidate/applications/{id}/feedback`
Who	Job seeker who was hired at least 30 days ago
Purpose	Anonymous rating of every accommodation the posting promised at the time of hire – this feeds the employer's trust score.

ON THE SCREEN

- "‹ Back to application"; subtitle "Were the promised accommodations really provided? Your answers are anonymous. The employer sees only the combined score."
- One card per accommodation with the required choice Delivered / Partly delivered / Not delivered in one row
- Comments ("Optional. Do not include names.", 2,000 characters, Speak)
- "Submit ratings"

ACTIONS

- Submit → "Thank you – Your ratings are saved. They help other job seekers know which employers keep their promises."

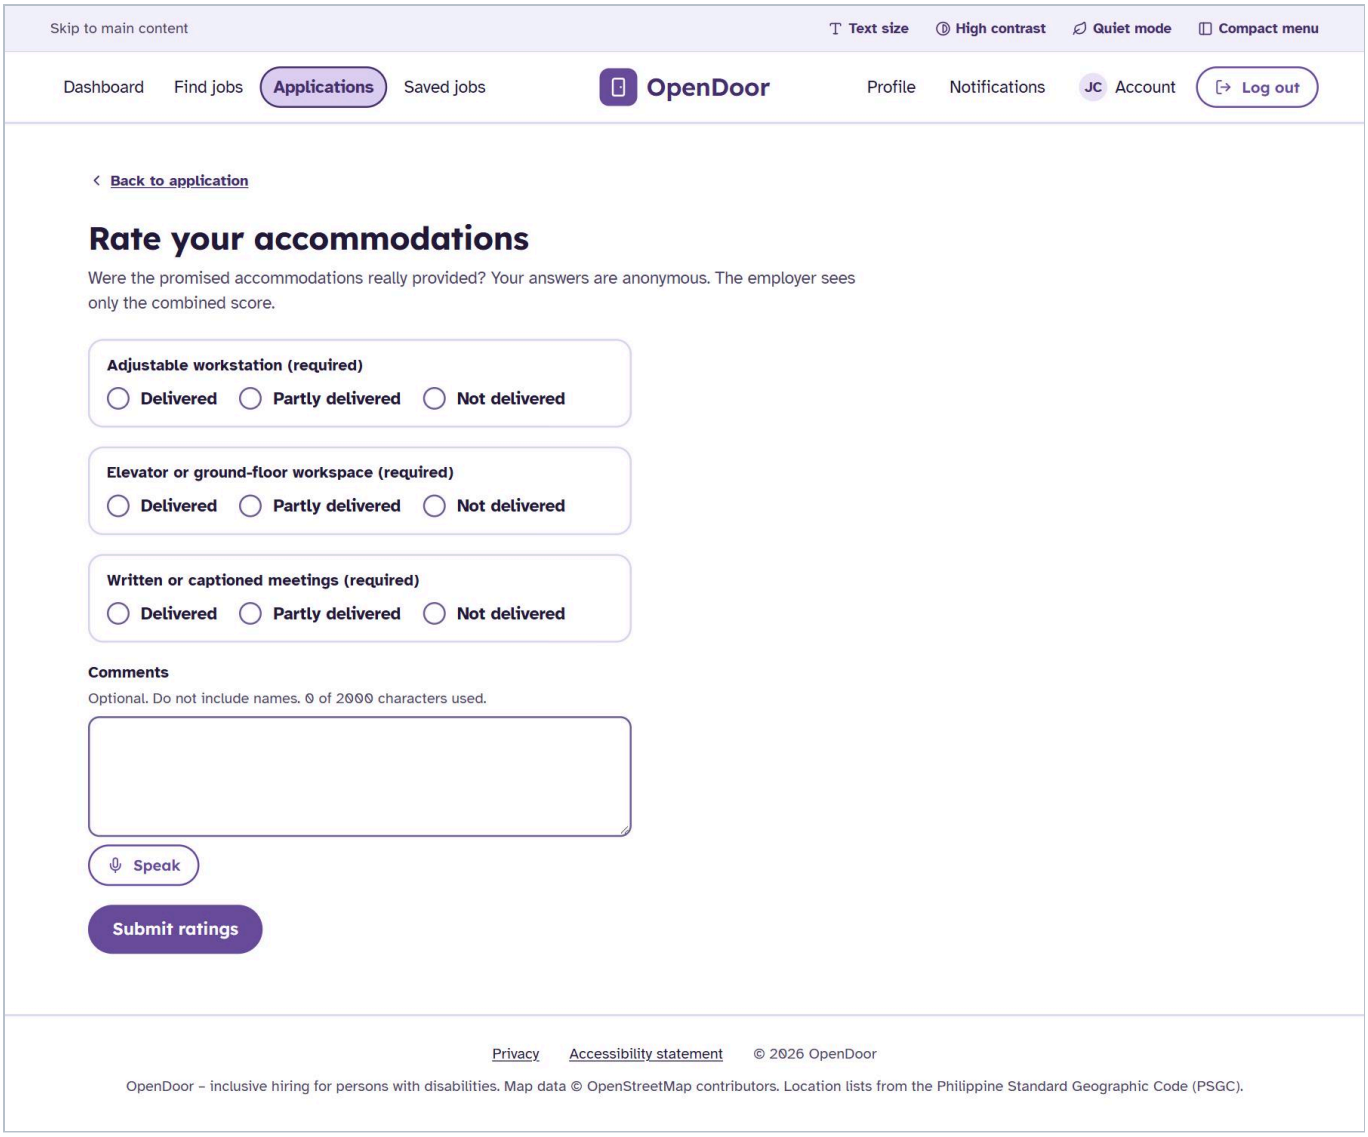

MESSAGES AND STATES

- Missing rating: error per card "Choose a rating for “…”." and error summary
- "Already rated" (each hire is rated once)
- "Not open yet – You can rate the accommodations from {date}, 30 days after your hire date."
- "Nothing to rate" (the posting listed no accommodations)

API

```
GET /applications/{id}/feedback-form
```

```
POST /applications/{id}/feedback {items[{accommodation_id, rating}], comments}
```

Screenshot `/candidate/applications/6/feedback`

4.8 Saved jobs NEW

Route	`/candidate/saved-jobs`
Who	Job seeker
Purpose	Bookmarked jobs, newest saved first.

ON THE SCREEN

- Subtitle "Jobs you bookmarked, newest first."
- Job cards, each with "Remove"
- After removing: "Removed “Data Encoder” from saved jobs." and an "Undo" button
- Pagination (12 per page)

ACTIONS

- Open a job
- Remove → focus moves to "Undo"
- Undo → the job is saved again and focus returns to its "Remove"

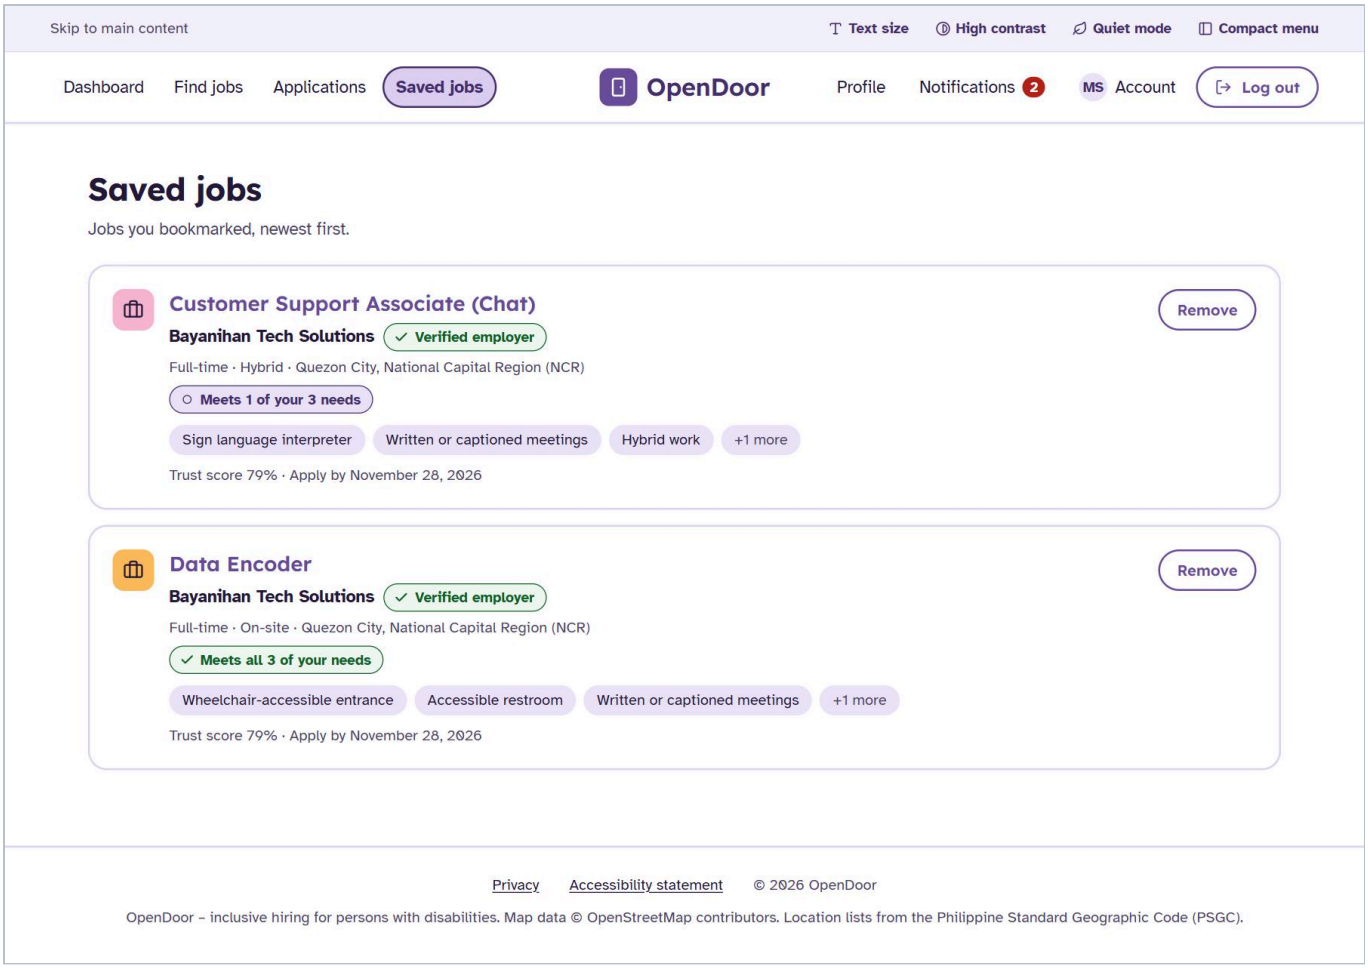

MESSAGES AND STATES

- Empty: card with a bookmark icon "No saved jobs – Use “Save job” on a job’s page to keep it here." and "Find jobs"
- Closed or hidden jobs disappear from the list and come back if they reopen

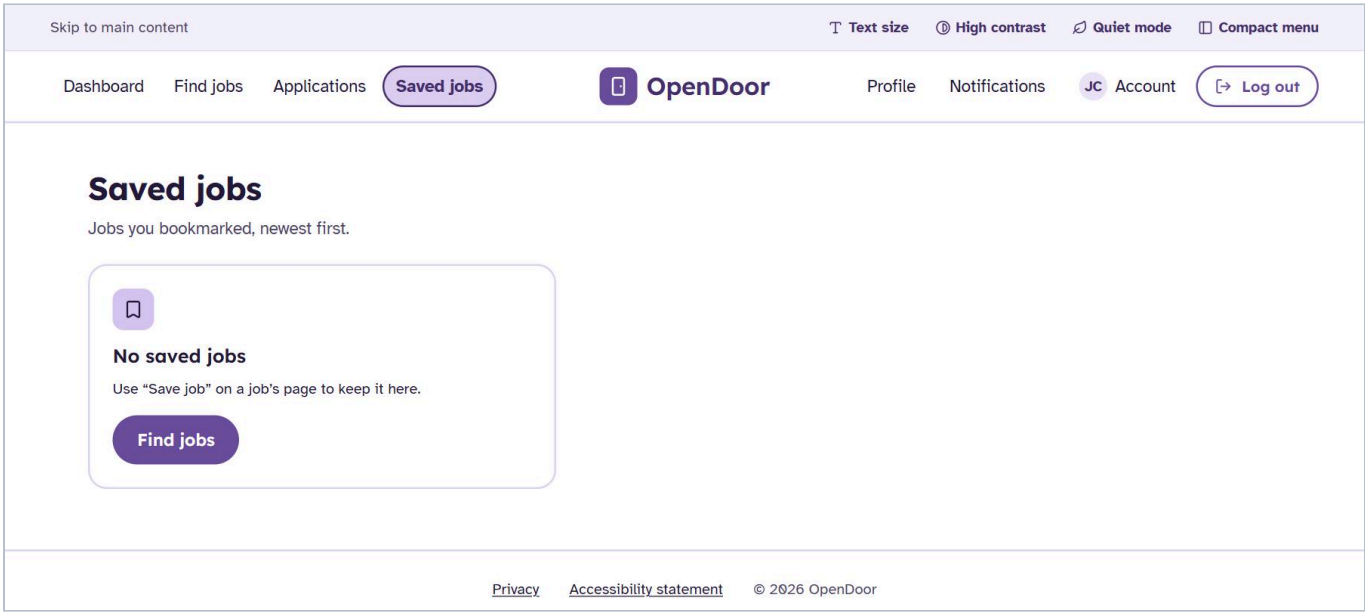

API

`GET /candidate/saved-jobs?page=`

`DELETE, POST /candidate/saved-jobs/{id}`

Screenshot `/candidate/saved-jobs`

Empty state `/candidate/saved-jobs`

5 Employer screens

Demo: Ana Reyes (`employer@opendoor.test`, Bayanihan Tech Solutions, verified, trust score 79%) and Ramon Villanueva (`employer2@opendoor.test`, Kalinga Foods Inc., waiting for verification). Menu: Dashboard · Job postings | logo | Company · Trust score · Notifications · Account · Log out ("Job postings" stays marked on the applicant pages).

5.1 Dashboard

Route	`/employer/dashboard`
Who	Employer
Purpose	Postings, applications and trust score at a glance.

ON THE SCREEN

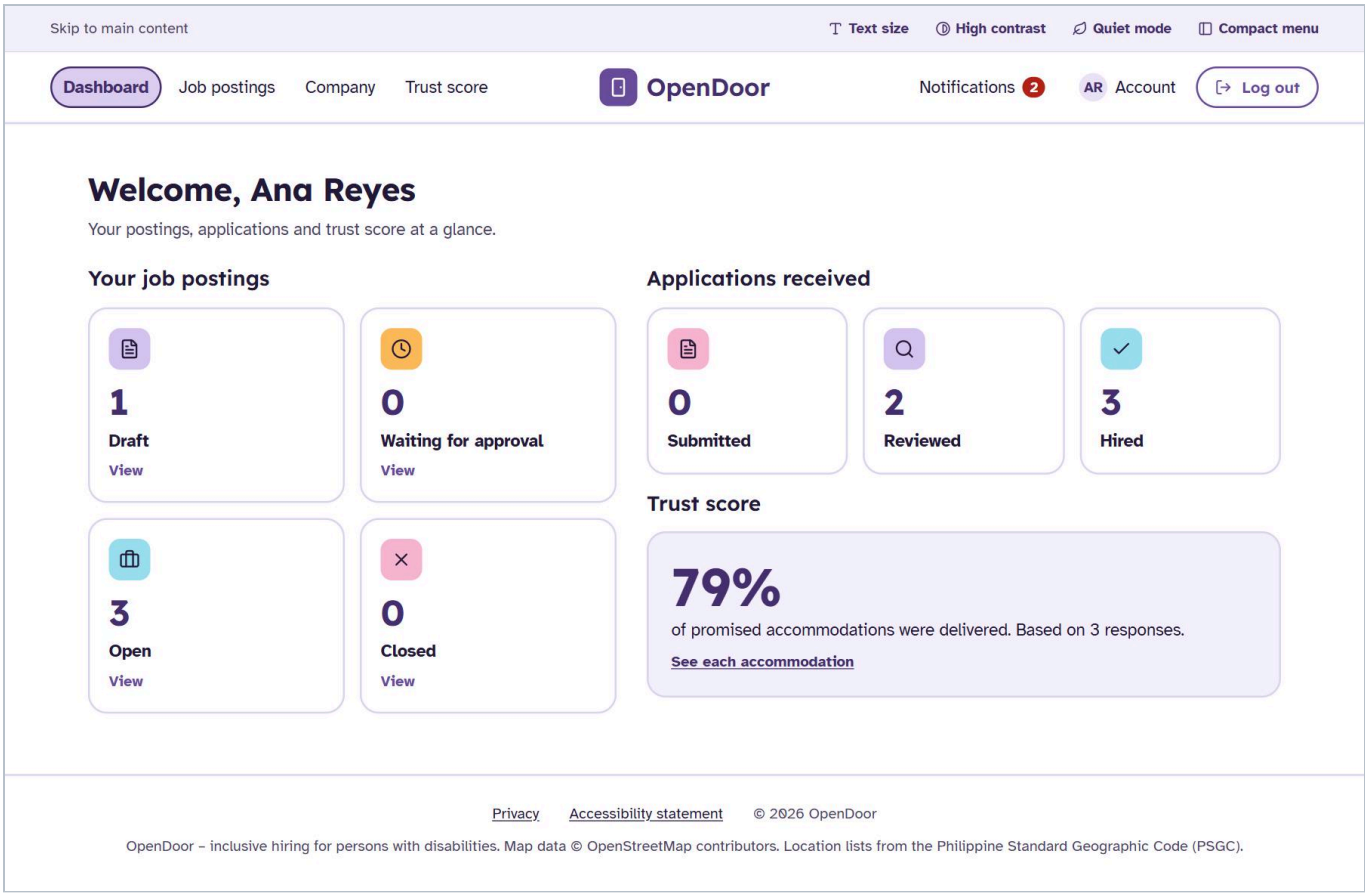

- h1 "Welcome, {name}", subtitle "Your postings, applications and trust score at a glance."
- Verified company with postings waiting: info "n jobs are waiting for approval"
- Callouts with an info icon: no company → "Set up your company profile so an administrator can verify your business." + "Set up company"; not verified → "Your business registration is waiting for verification." or "Verification was not approved: {reason}" + "View company profile"
- Tiles "Your job postings": Draft, Waiting for approval, Open, Closed (with icons and "View")
- Tiles "Applications received": Submitted, Reviewed, Hired (numbers only – there is no list of all applications)
- "Trust score" card with "See each accommodation"

ACTIONS

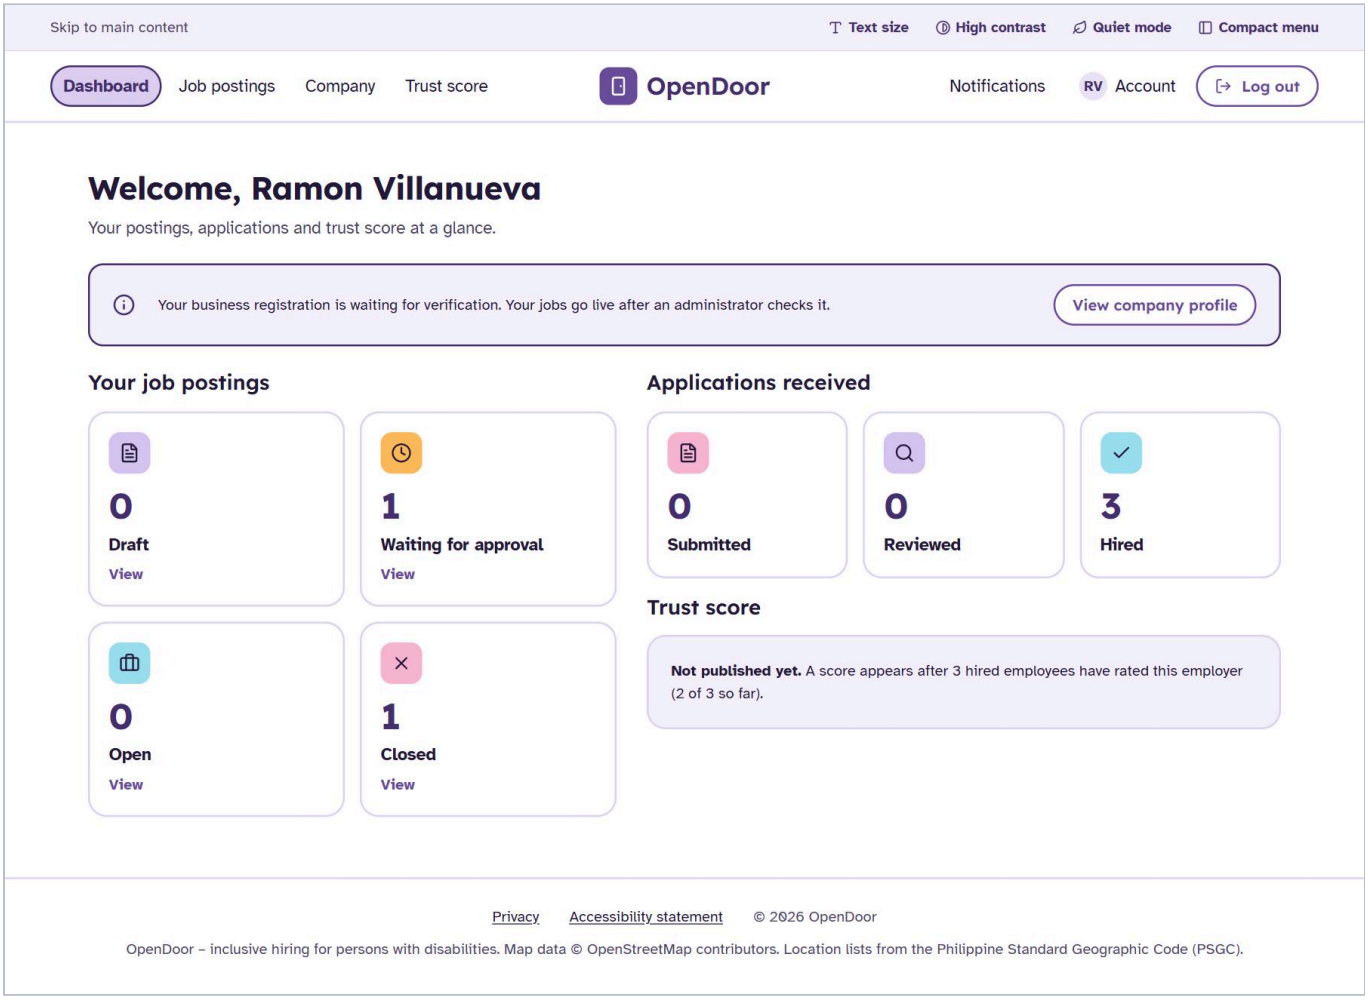

- Open filtered postings, company profile, trust score

API

```
GET /employer/dashboard
```

Screenshot `/employer/dashboard`

An employer whose company is not verified yet `/employer/dashboard`

5.2 Company profile

Route	`/employer/company`
Who	Employer
Purpose	Company details that an administrator checks with the DTI/SEC business registry.

ON THE SCREEN

- Subtitle "Checked against the DTI and SEC registry before your jobs go live."
- Verification alert: success "Verified employer – Checked on {date}. Your jobs show the Verified badge." / warning "Waiting for verification" / error "Verification was not approved – Reason: …"
- Two-column form (read row by row): Company name ("As registered with the DTI or SEC."), Business registration number ("For example: CS201912345."), Registered with (DTI (sole proprietorship) / SEC (corporation or partnership)), Industry, Office address, City or municipality
- Box "More details: about the company and logo": About the company (optional, Speak), Logo ("Optional. PNG, JPG or WebP, up to 2 MB.") – opens by itself when one of them has an error
- "Save company profile"

ACTIONS

- Save → "Your company profile is saved." and "Next: post a job."
- Changing a verified registration number warns: "Changing this number removes your Verified badge until it is checked again."
- Saving after a rejection sends the company back to the admin queue

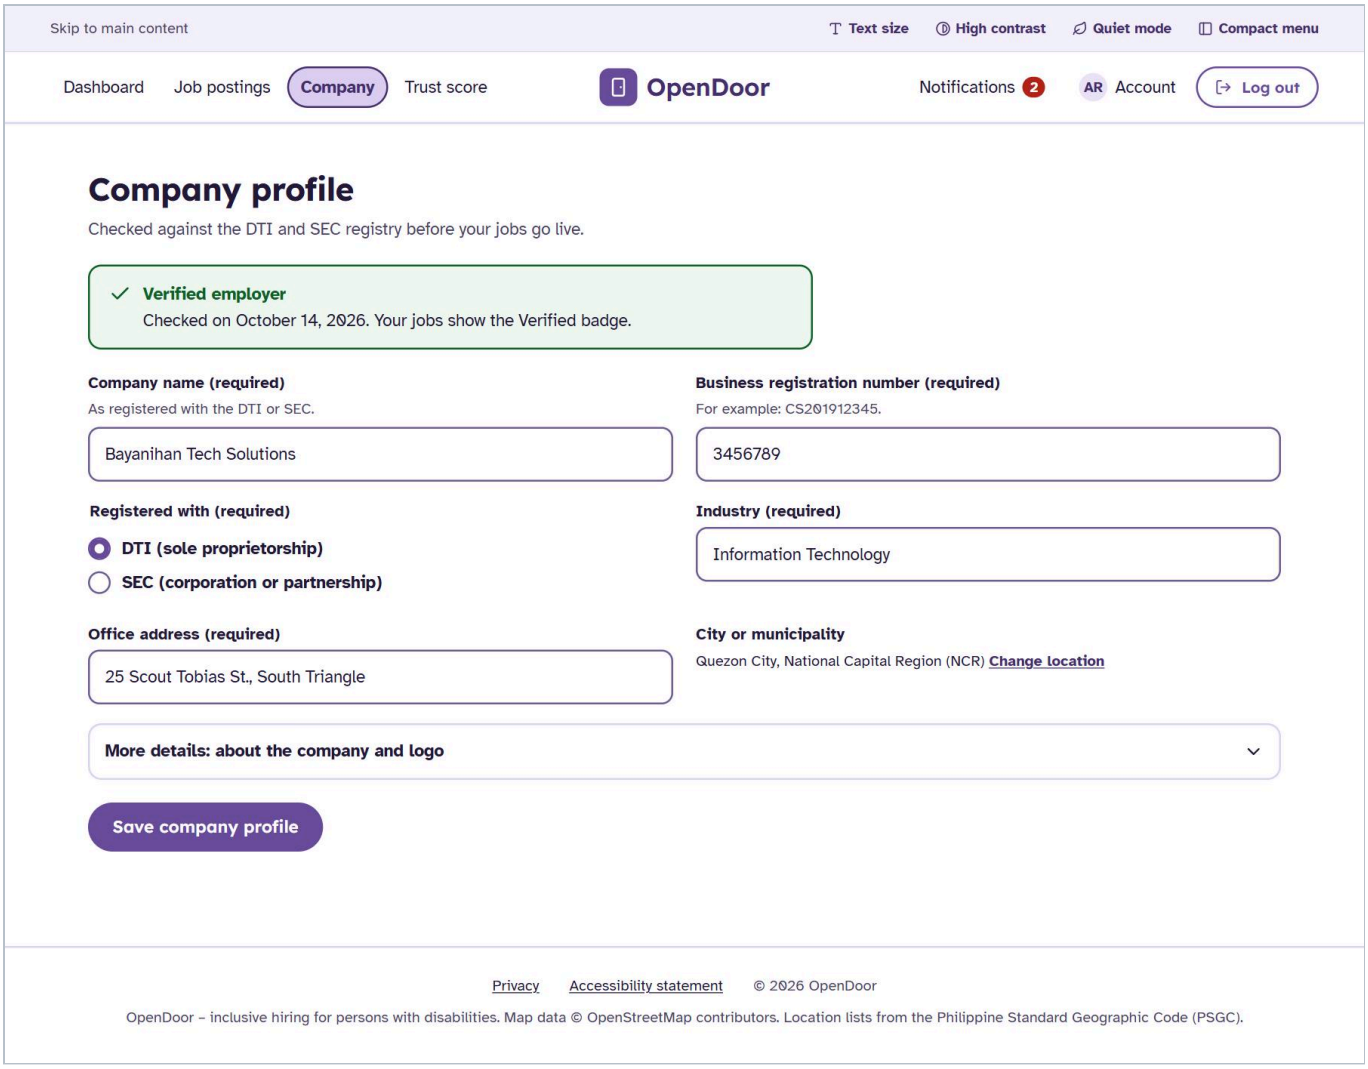

MESSAGES AND STATES

- New employer: empty form with "Welcome to OpenDoor – … An OpenDoor administrator checks your business registration before your jobs go live."

