OpenDoor UI Reference

Features, modules, components and screens for every user role

A reference for the team that designs and presents the OpenDoor user interface. It shows what the working system does today (October 24, 2026), in the IPT look adapted with his permission from team member Francis Ruzgal's `opendoor-ipt`: every screen of every role, what is on it, what the user can do there, the messages it shows and the API it uses. Screenshots were taken from the running application with the seeded demo data.

Prepared	October 25, 2026
Built from	commit `5f05cf4` (branch `main`), local stack with the seeded demo data
Contents	4 user roles · 13 modules · 38 screens · 75 screenshots · 31 shared components
Status	Backup reference for the team's UI work. The running application and `docs/openapi.yaml` stay the source of truth.

SIA 1 and IPT final project · PWD job-matching platform

1 About this document

A reference for the team that designs and presents the OpenDoor user interface. It shows what the working system does today (October 24, 2026), in the IPT look adapted with his permission from team member Francis Ruzgal's `opendoor-ipt`: every screen of every role, what is on it, what the user can do there, the messages it shows and the API it uses. Screenshots were taken from the running application with the seeded demo data.

How to read the screen pages

- Every screen has the same blocks: **Route** (address in the app), **Who** (roles that can open it), **Purpose**, **On the screen**, **Actions**, **Messages and states** and **API** (calls made through the gateway, base `/api`).
- Labels in quotes are the exact texts used today. A later change can alter the look, but keep the meaning of the texts, the order of steps and the accessibility behaviour described in sections 10–11 and Appendix D.
- NEW marks features and screens added after the first release (October 16, 2026): the required profile, the match score, the new application stages with the hiring confirmation, job details, the dashboards with charts and the IPT look.
- Screenshots are 1,440 px wide (desktop) unless the caption says otherwise. Long pages are cut into parts. The demo people and companies are fictional.

System in one paragraph

OpenDoor matches persons with disabilities (PWDs) with employers by the **workplace accommodations** a job offers and the job seeker needs, and lets hired employees confirm 30 days later whether those accommodations were really provided (the employer's **trust score**). The React app talks only to the API gateway; behind it the Laravel Core Service holds the data, the Insights Service builds the Workplace Accessibility Snapshot from public map and place data, and a SOAP business registry checks employer registrations.

2 Users, modules and what is new

User roles

Guest

Not logged in

Browses and searches open jobs, reads job details with the Accessibility Snapshot and public employer pages, reads how trust scores work, logs in or creates an account.

Navigation: logo · Home · Find jobs | Log in · Create account

Job seeker

Role `candidate` – person with a disability looking for work

Completes the profile (place, skills, education, work preferences) and the accommodation needs, finds jobs ranked by a match score, applies with a résumé, follows the stages, confirms a hire, saves and reports jobs, rates the promised accommodations from day 30 after the confirmed start date.

Navigation: logo · Dashboard · Find jobs · Applications · Saved jobs | Notifications · Account menu (Profile, Account, Log out)

Employer

Role `employer` – company that hires

Creates the company profile (checked against the DTI/SEC registry); once verified, publishes jobs with skills, qualifications, salary and structured accommodations; moves applicants through the stages; reports or confirms hires; follows its trust score.

Navigation: logo · Dashboard · Job postings · Company · Trust score | Notifications · Account

Administrator

Role `admin` – OpenDoor staff

Verifies employers with the business registry, removes postings that break the rules, suspends users, handles reports, moderates feedback, maintains categories and accommodation types, follows the charts on the dashboard.

Navigation: logo · Dashboard · Employers · Postings · Users · Reports · Feedback · Data | Account

Modules and features

#	Module	Features	Users	Screens
M1	Authentication and accounts	Create an account in 3 steps (role, details, privacy consent), log in, log out, change password, forgot password with an emailed reset link, session expiry. Login and reset requests limited to 5 per minute; suspended accounts are refused.	All	Log in, Forgot password, Reset password, Create account, Account
M2	Job seeker profile and needs	Required to apply NEW: where you live (PSGC), at least 3 skills from a shared list (suggested from the résumé), highest education, work setups and types of work you want. Also accommodation needs (grouped checklist), headline, experience, optional disability type with a separate "show to employers" choice, PDF résumé (5 MB).	Job seeker	Complete your profile, Profile and needs
M3	Company profile and verification	Company details, DTI/SEC registration number, office location, logo. An administrator checks the registration with the SOAP business registry and approves or rejects with a reason. Only a verified company can publish jobs.	Employer, Admin	Company profile, Employers, Employer verification

#	Module	Features	Users	Screens
M4	Job postings	Post a job in 6 steps with a review: basics, description and place, skills and qualifications NEW, salary and applying NEW, accommodations. A verified company's job goes live when it is published – there is no approval step NEW. Drafts, edit, close, reopen, delete; admins remove postings with a reason.	Employer, Admin	Job postings, Post a new job, Edit posting, Postings
M5	Search and matching	Keyword, work setup, distance NEW, category, "must offer" accommodations, sort. "Recommended for me" ranks jobs by a match score from 0 to 100 NEW: skills, place, qualifications, work preferences and the accommodation needs offered; "Why this match?" lists the parts.	Guest, Job seeker	Find jobs, Job details
M6	Applications	Apply with a résumé, a cover note and an interview accommodation request; stages Submitted → Under review → Shortlisted → Contacted → Hired NEW, or Not selected / Withdrawn / Job closed; a hire is reported by one side and confirmed by the other NEW; "Where it stands" timeline with dates.	Job seeker, Employer	Job details, My applications, Application details, Applicants, Application review
M7	Feedback and trust score	From day 30 after the confirmed start date the employee rates each promised accommodation (delivered, partly, not delivered). The employer's trust score is published from 3 responses.	Job seeker, Employer, public	Rate your accommodations, Trust score, Employer page, How trust scores work
M8	Dashboards	Tiles, lists and charts per role NEW: the job seeker's stages and best matches, the employer's postings, needs attention, 12-week chart and recent activity, the administrator's analytics charts (each with a table view).	All signed-in roles	Dashboards
M9	Notifications	In-app notices for application changes, hiring reports, admin decisions and the rating reminder, unread count in the header; each notice is also emailed (M13).	Job seeker, Employer	Notifications
M10	Moderation	Suspend and reactivate users, handle posting reports, remove postings, hide abusive feedback.	Admin (reports filed by job seekers)	Users, Reports, Postings, Feedback
M11	Master data	Job categories and accommodation types (5 groups). In-use items are retired instead of deleted. The skills list is seeded (98 skills with aliases).	Admin	Master data
M12	Saved jobs	Save jobs from the result cards or the job page; list them, remove them with Undo.	Job seeker	Find jobs, Job details, Saved jobs
M13	Accessibility settings	Display bar on every page: text size (slider), high contrast, quiet mode, compact menu and "Keep open"; text size, contrast and motion are saved to the account. Notices also sent by email, with an on/off switch, and a rating reminder on day 30.	All	Display bar, Account
–	Accessibility Snapshot (Insights mashup)	On every job page: employer claims, community verification and wheelchair-accessible places within 500 m (OpenStreetMap), official place names (PSGC).	Everyone	Job details
–	Read aloud and Voice input	Browser text-to-speech on job and application pages; browser speech-to-text on search and long text fields (privacy notice first).	Everyone	Job details, Application details, forms

#	Module	Features	Users	Screens
–	Onboarding	A welcome tour that opens each page and highlights one part of it at a time (the rest dimmed and blurred) NEW, and a "Get started" list on the dashboard.	Job seeker, Employer	Dashboards, Account

What is new since the first screen list

Date (2026)	Feature	What changed for the UI
Oct 21	Required profile	New job seekers complete their profile first ("Complete your profile"): place, at least 3 skills, education, work setups and types of work. Applying is refused until it is complete.
Oct 21	Skills list and résumé suggestions	A shared list of 98 skills with aliases; "Suggest skills from my résumé" reads the uploaded PDF and offers the skills it finds (the text is never stored).
Oct 21	Match score	"Recommended for me" ranks jobs by a score from 0 to 100 (skills 40, place 20, qualifications 15, preferences 10, needs 15); "Why this match?" on every card; Work setup and Distance filters.
Oct 21	Publishing without approval	Only verified companies can publish, and their jobs go live at once. The administrator's approval queue is gone; administrators can still remove a posting with a reason.
Oct 21	New look (IPT)	The look of Francis Ruzgal's `opendoor-ipt`: yellow display bar that folds away, header with icon links and an account menu, briefcase mascot, filter chips, cards on a violet-grey canvas.
Oct 21	Welcome tour as highlights	The tour opens each page and highlights one part of it; the rest of the page is dimmed and blurred. "Finish later" keeps the step on this device.
Oct 21	Text size panel	"Text size" opens a panel with a slider, Smaller/Larger buttons, a preview and quick picks.
Oct 22	Stages and hiring confirmation	Submitted → Under review → Shortlisted → Contacted → Hired; Hired only when the employer and the job seeker both confirm a hiring report with a start date. "Job closed" when the job closes during the process. Applying needs a résumé.
Oct 22	Admin charts	Activity per week, how far applications get, whether promised accommodations were delivered, most needed accommodations next to the jobs that offer them – each chart with "Show as a table".
Oct 22	Job cards and job details	Cards lead with the salary, place, work setup, skills and qualifications; the job page has "On this page" and sections for responsibilities, skills, qualifications, salary and benefits, schedule, accommodations and application requirements.
Oct 23	Employer dashboard	Tiles (open jobs, new applications, pending hire confirmations, confirmed hires), postings by status, "Needs attention", application overview, trust score, a 12-week chart and recent activity.
Oct 25	Dashboard layout	Employer dashboard: both card rows share one 3:2 split – postings beside "Needs attention" and the trust score, the 12-week chart beside a compact application overview – so the columns and card bottoms line up. Number tiles go two a row on phones (employer and admin).

Business rules that shape the screens

- Postings appear in search only when **open, not deleted, published by a verified company whose account is not suspended**. Drafts are visible only to their owner and admins. There is no approval step.
- Applying needs a **complete profile** (place, at least 3 skills, education, work setups, types of work) and a **résumé**. One application per job.
- Stages: Submitted → Under review (employer opens it) → Shortlisted → Contacted; the employer may skip forward, never back. Not selected (employer) and Withdrawn (job seeker) are final. "Job closed" is shown when the job closes during the process.

- **Hired only by mutual confirmation**: one side reports the hire with a start date, the other answers Confirm, Not yet (optionally a new date) or Incorrect. Never automatic; a withdrawal or Not selected cancels an open report.
- The match score (0–100) weighs skills 40, place 20, qualifications 15, work preferences 10 and accommodation needs 15; a part without data is left out. Disability type is never used.
- Applying closes on the "Apply by" date (Philippine time); a daily job closes expired postings at 00:05.
- Feedback opens on calendar day 30 after the confirmed start date, once per hire, and rates the accommodations the posting listed when the hire was confirmed. That morning the job seeker gets a reminder (in-app and email).
- Trust score = delivered ÷ rated, partly delivered counts as half, shown as a whole percent, published from 3 responses.
- Needs are used only for matching; employers see them only for applications to their own jobs. Disability type is optional and shown to employers only if the job seeker allows it.
- The business registry result is advice: an administrator always decides. Changing the registration number removes the Verified badge until checked again.

3 Public screens (guest)

Open to everyone. Header: logo, "Home" and "Find jobs", then "Log in" and "Create account" on the right. The display bar and footer are on every page.

3.1 Home

Route	`/`
Who	Everyone
Purpose	Explains OpenDoor and sends visitors to the jobs or to registration.

ON THE SCREEN

- h1 "Find work that fits how you work" (highlighted words) beside the waving briefcase mascot
- Lead "A job platform for persons with disabilities in the Philippines. Every job shows the skills it needs and the workplace support it offers, and people who were hired confirm it was really provided."
- Buttons "Create an account" (primary) and "Browse jobs"; "Already have an account? Log in"
- "Every job lists the support it offers:" with four tiles (Physical access, Communication, Work arrangement, Assistive technology)
- Card "Search open jobs" with a search field and "Search"; "Newest jobs" (3 cards) with "See all jobs"
- "How OpenDoor works": "Tell us what you need, once", "See the jobs that fit you", "Know which employers keep their word" (with "How trust scores work")

ACTIONS

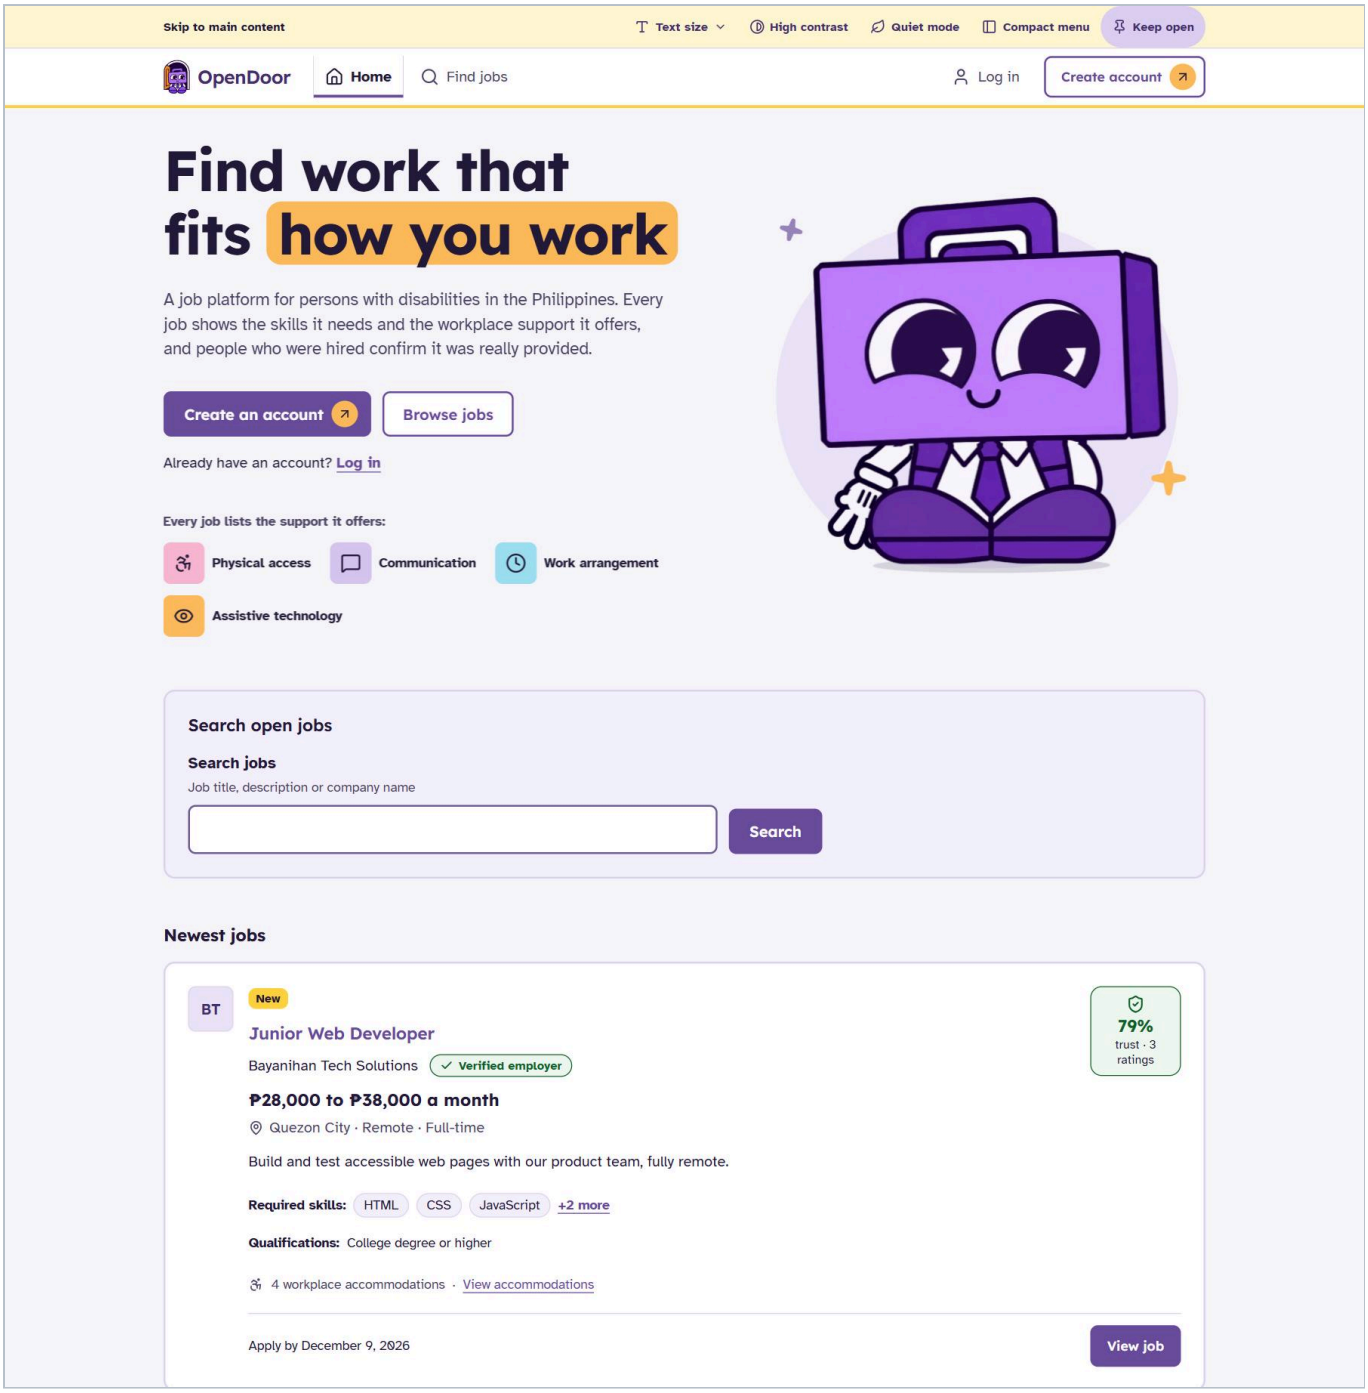

- Create an account → Create account
- Browse jobs / Search → Find jobs
- How trust scores work → 3.12

MESSAGES AND STATES

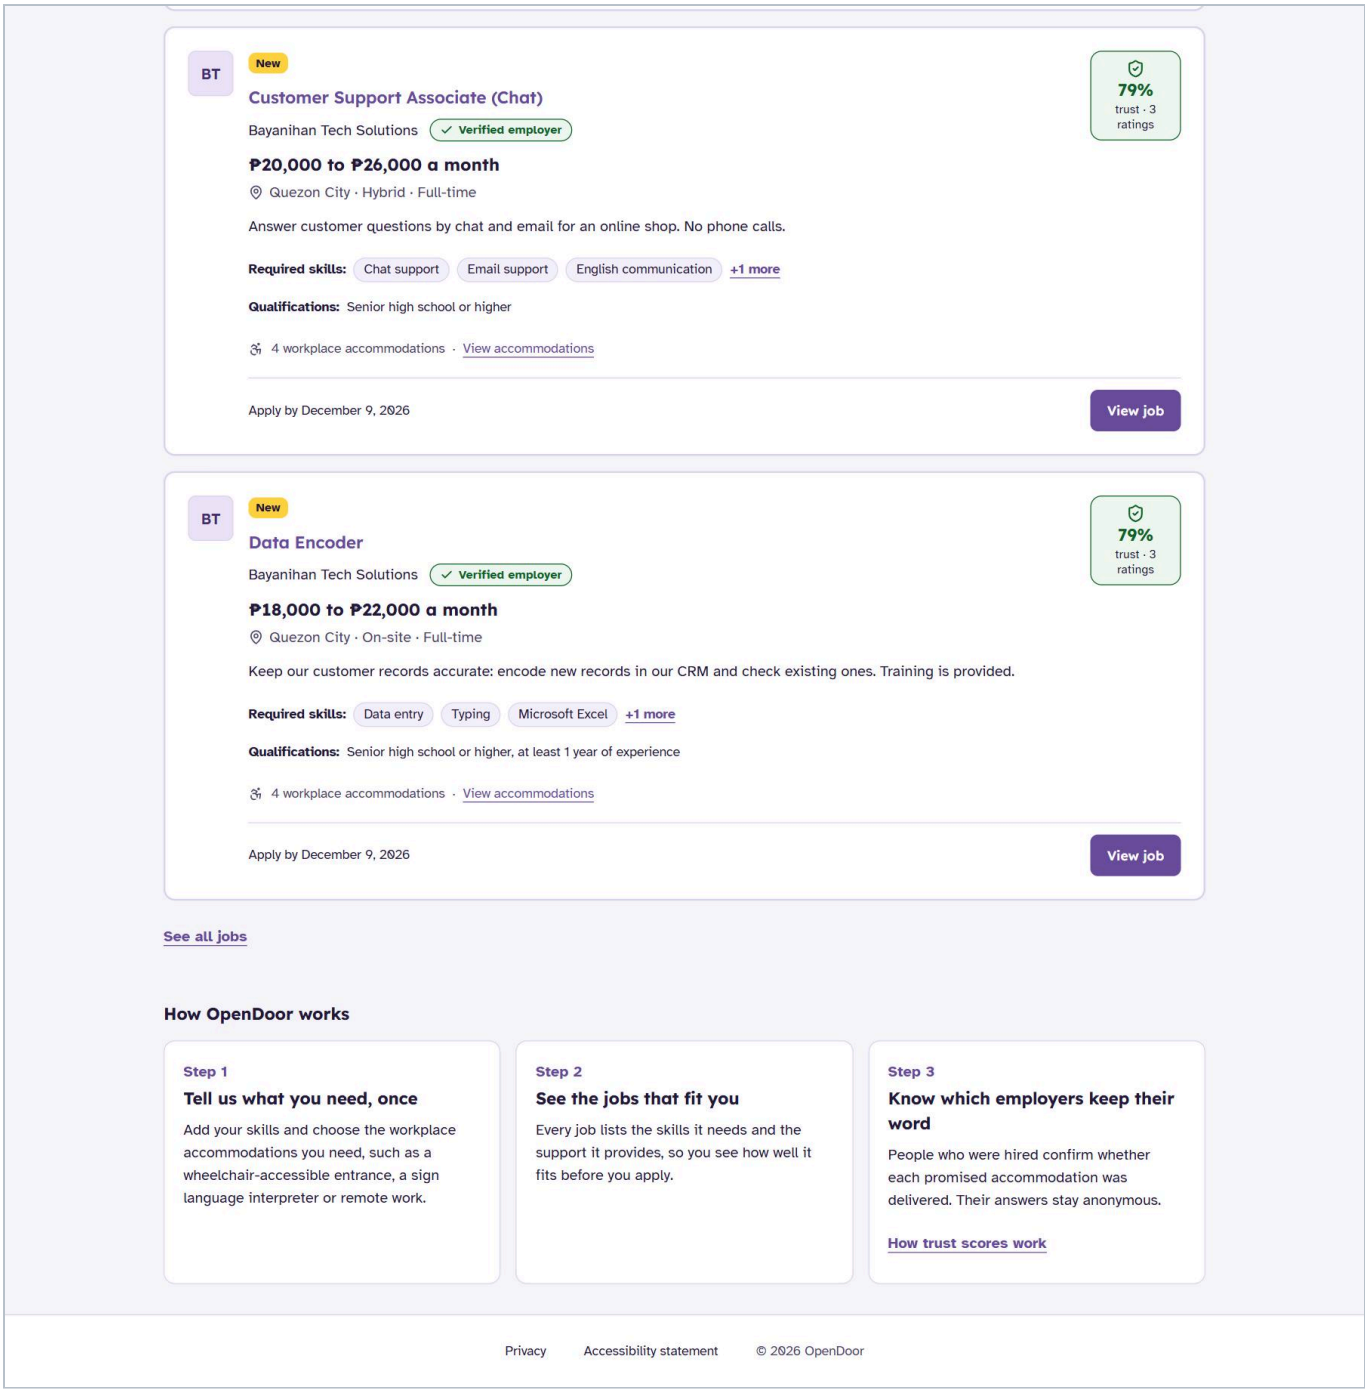

- Signed in: "Go to my dashboard" instead of the account buttons
- Quiet mode or reduced motion: the mascot stands still, no sparkles (section 8)

API

`GET /job-postings (newest 3)`

Screenshot – part 1 of 2 /

Screenshot – part 2 of 2 /

3.2 Find jobs

Route	`/jobs (guest), /candidate/jobs (job seeker – see 4.4)`
Who	Everyone
Purpose	Search and filter open jobs of verified companies.

ON THE SCREEN

- Subtitle "Search open jobs and filter by the support you need."
- "Search jobs" field ("Job title, description or company name. Results update as you type.") with "Speak"
- Filter chips "Work setup", "Category", "Accommodations" and "Sort: Best match" (see FilterChips)
- Announced count "3 jobs found", job cards, pagination

ACTIONS

- Typing filters after a short pause – no search button; focus stays in the field
- Every filter is kept in the address, so a search can be shared or bookmarked; the job page's back link returns to it
- Open a job card title or "View job" → Job details

MESSAGES AND STATES

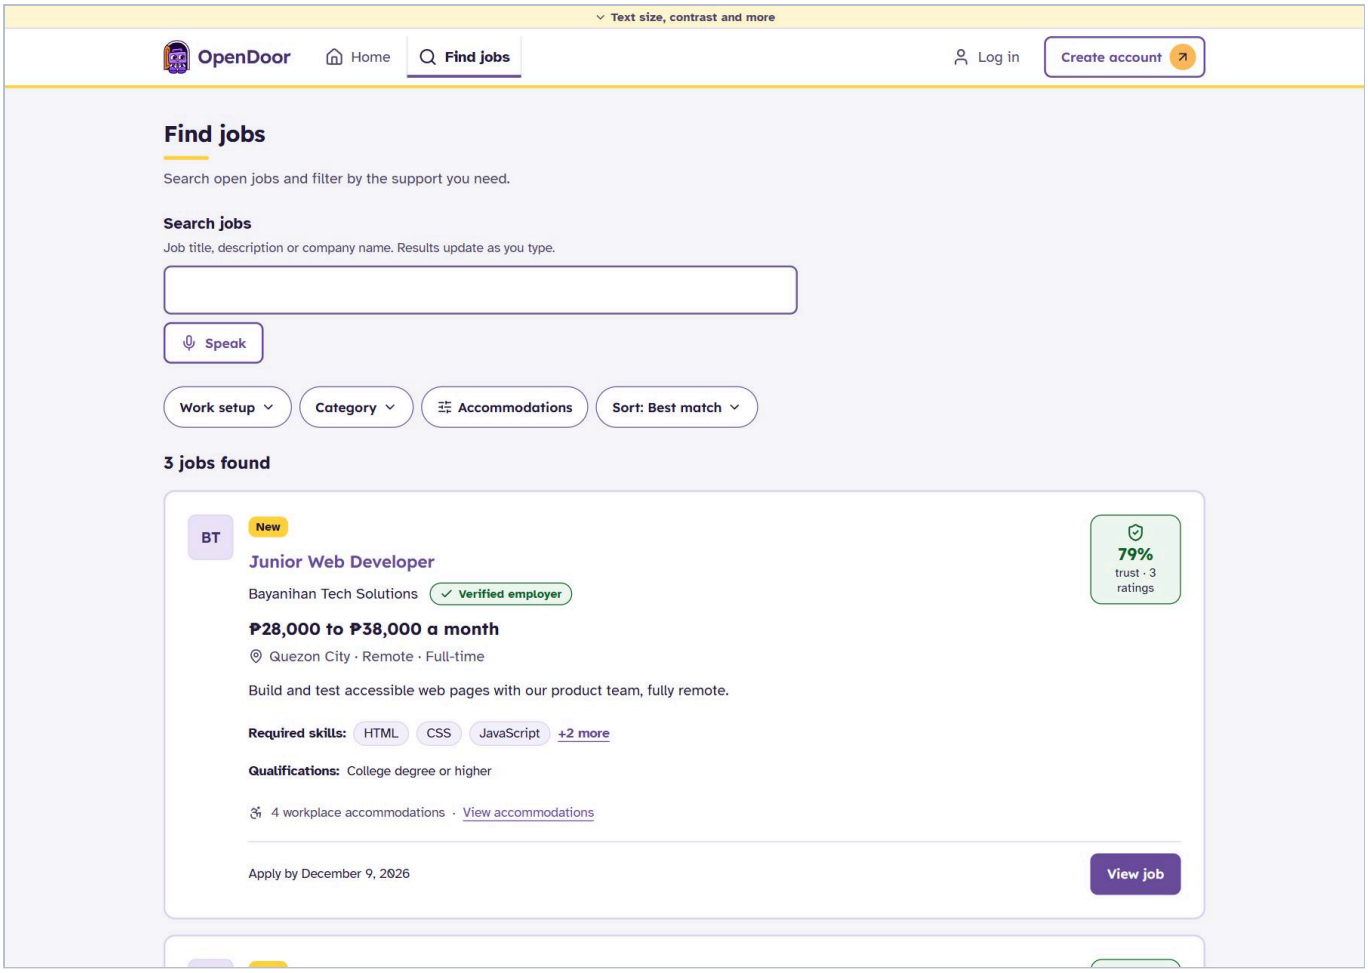

- Empty: the sad mascot and "Try fewer filters or a different keyword."
- Error: "Jobs could not be loaded" with reference id

API

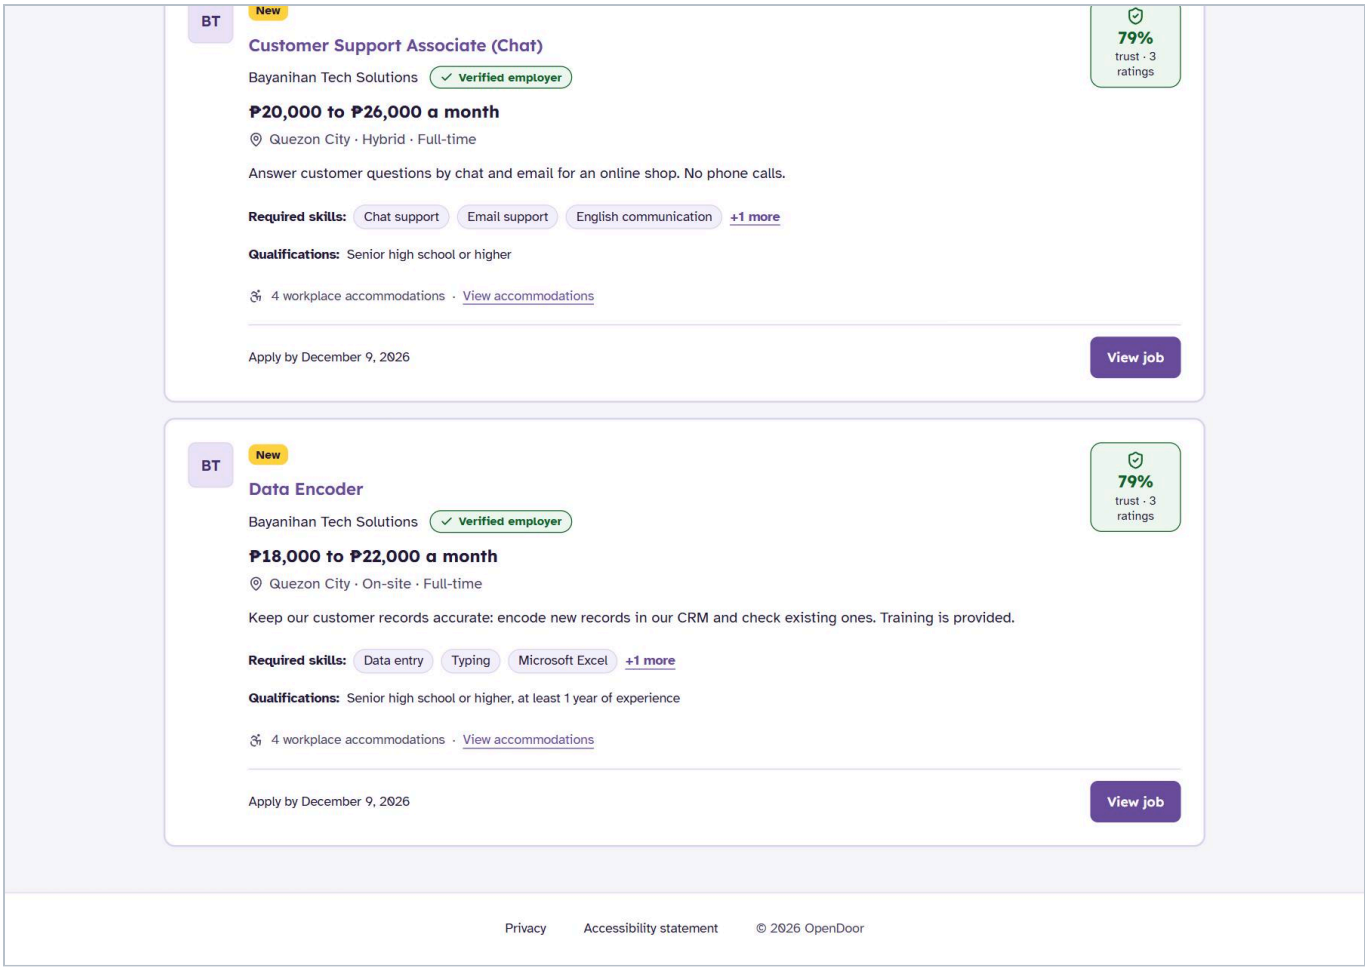

`GET /job-postings?q=&category=&accommodations[]=&work_setup[]=&sort=&page=`

`GET /categories`

`GET /accommodations`

Screenshot – part 1 of 2 `/jobs`

Screenshot – part 2 of 2 `/jobs`

3.3 Job details

Route	`/jobs/{id}`
Who	Everyone (job seekers see their own version – 4.5)
Purpose	Everything about one job: the work, the pay, the requirements, the accommodations, the employer's trust score and the Accessibility Snapshot.

ON THE SCREEN

- "‹ Back to job results" (or to the employer page or saved jobs, wherever the user came from); h1 job title; "Read this job aloud"
- "On this page" (NEW): links to Job overview, Responsibilities, Required skills, Qualifications, Salary and benefits, Location, schedule and work setup, Workplace accommodations, About the employer, Application requirements and Apply
- Sections in that order; "Job overview" shows the company with the Verified badge, Salary, Location, Work setup, Employment type, Apply by and Category; missing details say so ("Salary not disclosed", "The employer did not list any benefits.")
- Closed card "Workplace Accessibility Snapshot" with "Show"; "About the employer" with the Trust score card and "How trust scores work"
- Guest card "Interested?" – "Log in to apply, or create an account. It takes about 2 minutes." with "Log in to apply" (returns to this job after login) and "Create an account"

ACTIONS

- Log in to apply
- Read aloud
- Open the employer page
- Show / Hide the snapshot

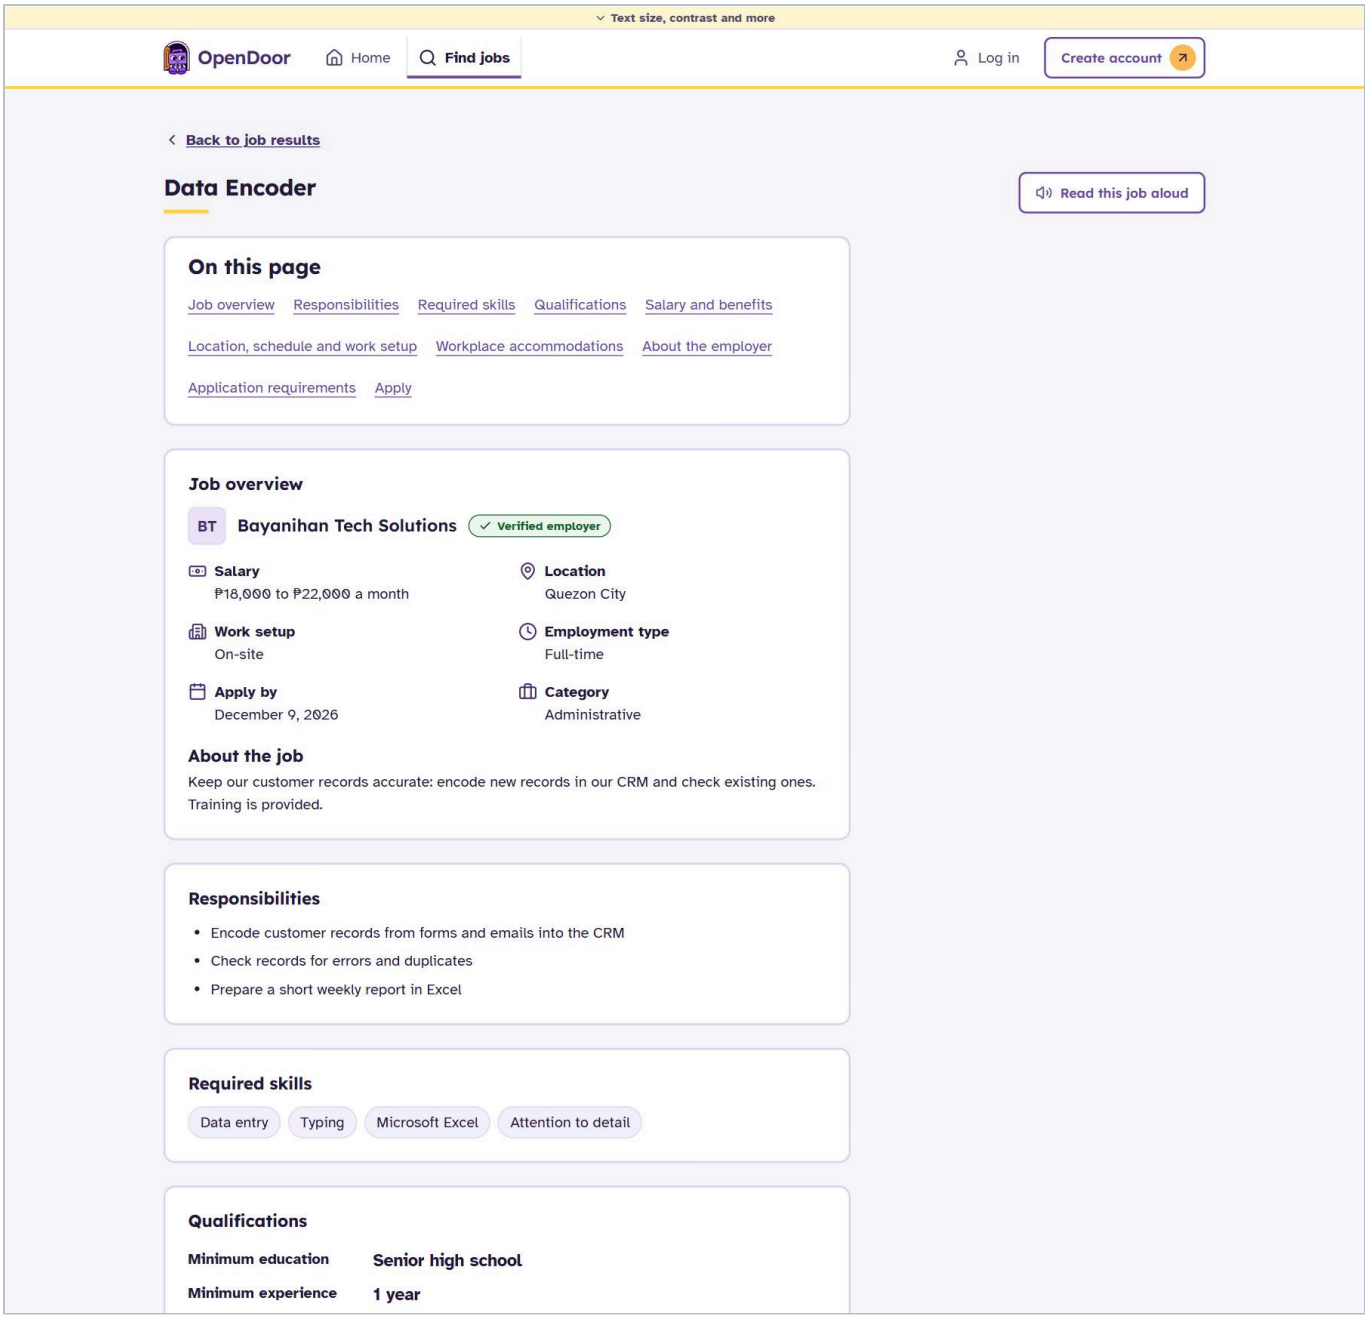

MESSAGES AND STATES

- Snapshot loads when opened
- Snapshot failed: "The accessibility snapshot is not available right now. The job details above are complete."
- Partial data notes, e.g. "Nearby places could not be loaded right now." or "Some map information is from an older saved copy because the map service did not respond."
- Unknown or unpublished job: "This job could not be loaded"