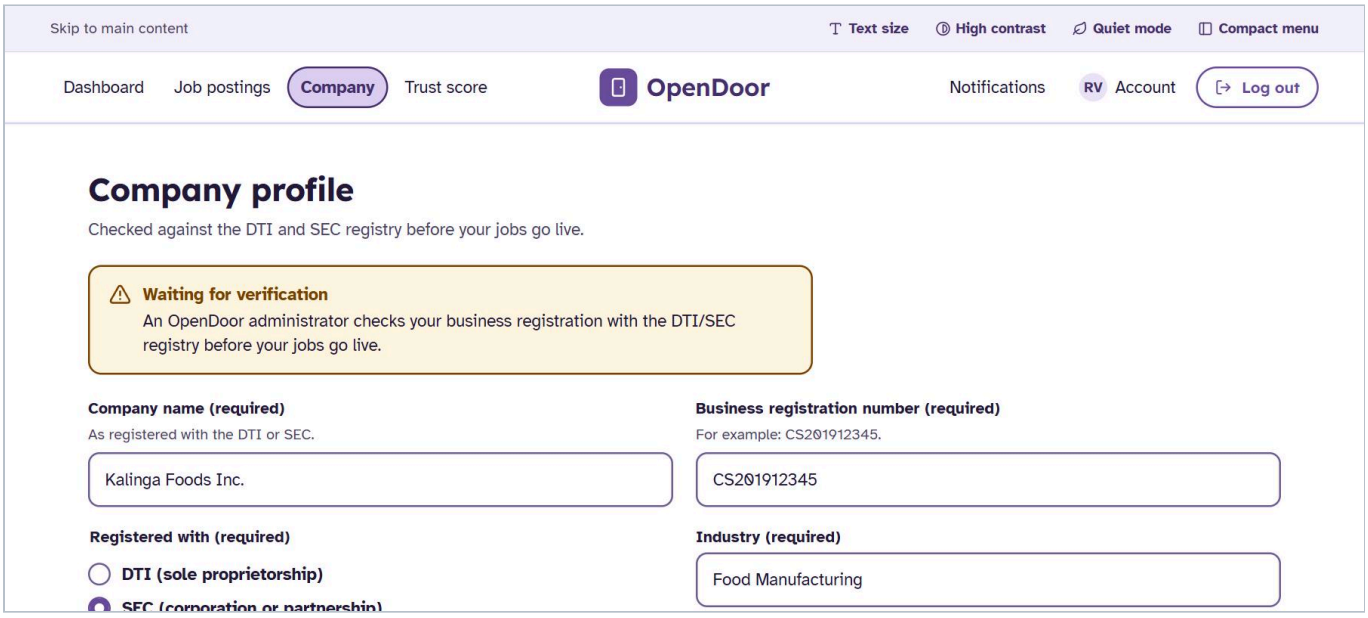

API

`GET /employer/company`

`PUT /employer/company (POST + _method=PUT when a logo is sent)`

Screenshot `/employer/company`

Waiting for verification (warning) `/employer/company`

5.3 Job postings

Route	`/employer/jobs`
Who	Employer
Purpose	All own postings and their state.

ON THE SCREEN

- Subtitle "All your postings and their state."
- Filter bar: "Show" by status, count ("4 postings"), "Post a new job" (plus icon) at the end
- Table: Job (link) · Status badge · Applicants (number links to the applicants; 0 is plain text) · Closes · Actions
- Actions: "Edit", "Close" (open jobs) or "Reopen" (closed jobs), "Delete" (danger outline); hint under the table

ACTIONS

- Close / Reopen → "“…” is closed to new applications." / "is open again."
- Delete → confirm "The job disappears from search. Applications already received stay available to you and the applicants."

MESSAGES AND STATES

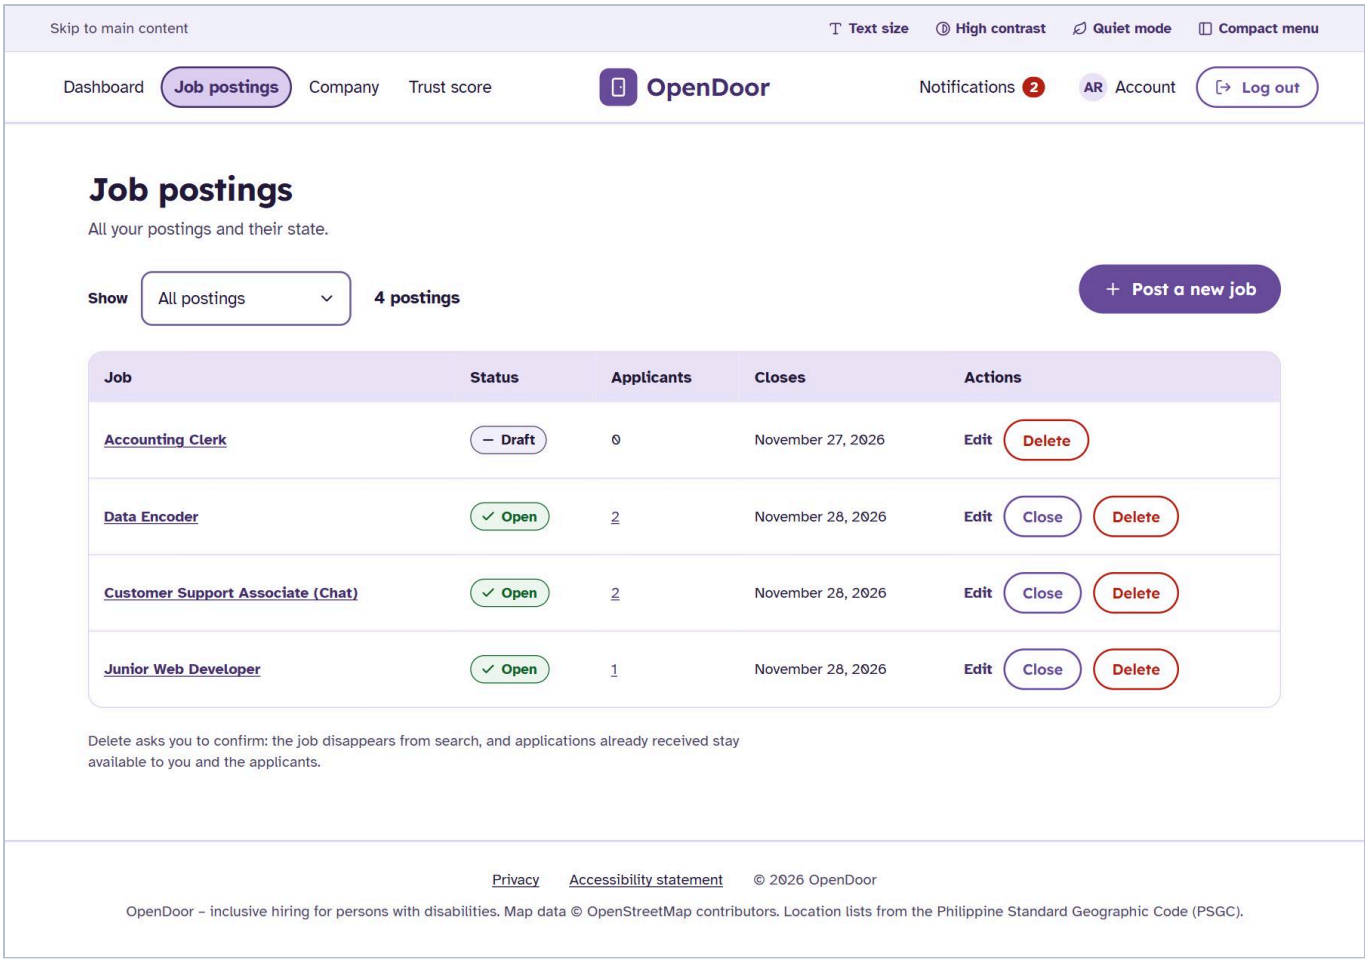

- "You have not posted any jobs yet"
- Message carried over from the form: "“…” was sent for approval." / "was saved as a draft."

API

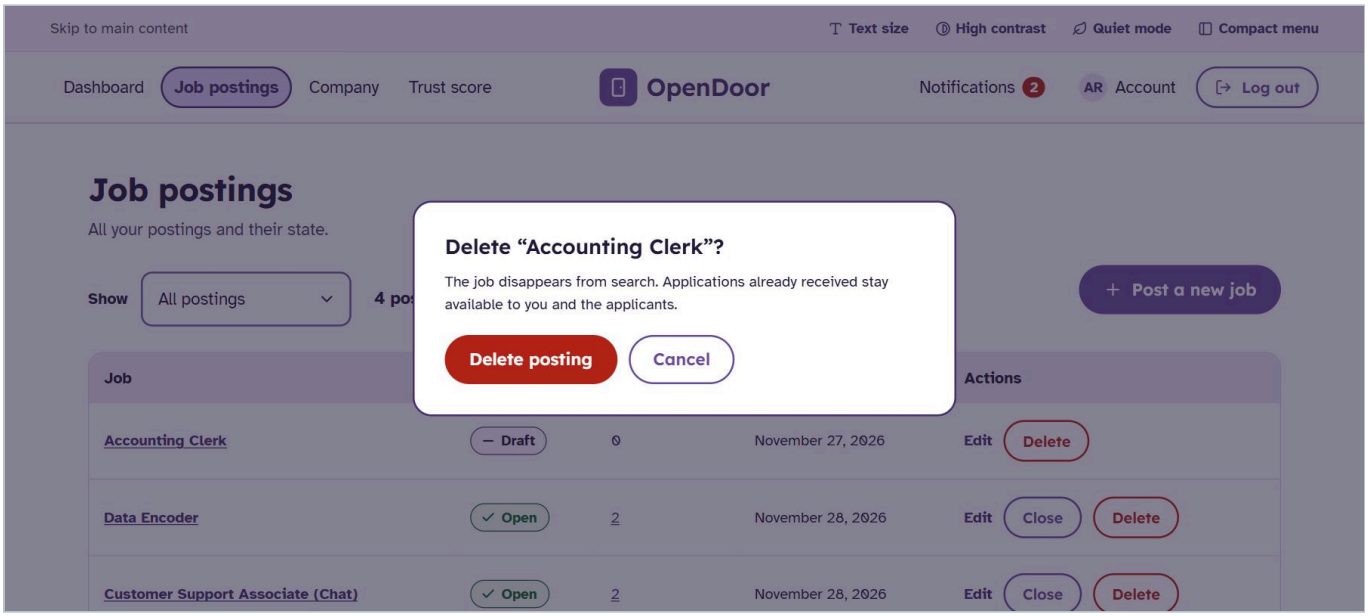

`GET /employer/job-postings?status=&page=`

`PATCH /job-postings/{id}/status {open|closed}`

`DELETE /job-postings/{id}`

Screenshot `/employer/jobs`

Delete confirmation (danger: focus starts on Cancel) `/employer/jobs`

5.4 Post a new job (4 steps) / Edit posting

Route	`/employer/jobs/new, /employer/jobs/{id}/edit`
Who	Employer (own postings)
Purpose	Write a job with structured accommodations and send it for approval.

ON THE SCREEN

- h2 "Step n of 4 · …" with progress bars; subtitle per step ("An administrator approves every job before it goes live.", "Describe the work and where it happens.", "Tell people what support you offer.", "Check everything, then send it for approval.")
- Step 1 Job basics: Job title, Category, Employment type (Full-time, Part-time, Contract, Internship) and Work setup (On-site, Hybrid, Remote) as choices in a row
- Step 2 Description and place: Job description (Speak; "Duties, qualifications and working hours."), Interview format (Online interview / On-site interview), Workplace address ("Street and building. Used for the accessibility snapshot."), City or municipality, Applications close on ("Not before today.")
- Step 3 Accommodations: warning "List only what you really provide – Hired employees will rate each one."; checklist in two columns, each checked item gets "Details for “…” (optional)"
- Step 4 Review and submit: cards "Job basics", "Description and place", "Accommodations offered", each with "Change" (back to that step); info "What happens next – An administrator checks the job. You get a notification when it is live or if something needs changing."
- Buttons "Back", "Save as draft" (new jobs and drafts; "Cancel" for submitted ones), "Next" / "Submit for approval"
- Edit: "‹ Back to job postings", h1 "Edit “{job}”", "Status: {badge}", starts on step 1; info "Saving changes sends this job back for approval. – It is hidden from job seekers until an administrator approves it again."; after a rejection: "This posting was not approved – Reason: … Edit it and submit it again."

ACTIONS

- Submit for approval → status "Waiting for approval"; editing an open job hides it until it is approved again
- Save as draft → status "Draft"

MESSAGES AND STATES

- No company yet: "Your company profile is missing" + link "Set up your company profile" (on every step)
- Each step shows only its own errors; server errors jump to the first step with an error
- Tab title "Post a new job (step n of 4) – OpenDoor"