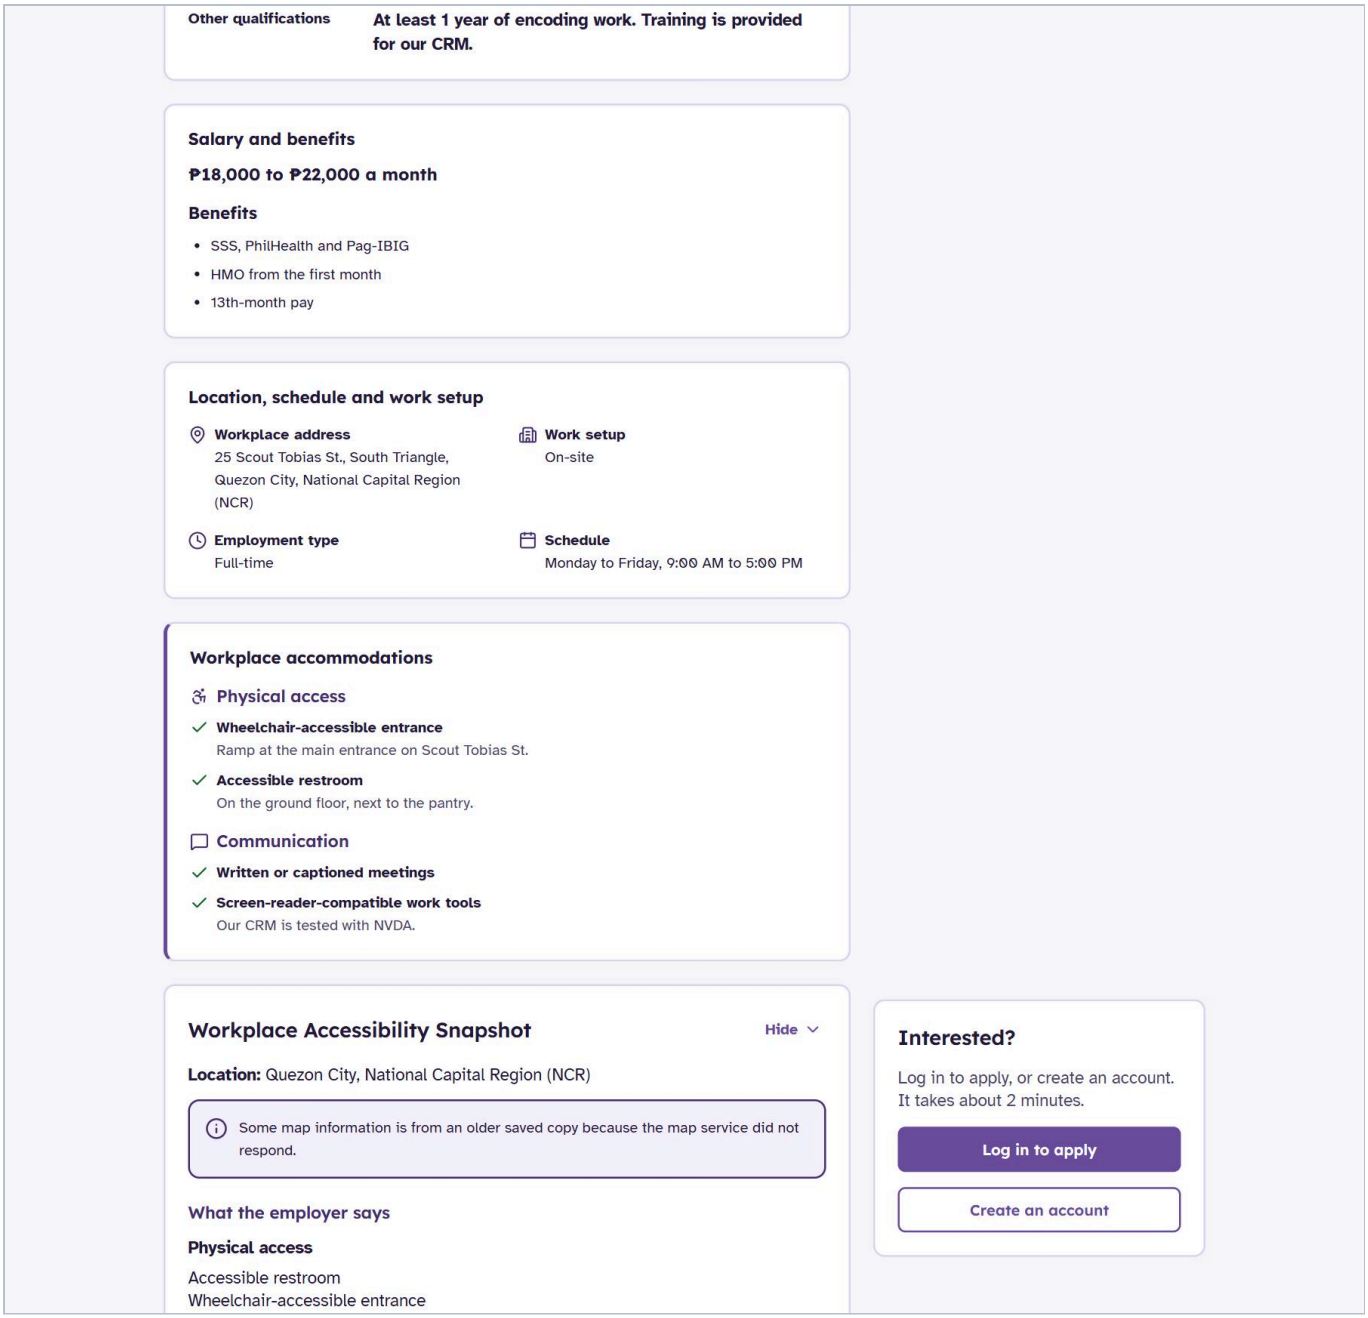

API

`GET /job-postings/{id}`

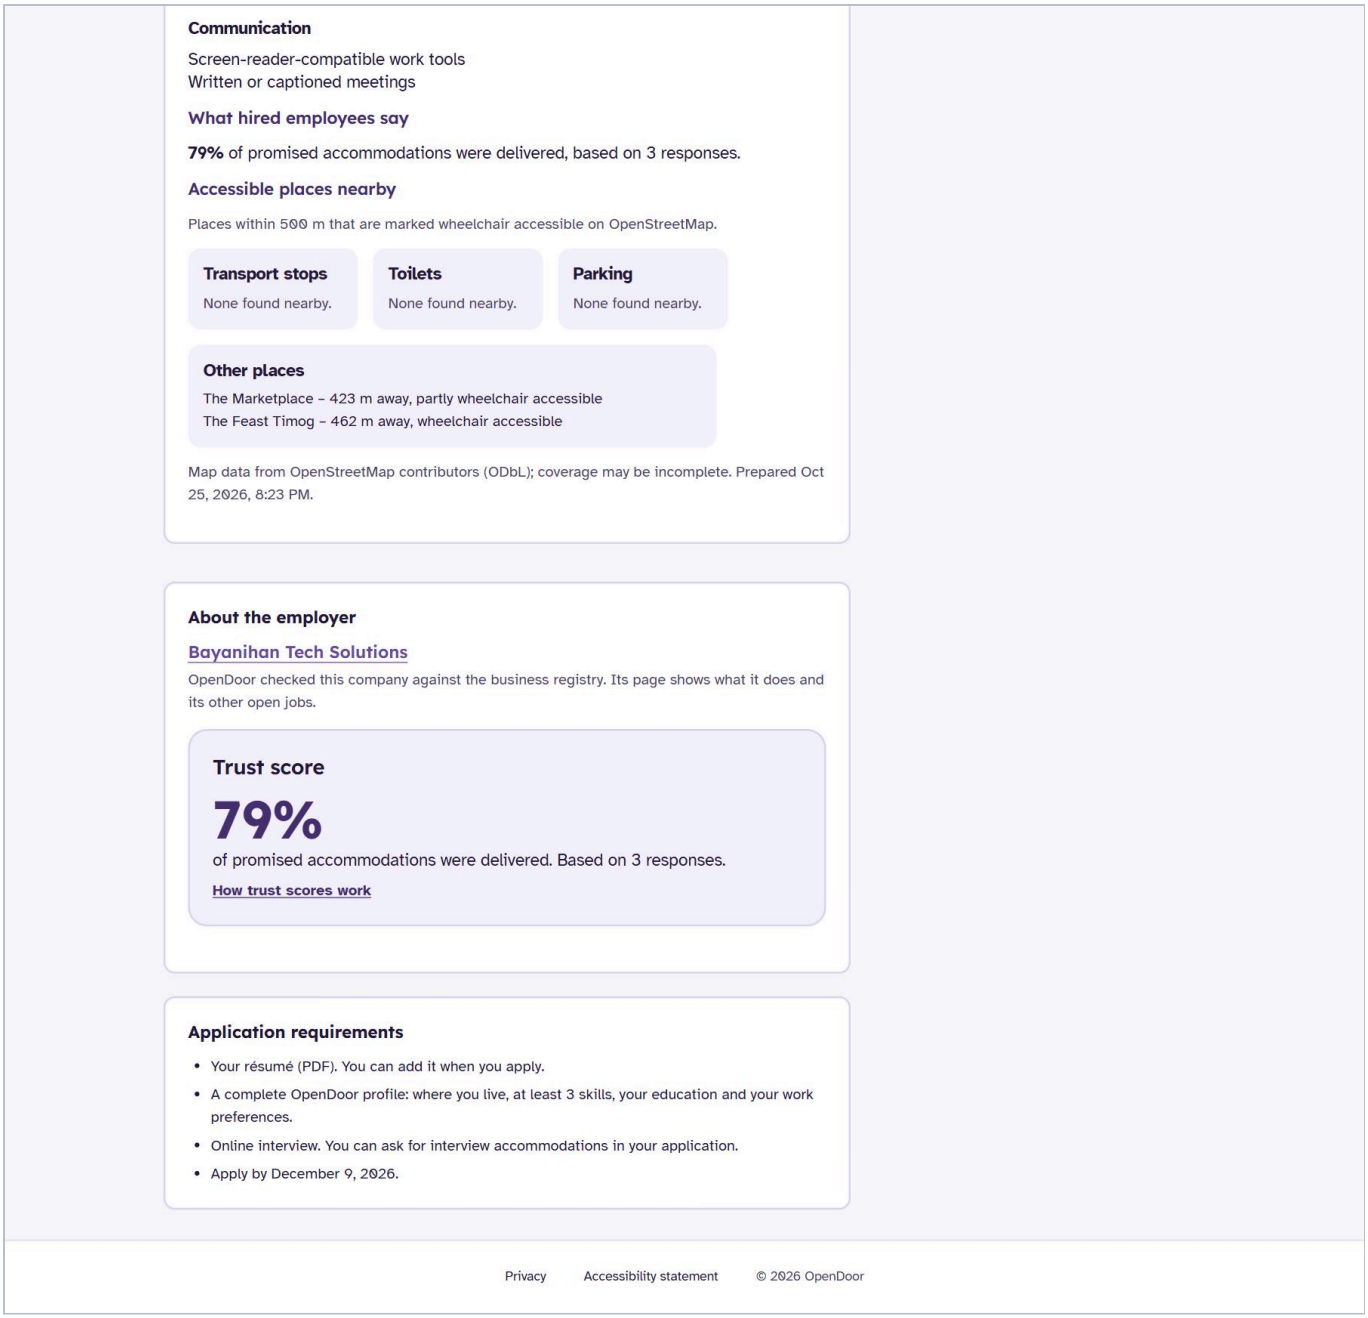

`GET /insights/job-postings/{id} (Insights mashup: Core summary + PSGC + Nominatim + Overpass), only when the snapshot is opened`

The Accessibility Snapshot opened – part 1 of 3 `/jobs/1`

The Accessibility Snapshot opened – part 2 of 3 `/jobs/1`

The Accessibility Snapshot opened – part 3 of 3 `/jobs/1`

3.4 Employer page

Route	`/employers/{id}`
Who	Everyone
Purpose	Public profile of a company with its trust score and open jobs.

ON THE SCREEN

- Back link to where the user came from (e.g. "‹ Back to job results")
- h1 company name with the Verified badge, "industry · location", about the company
- Side by side: Trust score card with the table "Each accommodation" and "Open jobs" as job cards

ACTIONS

- Open a job

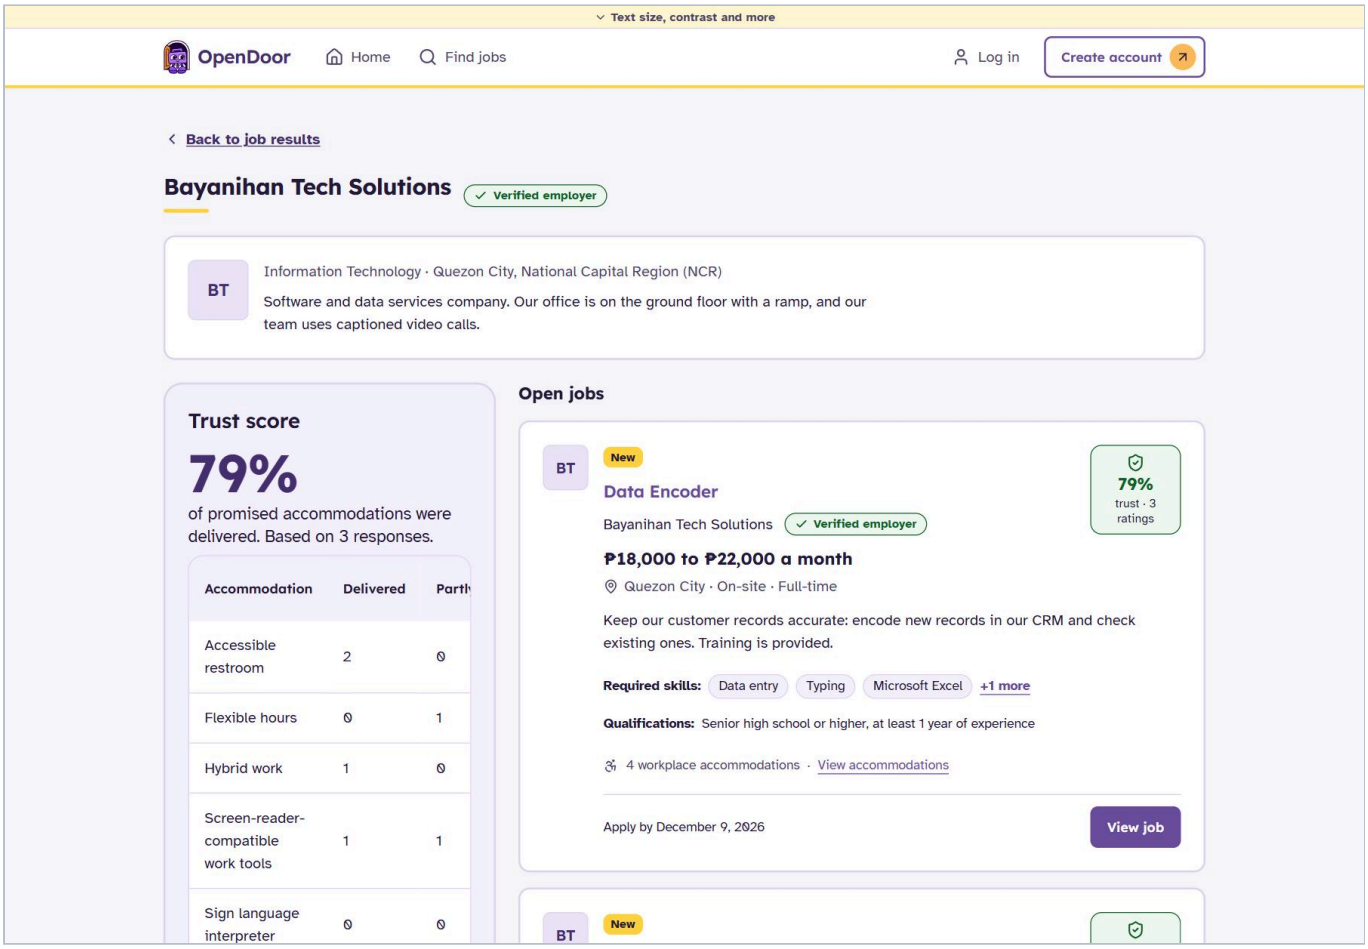

MESSAGES AND STATES

- No jobs: "No open jobs right now"
- Unpublished score: "Not published yet. A score appears after 3 hired employees have rated this employer (2 of 3 so far)."
- A wide table scrolls inside its box instead of widening the page

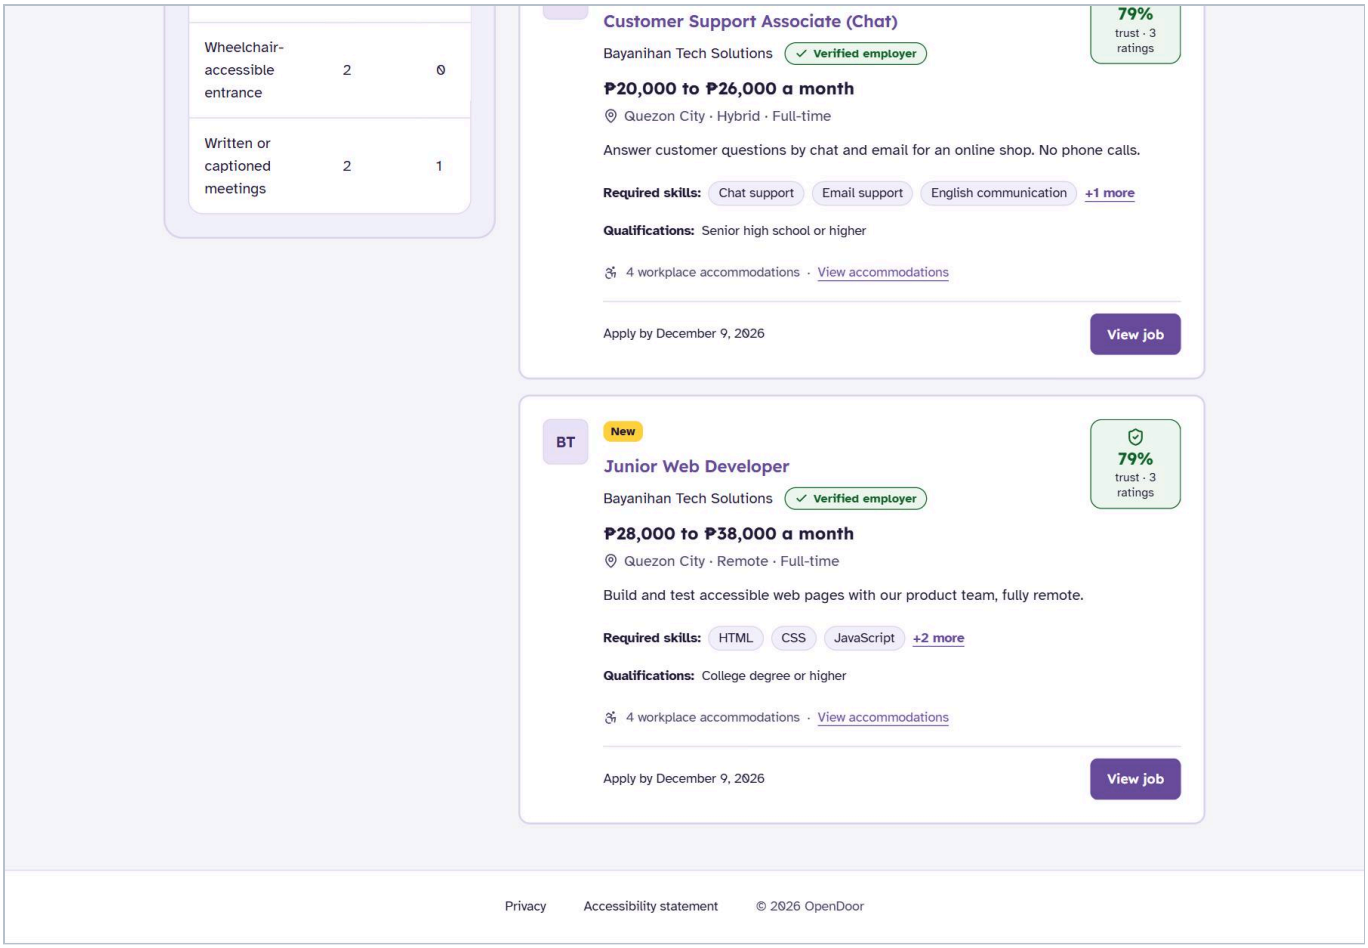

API

`GET /employers/{id}`

`GET /employers/{id}/trust-score`

Screenshot – part 1 of 2 `/employers/1`

Screenshot – part 2 of 2 `/employers/1`

3.5 Log in

Route	`/login`
Who	Guests (signed-in users are sent to their dashboard)
Purpose	Sign in with email and password.

ON THE SCREEN

- Subtitle "Use your email and password."; the door mascot on wide screens
- Card: Email address (required), Password (required), "Show password" and "Forgot your password?" on one row, full-width "Log in" ("Logging in…" while busy), "New to OpenDoor? Create an account"

ACTIONS

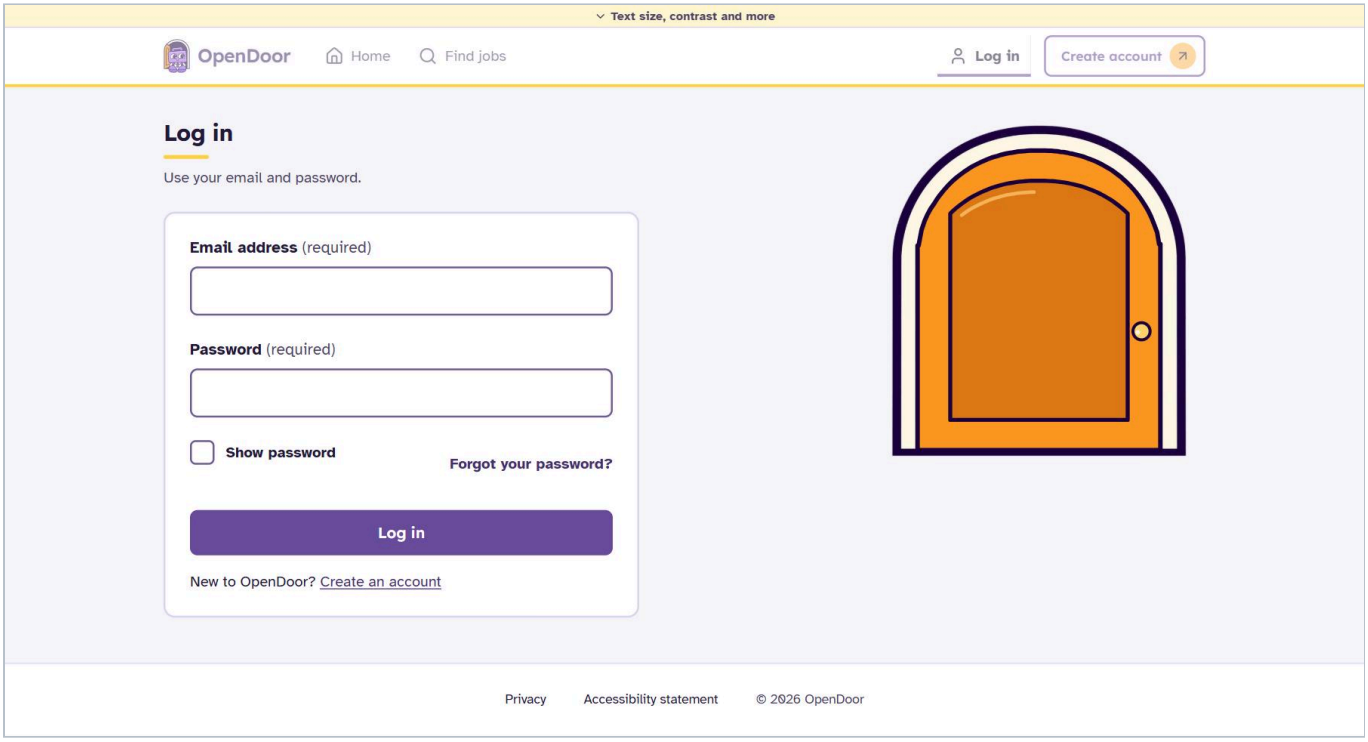

- Log in → the role's dashboard, or back to the page the user was sent from (only inside their own portal)
- Forgot your password? → 3.6

MESSAGES AND STATES

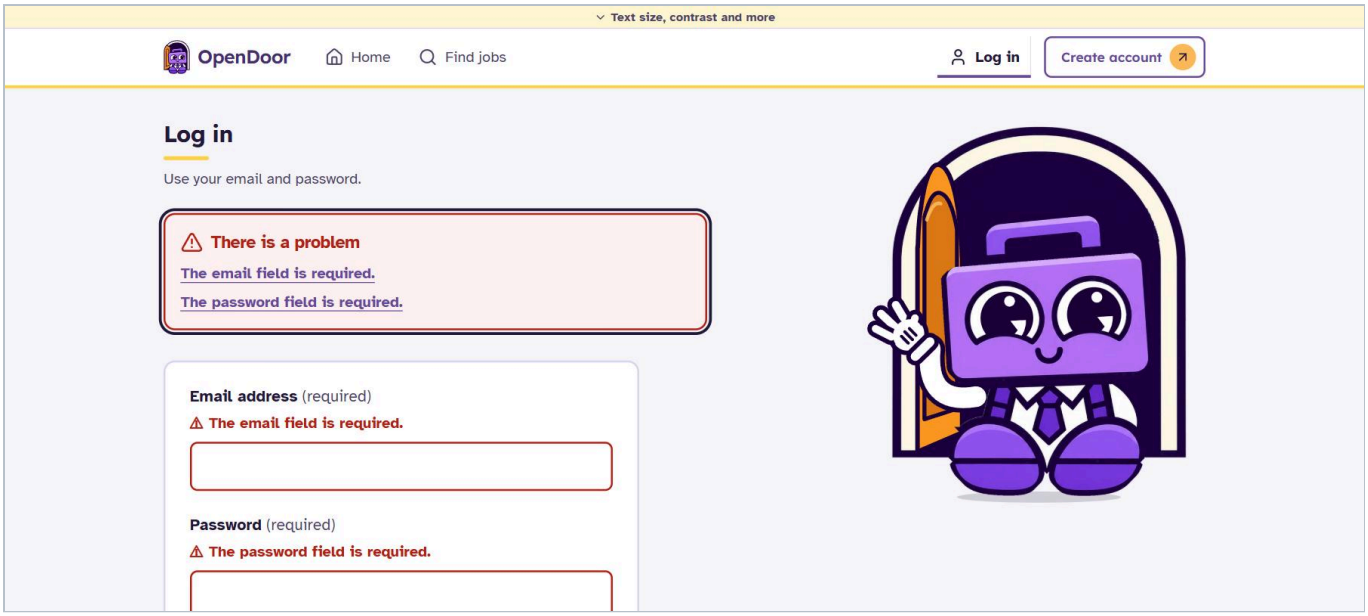

- "Your session has ended – Please log in again to continue." (expired token)
- After a password reset: "Your password is changed – Log in with your new password."
- Wrong email or password: error under Email
- "Your account is suspended – Please contact the OpenDoor administrator…"
- "Too many login attempts – For your security, please wait one minute and try again." (5 per minute)

API

`POST /login`

Screenshot `/login`

After "Log in" with empty fields: error summary and field errors `/login`

3.6 Forgot password

Route	`/forgot-password`
Who	Guests
Purpose	Ask for a link to choose a new password, without revealing whether an email has an account.

ON THE SCREEN

- h1 "Reset your password", subtitle "Enter the email address of your OpenDoor account. We will send you a link to choose a new password."
- Card: Email address (required), "Send reset link" ("Sending…"), "Remembered it? Back to log in"

ACTIONS

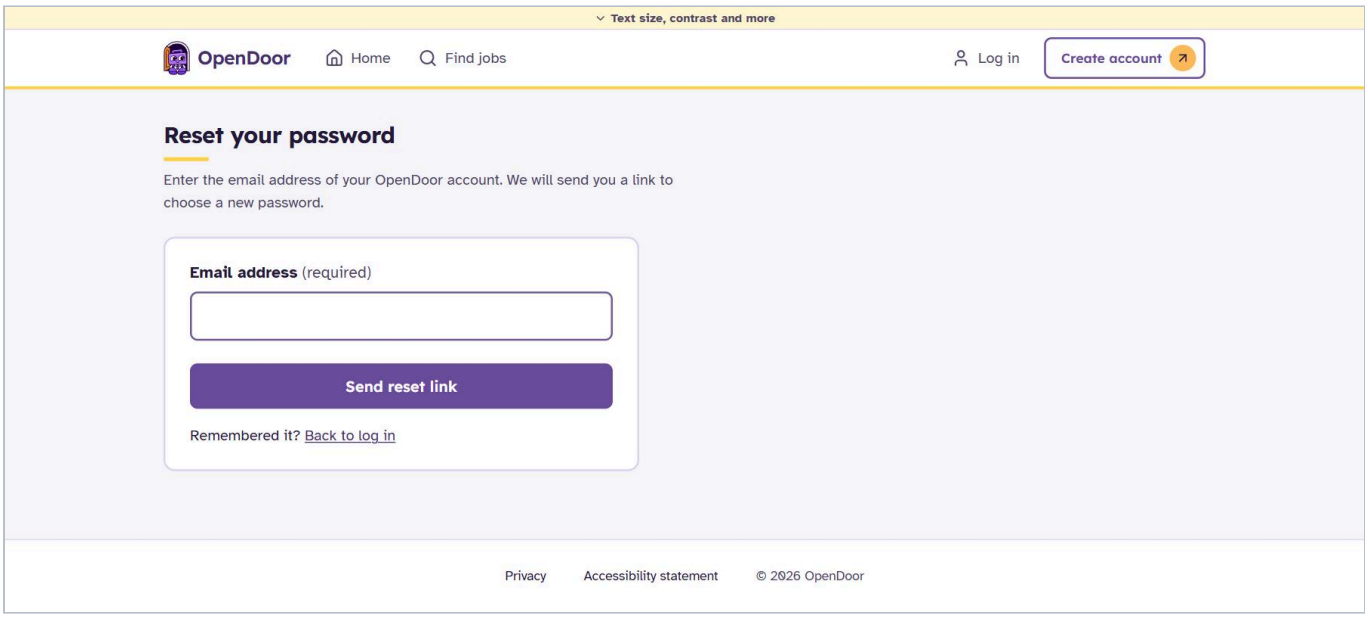

- Send reset link → "Check your email – If an OpenDoor account exists for {email}, we sent it a link to choose a new password. The link works for 60 minutes." with "Back to log in" and "Send another link"
- The email ("Reset your OpenDoor password", button "Choose a new password") goes only to active accounts and also when notification emails are turned off

MESSAGES AND STATES

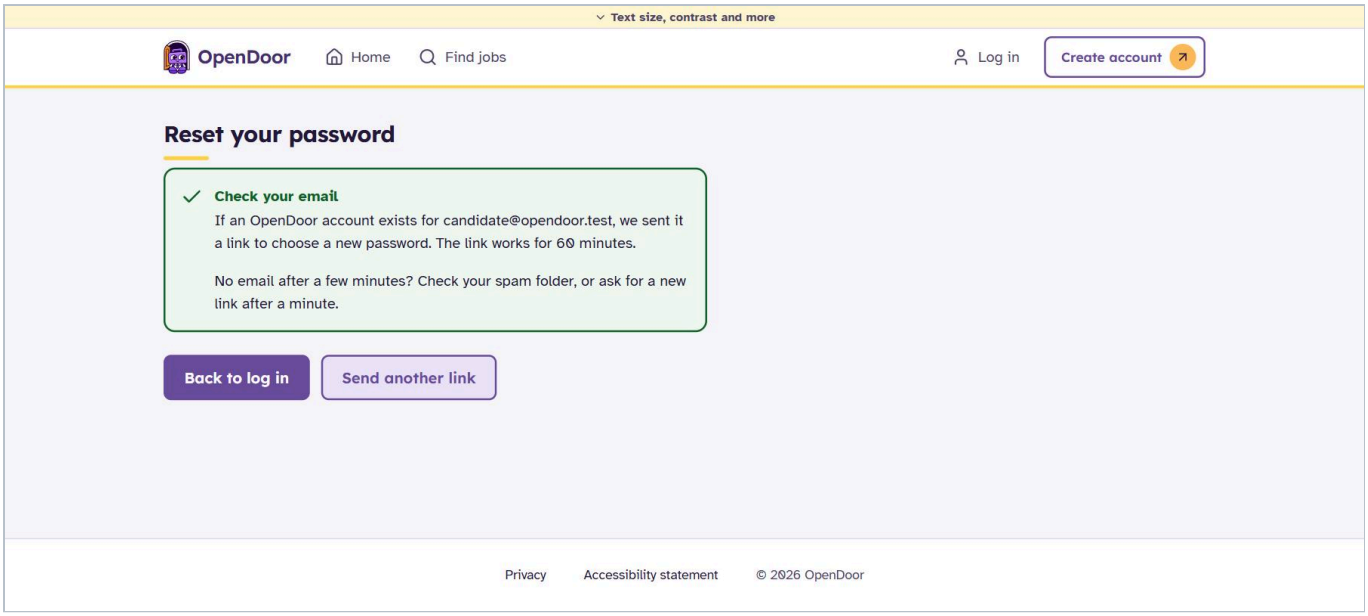

- Wrong email format: error summary linked to the field
- "Too many requests – For your security, please wait one minute and try again." (5 per minute)
- One new link per account per minute; the link works once, for 60 minutes

API

`POST /forgot-password {email} → always 200 with the same message`

Screenshot `/forgot-password`

After "Send reset link": the same answer for every email `/forgot-password`

3.7 Reset password

Route	`/reset-password?token=…&email=…`
Who	Guests (opened from the email)
Purpose	Choose a new password with the emailed link.

ON THE SCREEN

- h1 "Choose a new password", subtitle "… You will be signed out on all devices."
- Card: Email address (filled in from the link), New password ("At least 8 characters."), Confirm new password, "Show passwords", "Save new password" ("Saving…")

ACTIONS

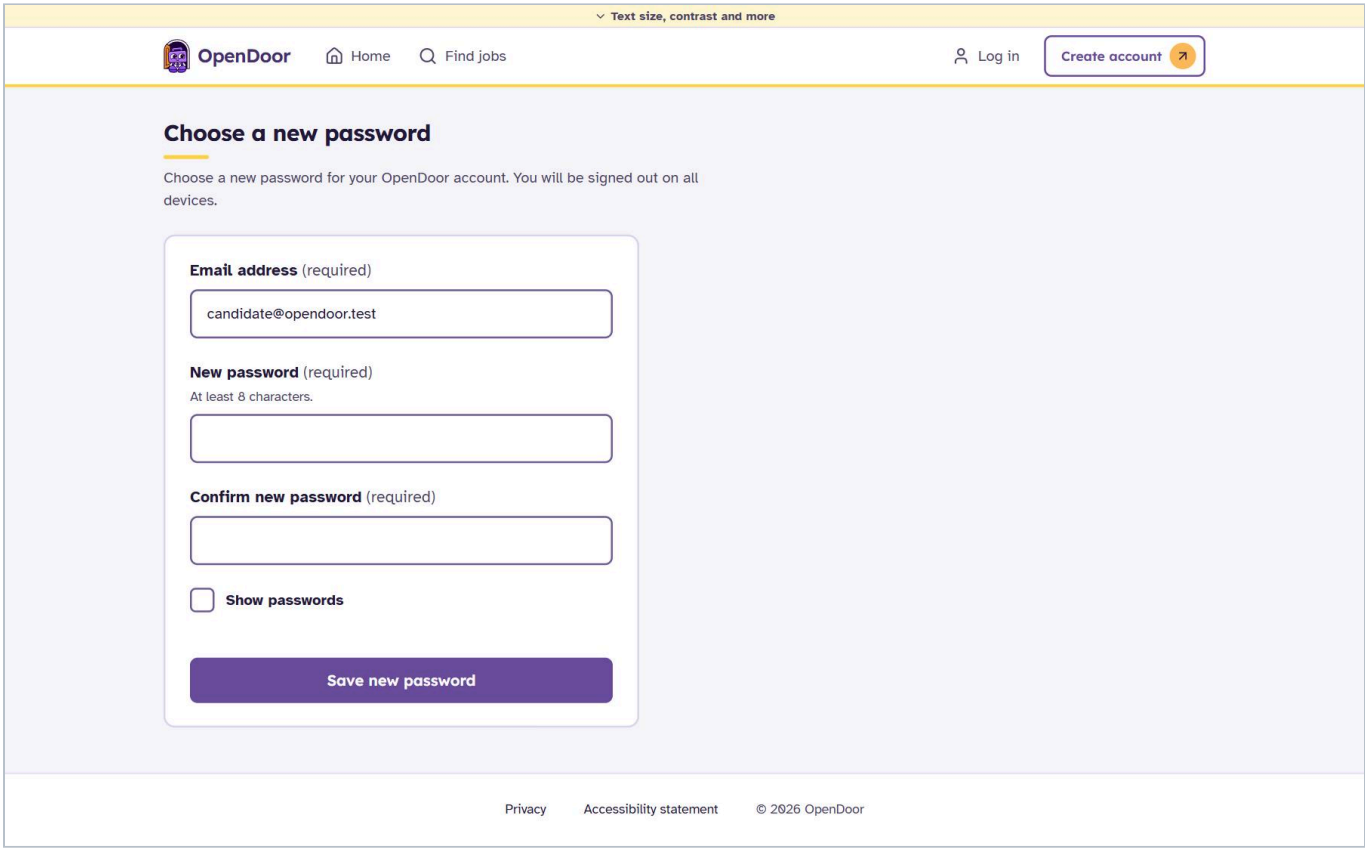

- Save → back to Log in with "Your password is changed – Log in with your new password."; every device is signed out

MESSAGES AND STATES

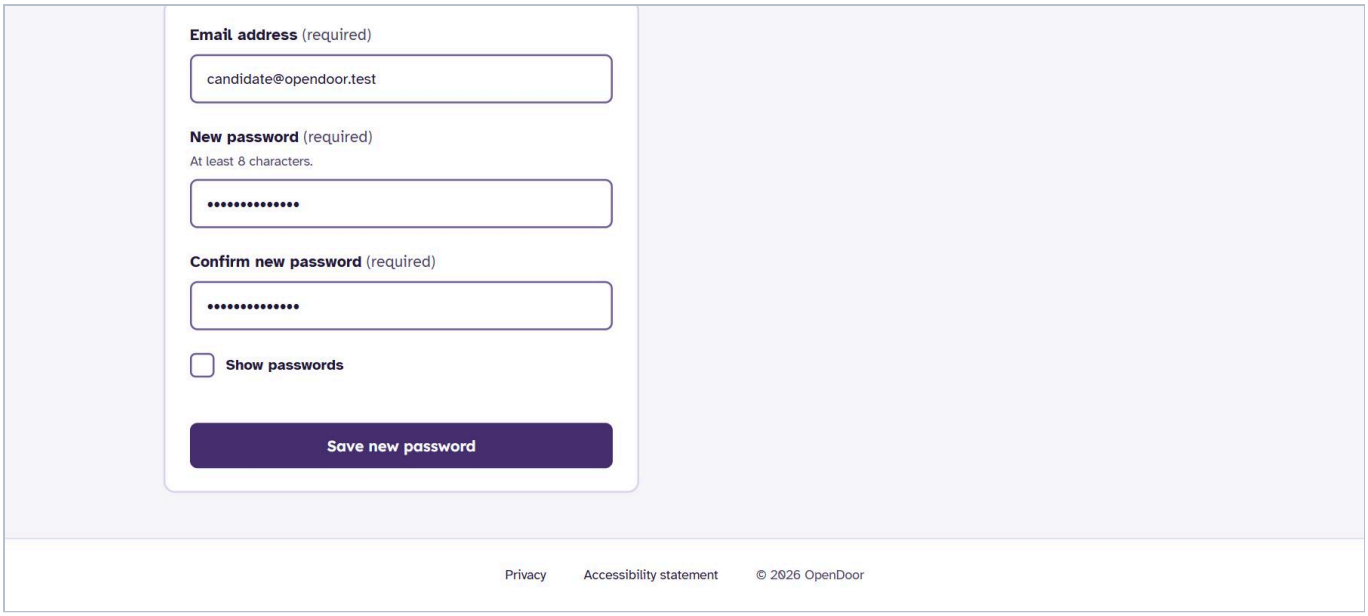

- Used, expired or wrong link: "This link cannot be used – This reset link is invalid or has expired. Ask for a new one." with "Ask for a new link"
- Link without a token: "This link is incomplete – Open the link from the email again, or ask for a new link."
- Weak or mismatched password: error summary linked to the field

API

```
POST /reset-password {token, email, password, password_confirmation}
```

Opened from the emailed link `/reset-password?token=example-token&email=candidate%40opendoor.test`

A used or expired link `/reset-password?token=example-token&email=candidate%40opendoor.test`

3.8 Create account (3 steps)

Route	`/register`
Who	Guests
Purpose	Create a job seeker or employer account with data-privacy consent.

ON THE SCREEN

- "Step n of 3 · ..." with progress bars; the door mascot on wide screens
- Step 1 "Your role": "What brings you to OpenDoor?" as two whole-card choices – "I am looking for a job" / "I am hiring"
- Step 2 "Your details": Full name, Email address ("We never share it."), Password ("At least 8 characters."), Confirm password, "Show password"
- Step 3 "Privacy and consent": card "Your privacy" (needs used only for matching, seen by employers only when you apply, disability type optional and never used for matching – "This follows the Data Privacy Act of 2012 (RA 10173).") and the checkbox "I agree that OpenDoor may process my personal data as described above."
- Buttons "Back", "Next", and on the last step "Create account" ("Creating account..."); "Already have an account? Log in" on step 1

ACTIONS

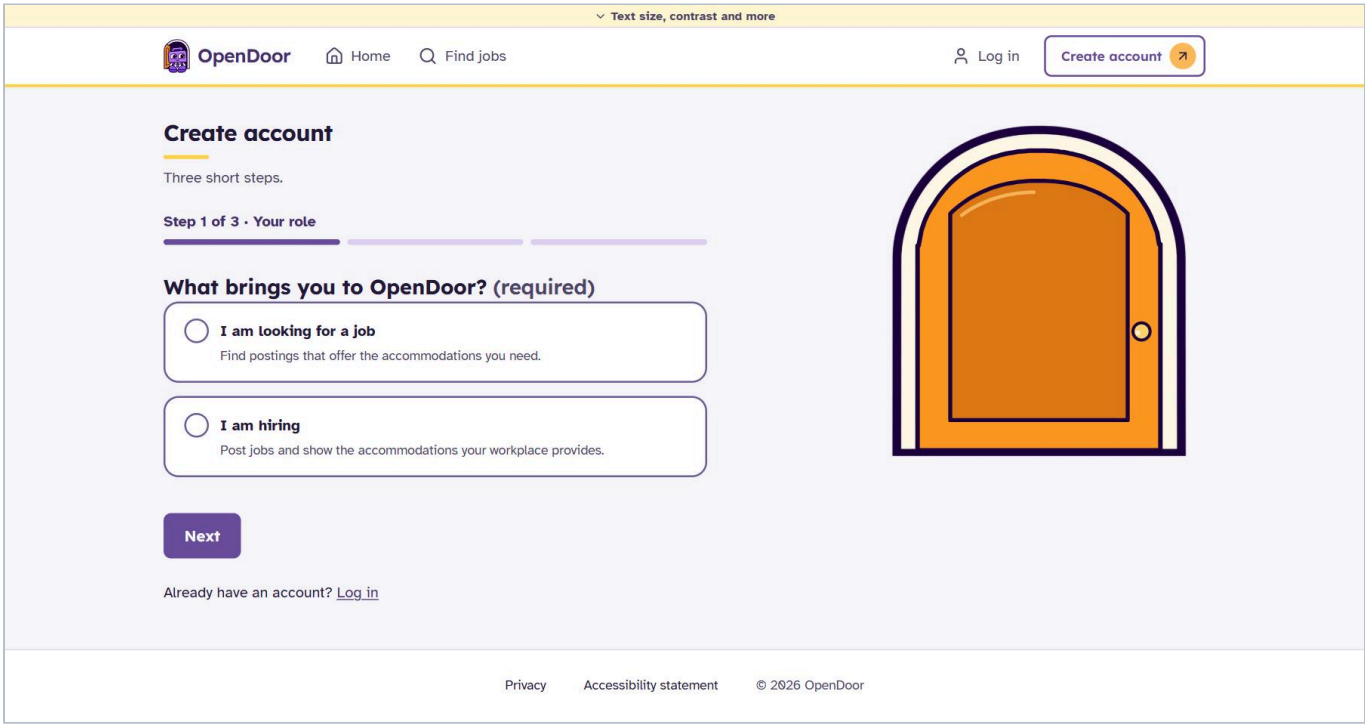

- Create account → job seekers go to "Complete your profile" (4.2) NEW, employers to Company profile; the welcome tour starts on the dashboard

MESSAGES AND STATES

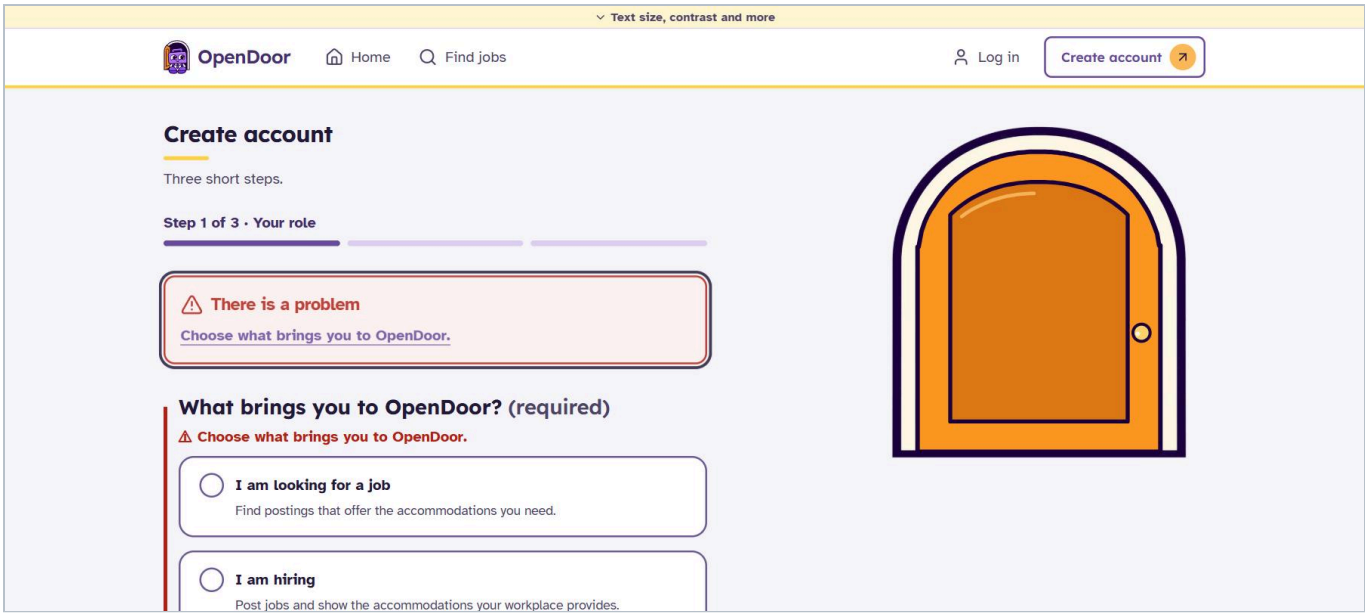

- Each step shows only its own errors in an error summary
- Server errors (e.g. email already used) send the user back to the first step with an error
- Tab title "Create account (step n of 3) – OpenDoor"