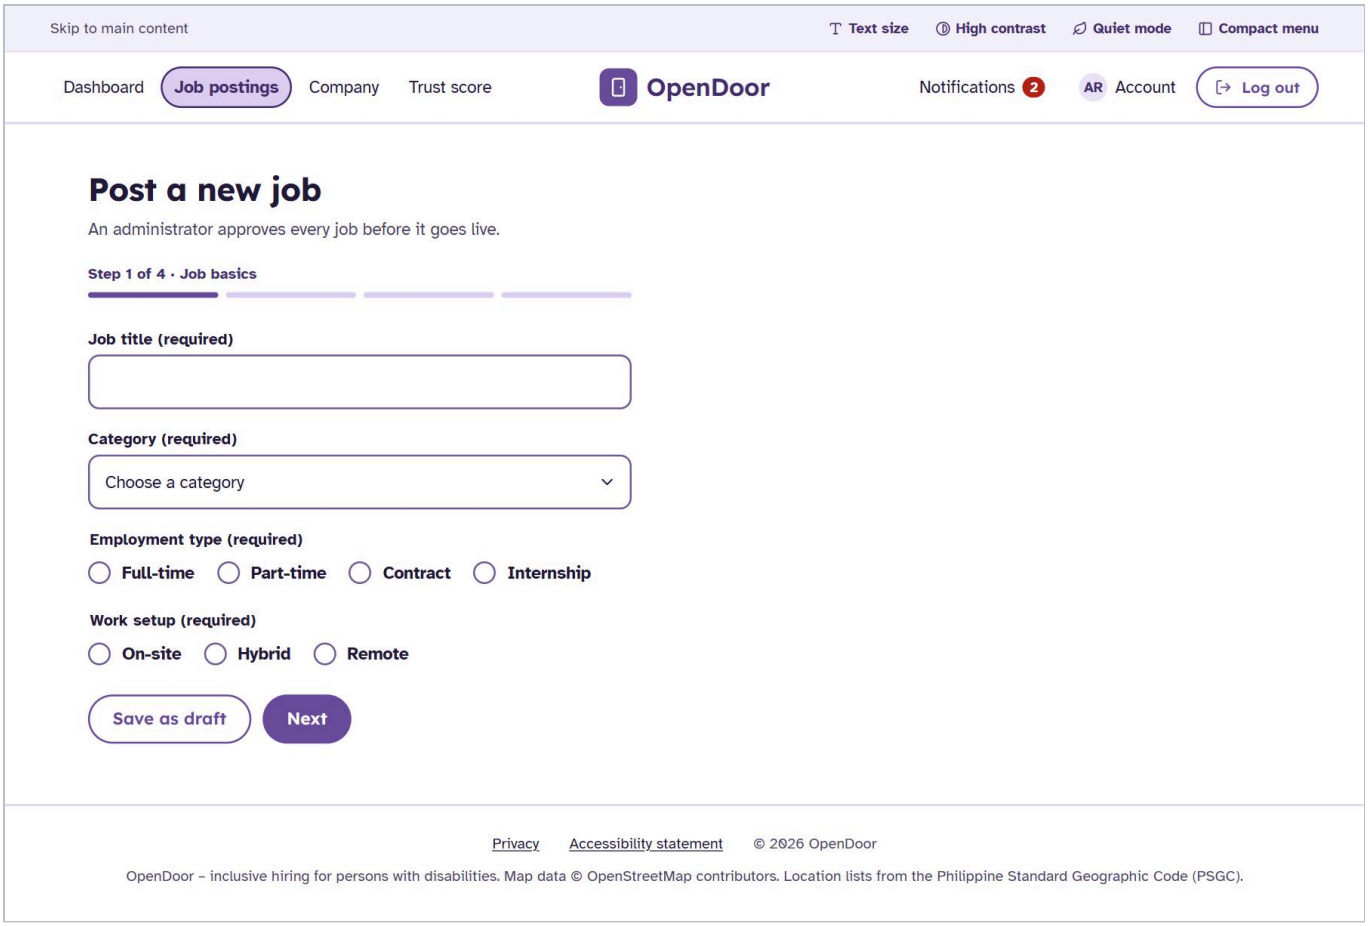

API

`POST /job-postings`

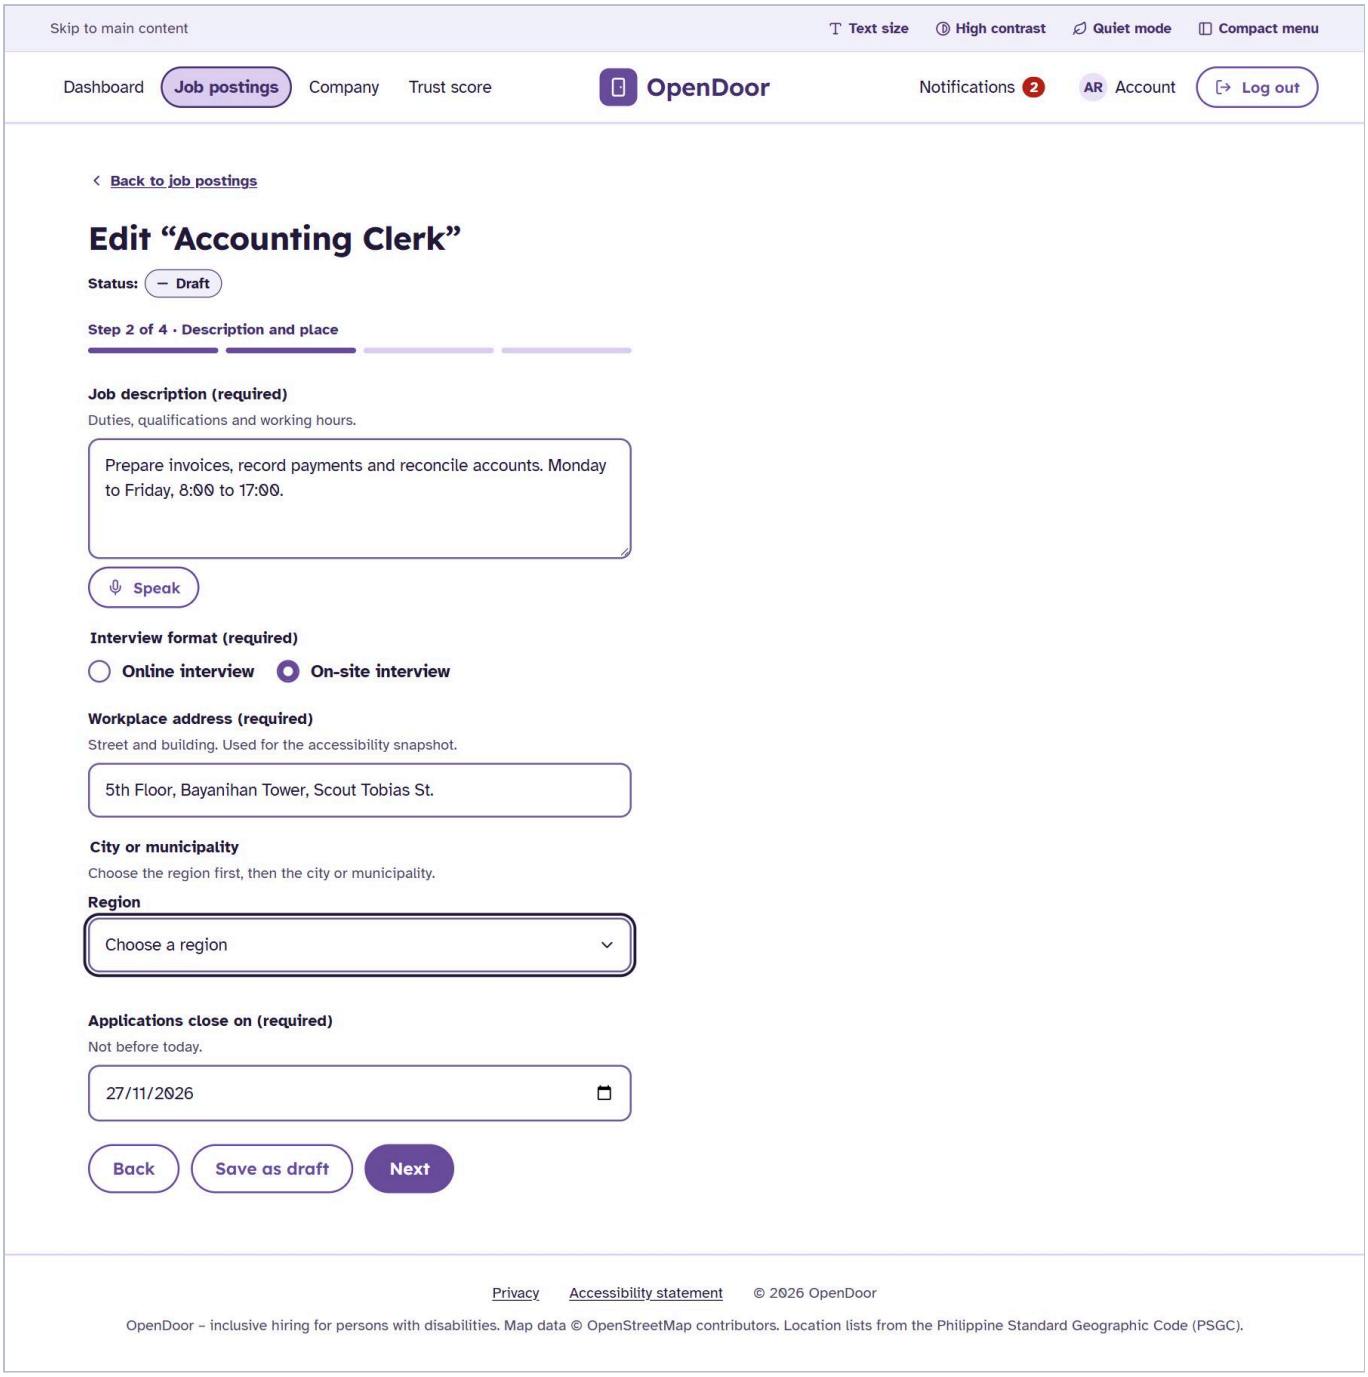

`PUT /job-postings/{id}`

`GET /job-postings/{id}`

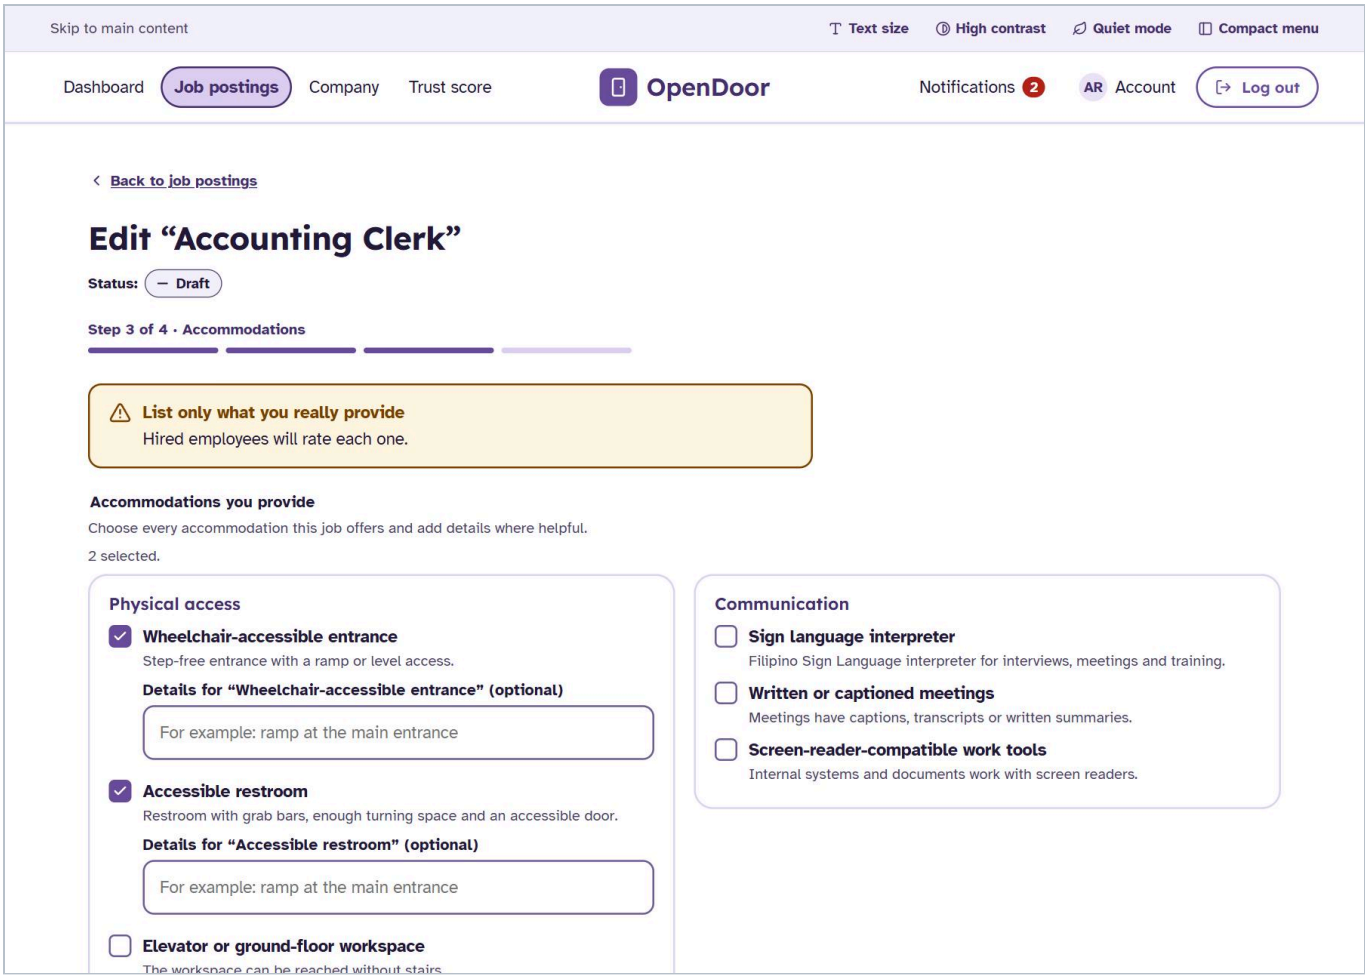

`GET /categories, /accommodations`

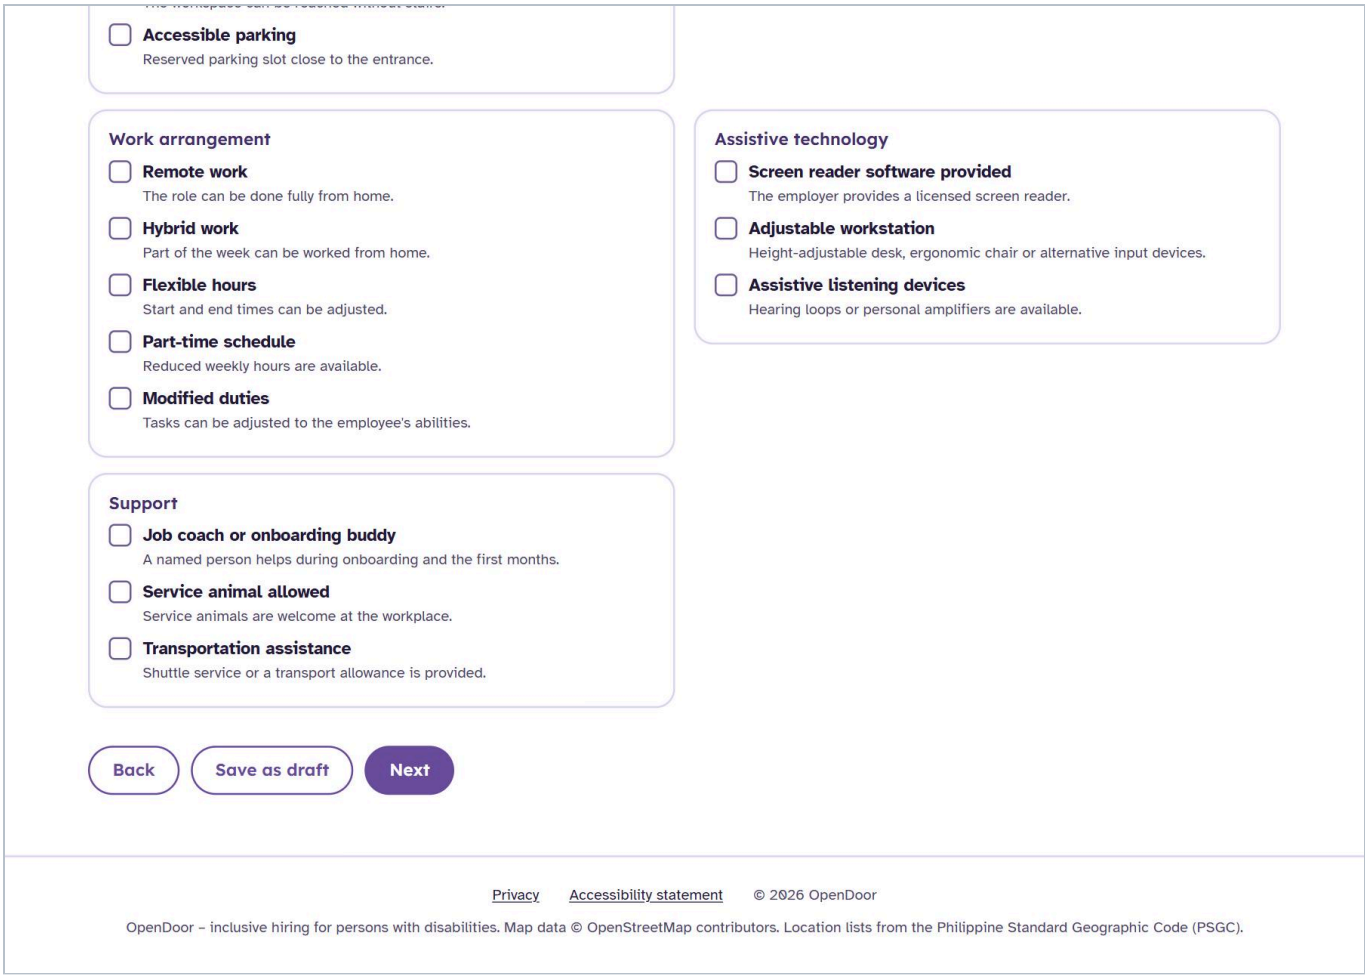

Step 1 · Job basics `/employer/jobs/new`

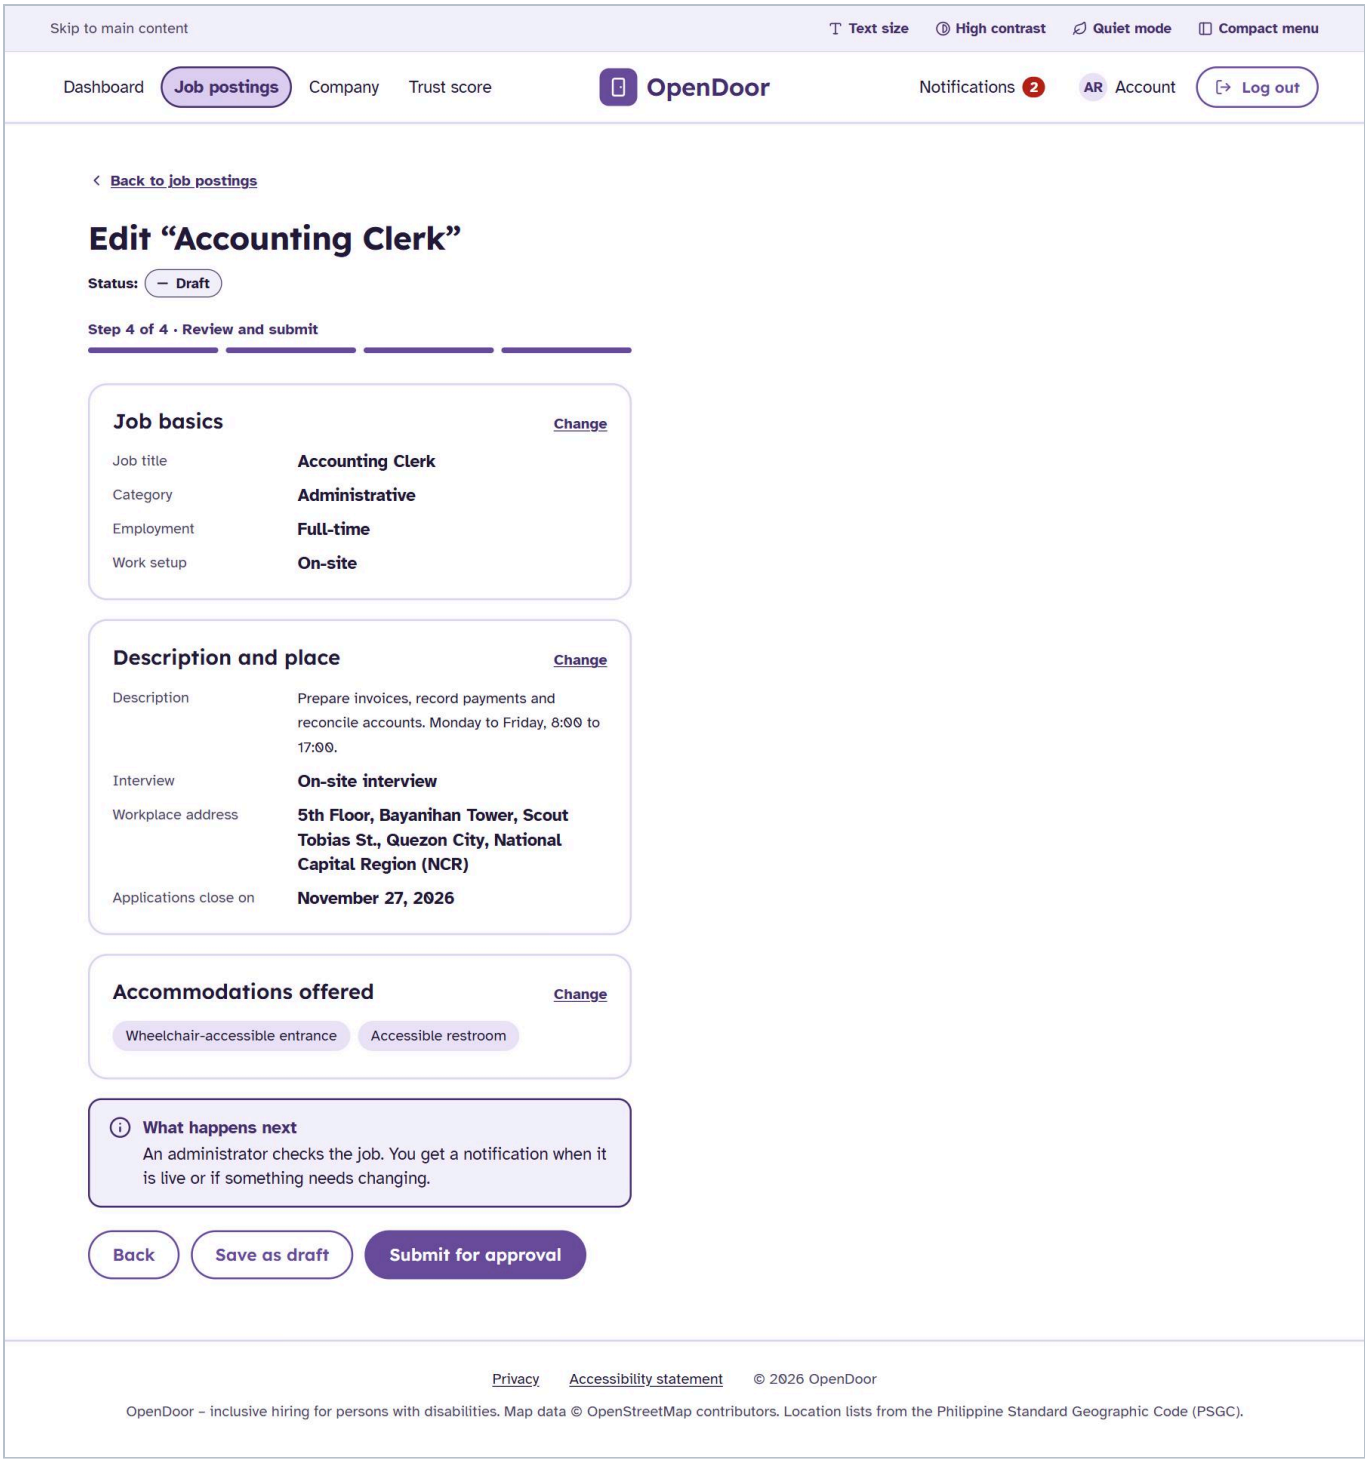

Step 2 · Description and place (location picker opened) `/employer/jobs/6/edit`

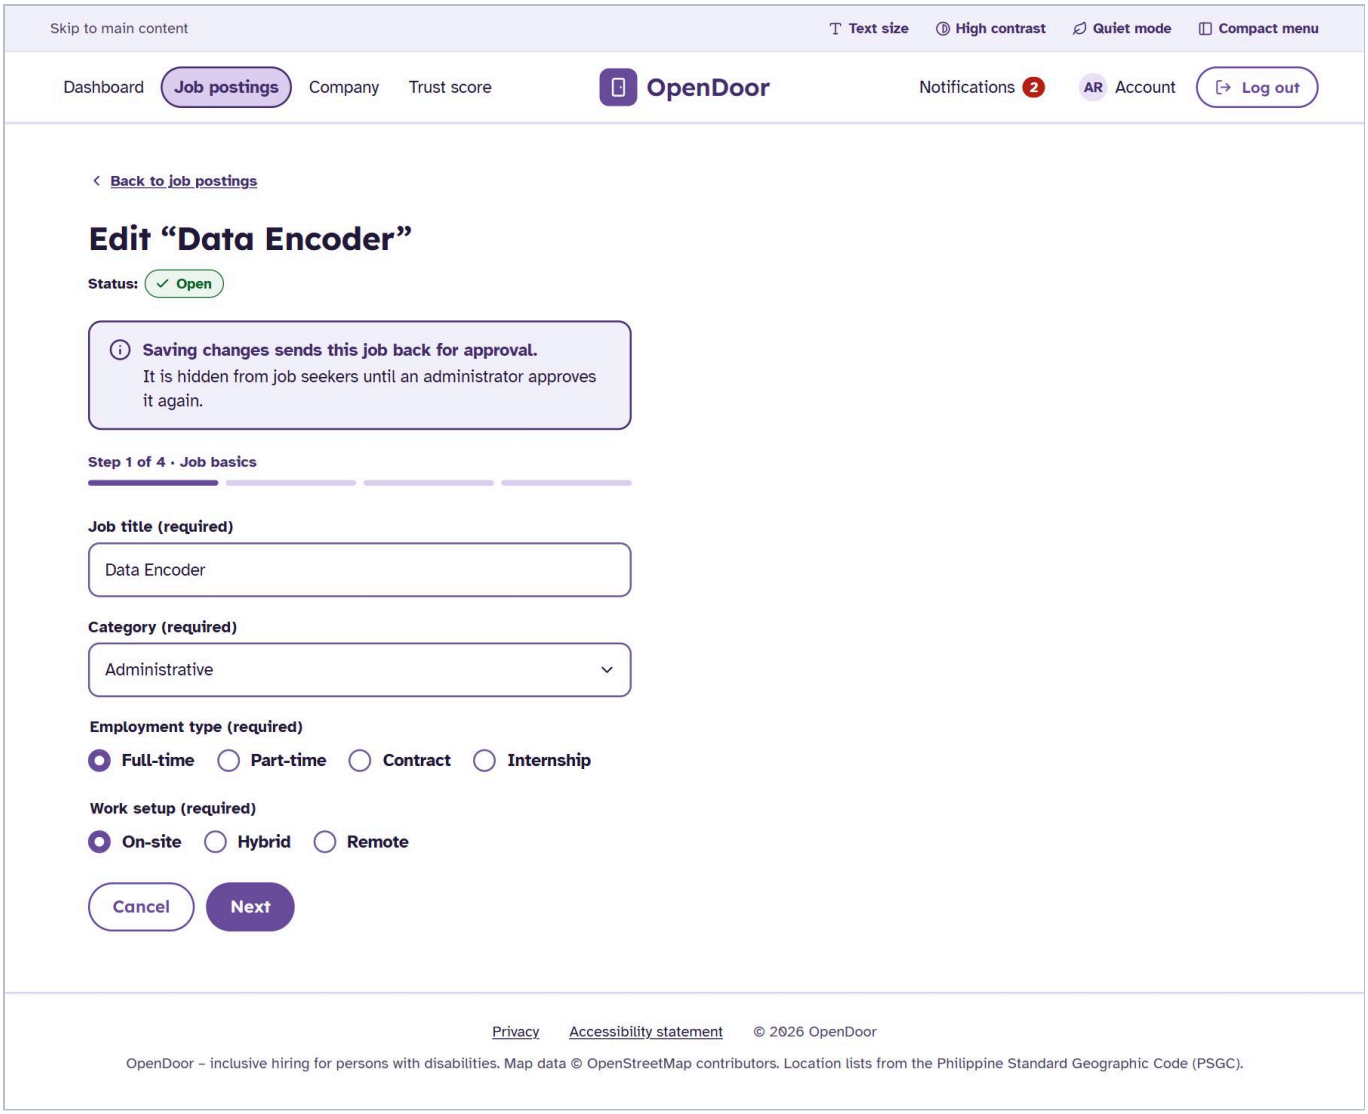

Step 3 · Accommodations – part 1 of 2 `/employer/jobs/6/edit`

Step 3 · Accommodations – part 2 of 2 `/employer/jobs/6/edit`

Step 4 · Review and submit `/employer/jobs/6/edit`

Editing an open posting: it goes back for approval `/employer/jobs/1/edit`

5.5 Applicants

Route	`/employer/jobs/{id}/applicants`
Who	Employer (own postings)
Purpose	Everyone who applied to one job.

ON THE SCREEN

- "‹ Back to job postings"; h1 "Applicants for “{job}””, subtitle "Everyone who applied to this job."
- Filter bar: "Show" by status with the count
- Table: Applicant (link) · Headline · Applied · Status

ACTIONS

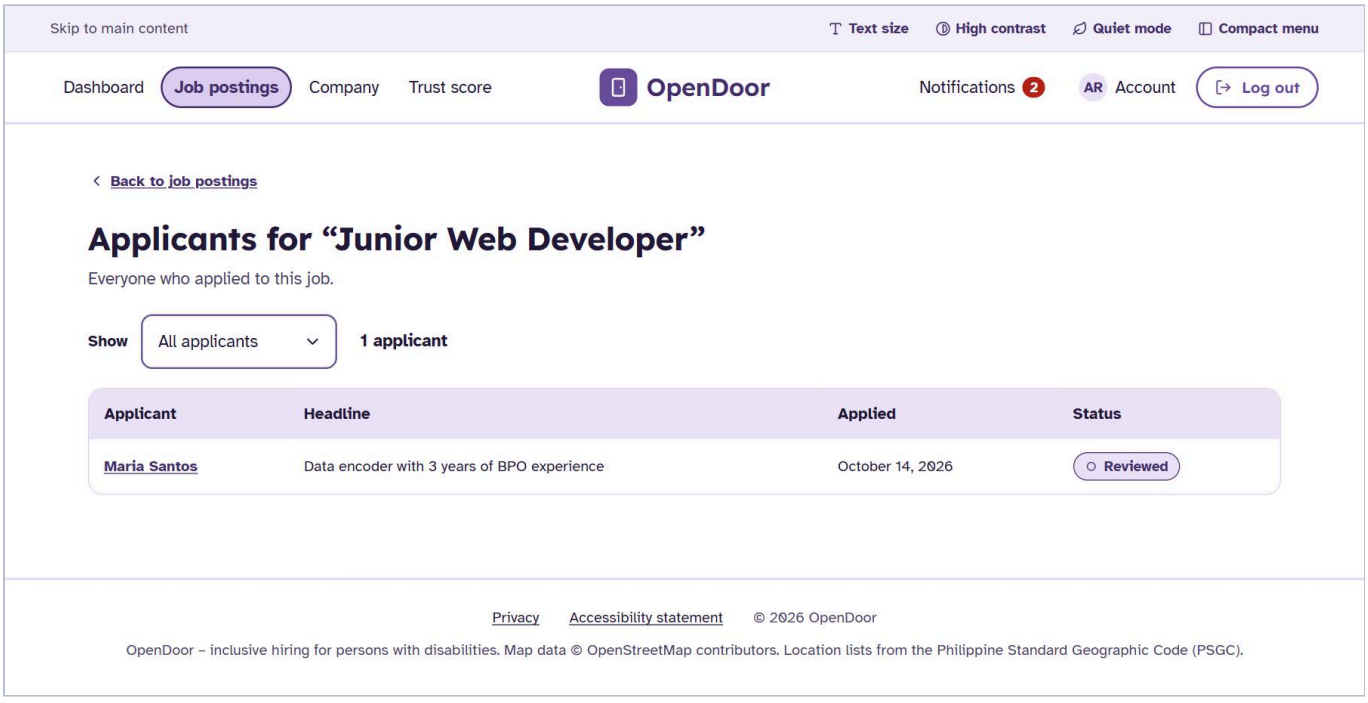

- Open an application

MESSAGES AND STATES

- "No applicants yet"

API

`GET /applications?job_posting_id=&status=&page=`

Screenshot `/employer/jobs/3/applicants`

5.6 Application review

Route	`/employer/applications/{id}`
Who	Employer (applications to own postings)
Purpose	Read one application and decide. Opening a Submitted application marks it Reviewed and tells the job seeker.

ON THE SCREEN

- "‹ Back to applicants"; h1 applicant name; status badge and "Applied for {job} on {date} · {headline}"
- Warning "Interview accommodation requested" with the request
- "Accommodations this applicant needs": badges "{need} · offered in your posting" (✓ green) or "{need} · not listed in your posting" (⚠ amber)
- Cards "Cover note" and "About the applicant": Skills, Work experience, Disability (only when the applicant chose to share it), Résumé link (secure link, new tab)
- "Mark as hired" and "Not selected" (danger outline); hint ""Mark as hired" and "Not selected" are final and ask you to confirm. The applicant is notified."

ACTIONS

- Reviewed only: "Mark as hired" (confirm: final; after 30 days the employee can rate) and "Not selected" (danger confirm: final; the applicant is notified)

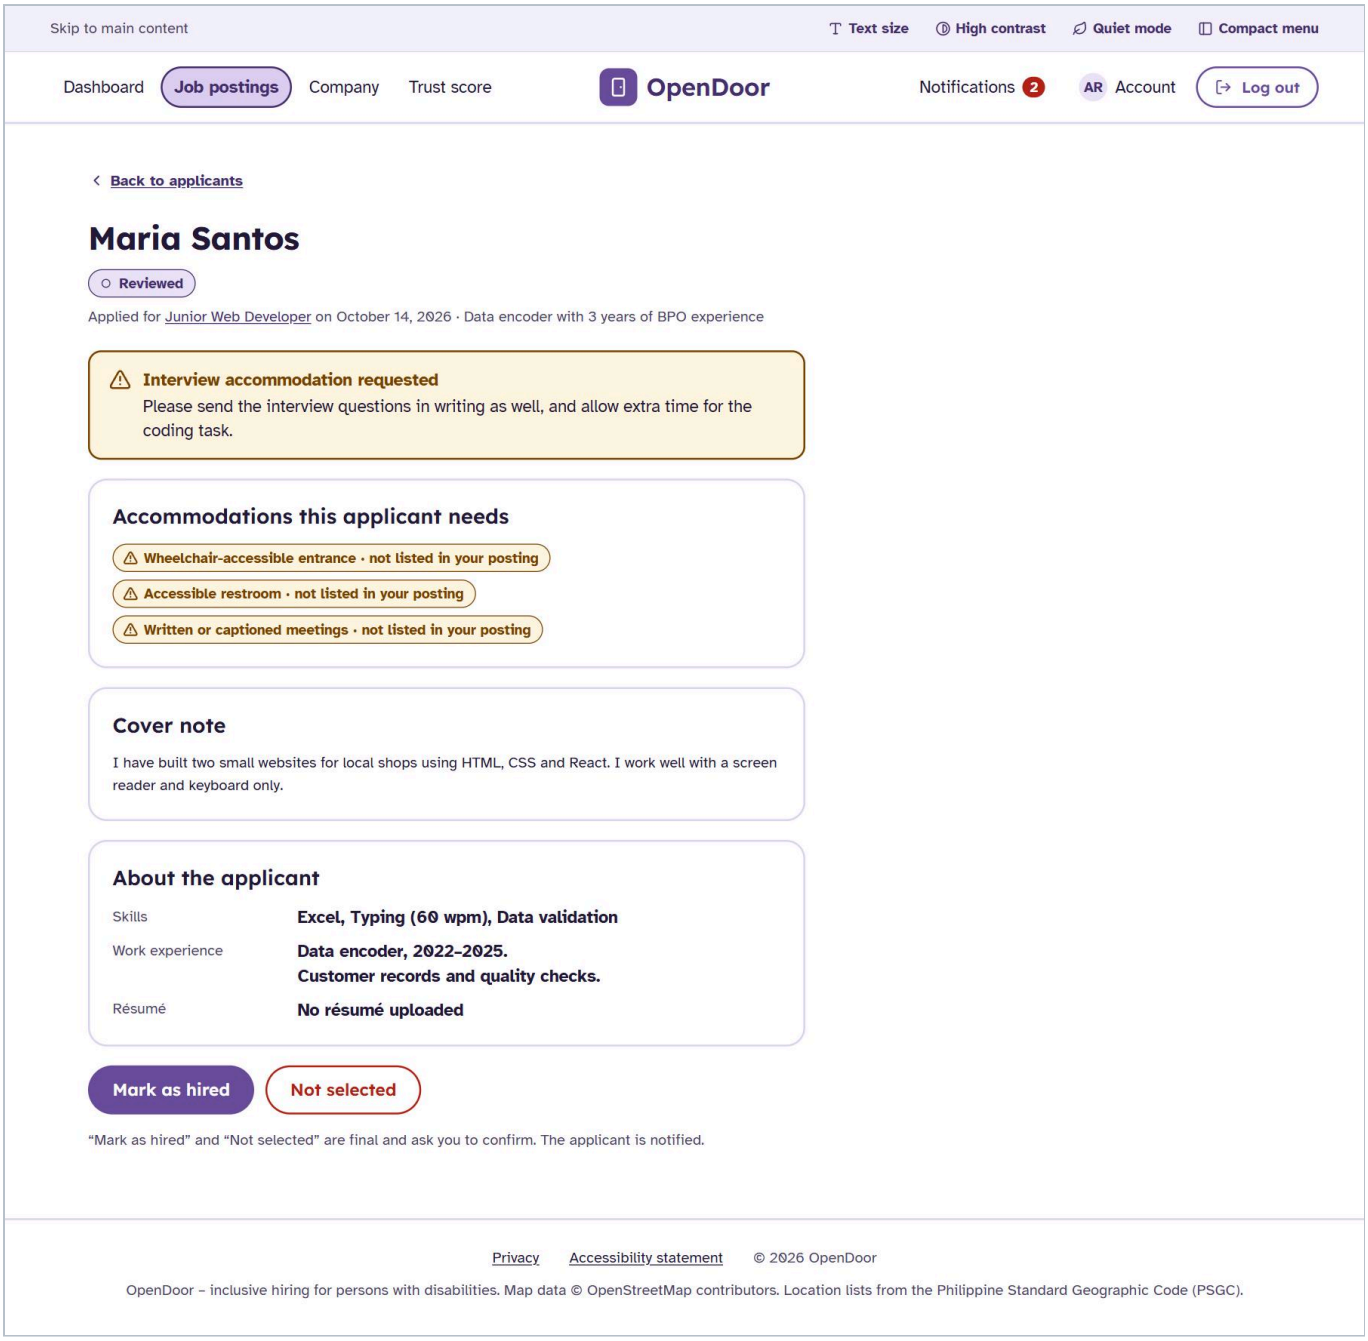

MESSAGES AND STATES

- "The applicant is marked as hired." / "...as not selected."

API

`GET /applications/{id}`

`PATCH /applications/{id}/status {hired|rejected}`

Screenshot `/employer/applications/7`

5.7 Trust score

Route	`/employer/trust-score`
Who	Employer
Purpose	The employer's own score: totals and per-accommodation counts, never individual answers.

ON THE SCREEN

- Subtitle "Whether you keep your accommodation promises."
- Left: card "Your trust score" and info "How it works – Hired employees rate each promised accommodation 30 days after their hire. Partly delivered counts as half. Answers are anonymous. A score is shown from 3 responses."
- Right: table "Each accommodation" (Delivered / Partly / Not delivered) and "Tip: keep your job postings accurate to keep your score high."

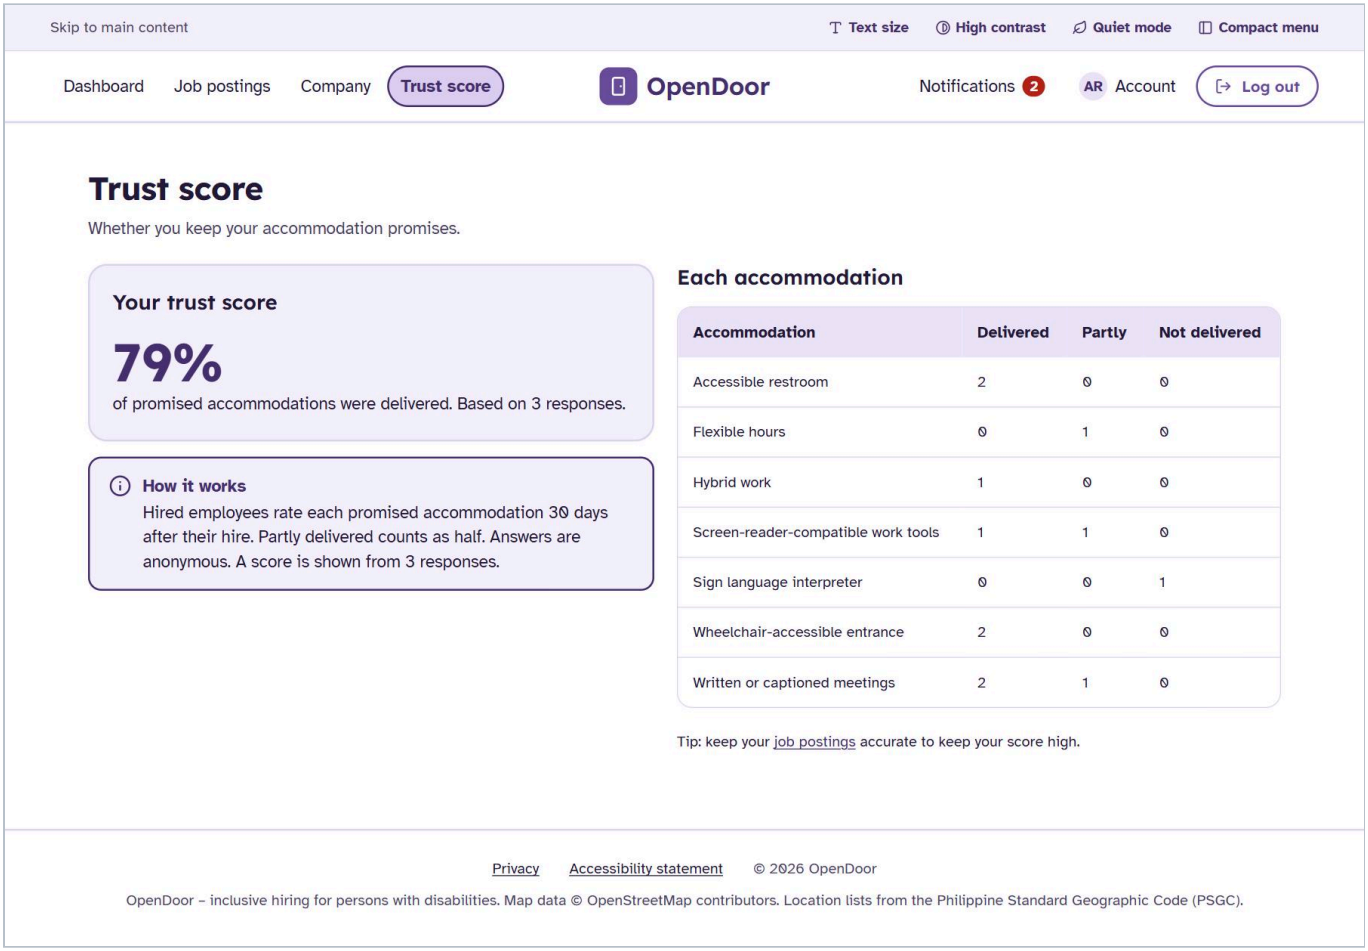

MESSAGES AND STATES

- "Your trust score could not be loaded" (e.g. no company yet)

API

`GET /employer/company`

`GET /employers/{id}/trust-score`

Screenshot `/employer/trust-score`

6 Administrator screens

Demo: OpenDoor Admin (`admin@opendoor.test`). Menu: Dashboard · Employers · Postings · Users | logo | Reports · Feedback · Data · Account · Log out. Administrators receive no notifications, so the header has no Notifications link.

6.1 Administration dashboard

Route	`/admin/dashboard`
Who	Administrator
Purpose	Work queues and platform numbers.

ON THE SCREEN

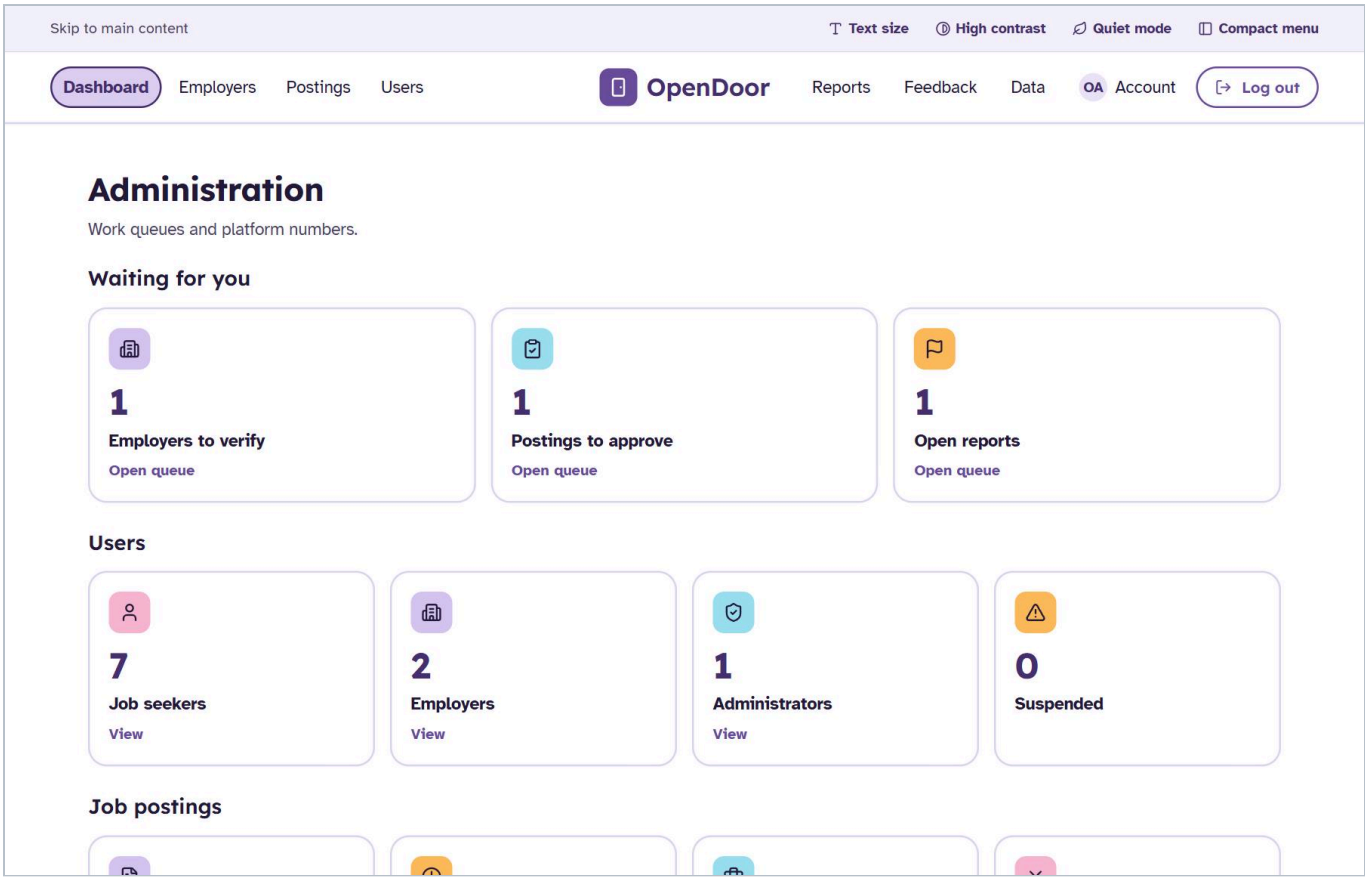

- h1 "Administration", subtitle "Work queues and platform numbers."
- "Waiting for you": Employers to verify, Postings to approve, Open reports – each tile with "Open queue"
- "Users": Job seekers, Employers, Administrators, Suspended
- "Job postings" and "Applications" by status
- "Verification after hire": Feedback responses, Hidden responses, Published trust scores
- "Manage categories and accommodation types"

ACTIONS

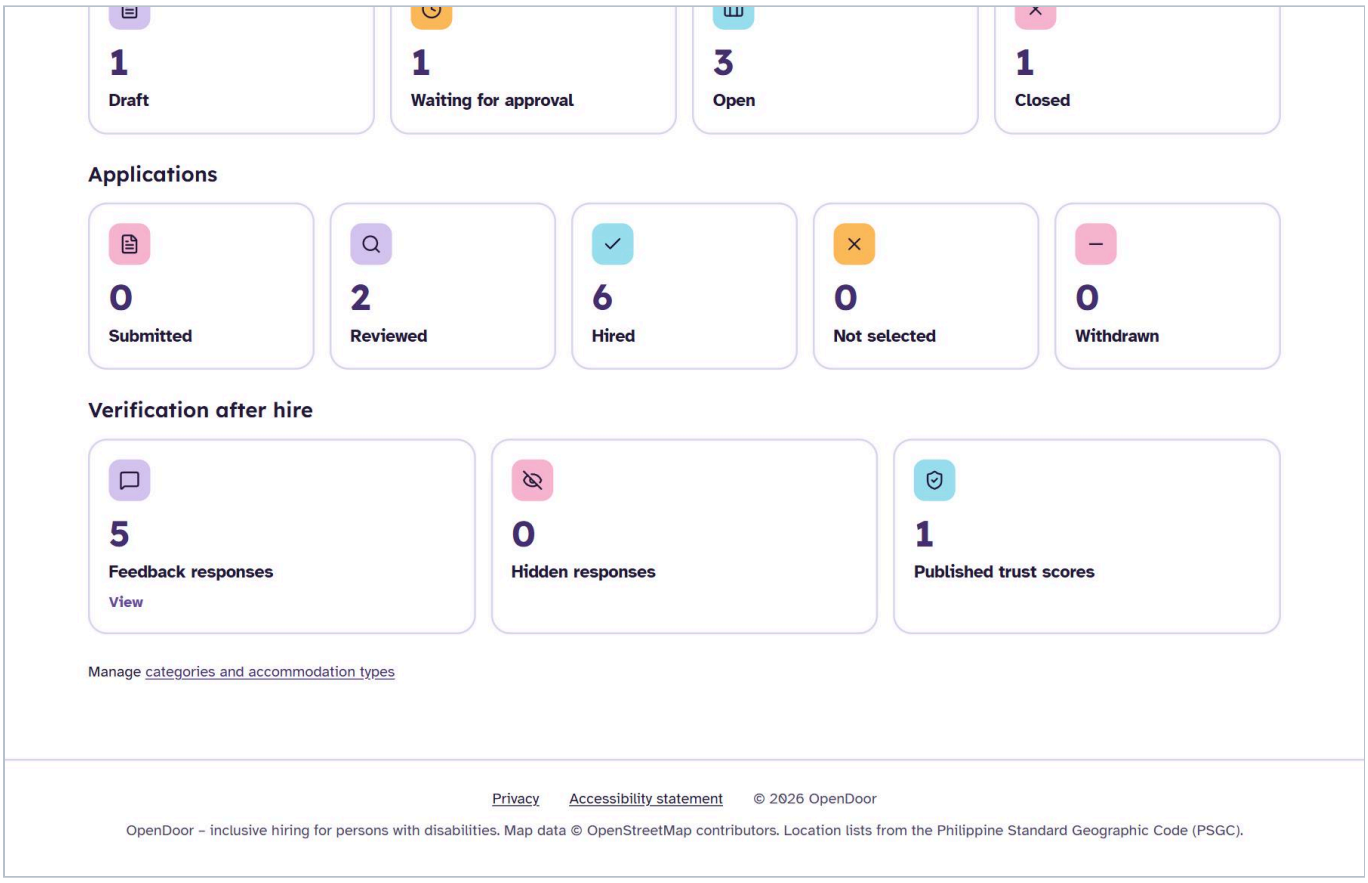

- Open a queue or a filtered list

API

`GET /admin/dashboard`

Screenshot – part 1 of 2 `/admin/dashboard`

Screenshot – part 2 of 2 `/admin/dashboard`

6.2 Employers

Route	`/admin/employers`
Who	Administrator
Purpose	Verification queue and company list.

ON THE SCREEN

- Subtitle by status (e.g. "Companies waiting to be verified.")
- Filter row with labels above: "Show" (Waiting for verification – default, Verified, Not approved), "Company or registration number", "Search"; count
- Table: Company (link) · Registration ("SEC · CS201912345") · Latest registry check (badge or "Not checked yet") · Account (email)

ACTIONS

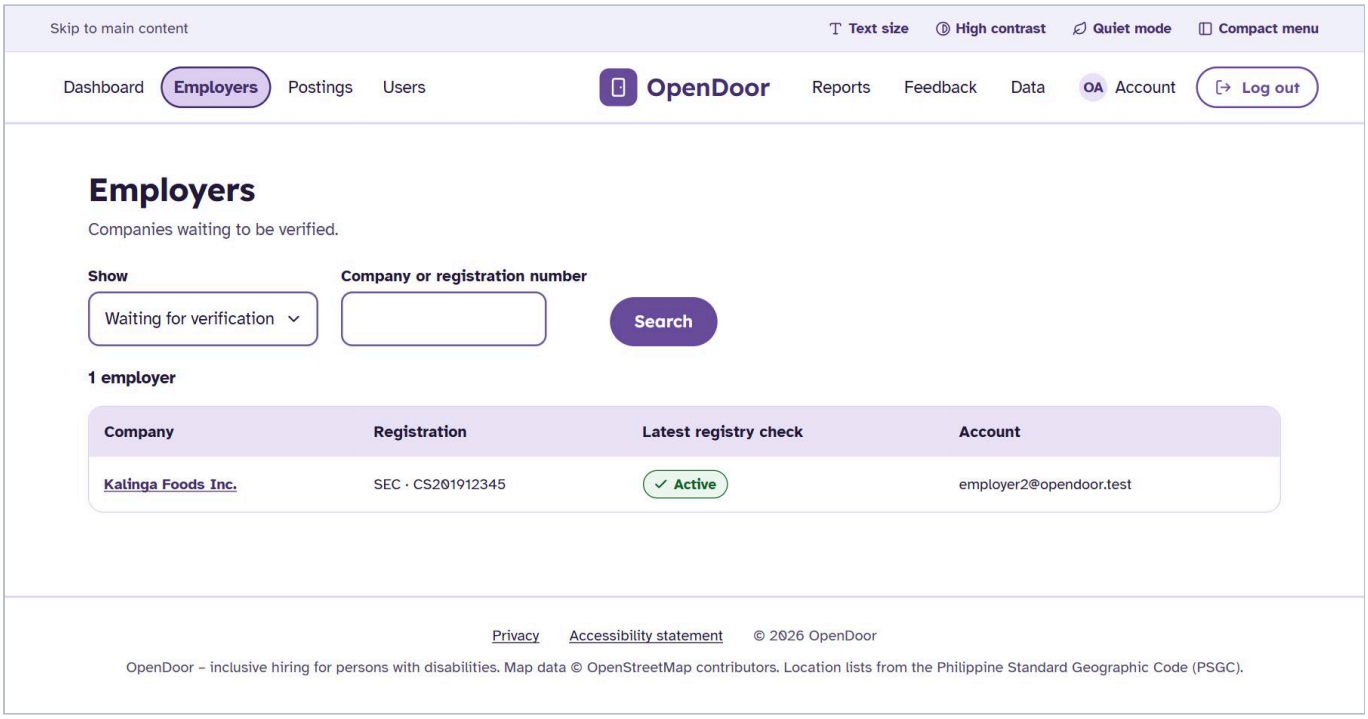

- Open an employer

MESSAGES AND STATES

- "No employers here"

API

```
GET /admin/employers?status=&q=&page=
```

Screenshot `/admin/employers`

6.3 Employer verification

Route	`/admin/employers/{id}`
Who	Administrator
Purpose	Check the registration with the (simulated) DTI/SEC SOAP registry, then decide.

ON THE SCREEN

- "‹ Back to employers"; h1 company; status badge (Verified employer / Waiting for verification / Not approved: {reason})
- Side by side: card "Company" (Registered with, Registration number, Industry, Address, Account, Verified on) and card "Business registry result" (status badge on top – Active, Expired, Cancelled, Not found, Check failed; Registered name, Name match %, Checked; warning "Check this carefully before approving" when not active or the name matches less than 80%)
- "Check with the business registry" (again); info "You decide – The registry result is advice only. Approving lets this company post jobs."
- "Approve" and "Do not approve" (danger outline), or "Remove verification" when verified

ACTIONS

- Check → "The registry check is done."
- Approve → confirm "The employer gets the Verified badge…" (+ "No active registry result is on file." when relevant)
- Do not approve / Remove verification → reason dialog "Reason shown to the employer" → employer notified

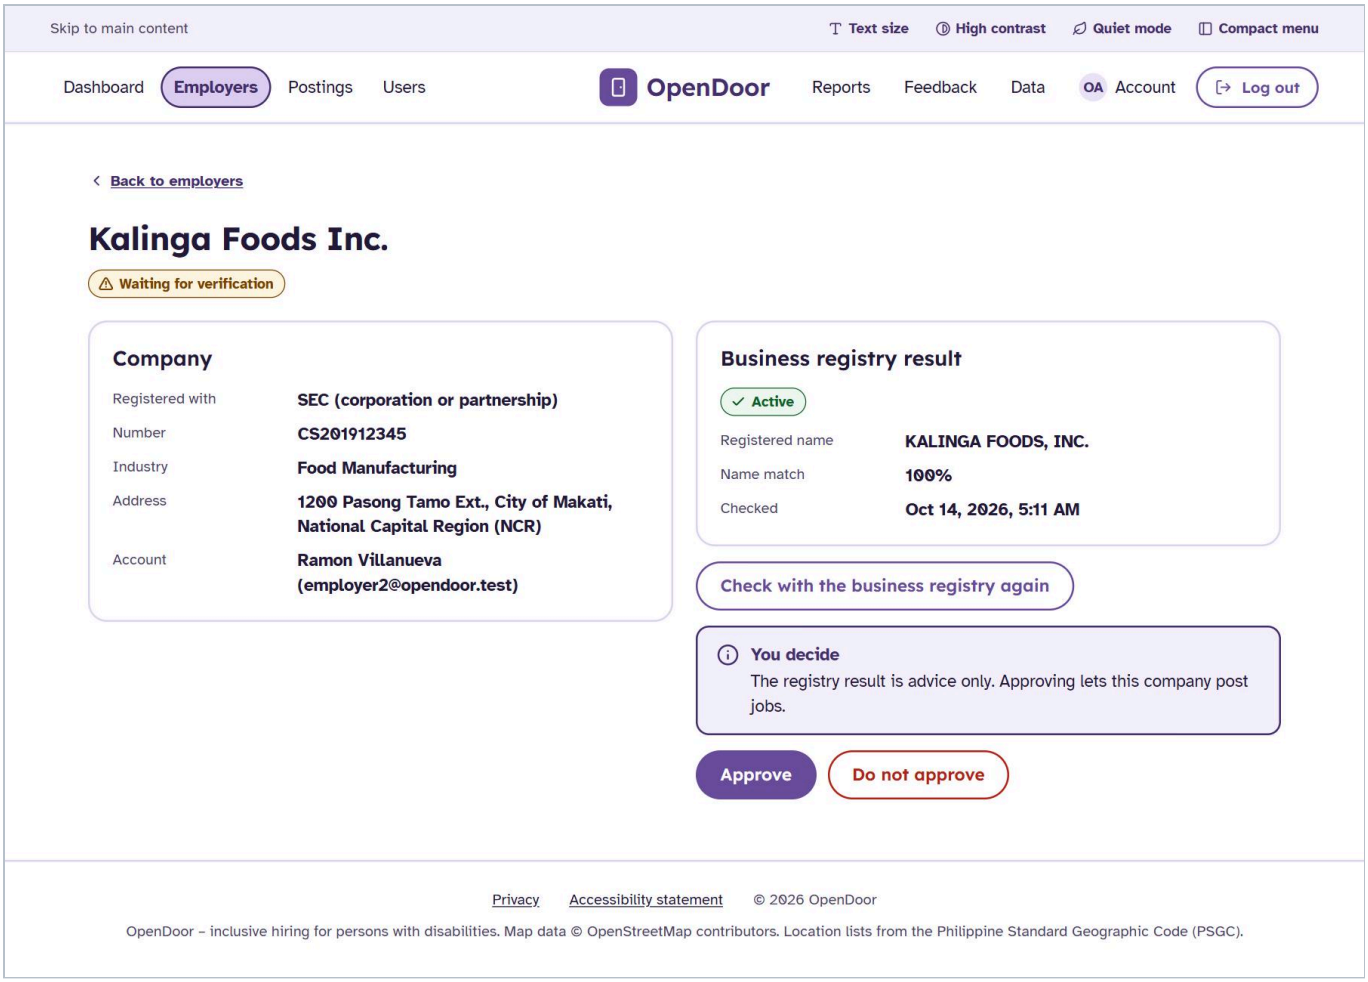

MESSAGES AND STATES

- "This employer has not been checked against the business registry yet."
- "The business registry did not respond. You can try again later or decide manually."
- "OpenDoor could not sign in to the business registry…"
- "The registry rejected the registration details…"

API

`GET /admin/employers/{id}`

`PATCH /admin/employers/{id}/verify {action: check|approve|reject, reason}`

Screenshot `/admin/employers/2`

6.4 Postings (approval)

Route	`/admin/job-postings`
Who	Administrator
Purpose	Approve new or edited postings; remove any posting.