API

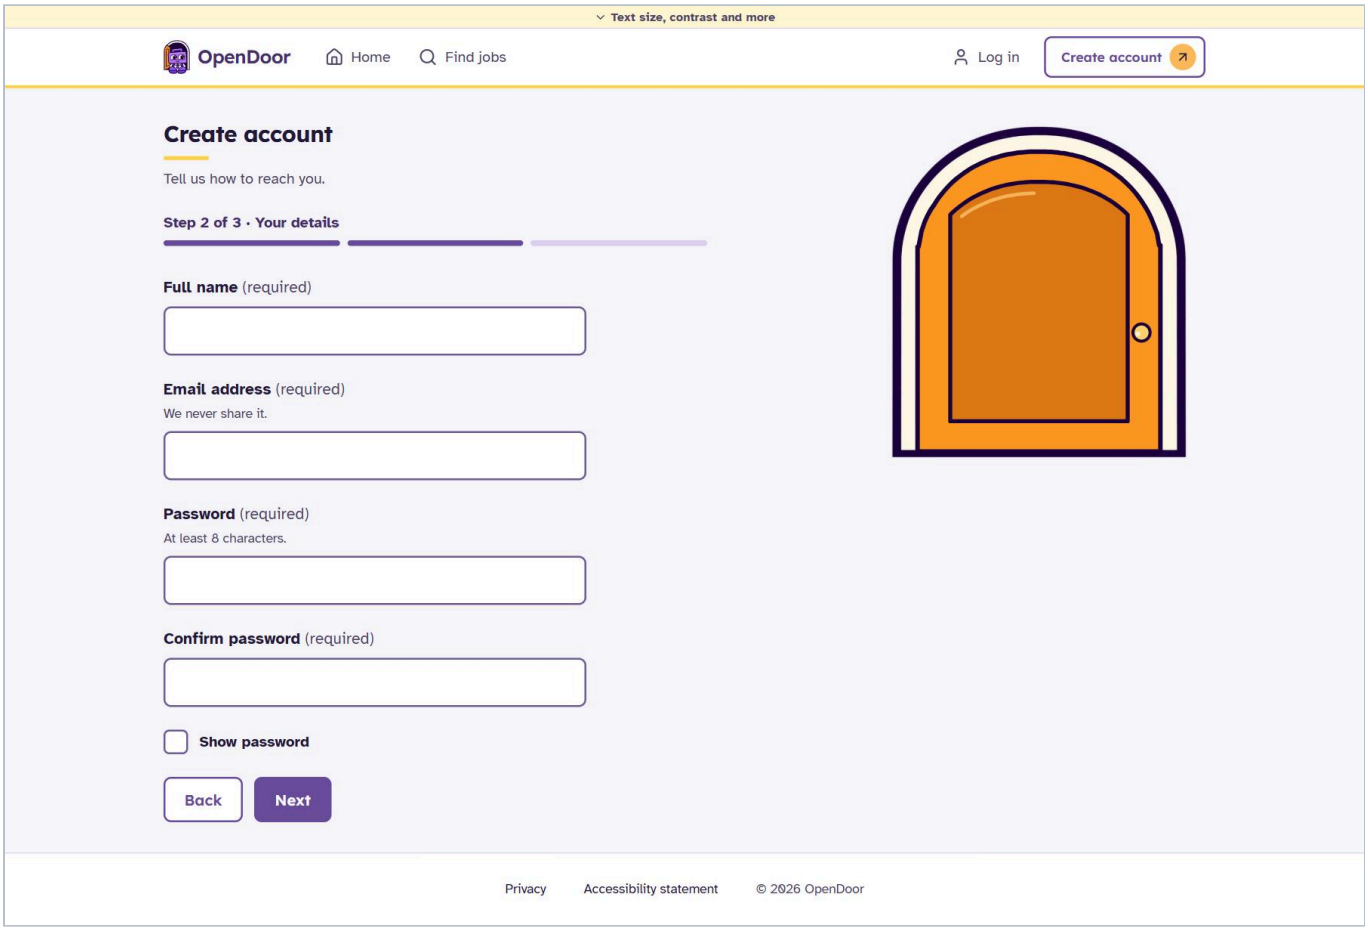

`POST /register (once, at the end)`

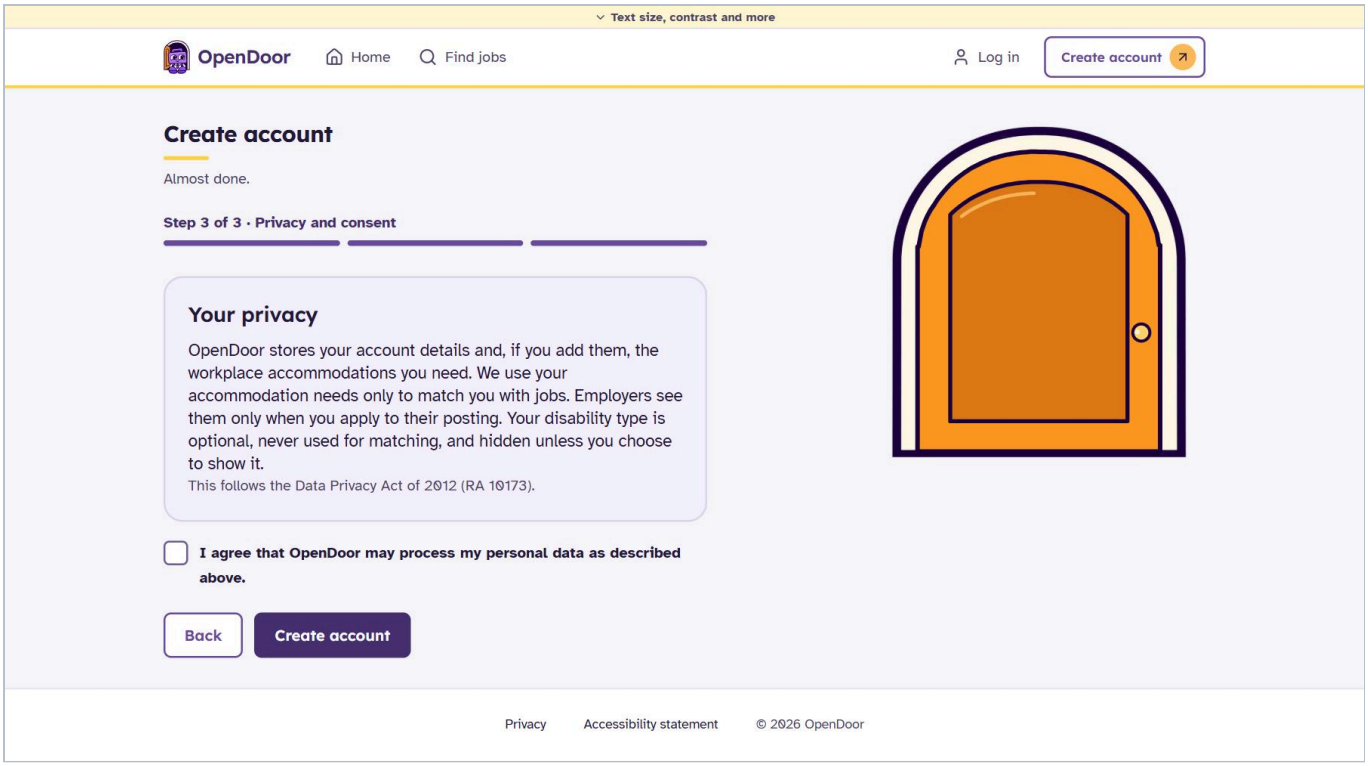

Step 1 · Your role `/register`

"Next" without a choice: the step is checked before moving on `/register`

Step 2 · Your details `/register`

Step 3 · Privacy and consent `/register`

3.9 Page not found

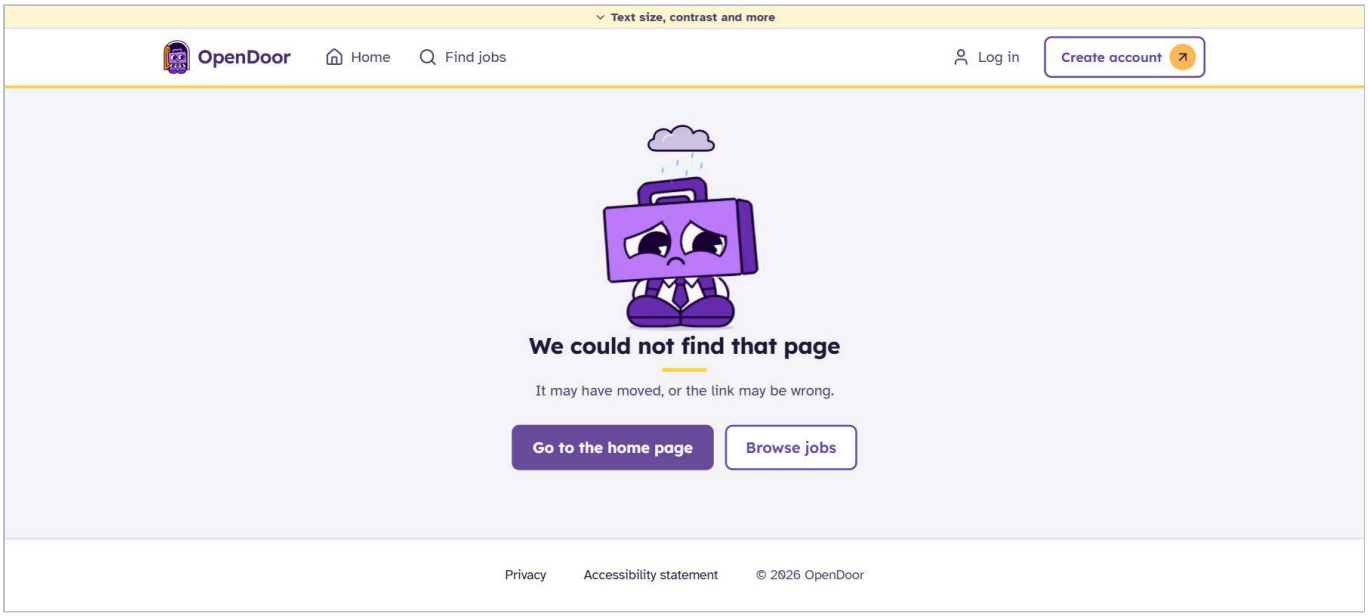

Route	`any unknown address`
Who	Everyone
Purpose	Friendly 404.

ON THE SCREEN

- The sad mascot, h1 "We could not find that page", "It may have moved, or the link may be wrong."
- Buttons "Go to the home page" (the role's dashboard when signed in) and "Browse jobs"

MESSAGES AND STATES

- Tab title "Page not found – OpenDoor"

Screenshot `/no-such-page`

3.10 Privacy

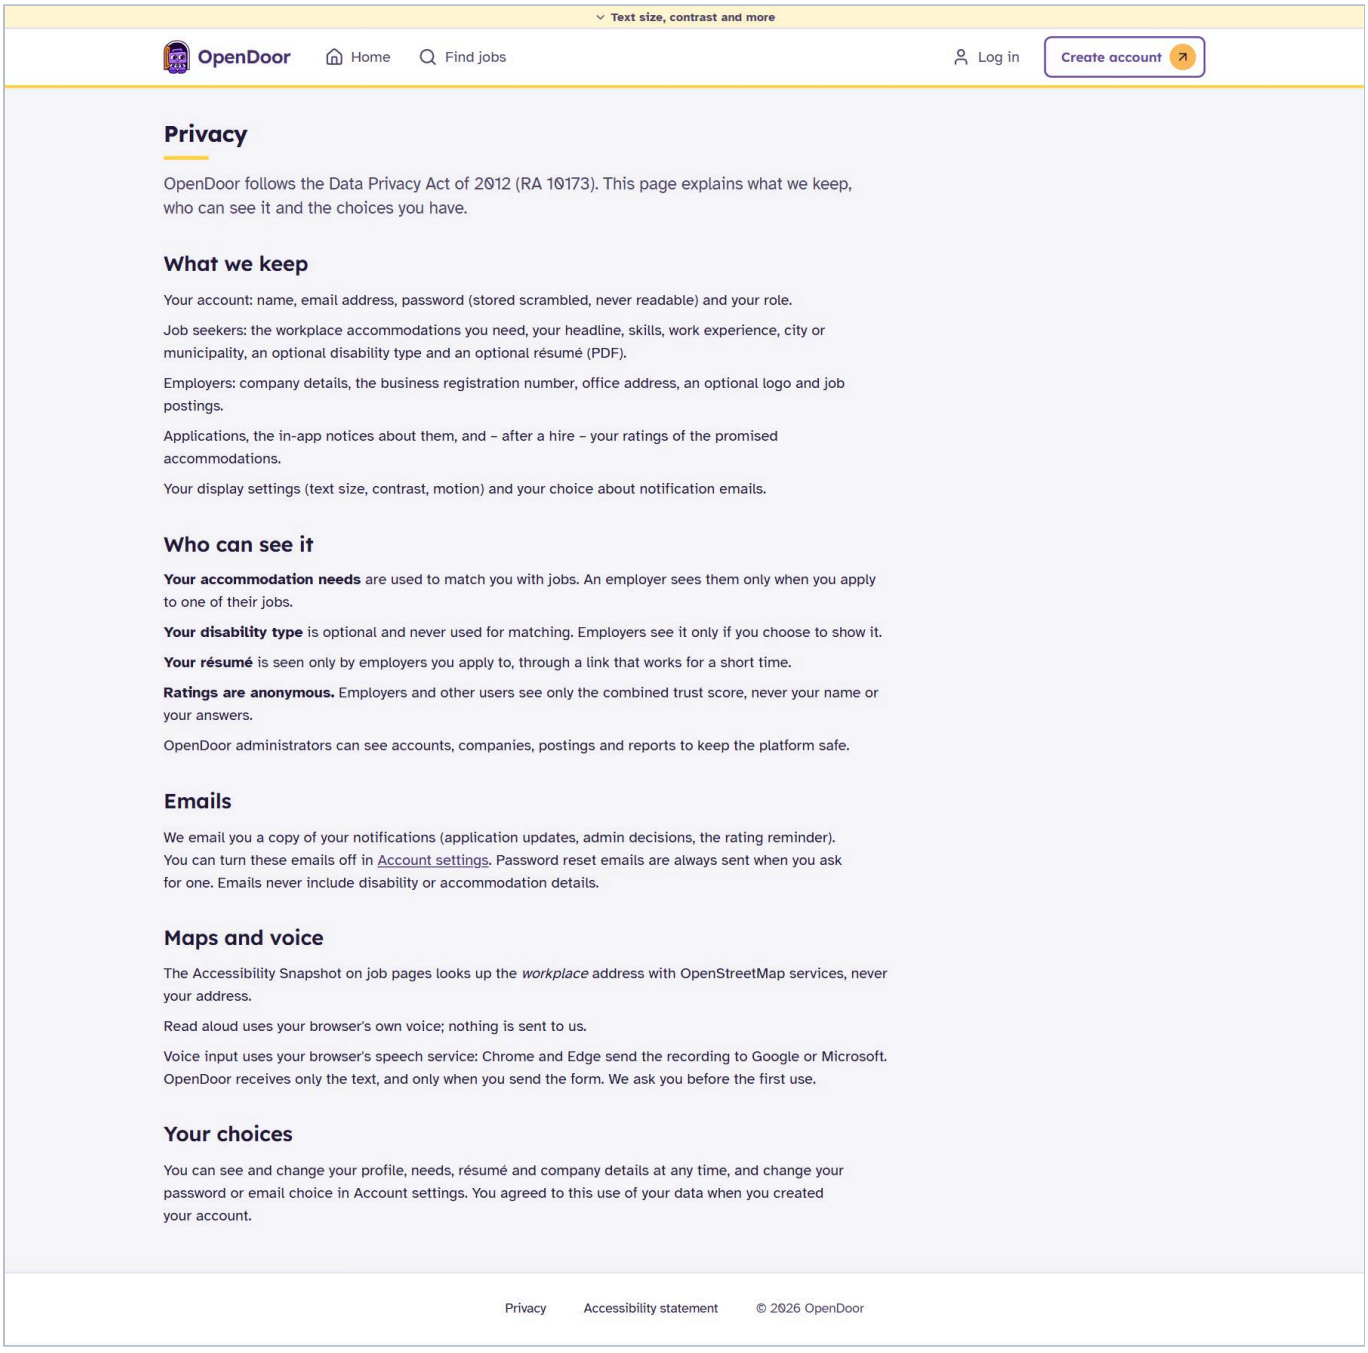

Route	`/privacy`
Who	Everyone (footer link)
Purpose	Plain-language privacy notice under the Data Privacy Act of 2012 (RA 10173).

ON THE SCREEN

- Sections "What we keep", "Who can see it", "Emails", "Maps and voice", "Your choices"
- Facts from the running system only (e.g. needs are seen by employers only through an application; Read aloud uses the browser's own voice)

ACTIONS

- Link to Account settings (email choice)

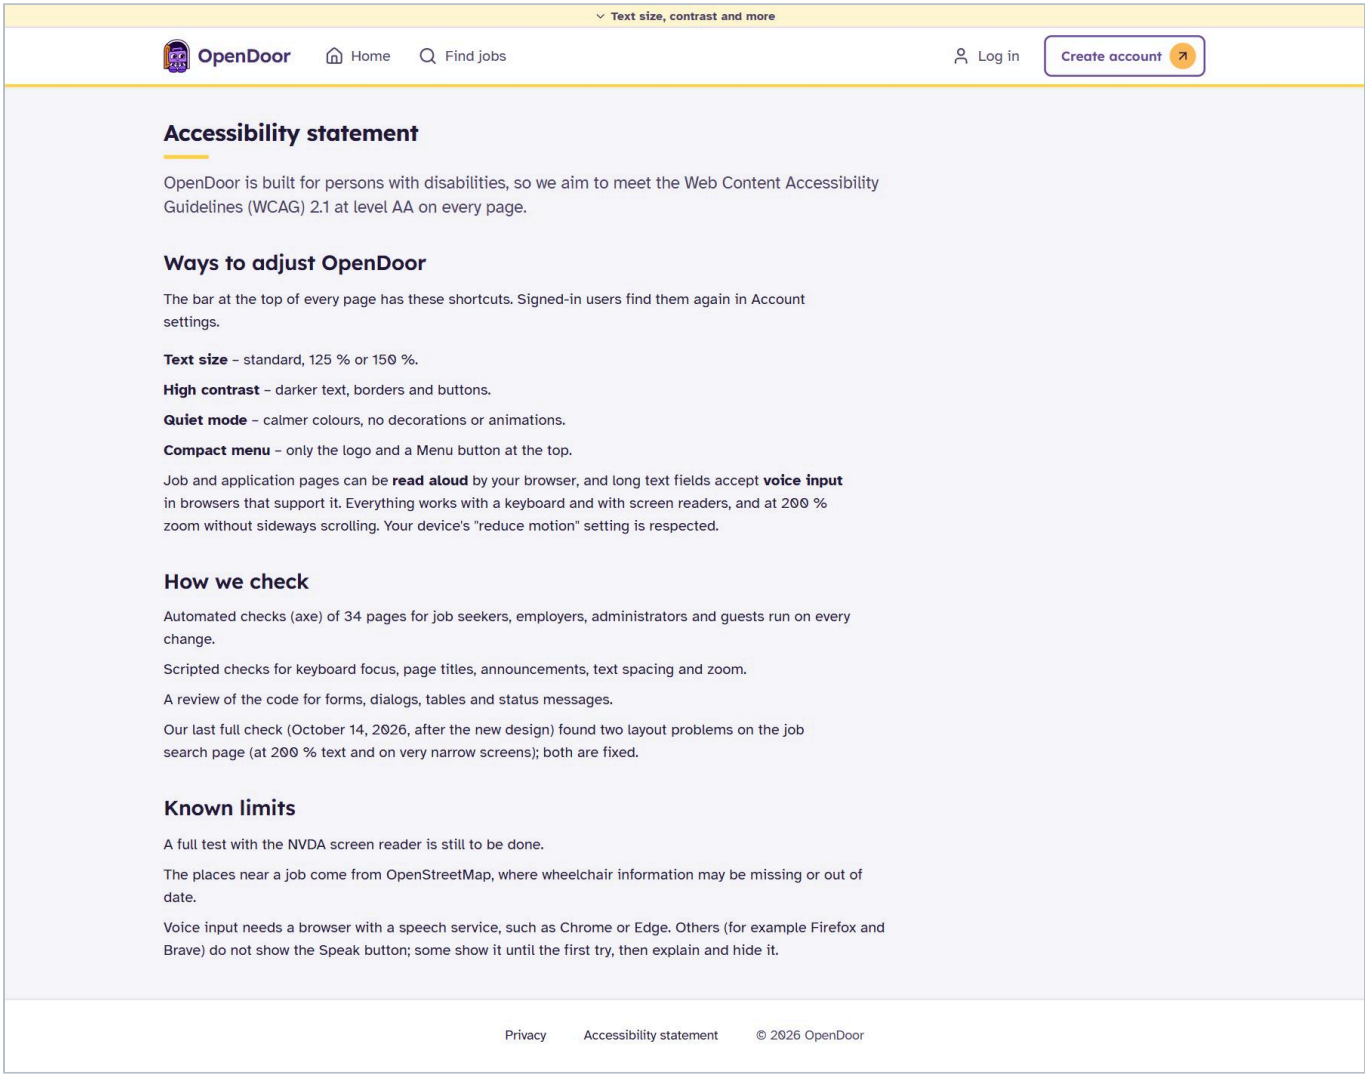

Screenshot `/privacy`

3.11 Accessibility statement

Route	`/accessibility`
Who	Everyone (footer link)
Purpose	States the WCAG 2.1 AA goal, the ways to adjust OpenDoor, how it is checked and the known limits.

ON THE SCREEN

- "Ways to adjust OpenDoor" – the display-bar settings, Read aloud and voice input
- "How we check" – automated axe checks of 33 pages, scripted checks, code review
- "Known limits" – NVDA screen-reader test still to do, OpenStreetMap data may be incomplete, voice input not in every browser

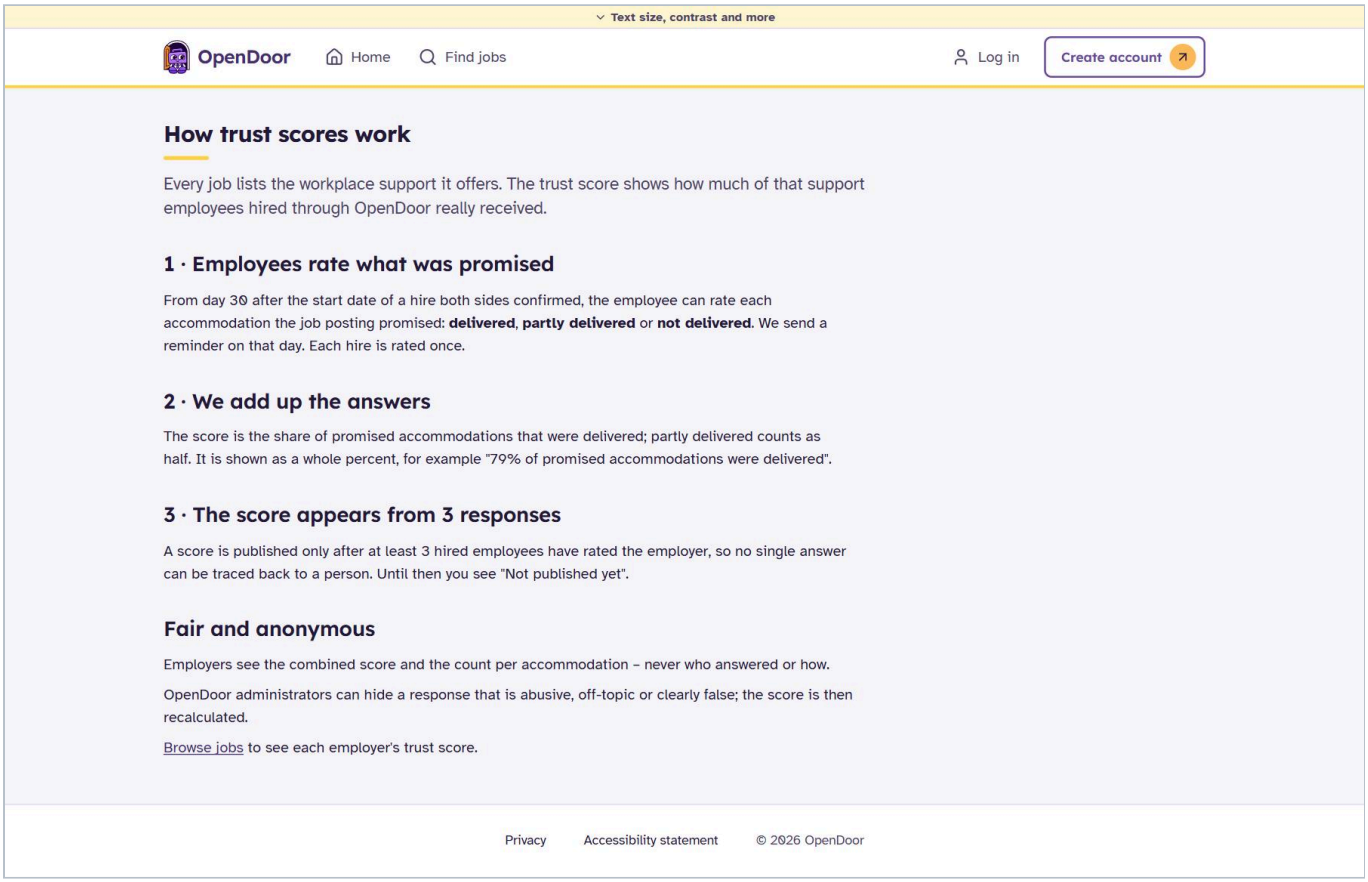

Screenshot `/accessibility`

3.12 How trust scores work

Route	`/trust-scores`
Who	Everyone (linked from every trust score card and the home page)
Purpose	Explains the trust score in three steps.

ON THE SCREEN

- "1 · Employees rate what was promised" (from day 30 after the confirmed start date, delivered / partly / not delivered, reminder, once per hire)
- "2 · We add up the answers" (partly counts as half, whole percent)
- "3 · The score appears from 3 responses"
- "Fair and anonymous"; link "Browse jobs"

Screenshot `/trust-scores`

4 Job seeker screens

Demo: Maria Santos (`candidate@opendoor.test`, complete profile, 3 needs, résumé on file) and Juan Dela Cruz (`candidate2@opendoor.test`, hired, can rate). Menu: Dashboard · Find jobs · Applications · Saved jobs | Notifications · Account menu (Profile, Account, Log out).

4.1 Dashboard

Route	`/candidate/dashboard`
Who	Job seeker
Purpose	Start page after login: where my applications stand and what to do next.