ON THE SCREEN

- h1 "Postings", subtitle "Approve new or edited jobs, or remove any posting."
- Filter bar: "Show" (default Waiting for approval) with the count
- Posting cards: title, company + status badge, "category · type · setup · closes {date}", box "Description and accommodations"
- "Approve", "Do not approve" (waiting only) and "Remove" (danger outline) NEW

ACTIONS

- Approve → "“…” is approved and now open."
- Do not approve → reason (hint: "unclear working hours or a missing accommodation detail") → back to draft, employer notified
- Remove → reason (hint: "false accommodation claims or a duplicate posting") → posting disappears for everyone, applications kept, employer notified

MESSAGES AND STATES

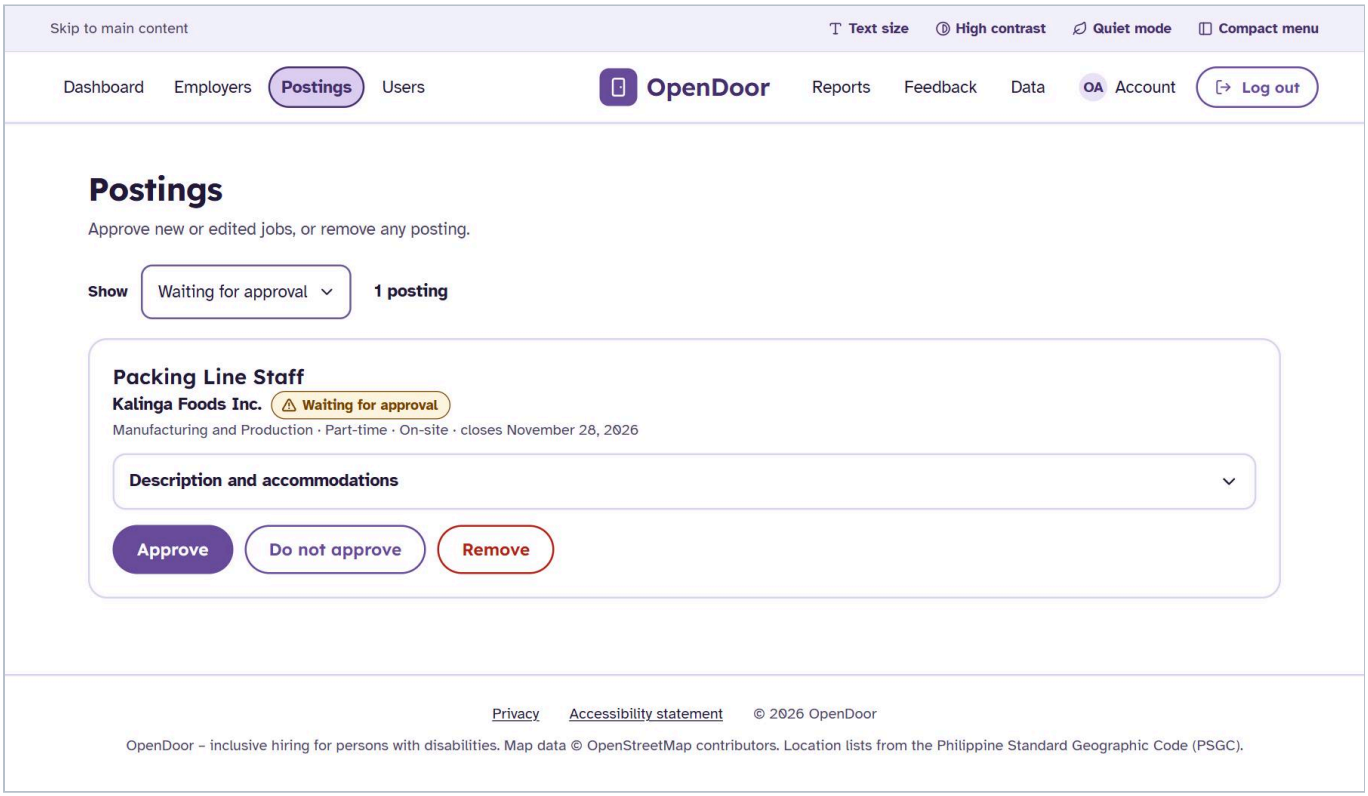

- "No postings are waiting for approval"

API

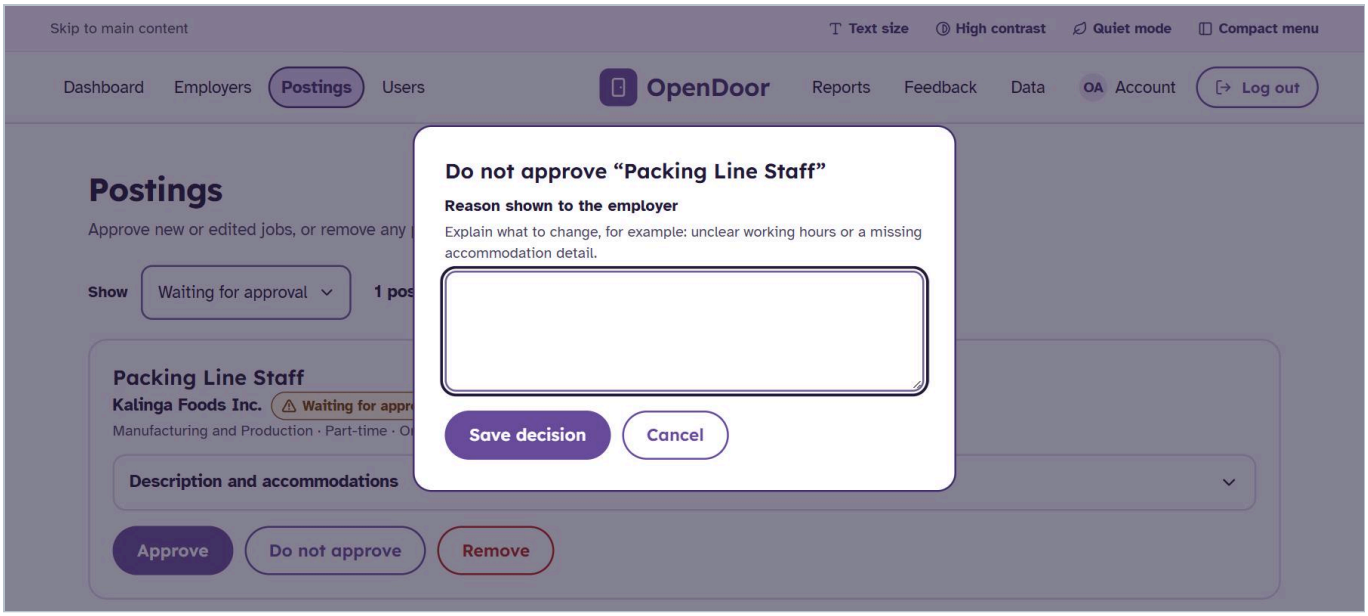

`GET /admin/job-postings?status=&page=`

`PATCH /admin/job-postings/{id}/approve {action, reason}`

`DELETE /admin/job-postings/{id} {reason}`

Screenshot `/admin/job-postings`

"Do not approve" reason dialog `/admin/job-postings`

6.5 Users

Route	`/admin/users`
Who	Administrator
Purpose	Find accounts; suspend or reactivate them.

ON THE SCREEN

- Subtitle "Find accounts. Suspend or reactivate them."
- Filter row: Role (All roles, Job seeker, Employer, Administrator), "Name or email", "Search"; count
- Table: Name · Email · Role · Status (Active / Suspended badge) · Action ("Suspend" danger outline / "Reactivate"; own row says "This is you")

ACTIONS

- Suspend → danger confirm: signed out on every device, cannot log in; for employers "Their job postings are hidden from candidates while the account is suspended. Nothing is deleted."
- Reactivate → confirm; employer postings are shown again

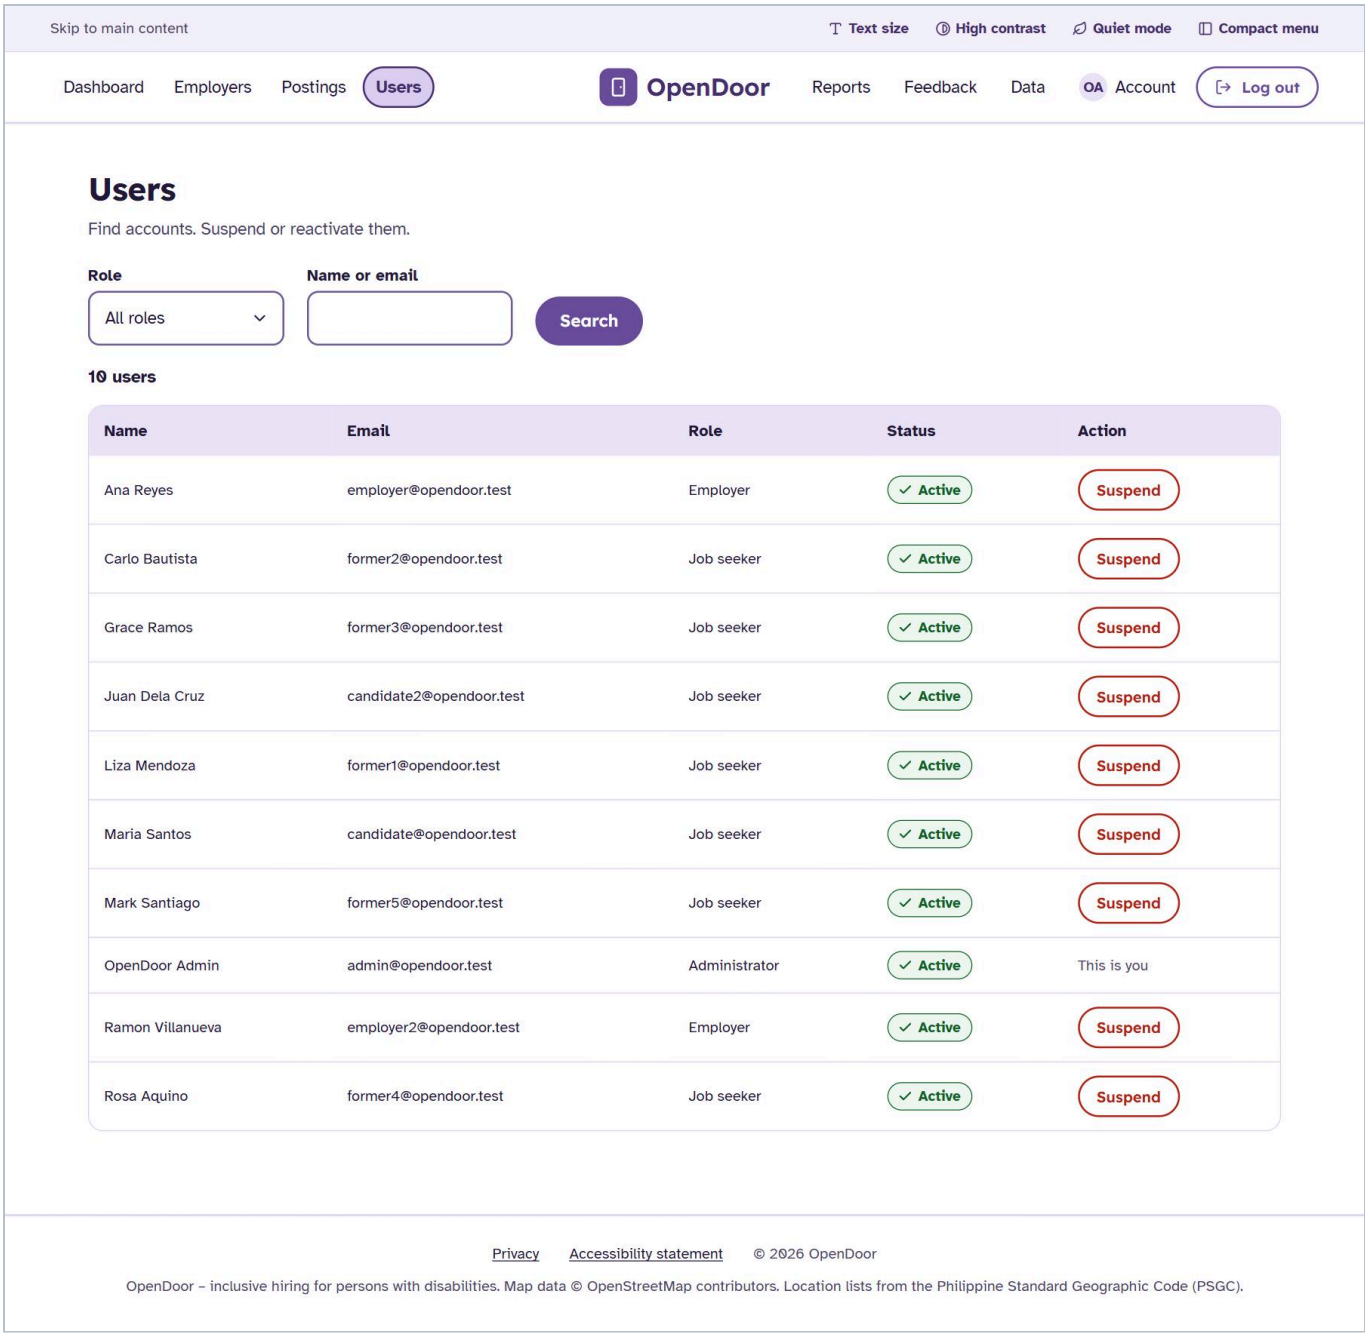

MESSAGES AND STATES

- "No users found"

API

`GET /admin/users?role=&q=&page=`

`PATCH /admin/users/{id}/suspend {suspended}`

Screenshot `/admin/users`

6.6 Reports

Route	`/admin/reports`
Who	Administrator
Purpose	Postings reported by job seekers.

ON THE SCREEN

- Subtitle "Postings that job seekers reported."
- Filter bar: "Show" (Open – default, oldest first; Dismissed; Action taken) with the count
- Report cards: posting title (link), "company · Reported {date} · status badge", the reason as a quote; resolved cards add "Resolved {date} – note: …"
- "Dismiss" and "Take action" on open reports

ACTIONS

- Dismiss / Take action → dialog with an optional "Note" (hint for action: "posting closed, employer contacted") → "The report was dismissed." / "…marked as actioned."

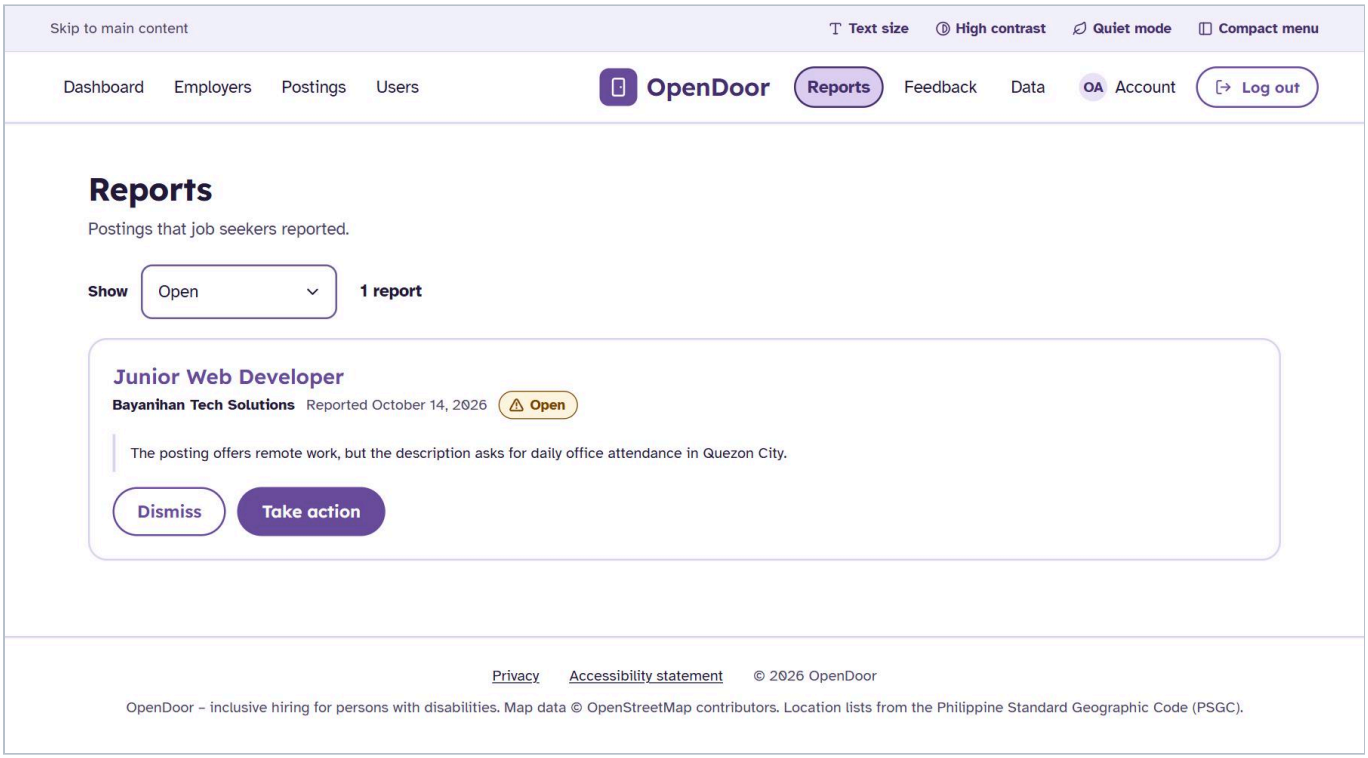

MESSAGES AND STATES

- "No reports here"

API

`GET /admin/reports?status=&page=`

`PATCH /admin/reports/{id} {status, note}`

Screenshot `/admin/reports`

6.7 Feedback

Route	`/admin/feedback`
Who	Administrator
Purpose	Moderate the anonymous ratings behind the trust scores.

ON THE SCREEN

- h1 "Feedback", subtitle "Moderate the anonymous ratings behind trust scores."
- Info "Hide only abusive, off-topic or clearly false responses. – The trust score is recalculated."
- "Show": All responses, Counted in the score, Hidden; count
- Cards: "{company} – {job}", "Submitted {date}", Hidden badge, ratings as tags ("Accessible restroom: Delivered"), comment quote, "Hide response" (danger outline) / "Show again"

ACTIONS

- Hide (danger confirm) / Show again → "The employer's trust score will be recalculated."

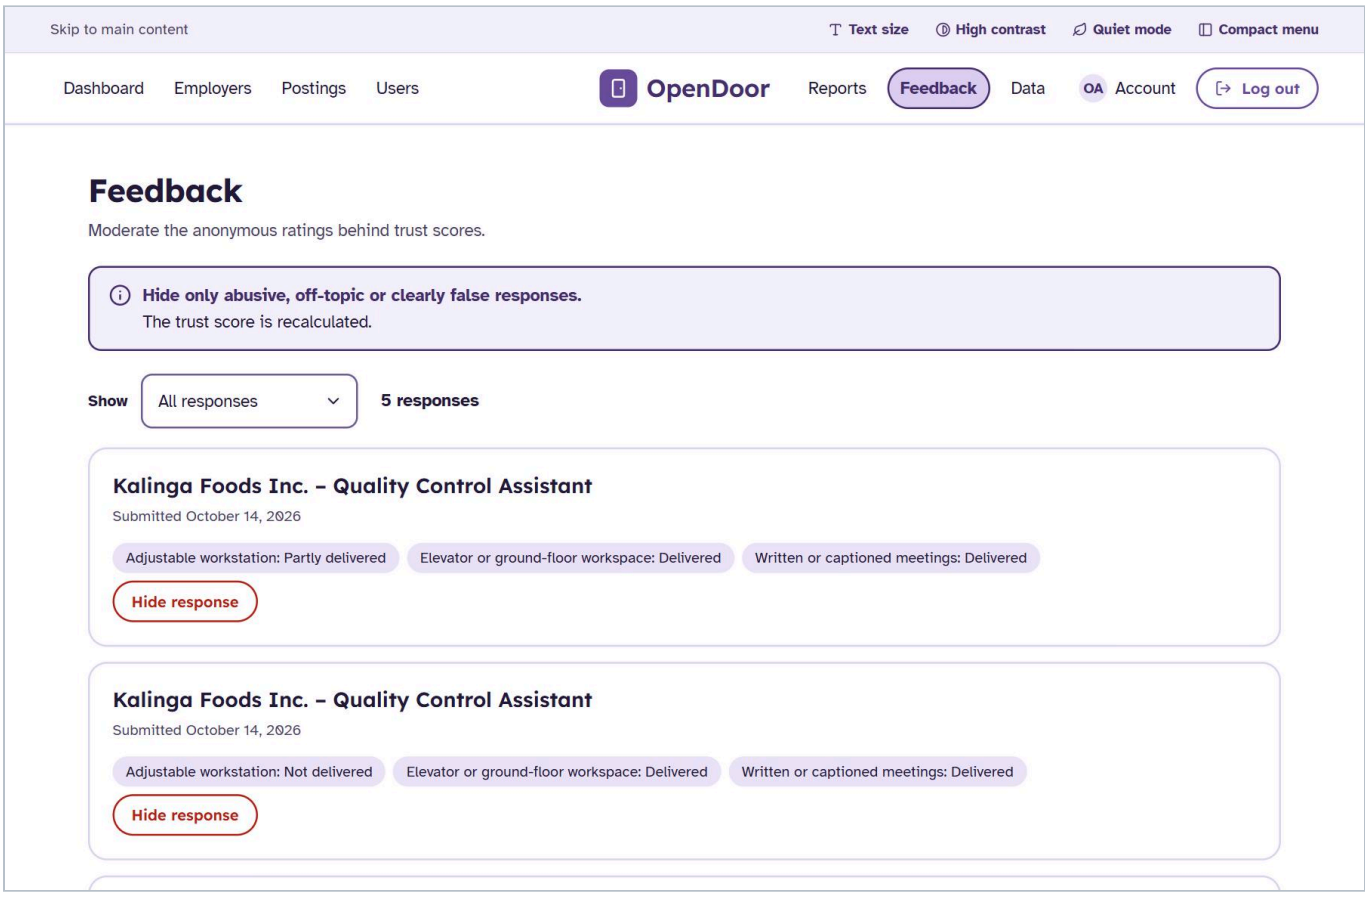

MESSAGES AND STATES

- "No feedback responses here"

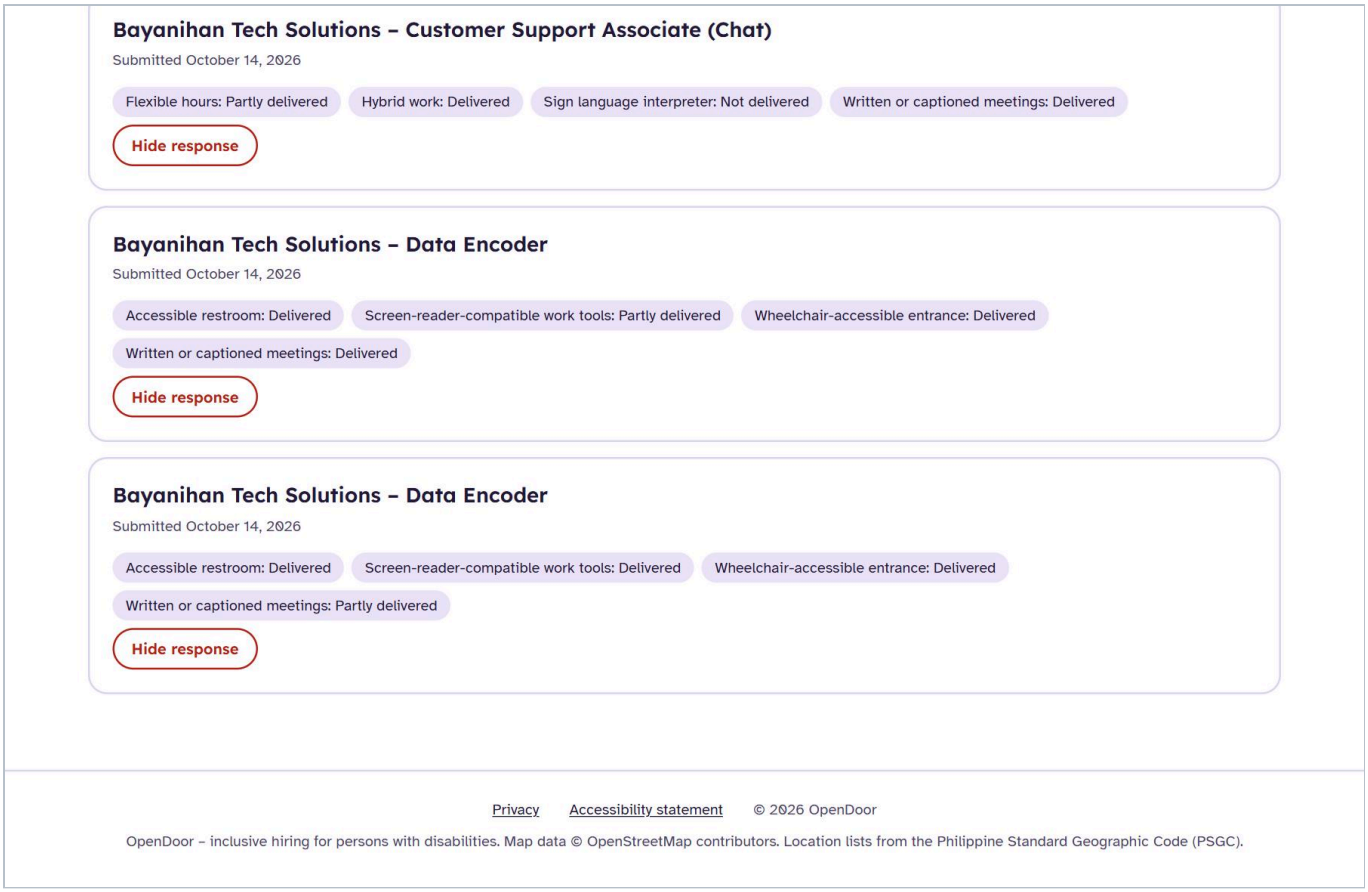

API

`GET /admin/feedback?hidden=&page=`

`PATCH /admin/feedback/{id}/hide {hidden}`

Screenshot – part 1 of 2 `/admin/feedback`

Screenshot – part 2 of 2 `/admin/feedback`

6.8 Master data

Route	`/admin/master-data`
Who	Administrator
Purpose	Job categories and accommodation types used everywhere in the forms.

ON THE SCREEN

- Subtitle "Categories and accommodation types used in every form."
- Card "Job categories": table Name · Actions ("Rename" dialog, "Delete"); "New category" and full-width "Add category"
- Card "Accommodation types": table Name – description · Group · Status (In use / Retired badge) · Actions (Edit, Delete or Restore); "Add accommodation type" → dialog with Name, Group (5 groups), Description (optional, "One short sentence shown under the checkbox.")