ON THE SCREEN

- h1 "Welcome, {name}", subtitle "Where your applications stand and what to do next."
- Card "My applications" with "See all N" NEW: a "Feedback due" callout with "Rate the accommodations" when a rating is open; tiles Under review, Shortlisted, Contacted, Hiring confirmations pending, Confirmed hires, Closed; "Your latest applications" with their stage badges
- Side: "Your best matches" – three jobs with their match label and the reasons ("4 of 4 skills · In your city, less than 1 km away · Meets all 3 of your needs") and "See all your matches"; "Your needs" (tags + "Change your needs", or "Add my needs"); "Ratings to give" ("Nothing to rate yet. Once a hire is confirmed, you can rate the accommodations 30 days after your start date.")
- First-time users: "Get started" card with "n of 4 done" and the steps Create your account · Add the accommodations you need · Add your skills and résumé · Apply to a job that fits; "Show the welcome tour" and "Hide this list"

ACTIONS

- Open an application, the matches, the profile or the feedback form
- Hide this list → "The “Get started” list is hidden. You can show it again in Account settings." (takes focus)

MESSAGES AND STATES

- No applications: "You have not applied yet." with "Find jobs that fit you"
- The "Get started" list goes away by itself when every step is done

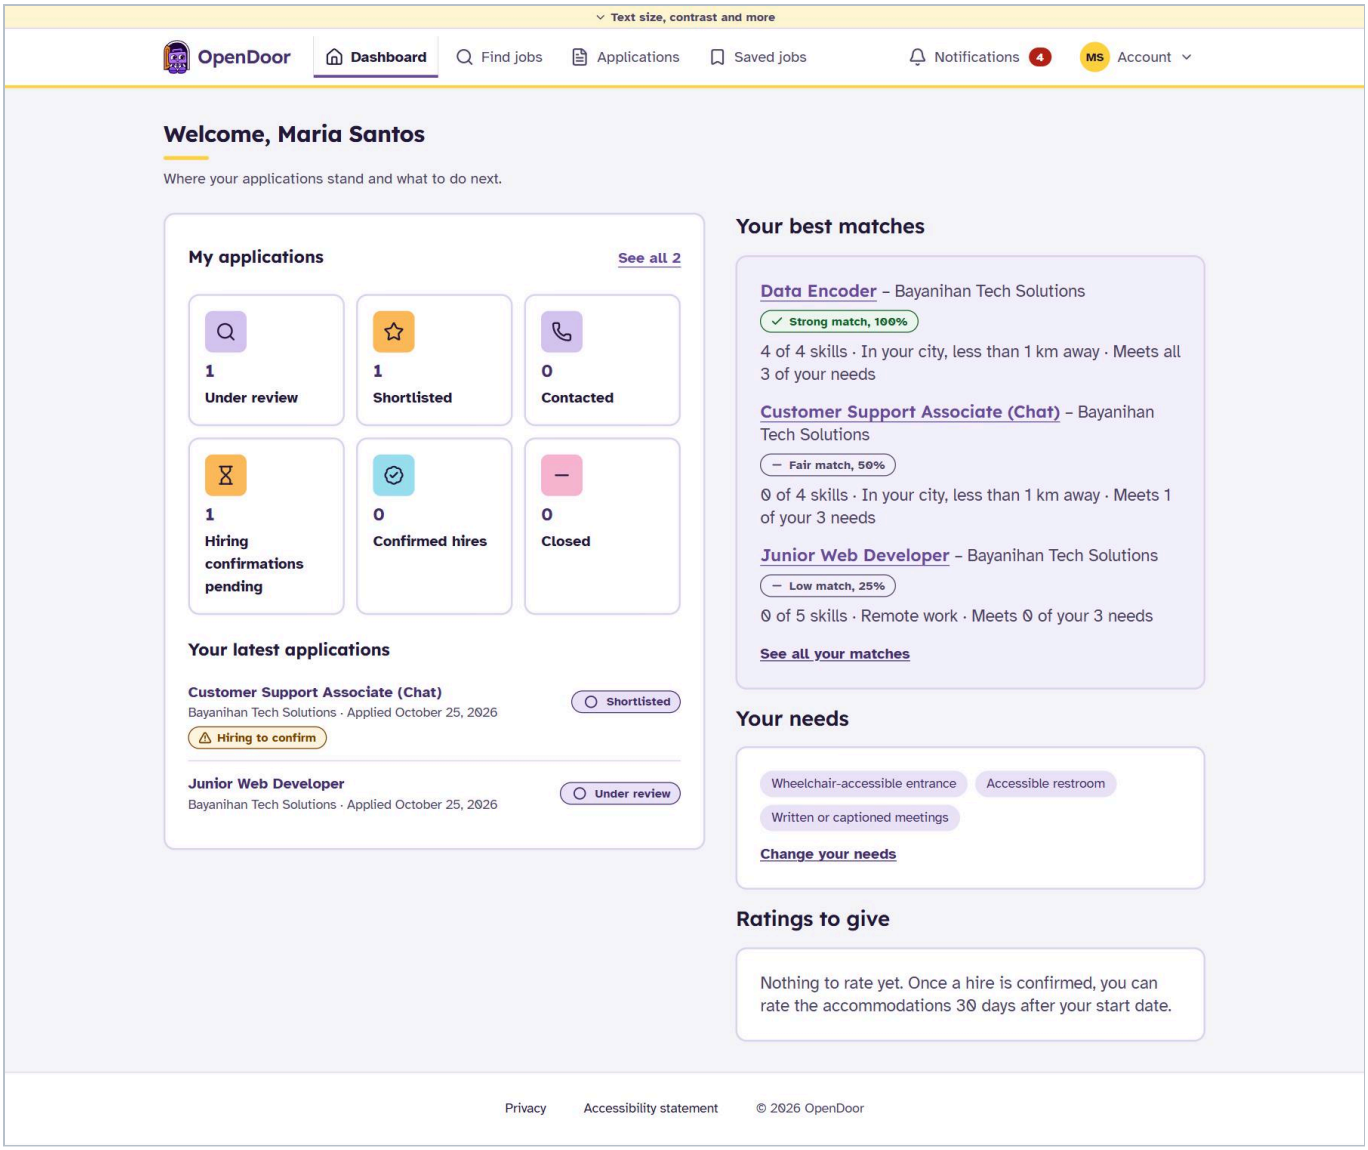

API

`GET /candidate/dashboard`

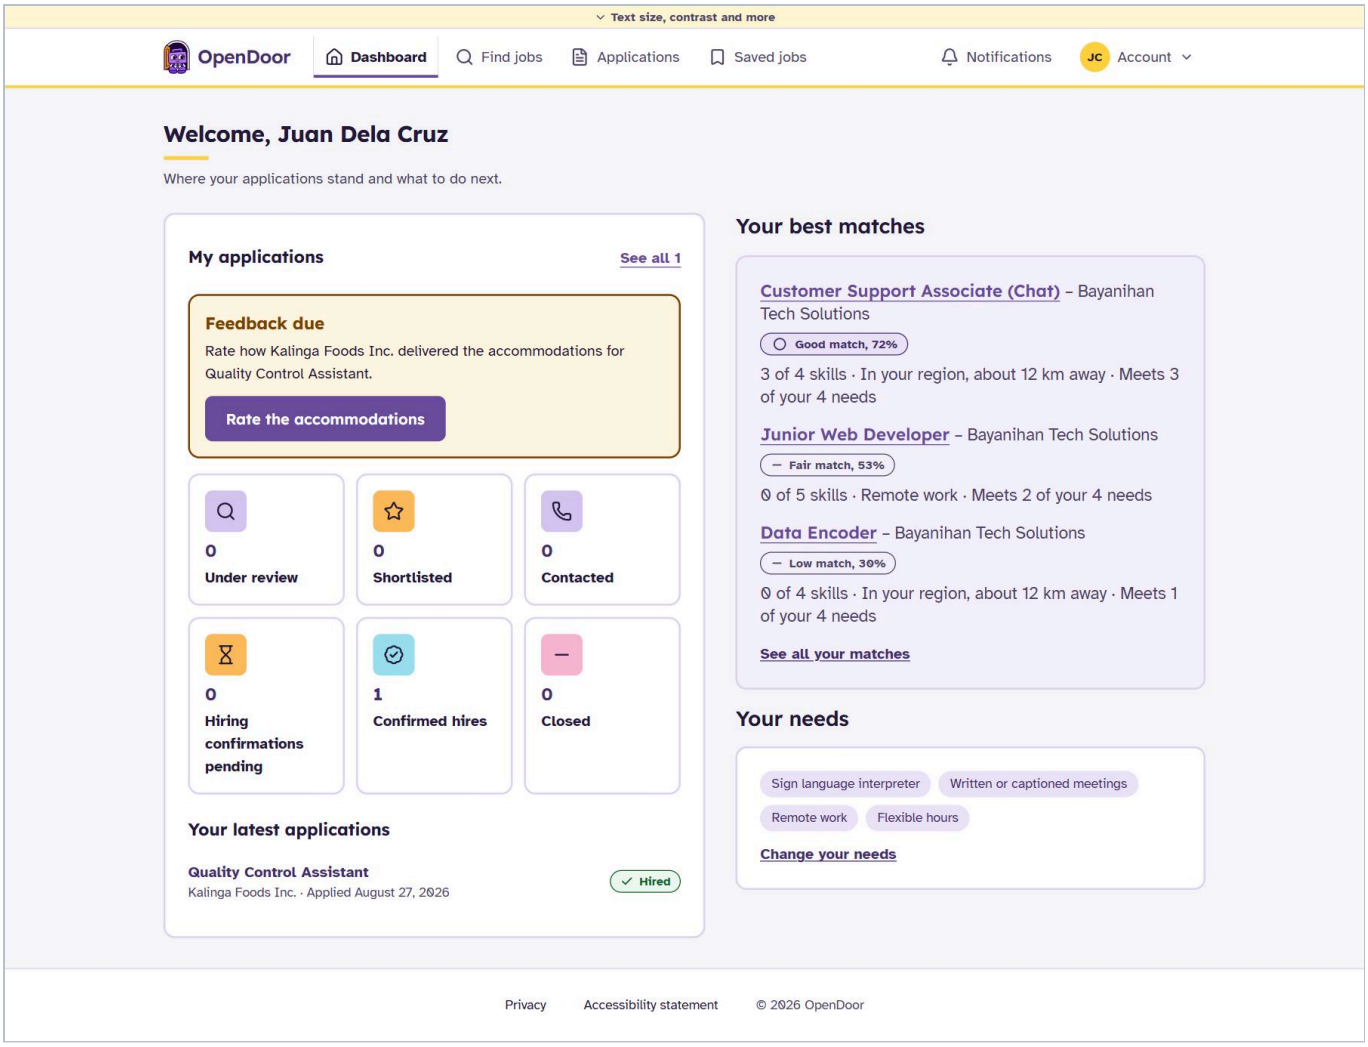

`GET /job-postings?match=1 (best matches)`

`GET /candidate/profile (needs, Get started)`

`PATCH /me/onboarding {checklist_hidden}`

Screenshot `/candidate/dashboard`

A hired job seeker: "Feedback due" comes first `/candidate/dashboard`

4.2 Complete your profile NEW

Route	`/candidate/setup`
Who	Job seeker (new accounts are sent here; an incomplete profile is sent back here)
Purpose	The answers needed before jobs can be recommended and before applying.

ON THE SCREEN

- Subtitle "We use these answers to recommend jobs that fit your skills, place and preferences."
- Info: "Everything marked “(required)” is needed to recommend jobs. Your accommodation needs, a résumé and a disability (if you want to share it) can be added afterwards under Profile and needs."
- "Where you live" (Region → Province → City or municipality), "Your skills" ("Add at least 3, for example Data entry or Filipino Sign Language.", suggestions from the shared list, "Add skill"), "Highest education", "Years of work experience" (optional), "Work setups you prefer", "Types of work you want"
- "Save and continue"

ACTIONS

- Save and continue → "Your profile is complete. Here are the jobs we recommend for you." on Find jobs

MESSAGES AND STATES

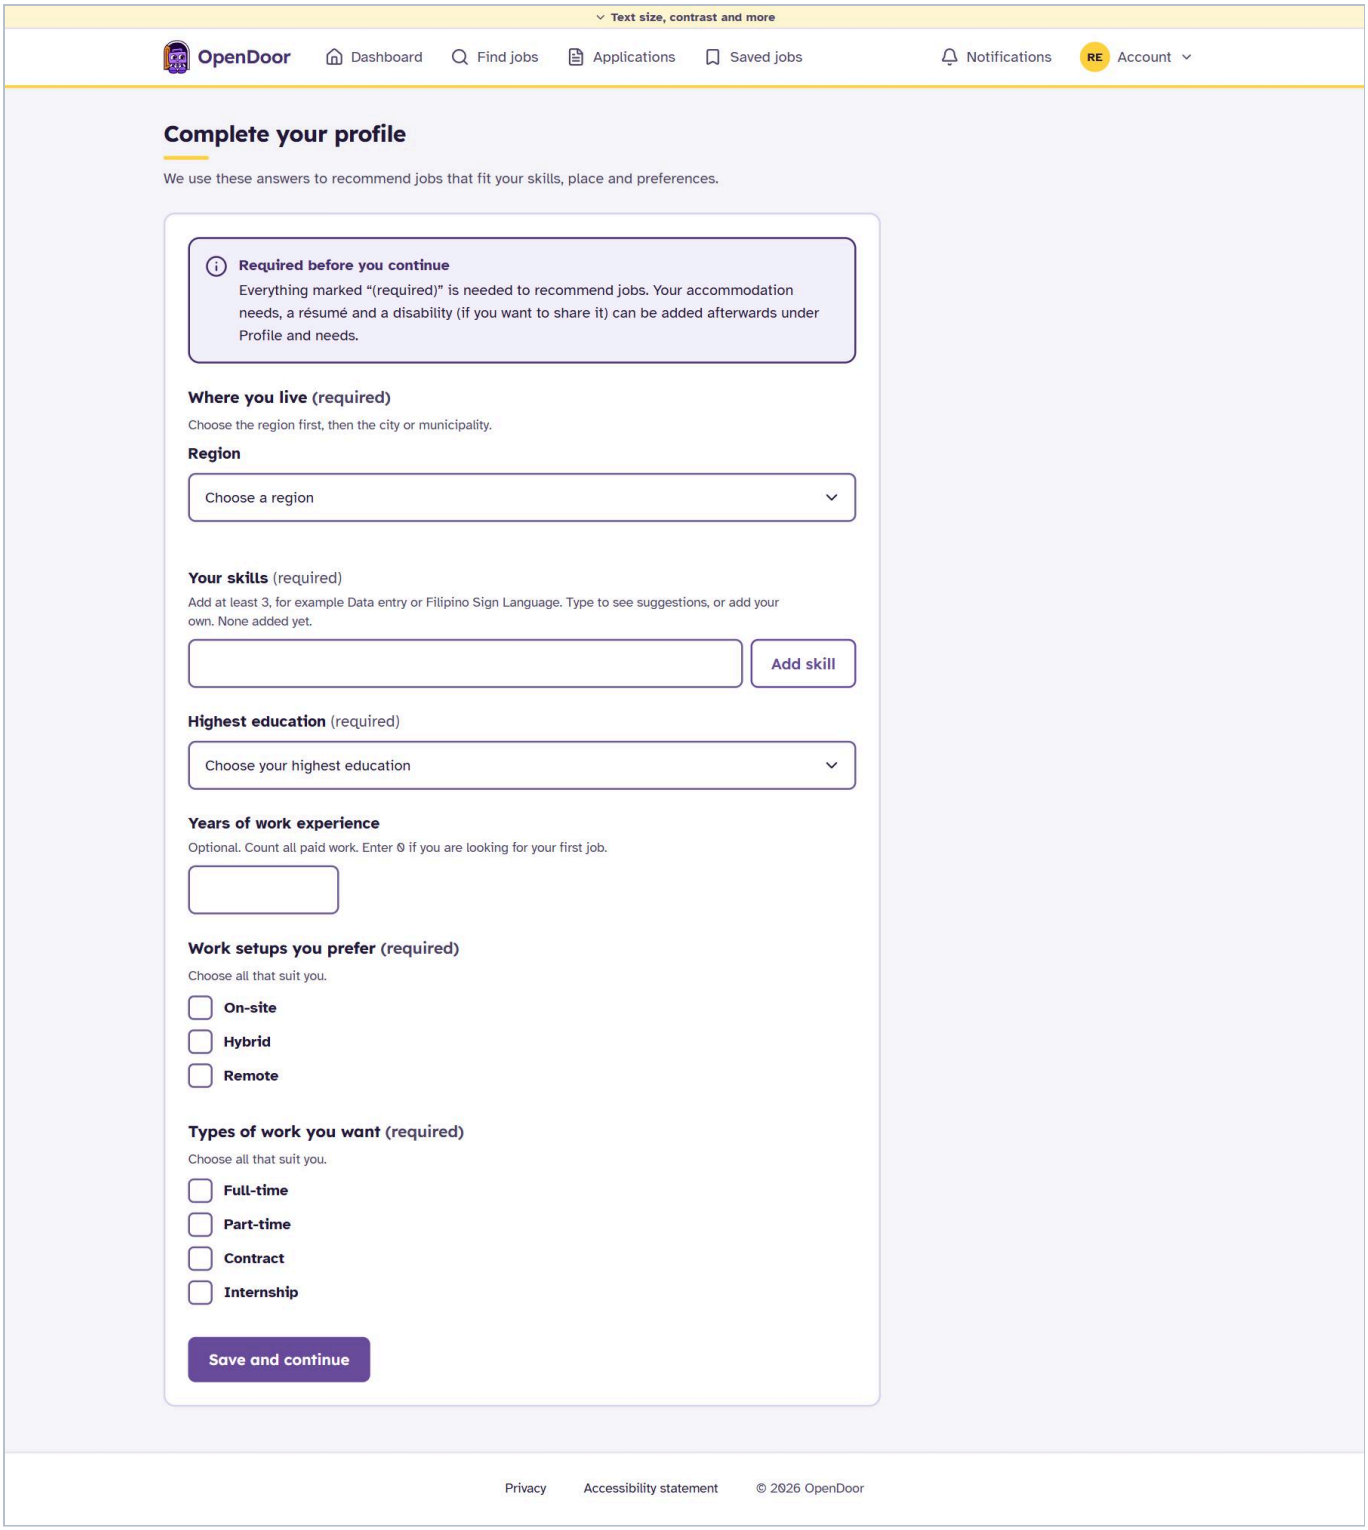

- Missing answers: "Choose the city or municipality where you live.", "Add at least 3 skills.", "Choose your highest education.", "Choose at least one work setup.", "Choose at least one type of work."

API

`GET, PUT /candidate/profile ( profile_complete , profile_missing )`

`GET /skills`

`GET /insights/locations/{regions|provinces|cities}`

A new job seeker right after Create account `/candidate/setup`

4.3 Profile and needs

Route	`/candidate/profile (?tab=about, ?tab=resume)`
Who	Job seeker
Purpose	The data used for matching and shown to employers when applying.

ON THE SCREEN

- Subtitle "Used only for matching. Employers see your needs only when you apply."; tabs "Accommodations you need", "About you", "Résumé"
- Accommodations you need: "We match jobs on these needs only. Employers see them only when you apply to one of their jobs…", the grouped checklist with "N selected.", "Save my needs"
- About you: Headline, "Where you live", "Your skills" with "Suggest skills from my résumé" NEW, "Highest education", "Years of work experience", "Work setups you prefer", "Types of work you want", Work experience (Speak), box "Disability (optional)" ("You do not have to tell us. It is never used for matching…"); "Save profile"
- Résumé: "View your current résumé (PDF, opens in a new tab)" or "You have not uploaded a résumé yet."; "Upload résumé" / "Replace résumé" ("PDF only, up to 5 MB.")

ACTIONS

- Each tab saves on its own ("Your needs are saved.", "Your profile is saved.", "Your résumé is uploaded. Under “About you” you can add skills we find in it.")
- Suggest skills from my résumé → tick the skills to add (see ResumeSkillSuggestions)

MESSAGES AND STATES

- Résumé checks before upload: "Choose a PDF file.", "The file is larger than 5 MB."

API

`GET, PUT /candidate/profile`

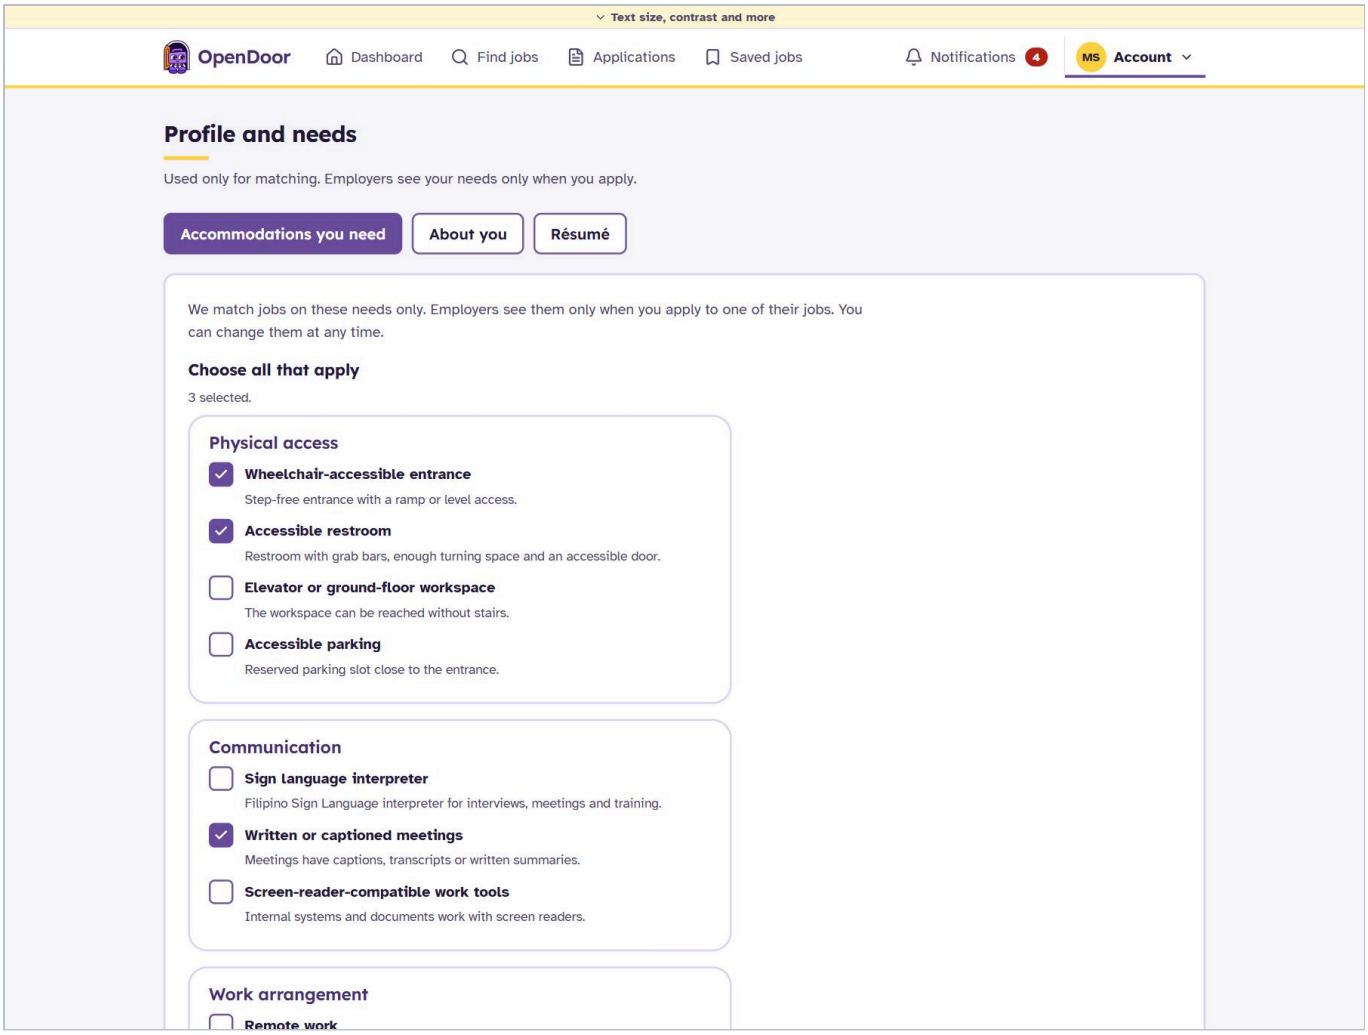

`PUT /candidate/accommodations {accommodation_ids}`

`POST /candidate/resume (multipart)`

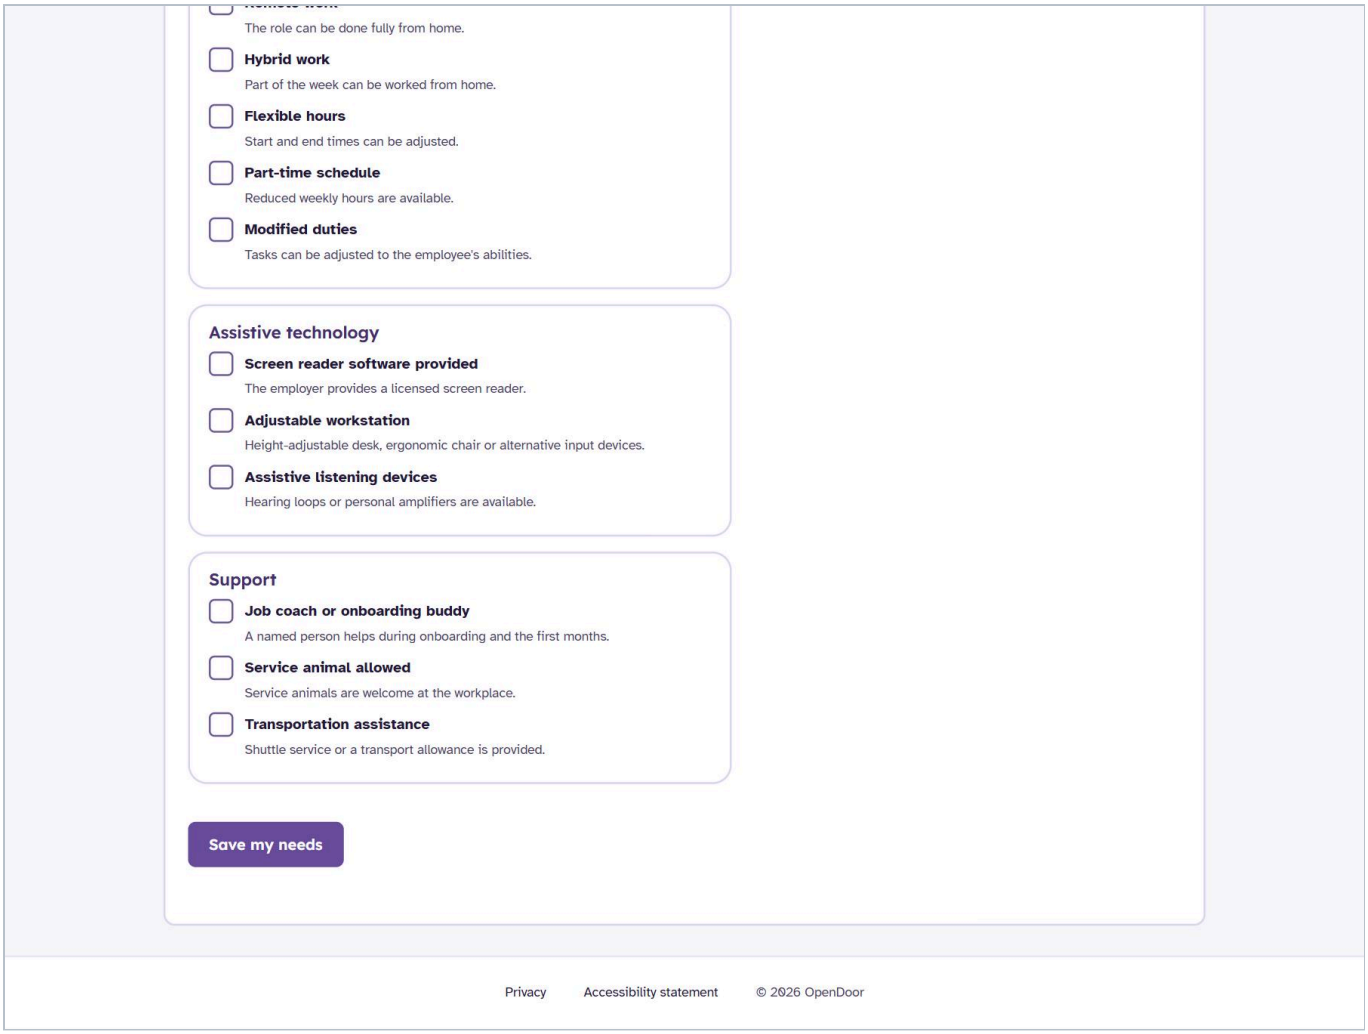

`GET /candidate/resume/skill-suggestions`

`GET /accommodations, /skills`

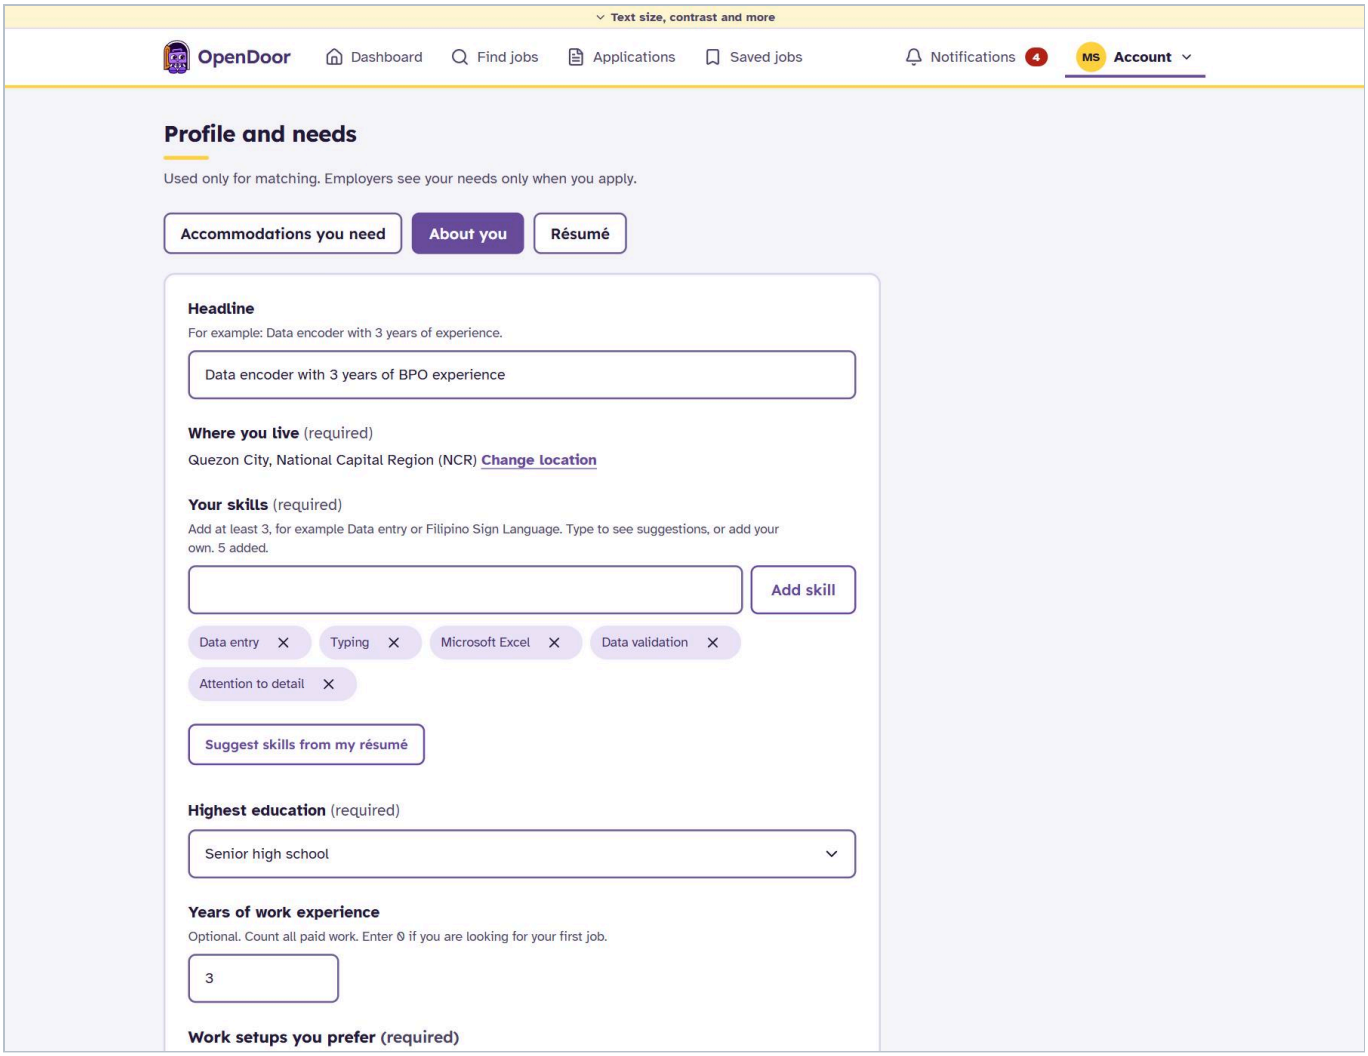

`GET /insights/locations/{regions|provinces|cities}`

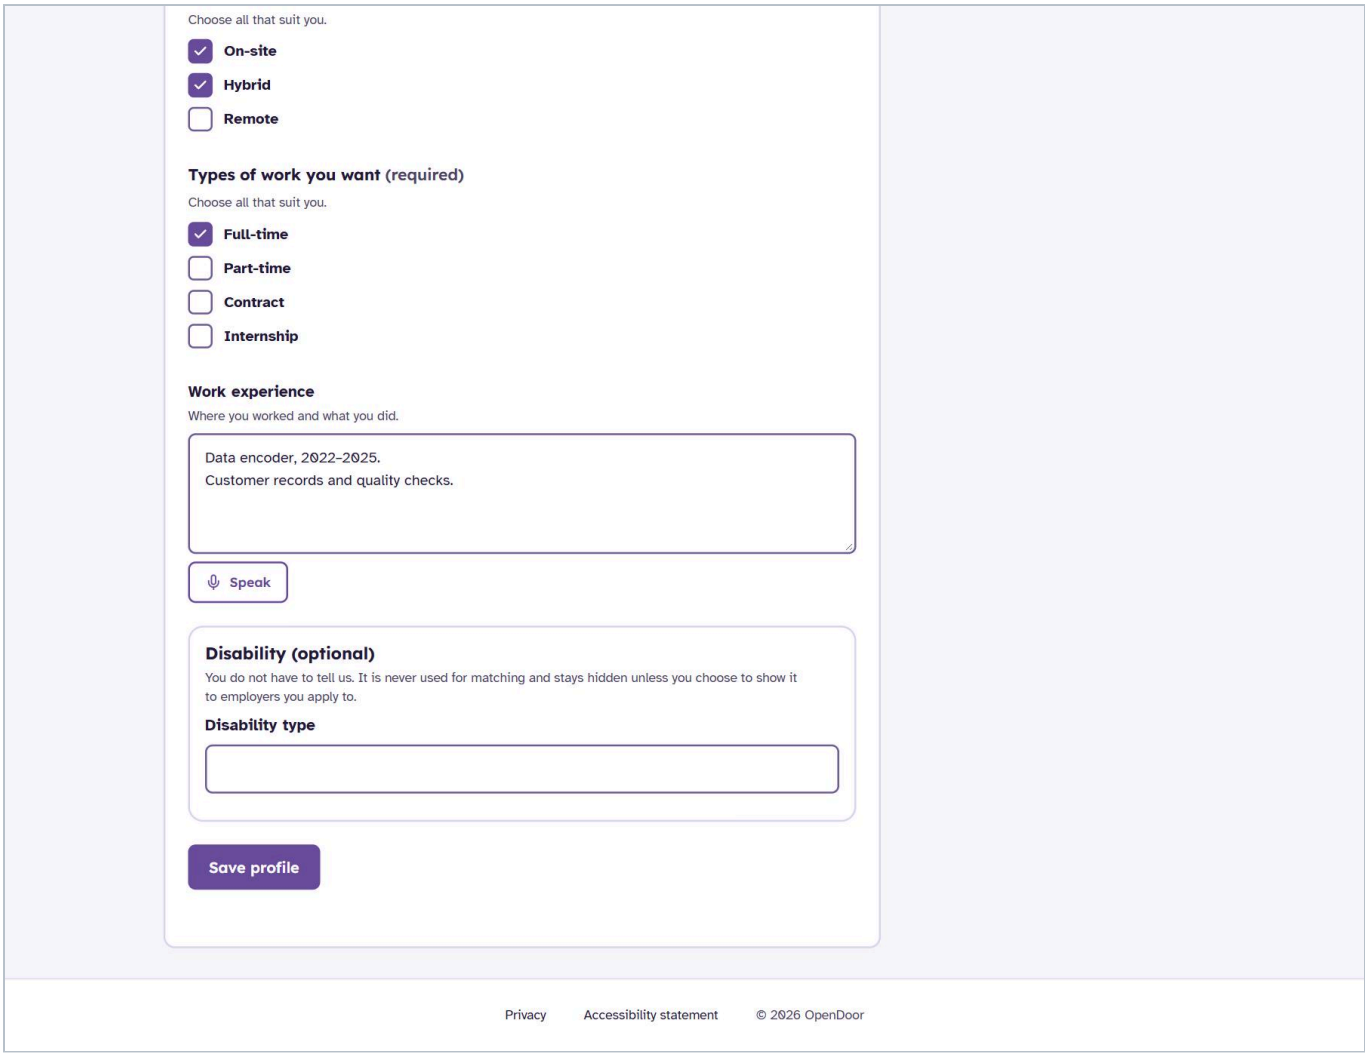

Tab "Accommodations you need" – part 1 of 2 `/candidate/profile`

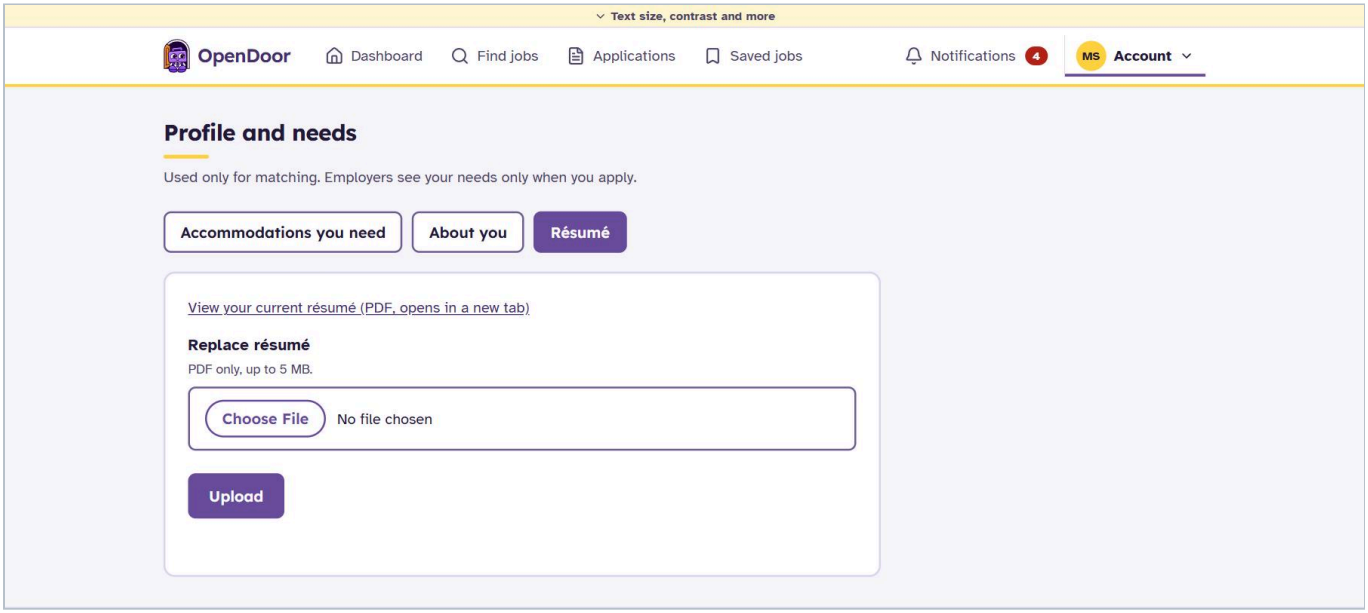

Tab "Accommodations you need" – part 2 of 2 `/candidate/profile`

Tab "About you" – part 1 of 2 `/candidate/profile?tab=about`

Tab "About you" – part 2 of 2 `/candidate/profile?tab=about`

Tab "Résumé" `/candidate/profile?tab=resume`

4.4 Find jobs – "Recommended for me"

Route	`/candidate/jobs`
Who	Job seeker
Purpose	The guest search plus the match score, the distance filter and saving from the results.

ON THE SCREEN

- Everything from 3.2, subtitle "The jobs that fit your skills, place, preferences and needs best come first."
- Chips "Recommended for me" (on by default) and "Distance" (10, 25, 50, 100 km; "Remote jobs are always shown.") NEW
- "Match: N% · label" and "Why this match?" on each card NEW
- "Save" / "Saved" on each card

ACTIONS

- "Recommended for me" ranks by match score, then the chosen sort
- Turn it off for a plain search
- Save / unsave a job without leaving the results

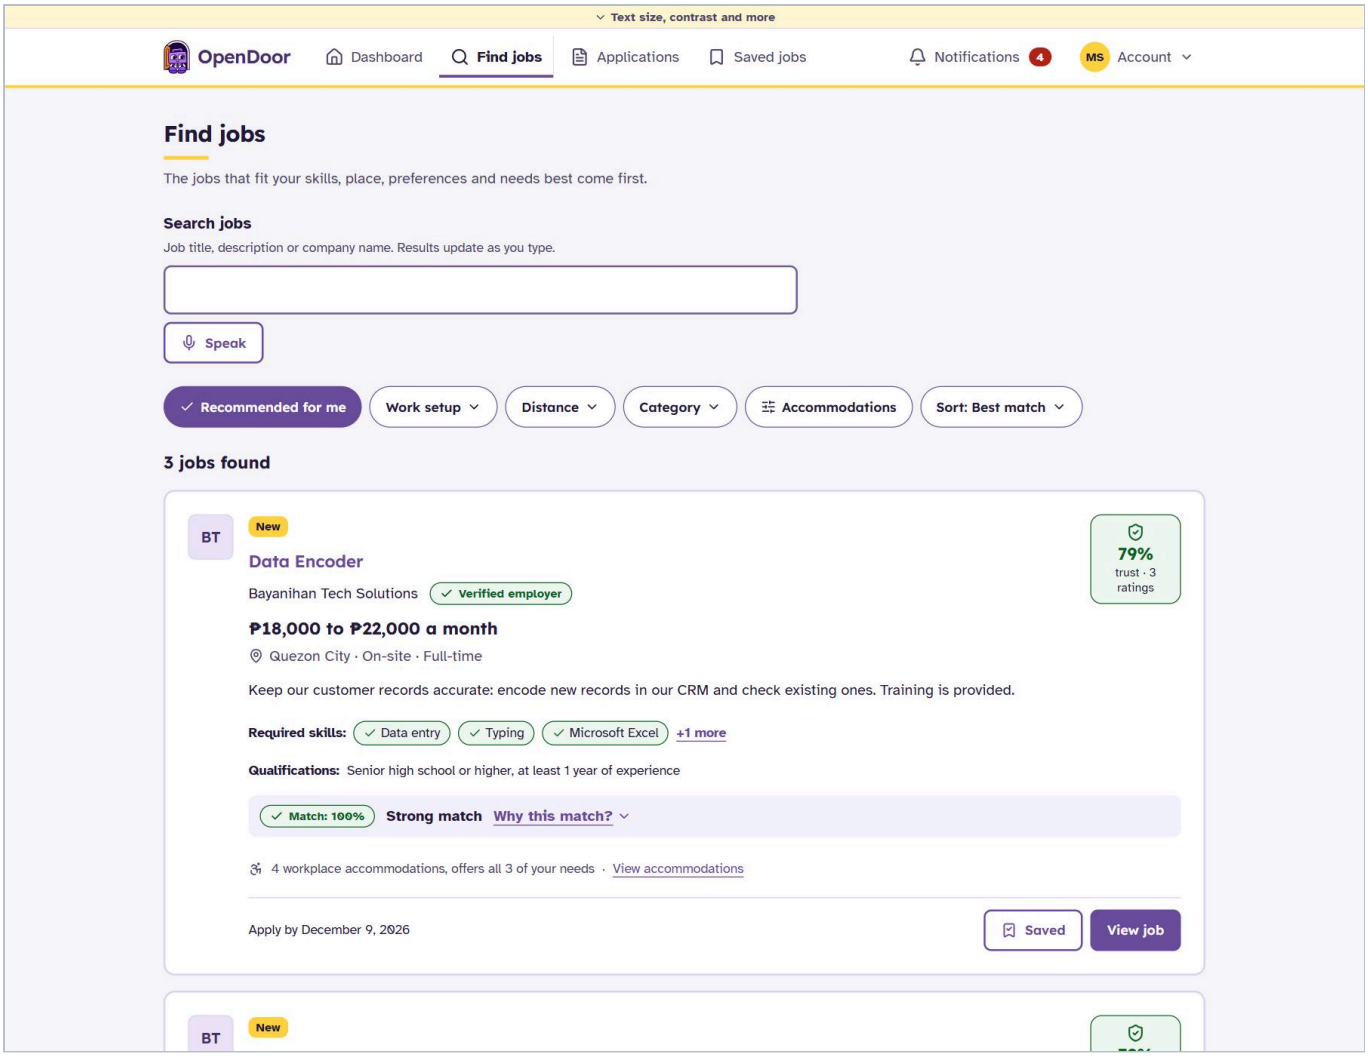

MESSAGES AND STATES

- A profile without a place: the Distance chip is not offered

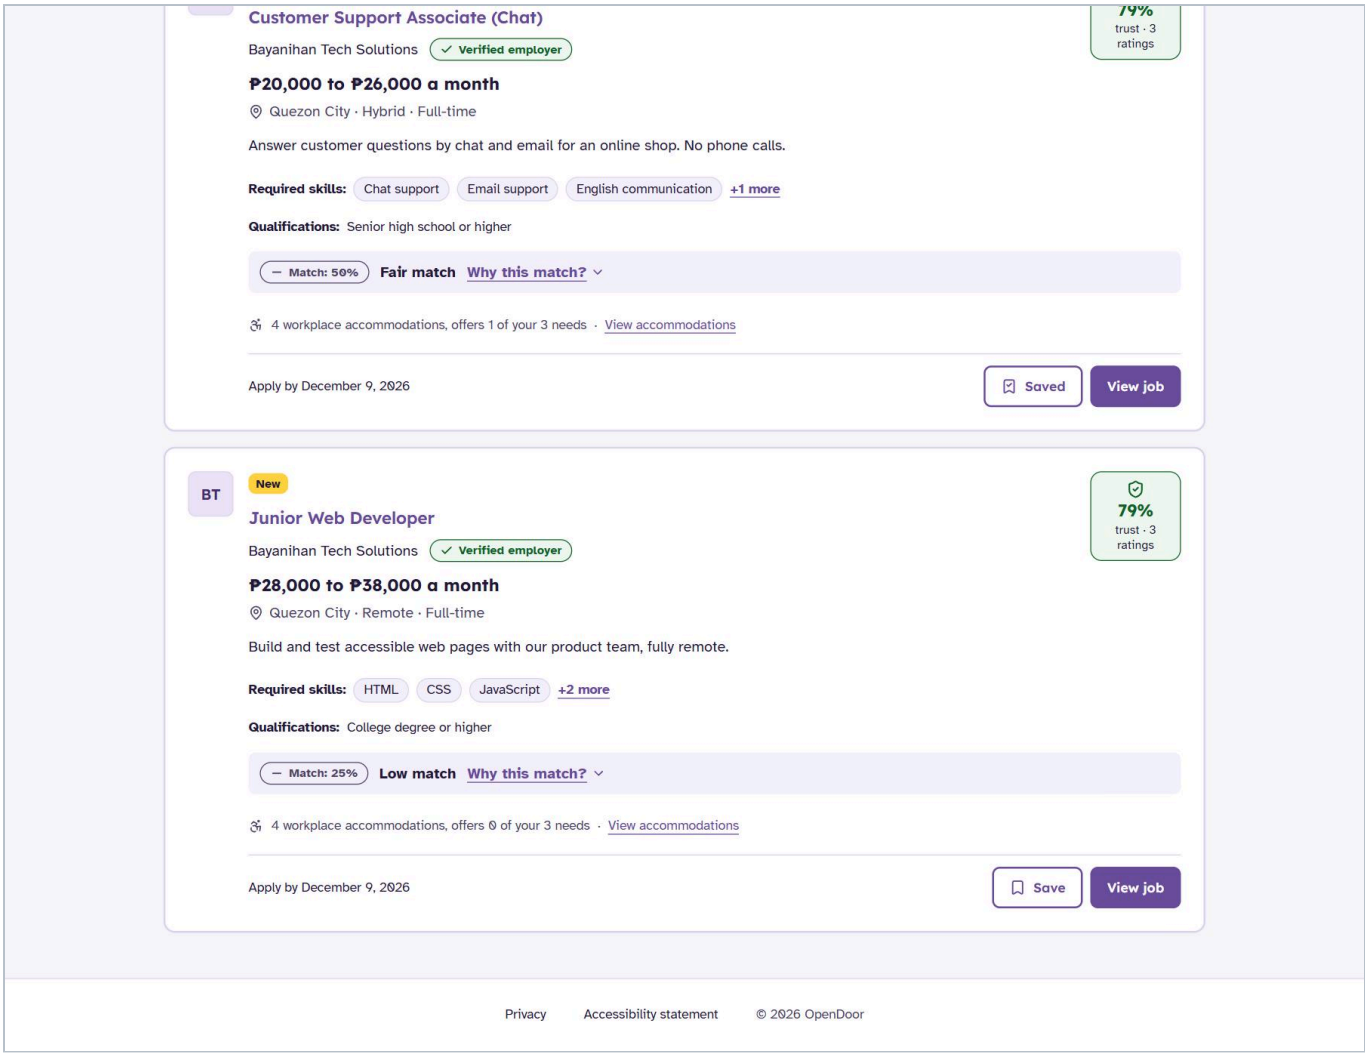

API

`GET /job-postings?…&match=1&distance=` (results include match and saved)

`POST, DELETE /candidate/saved-jobs/{id}`

Screenshot – part 1 of 2 `/candidate/jobs`

Screenshot – part 2 of 2 `/candidate/jobs`

4.5 Job details – apply, save, report

Route	`/candidate/jobs/{id}`
Who	Job seeker
Purpose	Decide, apply, bookmark or report.