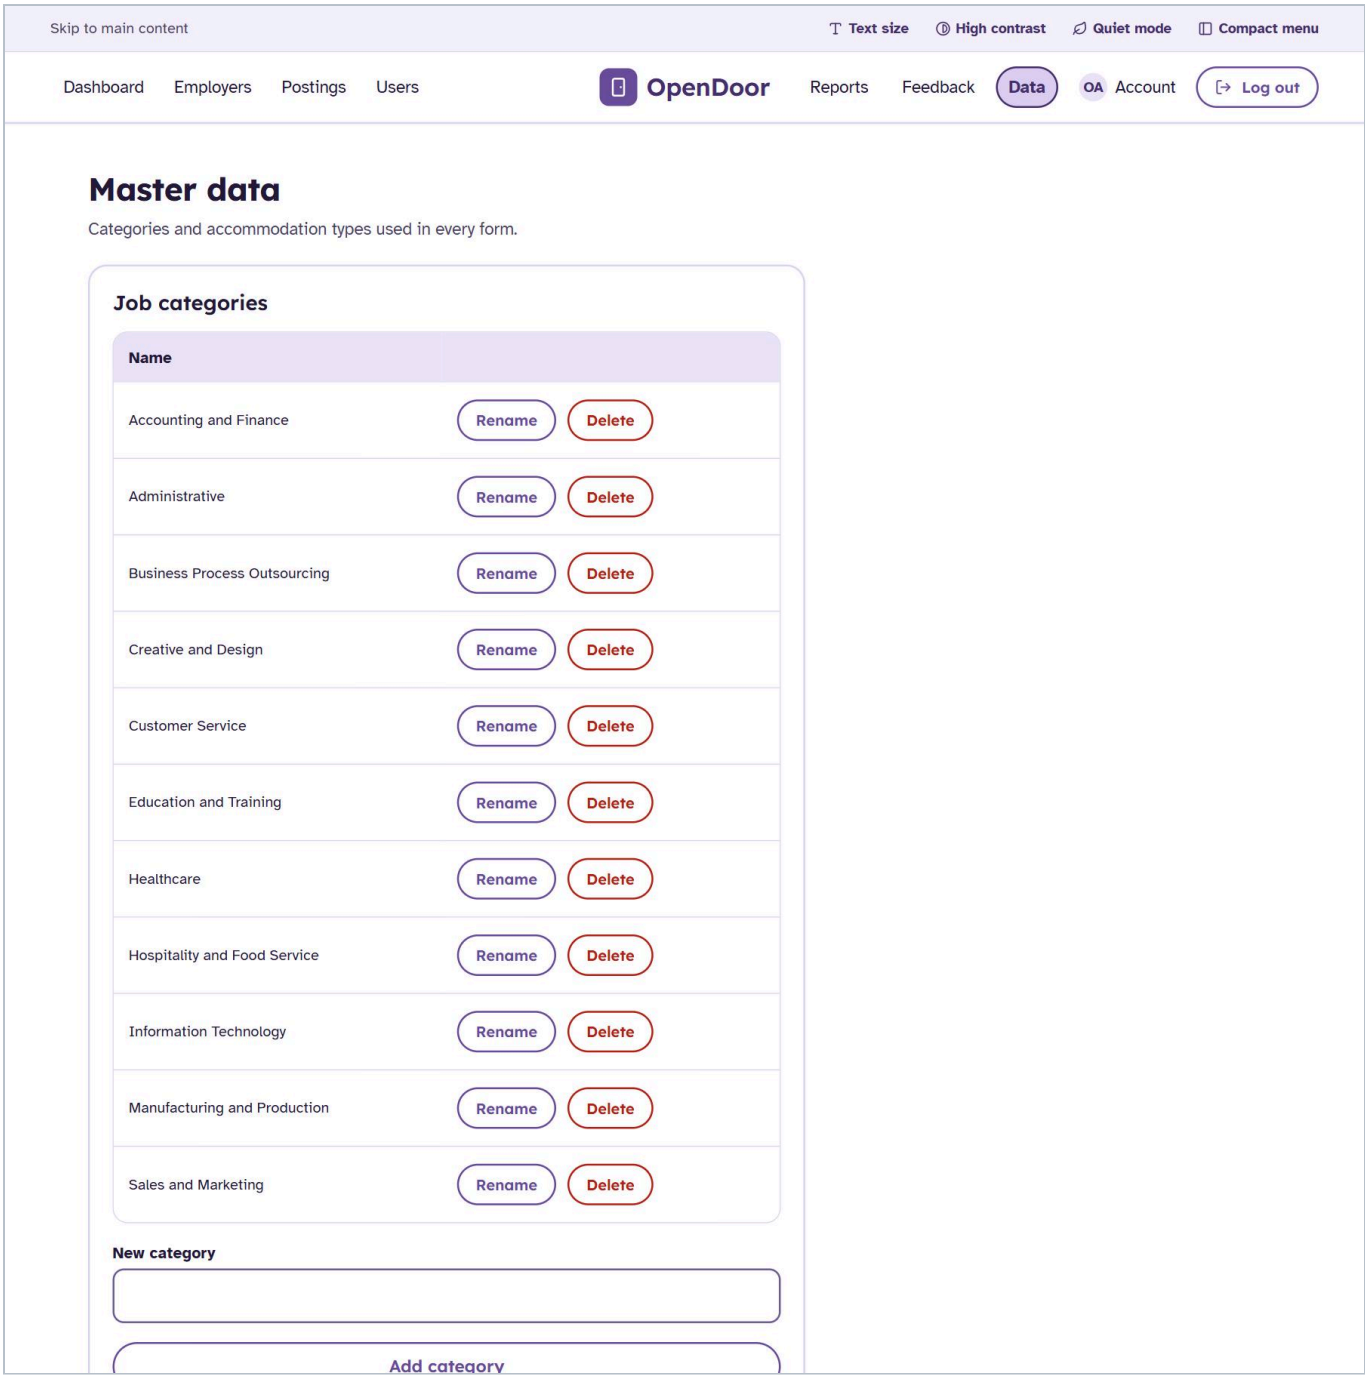

ACTIONS

- Delete a category in use → refused: "Categories used by job postings cannot be deleted. Rename them instead."
- Delete an accommodation in use → retired instead ("It no longer appears in forms."); Restore makes it available again

API

`GET /categories, POST/PUT/DELETE /admin/categories`

`GET/POST /admin/accommodations, PUT/DELETE /admin/accommodations/{id}`

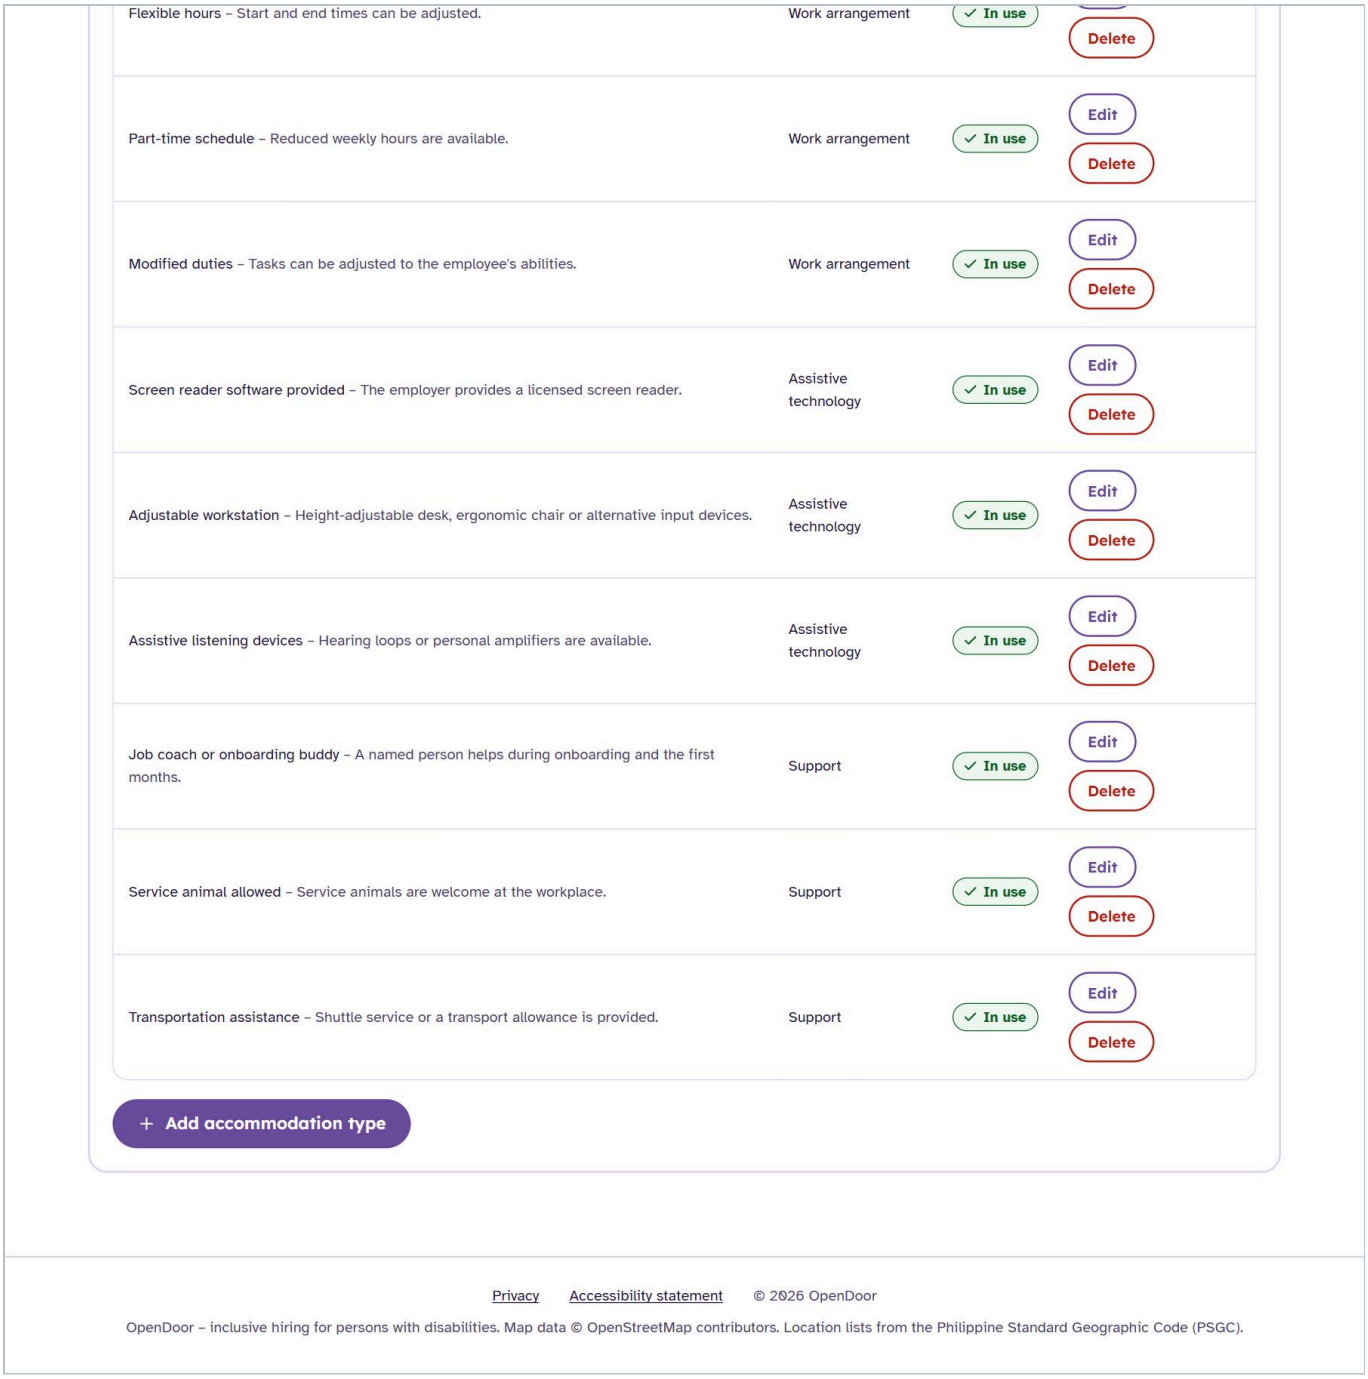

Screenshot – part 1 of 3 `/admin/master-data`

Accommodation types

Name	Group	Status	Actions
Wheelchair-accessible entrance – Step-free entrance with a ramp or level access.	Physical access	✓ In use	Edit Delete
Accessible restroom – Restroom with grab bars, enough turning space and an accessible door.	Physical access	✓ In use	Edit Delete
Elevator or ground-floor workspace – The workspace can be reached without stairs.	Physical access	✓ In use	Edit Delete
Accessible parking – Reserved parking slot close to the entrance.	Physical access	✓ In use	Edit Delete
Sign language interpreter – Filipino Sign Language interpreter for interviews, meetings and training.	Communication	✓ In use	Edit Delete
Written or captioned meetings – Meetings have captions, transcripts or written summaries.	Communication	✓ In use	Edit Delete
Screen-reader-compatible work tools – Internal systems and documents work with screen readers.	Communication	✓ In use	Edit Delete
Remote work – The role can be done fully from home.	Work arrangement	✓ In use	Edit Delete
Hybrid work – Part of the week can be worked from home.	Work arrangement	✓ In use	Edit Delete
			Edit

Screenshot – part 3 of 3 `/admin/master-data`

7 Screens for every signed-in user

Reached from the header: the Notifications link (job seekers and employers) and "Account".

7.1 Notifications

Route	`/notifications`
Who	Job seeker, Employer
Purpose	In-app notices, newest first (12 per page).

ON THE SCREEN

- Subtitle "Updates about your applications and postings."
- Bold "2 unread notifications" / "Everything is read." and "Mark all as read"
- Each notice is a card: unread ones are tinted with a stronger border and a "New" badge; the message links to the related page; date and time; "Mark as read" on every unread notice
- Each notice is also emailed unless the user turned emails off in Account (section 9)

ACTIONS

- Open a notice → its page, and it is marked read
- Mark all as read → "All notifications are marked as read."

MESSAGES AND STATES

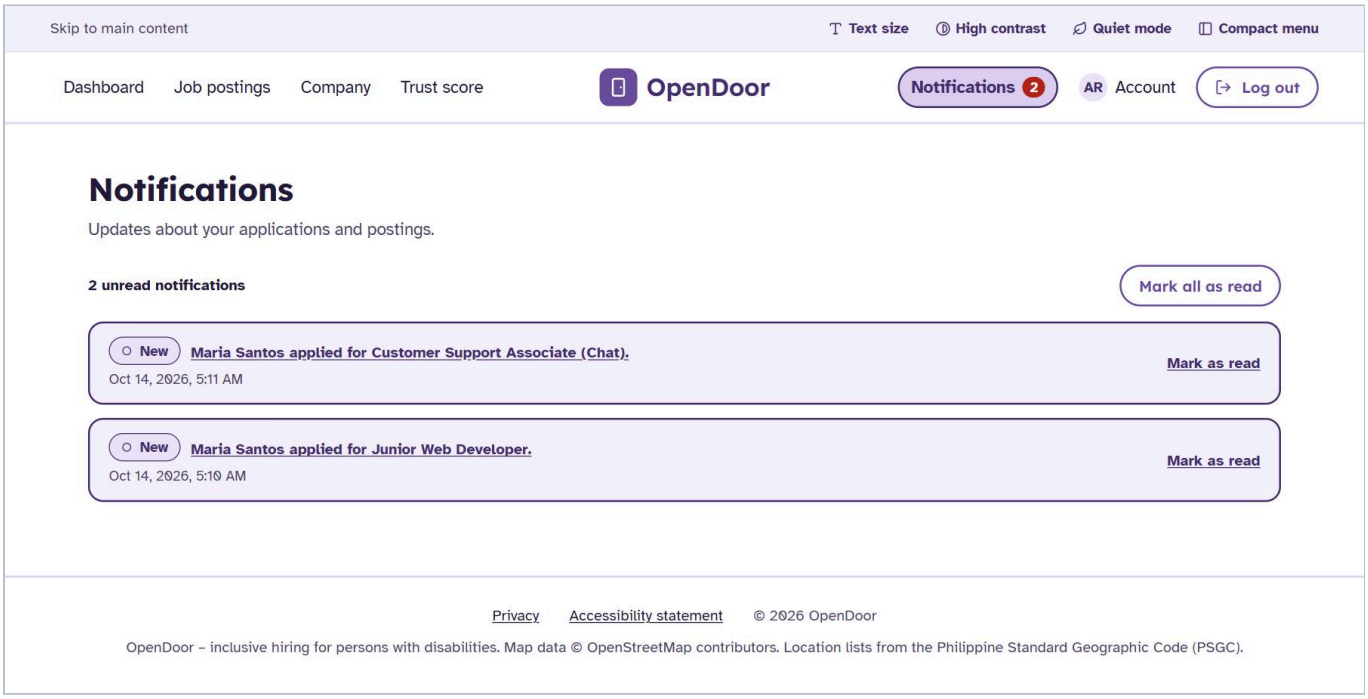

- "No notifications yet – You will be told here when an application or posting changes."

API

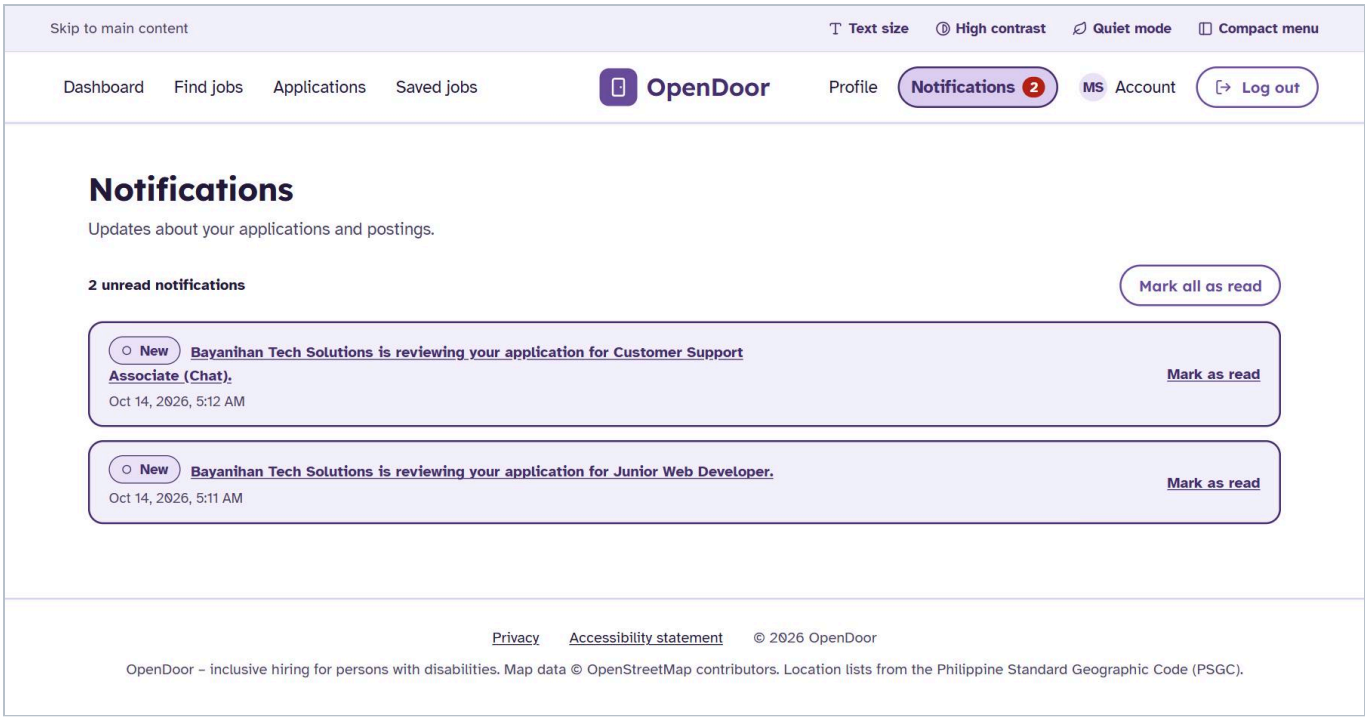

`GET /notifications?page=`

`PATCH /notifications/{id}/read`

`PATCH /notifications/read-all`

Employer `/notifications`

Job seeker `/notifications`

7.2 Account NEW

Route	`/account (?tab=password, ?tab=email)`
Who	All signed-in users
Purpose	Display settings, password and email notifications.

ON THE SCREEN

- h1 "Account", subtitle "{name} · {email} · {role}"; tabs "Display", "Password", "Email notifications" (not for administrators)
- Display: "Changes apply right away and are saved to your account. Decoration and the top menu are kept on this device only."; choices Text size (Standard, Large (125%), Extra large (150%)), Colours (Standard colours, High contrast), Motion (Allow animations, Reduce motion), Decoration (Show sparkles and colours, Quiet: plain and calm), Top menu (Show all links, Compact: one Menu button); the result as an alert
- Password: "Change password" – Current password, New password ("At least 8 characters, different from the current one."), Confirm new password, "Change password"
- Email notifications NEW: checkbox "Send me an email for each notification" ("On by default. The email repeats the notice and links to OpenDoor. It never includes disability or accommodation details."), the result as an alert, and an "Example email" preview with the user's first name

ACTIONS

- A display change applies at once (the display bar follows) and is saved to the account (other devices get it at the next login)
- The email checkbox saves at once: "Email notifications are on." / "Email notifications are off. You still see every notice under Notifications."
- Change password → "Your password is changed." (other devices are signed out)

MESSAGES AND STATES

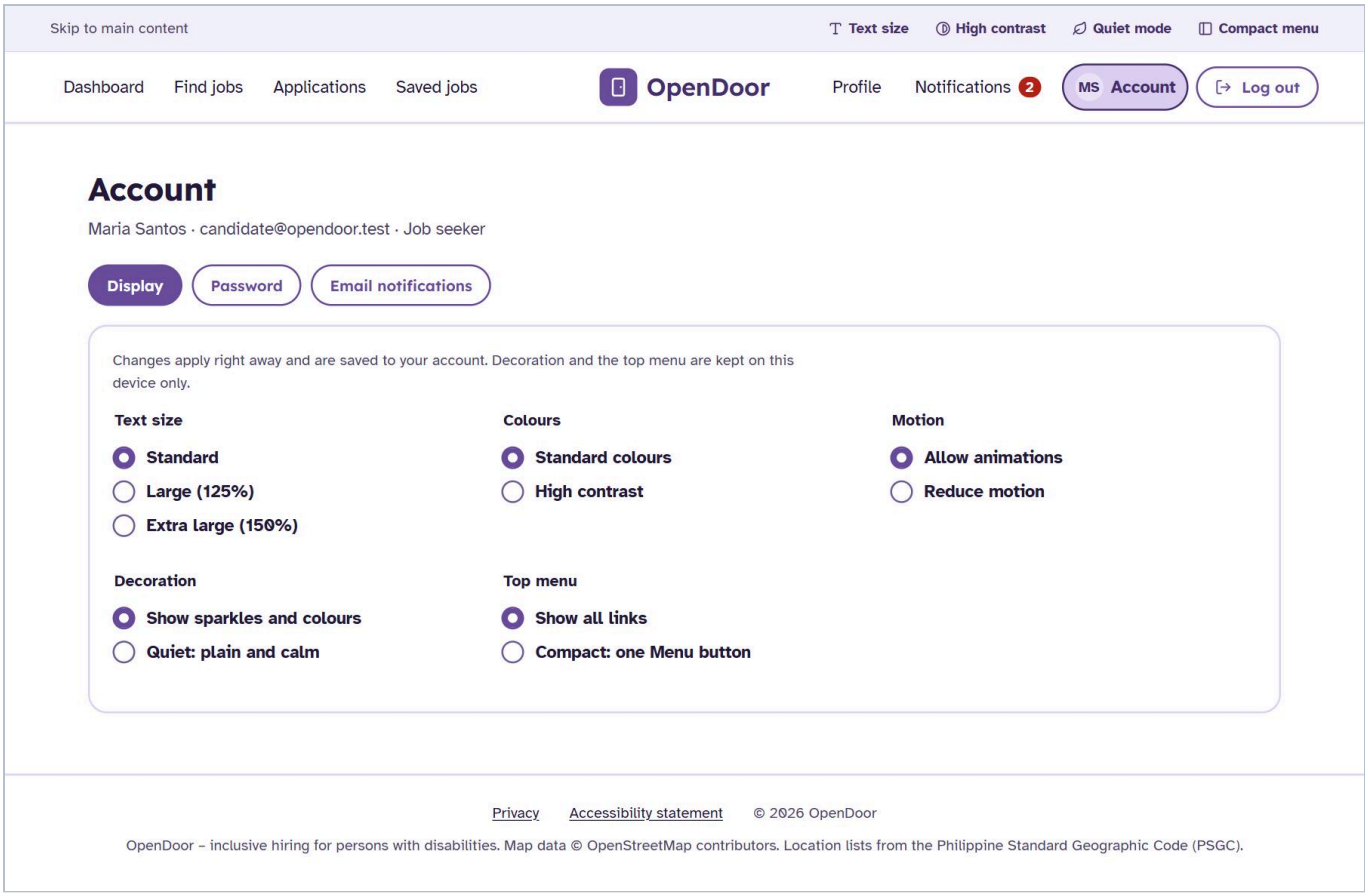

- Saving failed: "Display settings applied on this device, but not saved to your account. Change a setting to try again."
- Email choice not saved: the checkbox goes back and "Your choice was not saved. Please try again."

API

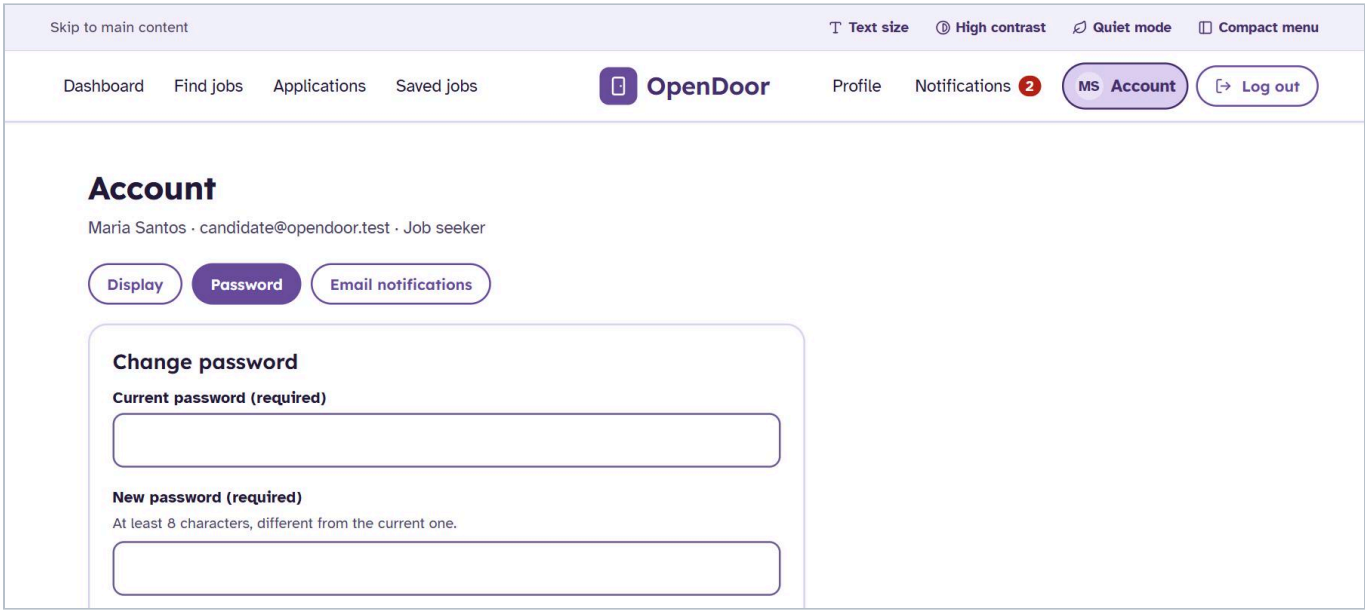

`PUT /me/display-prefs {text_size, contrast, motion}`

`PUT /me/email-notifications {enabled}`

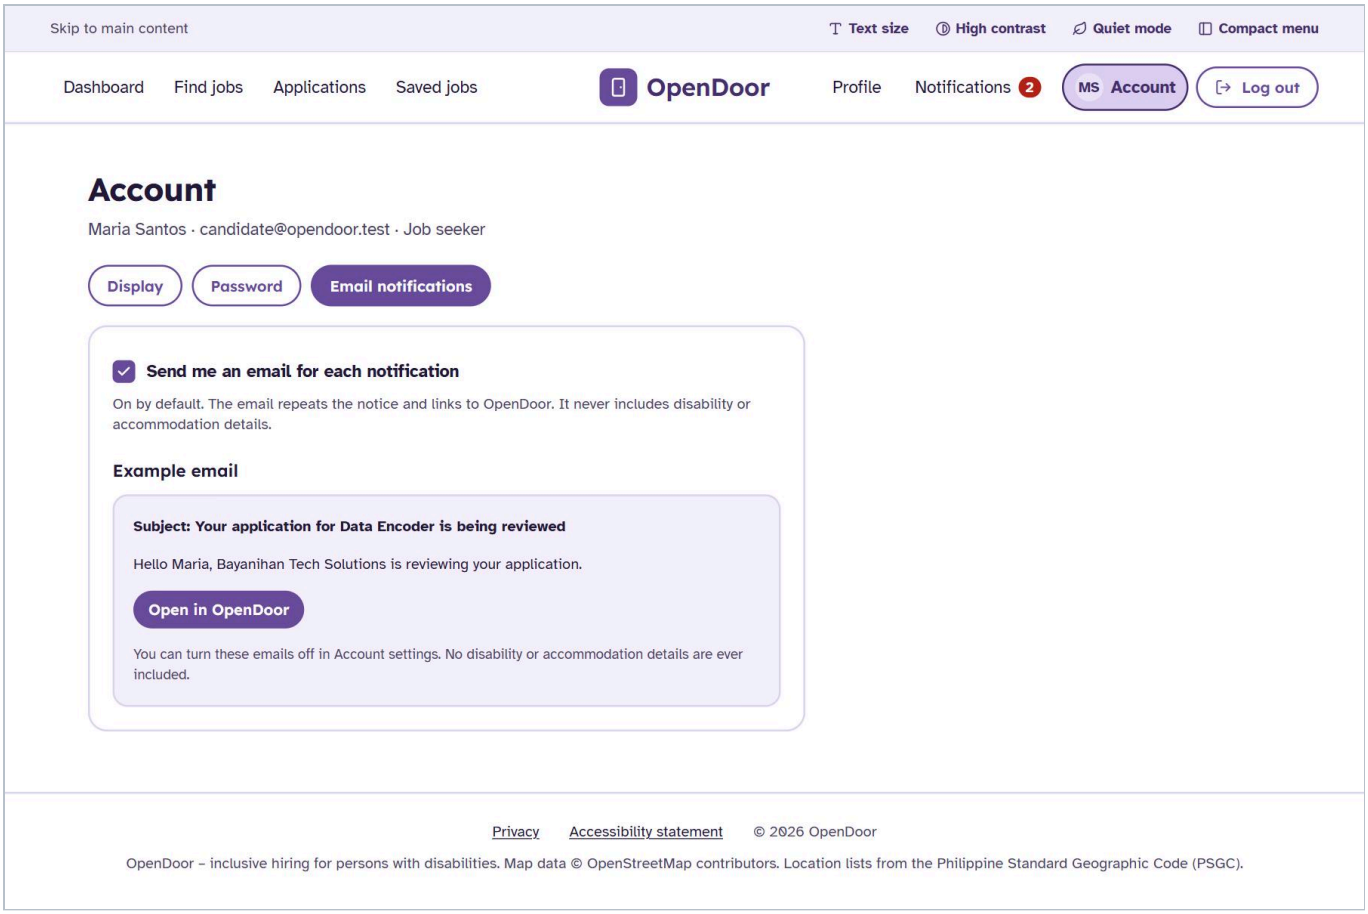

`PUT /me/password`

Tab "Display" `/account`

Tab "Password" `/account?tab=password`

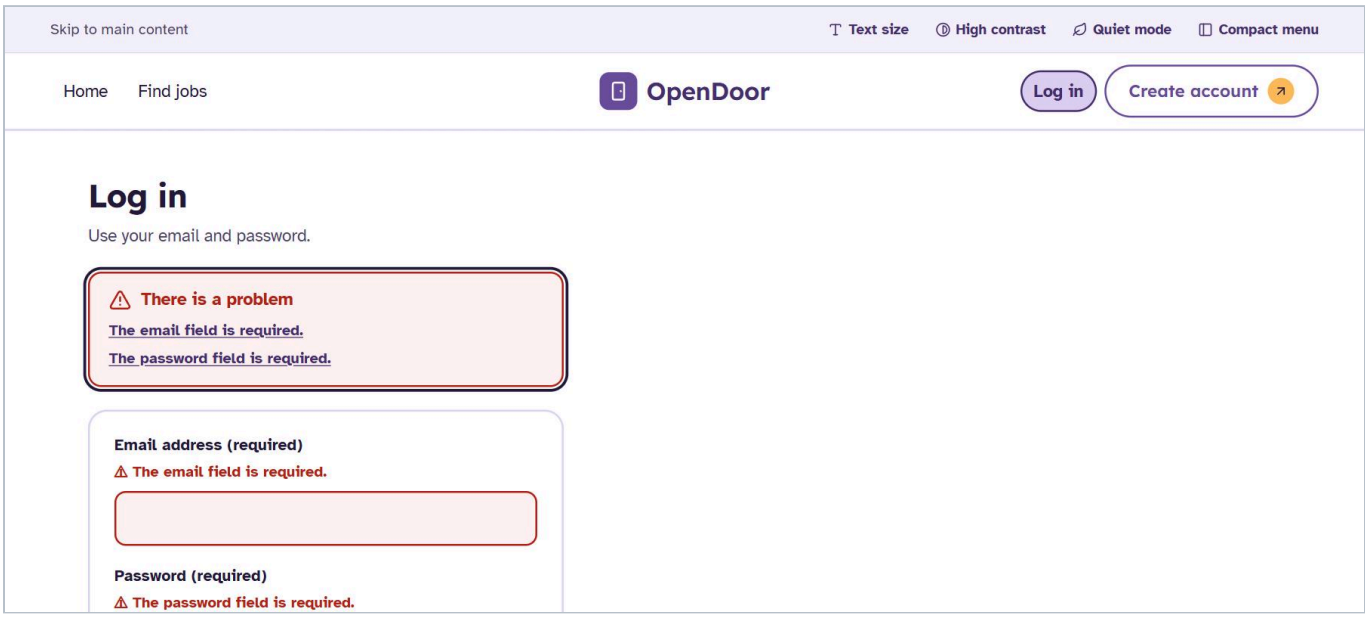

Tab "Email notifications" with the example email `/account?tab=email`

8 Dialogs, states and phone layout

Patterns the new UI must keep. Most of them already appear on the screen pages; here they are side by side.

8.1 Error summary after a failed submit

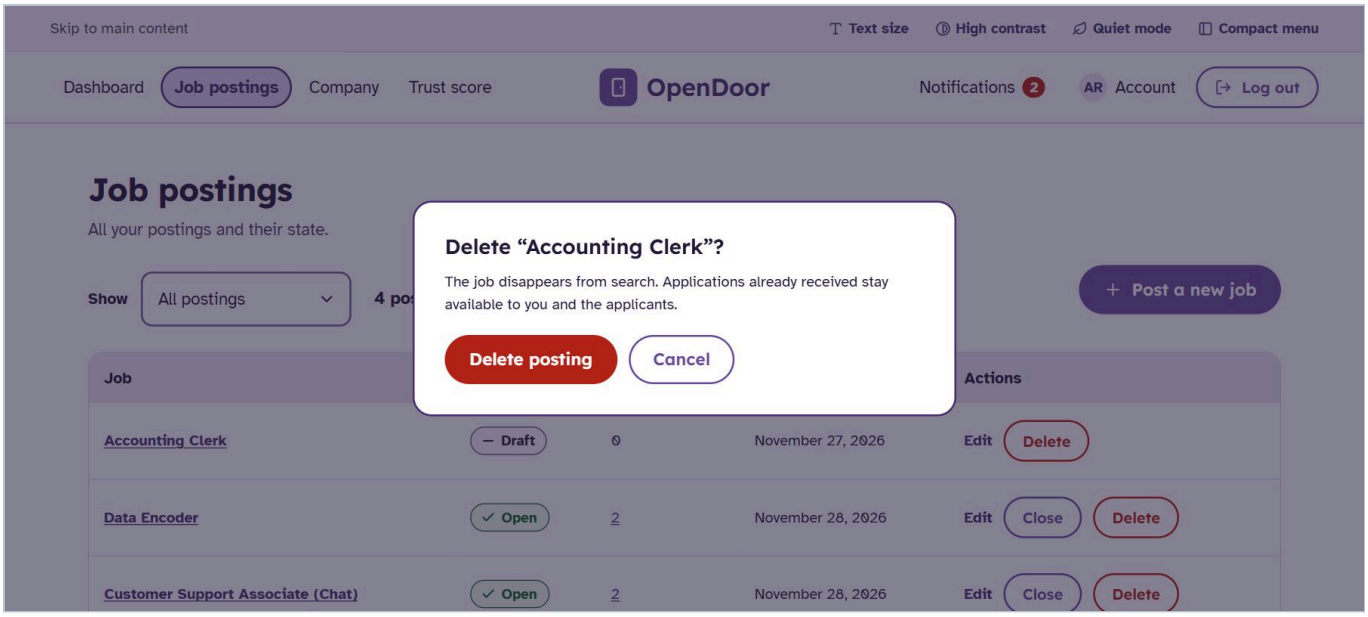

Focus moves to the summary; each line links to its field; each field shows its error under the label and gets a red border.

Screenshot `/login`

8.2 Confirm dialog (dangerous action)

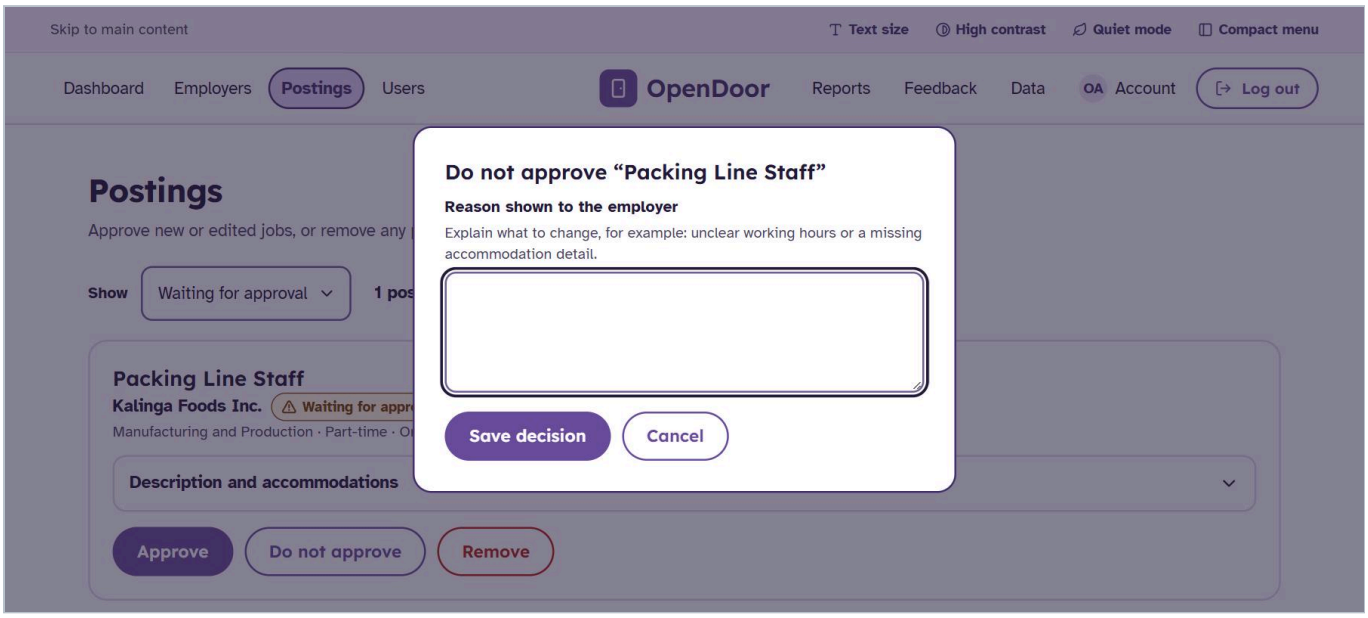

Red confirm button, focus starts on Cancel, Escape closes, focus returns to the button that opened it.

Screenshot `/employer/jobs`

8.3 Reason dialog

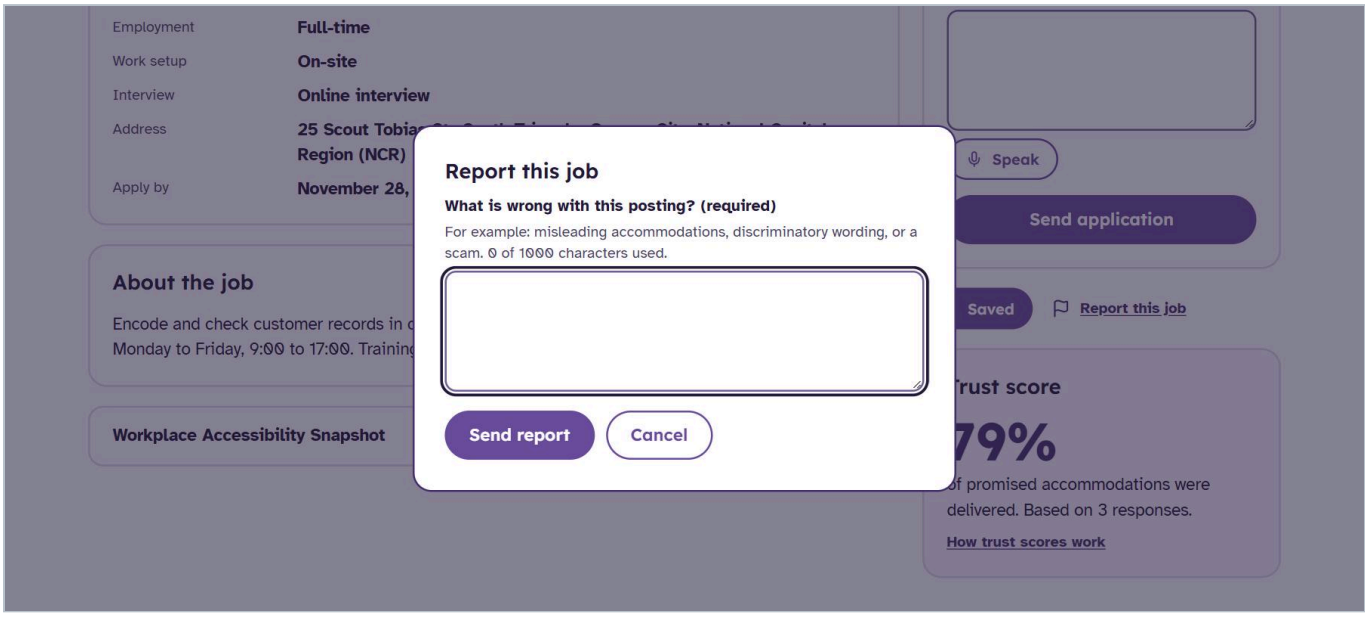

Required reason with an inline error "Enter a reason."; used for rejecting employers and postings, removing postings and resolving reports (optional note).

Screenshot `/admin/job-postings`

8.4 Form in a dialog

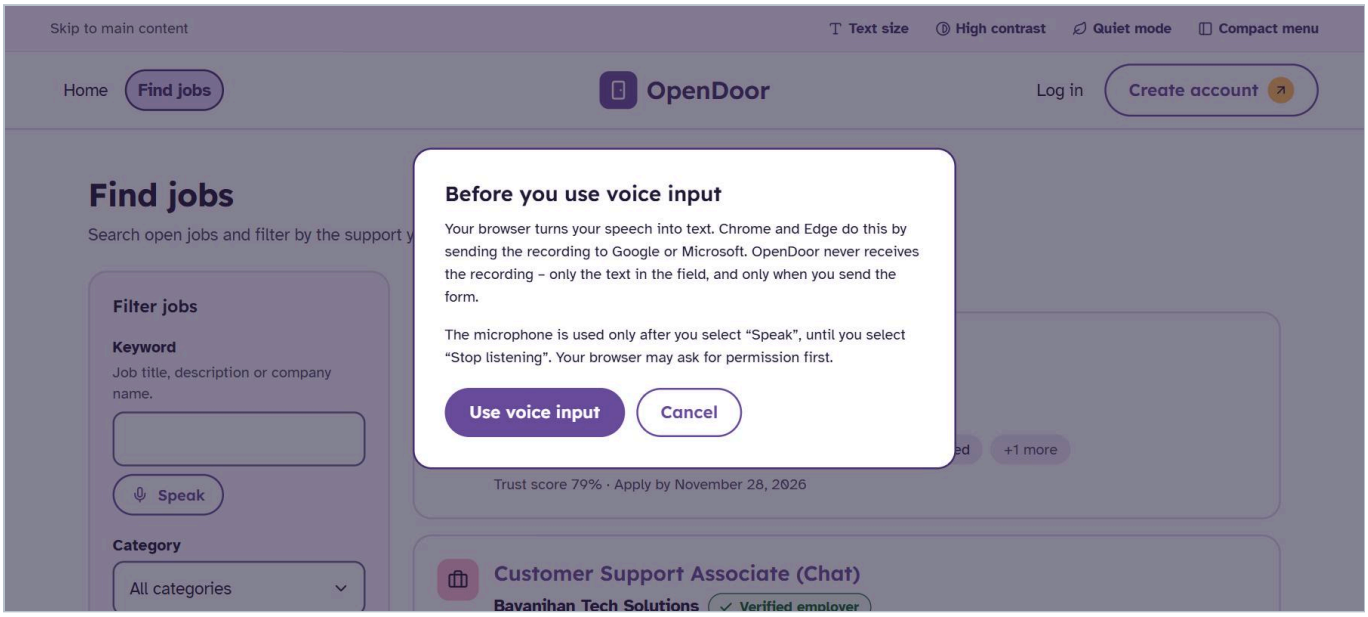

Report this job: required text area with counter and hint, "Send report" / "Cancel".

Screenshot `/candidate/jobs/1`

8.5 Voice input privacy notice

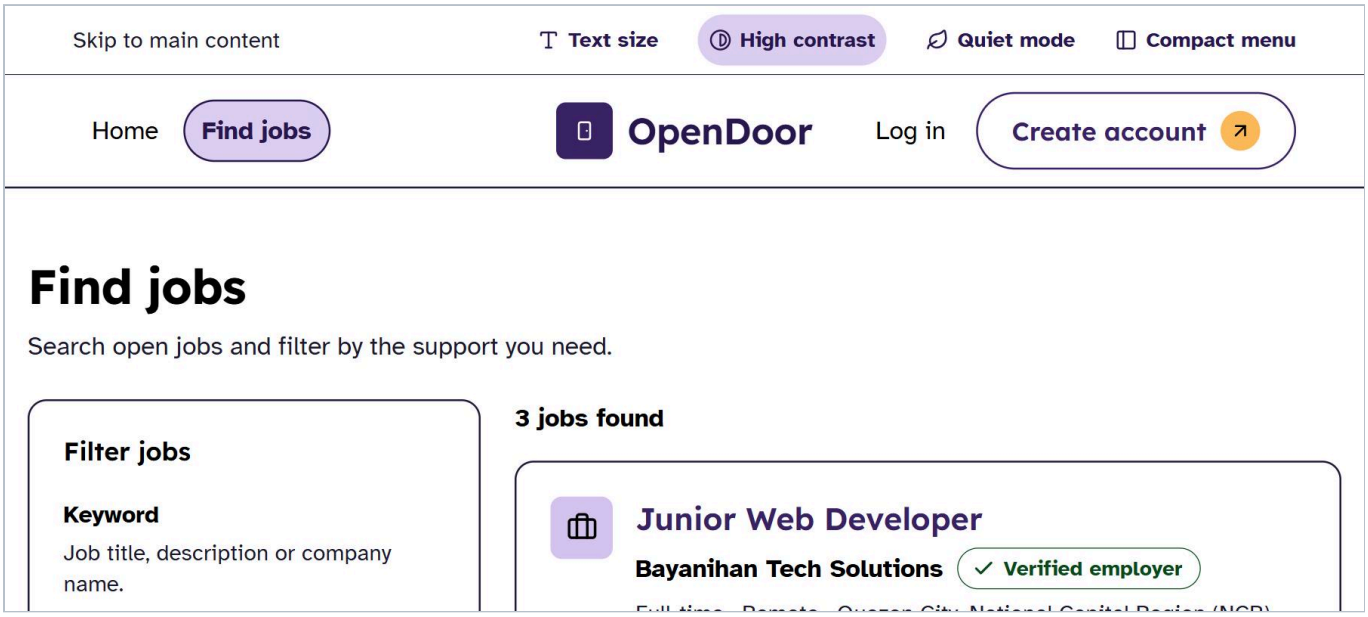

Shown once before the first use of "Speak": the browser (Chrome/Edge) sends the recording to Google or Microsoft; OpenDoor receives only the text.

Screenshot `/jobs`

8.6 High contrast and 150 % text

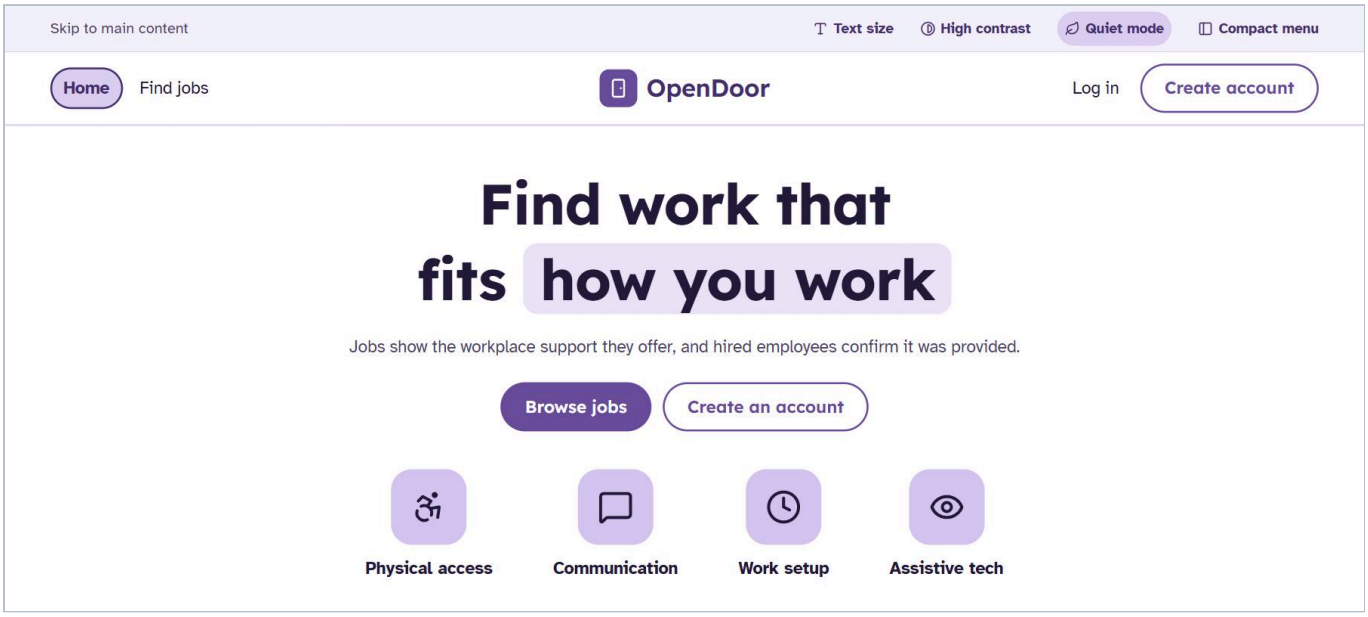

Display bar or Account → Display. Darker text, borders and buttons, thicker focus ring and link underlines. When the full menu does not fit at the larger text size, the header shows the Menu button. Nothing is cut off.

Screenshot `/jobs`

8.7 Quiet mode

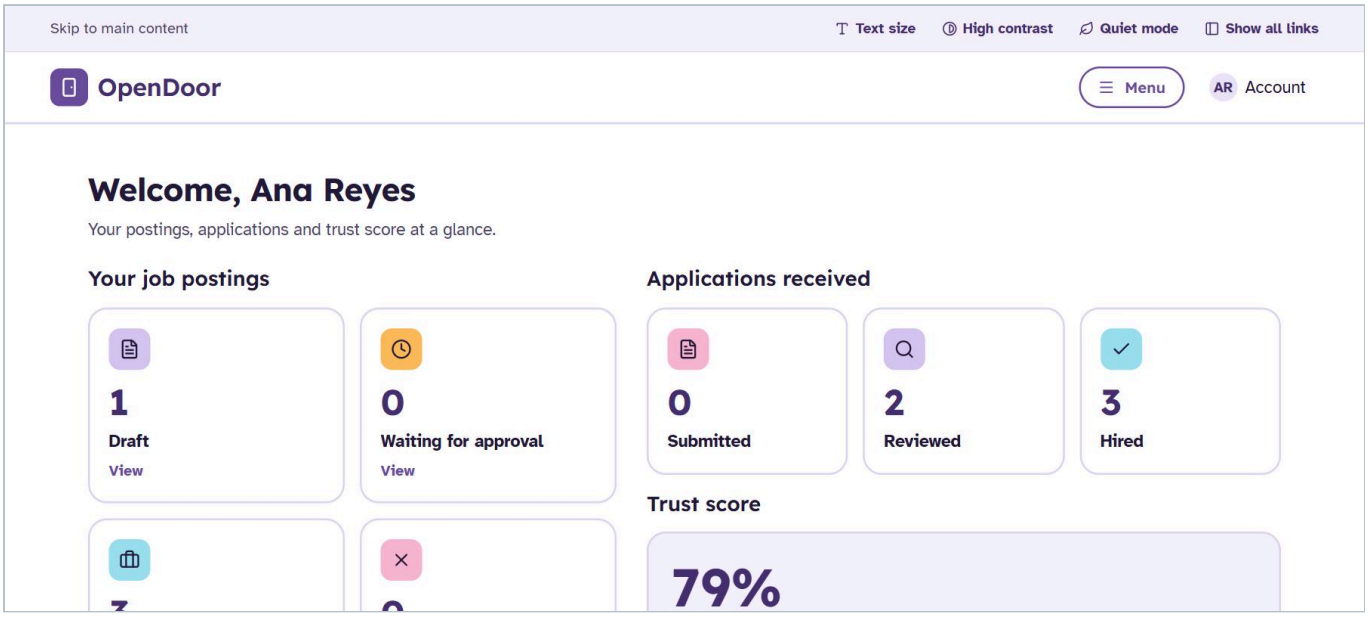

Display bar → "Quiet mode": no sparkles or decorative highlights, calm colours, no animations. Kept on this device.

Screenshot /

8.8 Compact menu

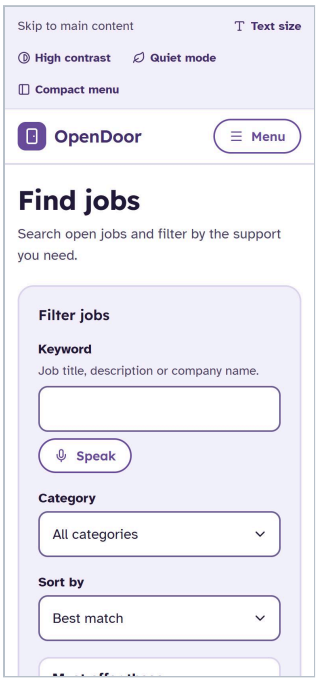

Display bar → "Compact menu": only the logo, "Menu" and Account at the top, on any screen width. "Show all links" brings the full menu back.

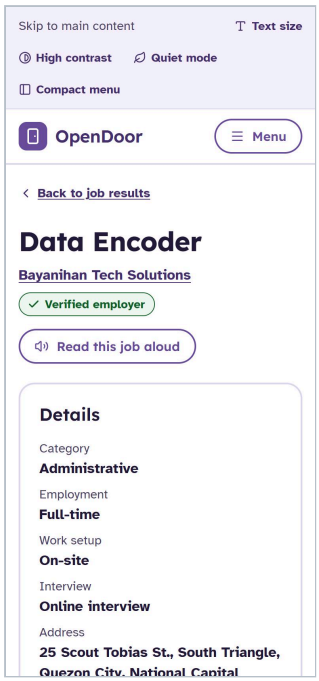

Screenshot `/employer/dashboard`

8.9 Phone width (390 px)

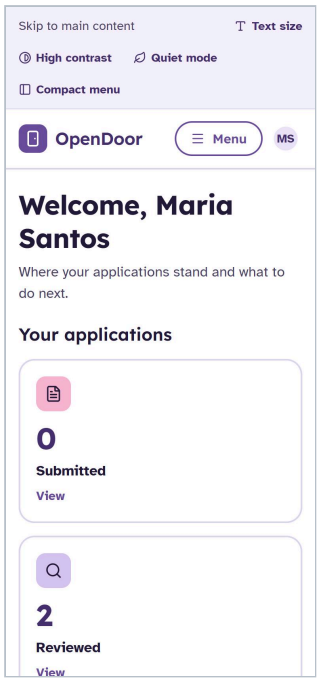

The header shows the logo, "Menu" and Account; the Menu panel lists the links with icons. The filter panel sits above the results, job cards put the icon tile above the text, dashboard tiles stack and the "Where it stands" timeline turns vertical.

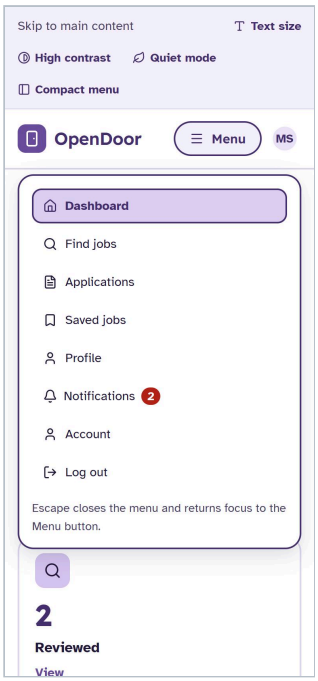

Find jobs (guest)

Job details (guest)

Job seeker dashboard

The Menu panel opened

9 Email notifications NEW

The second half of M13, built on October 12, 2026 (user choice: **on by default**, can be turned off). Every in-app notice is also sent by email to job seekers and employers. Administrators receive no notices and have no switch.

Account – "Email notifications" tab	Checkbox "Send me an email for each notification", saved at once with the result as an alert, and an example email (see 7.2). Value: `email_notifications` in `GET /me` and the login response. Save: `PUT /me/email-notifications {"enabled": true|false}`.
Which emails	The same events as the in-app notices (Appendix C): new application (employer), status changed by the other side (job seeker or employer), employer verification decision and posting review or removal (employer, with the admin's reason), and the rating reminder (job seeker). Suspended accounts get no email.
Email content	Subject such as "New application for Data Encoder", "Your job posting Data Encoder was approved" or "Rate the accommodations for Data Encoder"; greeting with the name, the notice text, a button "Open in OpenDoor" to the same page as the in-app link, and a footer explaining how to turn the emails off in Account settings. No disability, accommodation-need or interview-request details.
Timing and failures	Sent right after the action has answered, so a slow mail server never delays the user. A mail server failure is logged and never undoes the action; the in-app notice is always there.
Rating reminder	Notice type `feedback_reminder` (in-app and email) to a hired job seeker on the day the feedback form opens (daily run at 08:00, Philippine time), linking to "Rate your accommodations". Once per hire; missed days are caught up; suspended accounts get it after reactivation.
Still to set up	The mail provider (SMTP) is chosen at deployment; locally the emails are written to the Core log.

10 Design foundations

Current values from `frontend/src/index.css`. Contrast ratios are against white. A new visual design may change them, but must keep the contrast levels.

Colour tokens

	Token	Value	Use
	`--od-text-default`	`#241b3a`	Body text and headings (16.2:1)
	`--od-text-muted`	`#4e4568`	Hints, subtitles, secondary text (8.8:1)
	`--od-text-accent`	`#47306f`	Links (10.9:1)
	`--od-brand-primary`	`#6a4c9c`	Primary buttons, current menu item, "View" links (6.7:1)
	`--od-brand-primary-dark`	`#47306f`	Hover, info alert text
	`--od-surface-page`	`#ffffff`	Page background, cards
	`--od-surface-subtle`	`#f5f1fc`	Display bar, filter panel, info background
	`--od-surface-tint`	`#ebe3f7`	Tags, table header row, highlighted cards
	`--od-surface-current`	`#dccff1`	Current menu item, unread notices
	`--od-border-subtle`	`#ddd5ee`	Card borders and dividers (decorative only)
	`--od-border-input`	`#6f5f94`	Input and checkbox borders (5.6:1)
	`--od-border-focus`	`#241b3a`	Focus ring (3 px)
	`--od-accent-orange / pink / sky / lilac`	`#fdba5a`	Icon tiles and decoration (also #f8b5d1, #9adff0, #d4c4ef); never carry meaning
	`--od-status-danger`	`#b42318`	Errors, danger buttons, unread count (6.6:1) on #fef1f1
	`--od-status-success`	`#116329`	Success text and badges (7.4:1) on #eef8f0
	`--od-status-warning`	`#7a4300`	Warning text (7.4:1) on #fff6e1

Type, layout and behaviour

Typography	**Lexend** for headings, numbers and buttons; **Atkinson Hyperlegible** (made for readers with low vision) for text. Both are served by OpenDoor itself (no calls to Google). Base 16 px, line height 1.5, h1 34 px; paragraphs at most about 70 characters wide.
Layout	Content up to 81 rem (1,264 px) centred, as on the 1,440 px Figma frames. Find jobs uses two columns (20 rem filters + results) from 56 rem (896 px); job details, the employer page and dashboards use a main column and a side column. Below that everything stacks. Job cards stack their icon tile, text and button when the card is narrower than 30 rem – this also works at large text sizes.
Shape and spacing	8 px grid; corner radius 12 px (fields), 16 px (tables, alerts), 20 px (cards) and fully rounded pills (buttons, badges, tags); cards have a 2 px border.

Buttons	Pill-shaped: primary (filled purple), secondary (purple outline), small, link-style, danger outline (red outline: Withdraw, Delete, Suspend, Not selected…) and danger (filled red, inside confirm dialogs). At least 52 px high (44 px small). Busy buttons keep focus and say what is happening ("Saving…").
Status	Always icon + word + colour, never colour alone: ✓ success (green), ✕ danger (red), ⚠ warning (amber), ○ info (purple), – neutral (grey).
Display settings	Text size 100 / 125 / 150 % (root font size), high contrast (darker text, borders and buttons, thicker focus ring) and reduced motion are saved to the account. Quiet mode (no sparkles or decoration, calm colours, no animation) and the compact menu stay on the device. Applied as `data-text-size`, `data-contrast`, `data-motion`, `data-quiet` and `data-menu` on `<html>`; the system "reduce motion" setting is also respected; in Windows forced colours the native checkboxes and radios come back.
Responsive	Works at 320 px width and at 200 % text without sideways scrolling (checked again on October 14, 2026); wide tables scroll inside their own labelled box.

11 Shared components

Building blocks in `frontend/src/components`, reused across the screens. The pictures are cut from the screenshots at their real size.

UtilityBar (display bar)

Thin bar at the top of every page: "Skip to main content", "Text size (now Standard)" (cycles Standard → Large → Extra large), "High contrast", "Quiet mode" and "Compact menu" / "Show all links". Toggles say whether they are on (pressed state); each change is announced ("Quiet mode is on.").

Signed in, text size and contrast are also saved to the account. The same choices are in Account → Display.

SiteHeader

Role links on the left and right of the centred OpenDoor logo (links to the role's home); the current page is a filled pill. Signed in: Notifications with unread count, "Account" with initials, "Log out". When the full menu does not fit (narrow screen, large text, or Compact menu chosen) it shows the logo, a "Menu" button and Account; the Menu panel lists the links with icons, closes with Escape and returns focus to the button.

The full menu is measured, so it never wraps onto two lines.

SiteFooter

Links "Privacy" and "Accessibility statement", "© 2026 OpenDoor", and the line "OpenDoor – inclusive hiring for persons with disabilities. Map data © OpenStreetMap contributors. Location lists from the Philippine Standard Geographic Code (PSGC)."

Page and BackLink

Every screen starts with one h1, an optional subtitle and optional actions (Read aloud) and badge. Sets the browser tab title ("Find jobs – OpenDoor") and moves focus to the h1 when the address changes (not when only the search part changes, so typing in a filter keeps focus). "‹ Back to …" links return to where the user came from, filters included.

Where two pages share a heading, the tab title is made unique.

Button

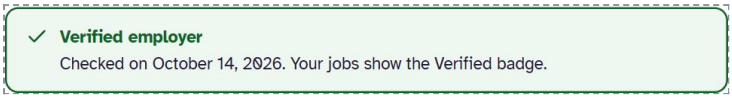

Button that stays focusable while unavailable (`aria-disabled` instead of `disabled`) and ignores repeated clicks while a request runs.

Variants: primary, secondary, small, link, danger outline, danger.

Alert / ApiErrorAlert

Message box in four types (info, success, warning, error), each with an icon, a coloured border and a bold title. API errors show a plain-language message and a "Reference: …" request id for support.

Results are announced politely; blocking errors assertively.

ErrorSummary

"There is a problem" box above a form after a failed submit, listing every error as a link to its field. It takes focus.

GOV.UK error-summary pattern; each field also shows its own error (red border and message) under the label.

Form fields

TextField, TextArea (with "N of M characters used" counter), SelectField, CheckboxField and RadioGroup (24 px custom boxes; inline or as whole-card choices). Label above, then hint, then error, then the input; required fields say "(required)" in text. "Show password" checkboxes on password forms.

`voice` adds the Speak button (VoiceInput).

Tabs

ARIA tabs: Left/Right arrows, Home and End move between tabs; the open tab is kept in the address (`?tab=about`), so it can be linked. All panels stay loaded, so unsaved edits survive switching tabs.

Used on Profile and Account.

WizardProgress

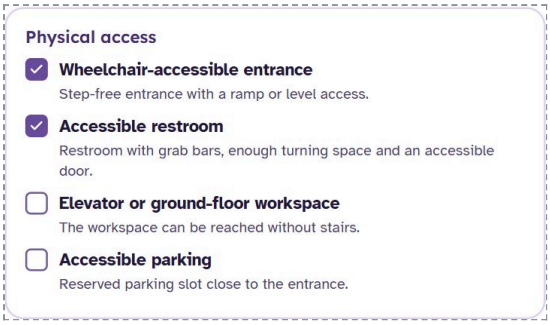

"Step 2 of 4 · Description and place" heading with one bar per step (decorative). The heading takes focus on each step; the tab title says the step ("Post a new job (step 2 of 4)"). "Next" checks only the fields of that step; server errors send the user to the first step that has one.

Used by Create account (3 steps) and Post a new job / Edit posting (4 steps).

AccommodationPicker

Grouped checkboxes for the accommodation types (Physical access, Communication, Work arrangement, Assistive technology, Support) with short descriptions and a live "N selected." line. In job postings, each checked item gets an optional "Details for …" input.

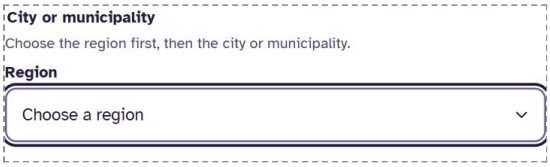

Used for needs, posting accommodations (two columns) and the "must offer" search filter.

LocationPicker

Region → Province → City or municipality selects from the official PSGC lists (NCR has no provinces); hint "Choose the region first, then the city or municipality." Shows the saved place with a "Change location" button until the user edits it.

Lists come from the Insights Service; a failed list is announced.

JobCard and SaveJobButton

Search result: coloured icon tile, title link, company + Verified badge, "Full-time · On-site · Quezon City…", match badge, up to 3 accommodation tags (+N more), "Trust score 79% · Apply by …" or "Trust score not published yet (1 of 3 responses)". For job seekers a "Save" / "Saved" button on the right (pressed state; its name includes the job title).

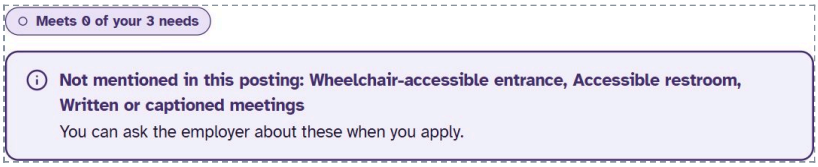

Also used on Saved jobs (with Remove) and the employer page.

MatchBadge

"Meets all 3 of your needs" (green ✓) or "Meets 1 of your 3 needs" (purple ○). On job details an info alert below lists "Not mentioned in this posting: …".

Only for job seekers who saved needs.

StatusBadge / VerifiedBadge

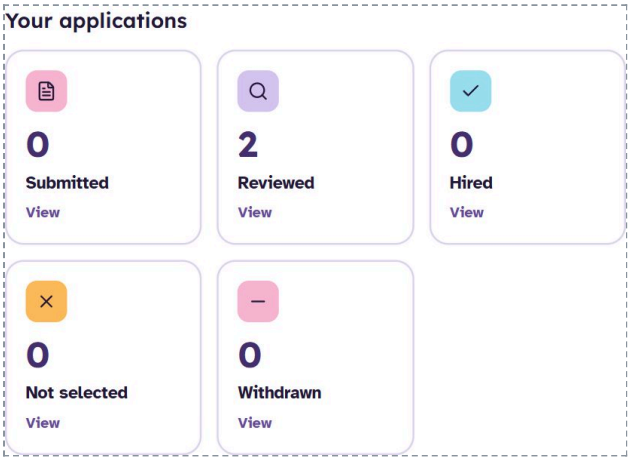

Pill-shaped status with icon for applications, postings, registry checks and reports (see Appendix B). "✓ Verified employer" for checked companies.

IconTile and StatCards

Dashboard tiles: coloured icon tile, big number (Lexend) and label; a "View" link covers the whole tile and is named with the number ("View Submitted (2)"); admin queues say "Open queue".

The tile draws the focus ring when its link is focused.

StatusTimeline

"Where it stands": Submitted → Reviewed → Decision, each with its date or "Waiting for employer"; the step being waited for is marked as current (`aria-current="step"`).

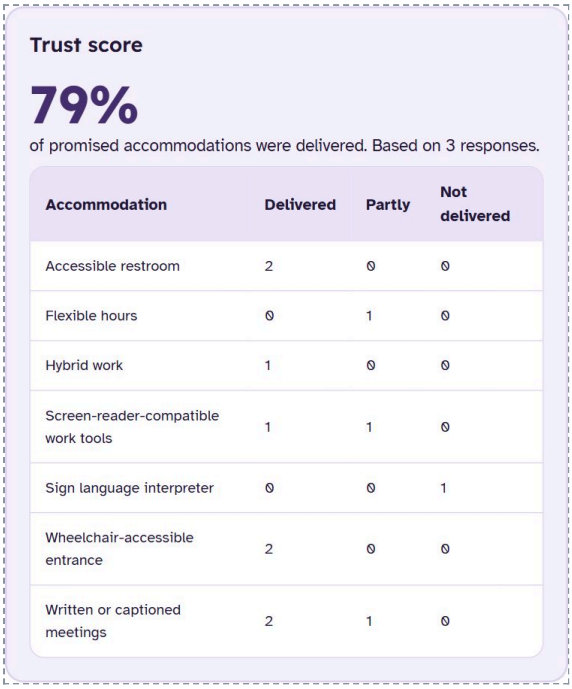

Stacks on phones.

TrustScoreCard

"79% of promised accommodations were delivered. Based on 3 responses." with a link "How trust scores work", or "Not published yet … (1 of 3 so far)". Optional table per accommodation (Delivered / Partly / Not delivered).

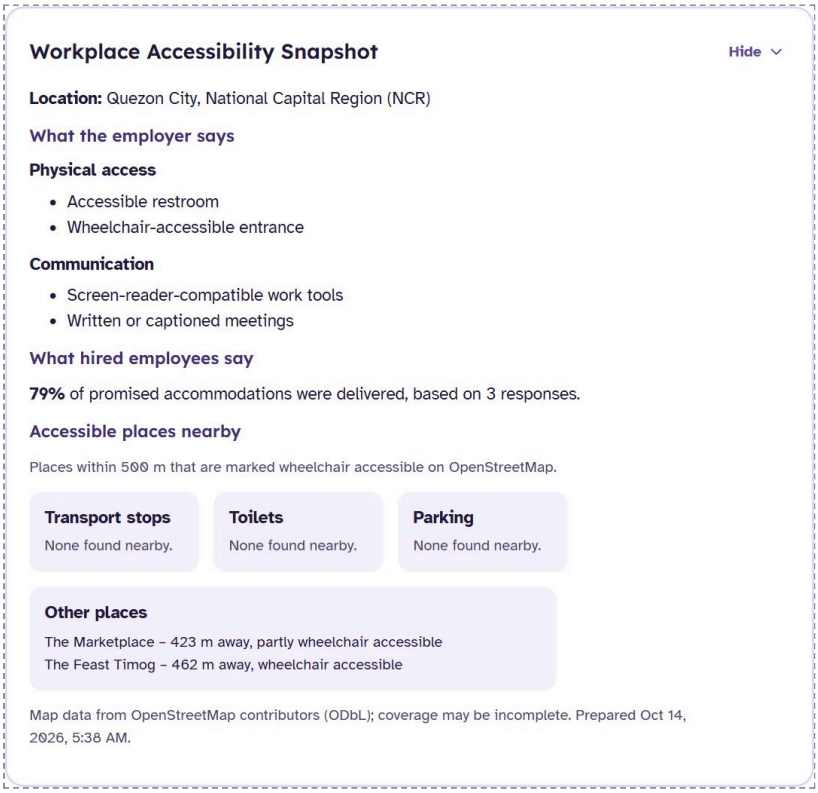

Compact on the job page and dashboard; with the table on the employer and trust-score pages.

AccessibilitySnapshot

Insights mashup on the job page, as a closed card with "Show Workplace Accessibility Snapshot": location, "What the employer says", "What hired employees say", "Accessible places nearby" (transport stops, toilets, parking, other places with distance and wheelchair status), source note.

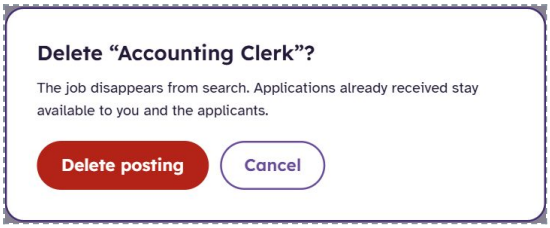

Loads only when opened; failures never block the job page.

Dialog / ConfirmDialog / ReasonDialog

Modal on the native `<dialog>`: traps focus, Escape closes, focus returns to the button that opened it. ConfirmDialog asks yes/no; ReasonDialog asks for a (required or optional) reason or note.

Dangerous actions start with focus on Cancel and use a red confirm button.

NotificationsLink

Header link "Notifications" with a red count badge; its name says "Notifications 2 unread". Refreshes on every page change and after marking as read.

AsyncContent, Loading, EmptyState, ResultCount, Pagination, ActionFeedback

Shared states: "Loading …" status line; error with "Try again"; empty state as a card with an icon tile, a title and the next step; announced result count ("4 postings"); pagination with chevrons ("Previous page", "Page 1 of 3", "Next page", 12 items per page); success/error message after an action.

Unavailable pagination buttons stay focusable instead of disappearing.

ReadAloud NEW

"Read this job aloud" button: reads the title and main content with the browser's own voice. While reading: "Pause reading" / "Resume reading" and "Stop reading".

Hidden when the browser cannot speak. Nothing leaves the device.

VoiceInput NEW

"Speak" button under a text field; adds what the user says to the field until "Stop listening". First use shows a notice that Chrome/Edge send the audio to their speech service.

Hidden where the browser has no speech recognition (e.g. Firefox). Known limit: Brave shows the button but cannot turn speech into text.

A Route map

Signed-in users who open a page of another role are sent to their own dashboard; guests who open a protected page are sent to Log in and come back after logging in.

Route	Screen	Who
`/`	Home	Everyone
`/jobs`	Find jobs	Everyone
`/jobs/{id}`	Job details	Everyone
`/employers/{id}`	Employer page	Everyone
`/privacy`	Privacy	Everyone
`/accessibility`	Accessibility statement	Everyone
`/trust-scores`	How trust scores work	Everyone
`/login`	Log in	Guests
`/forgot-password`	Forgot password	Guests
`/reset-password`	Reset password (from the email)	Guests
`/register`	Create account	Guests
`/candidate/dashboard`	Dashboard	Job seeker
`/candidate/jobs`	Find jobs (match mode)	Job seeker
`/candidate/jobs/{id}`	Job details (apply, save, report)	Job seeker
`/candidate/applications`	My applications	Job seeker
`/candidate/applications/{id}`	Application details	Job seeker
`/candidate/applications/{id}/feedback`	Rate your accommodations	Job seeker
`/candidate/saved-jobs`	Saved jobs	Job seeker
`/candidate/profile`	Profile and needs	Job seeker
`/employer/dashboard`	Dashboard	Employer
`/employer/company`	Company profile	Employer
`/employer/jobs`	Job postings	Employer
`/employer/jobs/new`	Post a new job	Employer
`/employer/jobs/{id}/edit`	Edit posting	Employer
`/employer/jobs/{id}/applicants`	Applicants	Employer
`/employer/applications/{id}`	Application review	Employer
`/employer/trust-score`	Trust score	Employer
`/admin/dashboard`	Administration	Admin
`/admin/employers`	Employers	Admin
`/admin/employers/{id}`	Employer verification	Admin

Route	Screen	Who
`*`	Page not found	Everyone

B Labels and statuses

API values and the words the user sees. Badge = icon and colour of the status badge.

Application

API value	Shown as	Badge
`pending`	Submitted	– neutral
`reviewed`	Reviewed	○ purple (info)
`hired`	Hired	✓ green
`rejected`	Not selected	– neutral
`withdrawn`	Withdrawn	– neutral

Job posting

API value	Shown as	Badge
`draft`	Draft	– neutral
`pending_approval`	Waiting for approval	⚠ amber
`open`	Open	✓ green
`closed`	Closed	– neutral

Registry check

API value	Shown as	Badge
`ACTIVE`	Active	✓ green
`EXPIRED`	Expired	✕ red
`CANCELLED`	Cancelled	✕ red
`NOT_FOUND`	Not found	✕ red
`ERROR`	Check failed	⚠ amber

Report

API value	Shown as	Badge
`open`	Open	⚠ amber
`dismissed`	Dismissed	– neutral
`actioned`	Action taken	✓ green

Feedback rating

API value	Shown as
`delivered`	Delivered
`partial`	Partly delivered (counts as half)
`not_delivered`	Not delivered

Employment type

API value	Shown as
`full_time`	Full-time
`part_time`	Part-time
`contract`	Contract
`internship`	Internship

Work setup

API value	Shown as
`onsite`	On-site
`hybrid`	Hybrid
`remote`	Remote

Interview format

API value	Shown as
`online`	Online interview
`onsite`	On-site interview

Accommodation group

API value	Shown as
`physical_access`	Physical access
`communication`	Communication
`work_arrangement`	Work arrangement
`assistive_technology`	Assistive technology
`support`	Support

Role

API value	Shown as
`candidate`	Job seeker
`employer`	Employer
`admin`	Administrator

C Notification texts

Each notice has a message and a link; the emails repeat the same text (section 9).

To	When	Message	Opens
Employer	A job seeker applies	"Maria Santos applied for Junior Web Developer."	Application review
Job seeker	Employer opens the application	"Bayanihan Tech Solutions is reviewing your application for Junior Web Developer."	Application details
Job seeker	Employer marks as hired	"Congratulations! … marked you as hired for {job}. You can rate the promised accommodations from {date}."	Application details
Job seeker	Employer marks as not selected	"… decided not to continue with your application for {job}."	Application details
Employer	Job seeker withdraws / confirms hire	"… withdrew the application for {job}." / "… confirmed being hired for {job}."	Application review
Employer	Admin approves or rejects the company	"{company} is now verified. Candidates see the Verified badge on your postings." / "{company} was not verified: {reason}. Update your company profile to be checked again."	Company profile
Employer	Admin approves, rejects or removes a posting	"Your posting {job} was approved and is now open to candidates." / "…was not approved: {reason}. Edit it and submit it again." / "…was removed by an administrator: {reason}."	Job page / edit form / Job postings
Job seeker	Feedback form opens (day 30 after the hire; daily run at 08:00)	"You can now rate the accommodations {company} promised for {job}. Your answers are anonymous."	Rate your accommodations

D Accessibility rules to keep

OpenDoor targets WCAG 2.1 AA (audit October 11, 2026: axe found 0 violations on 33 pages; Lighthouse 100 on the public pages). Any new UI must keep these behaviours.

- One h1 per screen; after moving to another screen, focus goes to its h1 and the browser tab title changes ("Saved jobs – OpenDoor").
- "Skip to main content" is the first link (in the display bar); landmarks: header with the navigation "Main", main, footer.
- Step-by-step forms: the "Step n of N · …" heading takes focus on each step, the tab title names the step, and "Next" checks only that step. Tabs follow the ARIA tabs pattern (arrow keys, Home, End) and keep the open tab in the address.
- Every input has a visible label; hints and errors sit between the label and the input and are linked to it; required fields say "(required)" in text.
- After a failed submit show the error summary at the top and move focus to it.
- Status is never shown by colour alone (text + icon + colour). Contrast at least 4.5:1 for text and 3:1 for borders and focus rings.
- Buttons stay focusable while busy or unavailable; they say what is happening ("Saving…", "Please wait…").
- Dialogs: focus inside, Escape closes, focus returns to the opener; dangerous confirmations start on Cancel.
- Announce results and saves without moving focus: result counts ("3 jobs found", also "0"), "Your needs are saved.", "Saved. Find it under Saved jobs."
- If the focused element disappears (a deleted row), focus goes back to the page h1 instead of the top of the document.
- Touch targets at least 44 px; works at 320 px width, 200 % zoom and with the 125/150 % text setting without sideways scrolling.
- Decoration (sparkles, icon tiles, accent colours) never carries meaning and disappears in Quiet mode; toggles in the display bar announce their new state.
- Dates in Philippine time, written out ("October 12, 2026"); distances as text ("427 m away"), never only on a map.
- Read aloud and Voice input appear only where the browser supports them and never start on their own.

E Demo accounts

Seeded by `php artisan migrate:fresh --seed`. All use the password in `DEMO_PASSWORD` (Core `.env`, not written here).

Email	Name	Shown in the screenshots as
`admin@opendoor.test`	OpenDoor Admin	Administrator
`candidate@opendoor.test`	Maria Santos	Job seeker with 3 saved needs
`candidate2@opendoor.test`	Juan Dela Cruz	Job seeker, hired, can rate
`employer@opendoor.test`	Ana Reyes	Bayanihan Tech Solutions – verified, trust score 79%
`employer2@opendoor.test`	Ramon Villanueva	Kalinga Foods Inc. – waiting for verification

Rebuilding this document

- Start the stack on a freshly seeded Core database (a copy such as `opendoor_core_test` keeps the main local data untouched).
- In `tests/a11y`: `node ui-reference/capture.mjs` (needs `DEMO_PASSWORD`; adds a few demo actions, then takes the screenshots), then `node ui-reference/build.mjs`.
- Screen texts live in `tests/a11y/ui-reference/content.mjs`.