ON THE SCREEN

- Everything from 3.3, plus "How this job fits you" NEW: the match label and each part (skills you have and miss, place and distance, education, experience, preferences, the accommodation needs offered and not mentioned)
- Side card "Apply for this job": Cover note (optional, 2,000 characters, Speak), Interview accommodation request (optional, 1,000 characters), "Send application"; without a résumé on file also "Your résumé" (PDF, saved to the profile)
- Already applied: card "Your application" – "You applied on {date}. Status: {badge}" and "View your application"
- "Save job" / "Saved" and "Report this job"

ACTIONS

- Send application → the happy mascot with "Application sent – The employer will review it. You can follow its status in My applications." (focus moves to it)
- Report → dialog "What is wrong with this posting?" (required, 1,000 characters) → "Send report"

MESSAGES AND STATES

- Incomplete profile: "Complete your profile before you apply: where you live, at least 3 skills, your education and your work preferences. You can do this under Profile and needs." NEW
- No résumé: "Add your résumé (PDF) to apply. We save it to your profile." NEW
- "This job is no longer accepting applications."
- Only one open report per job seeker and job

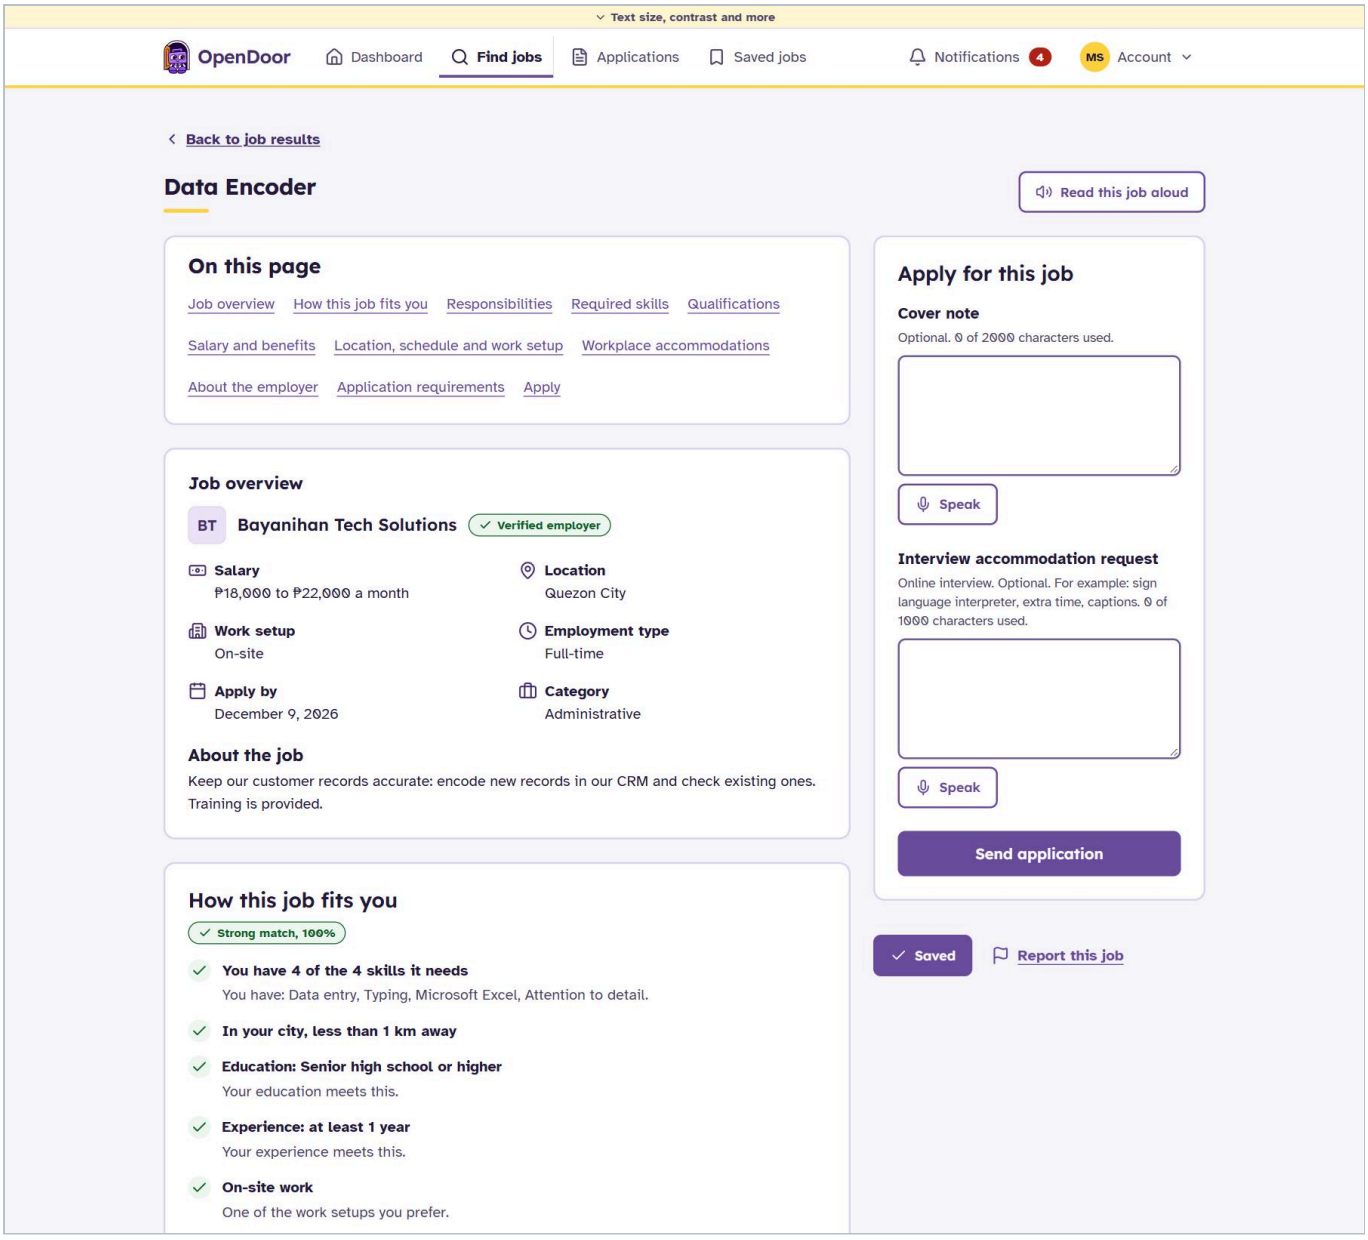

API

`POST /job-postings/{id}/applications`

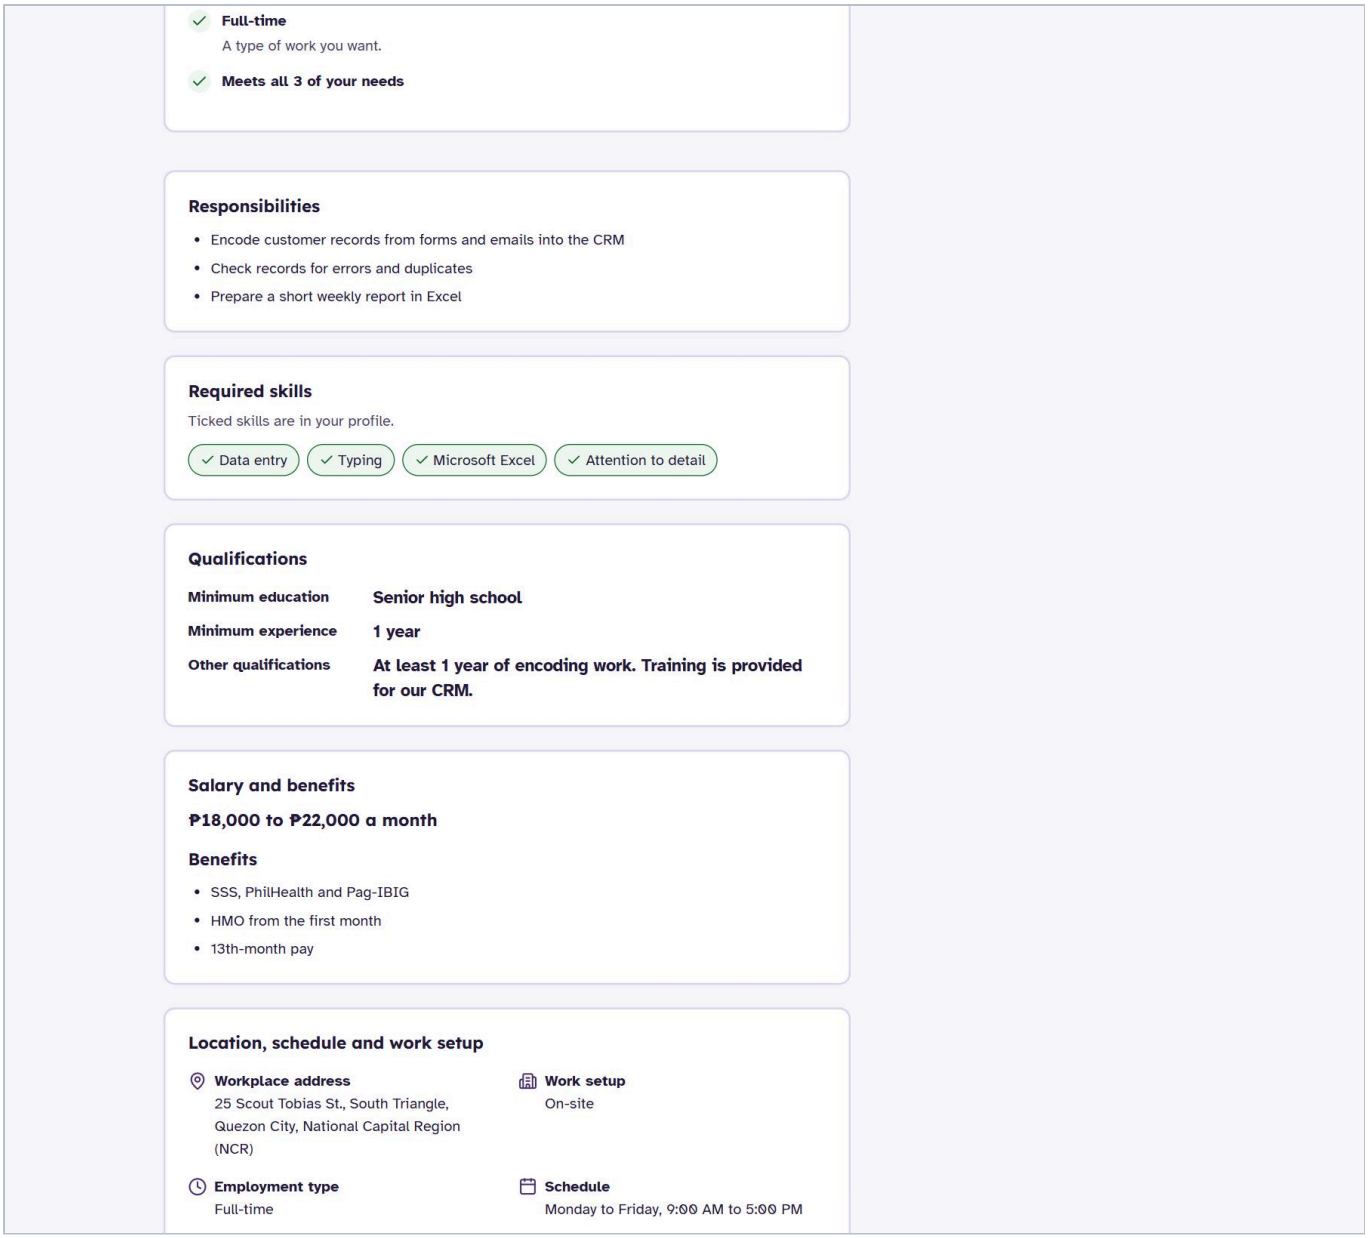

`POST /candidate/resume (when the form asks for it)`

`POST, DELETE /candidate/saved-jobs/{id}`

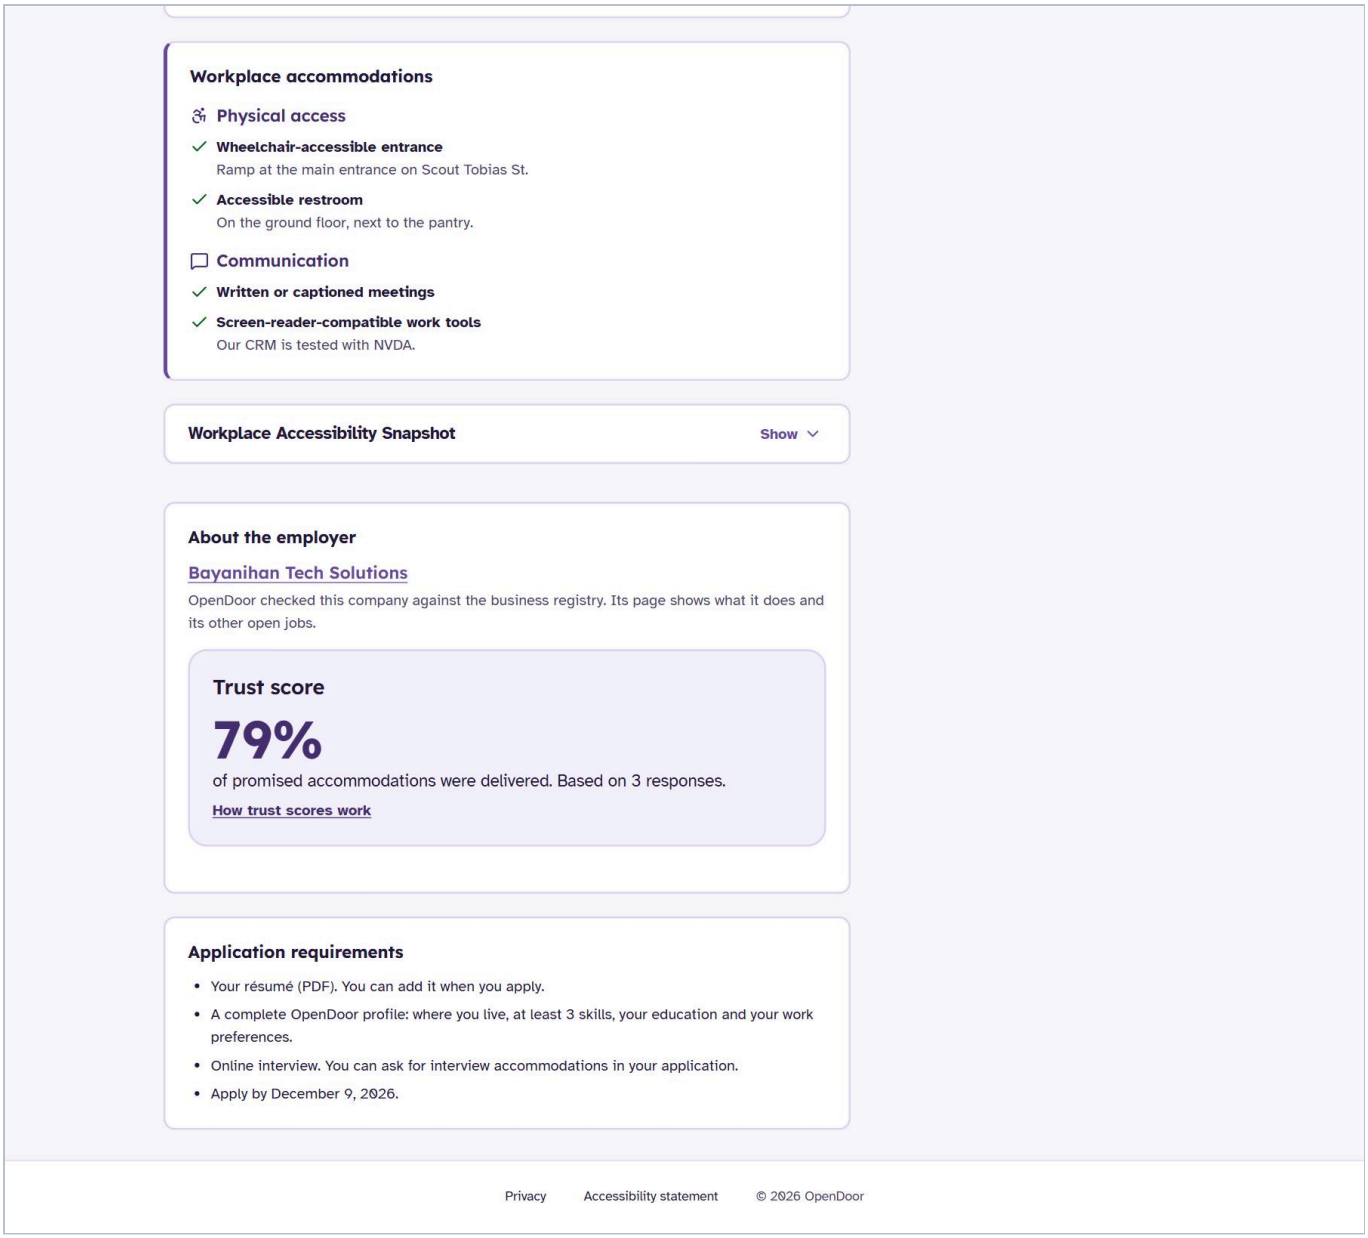

`POST /job-postings/{id}/reports {reason}`

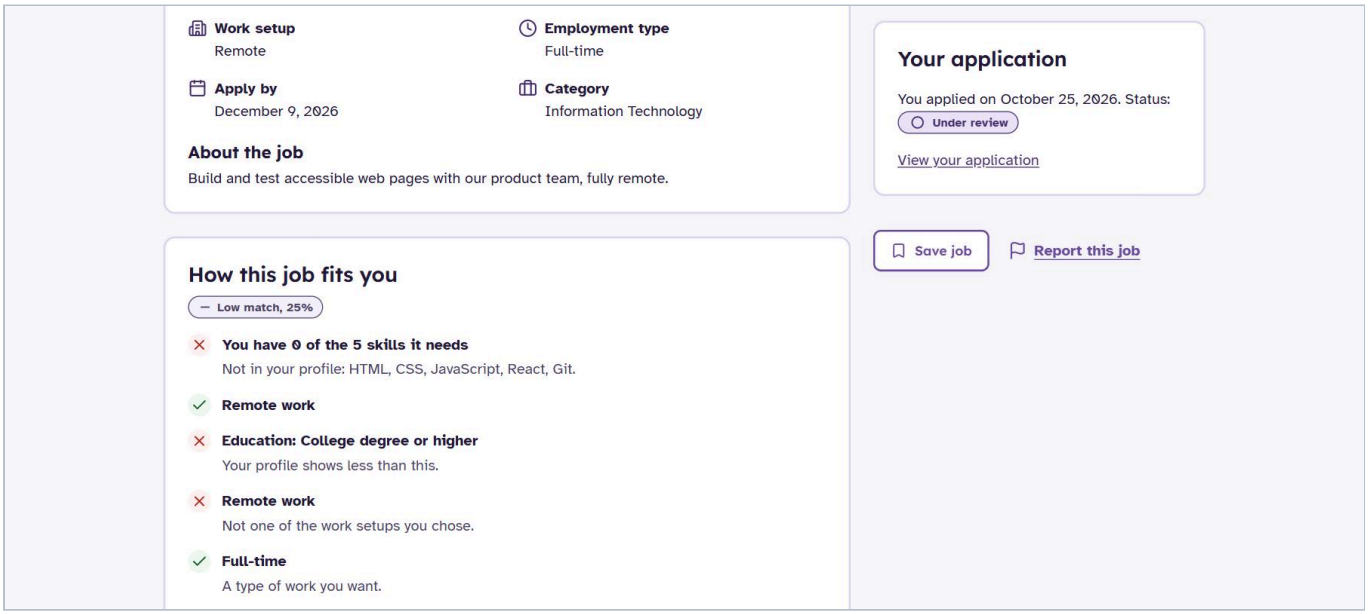

Screenshot – part 1 of 3 `/candidate/jobs/1`

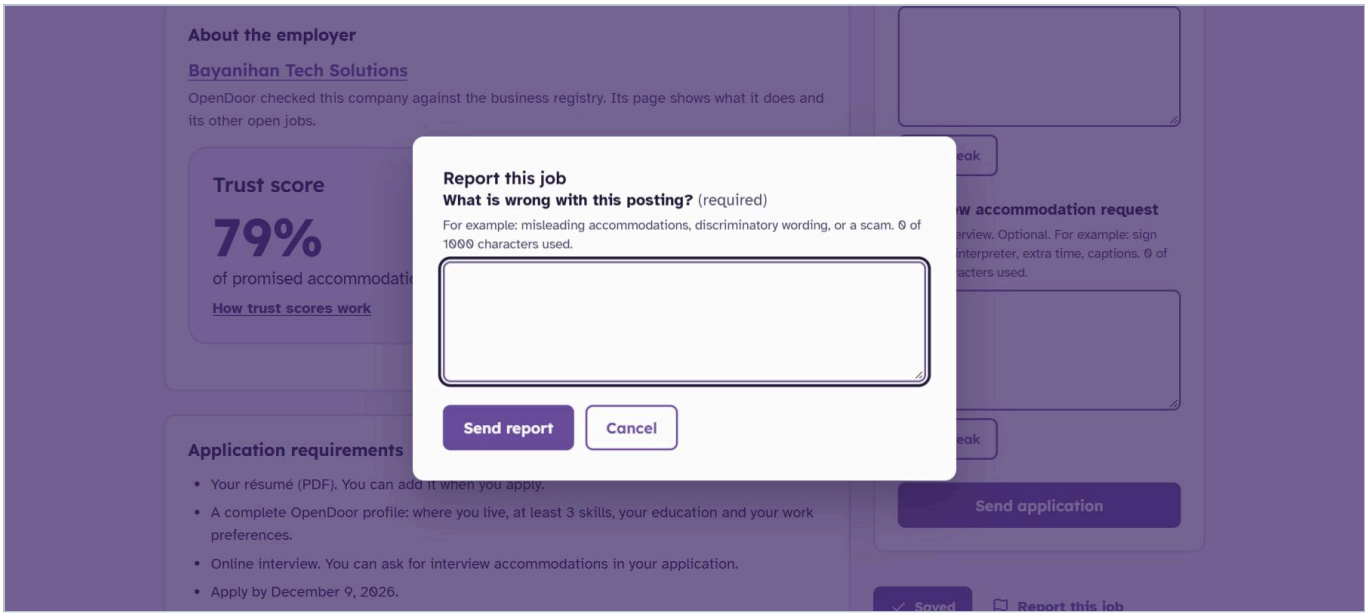

Screenshot – part 2 of 3 `/candidate/jobs/1`

Screenshot – part 3 of 3 `/candidate/jobs/1`

A job that fits only partly: "How this job fits you" names what is missing `/candidate/jobs/3`

"Report this job" dialog `/candidate/jobs/1`

4.6 My applications

Route	`/candidate/applications`
Who	Job seeker
Purpose	All applications with their stage.

ON THE SCREEN

- Subtitle "Every job you applied to and where it stands."
- Filter "Show" (All applications or one stage) with the announced count
- Table: Job (link) · Employer · Applied · Status badge (plus "Hiring to confirm" while a report waits)
- Pagination

ACTIONS

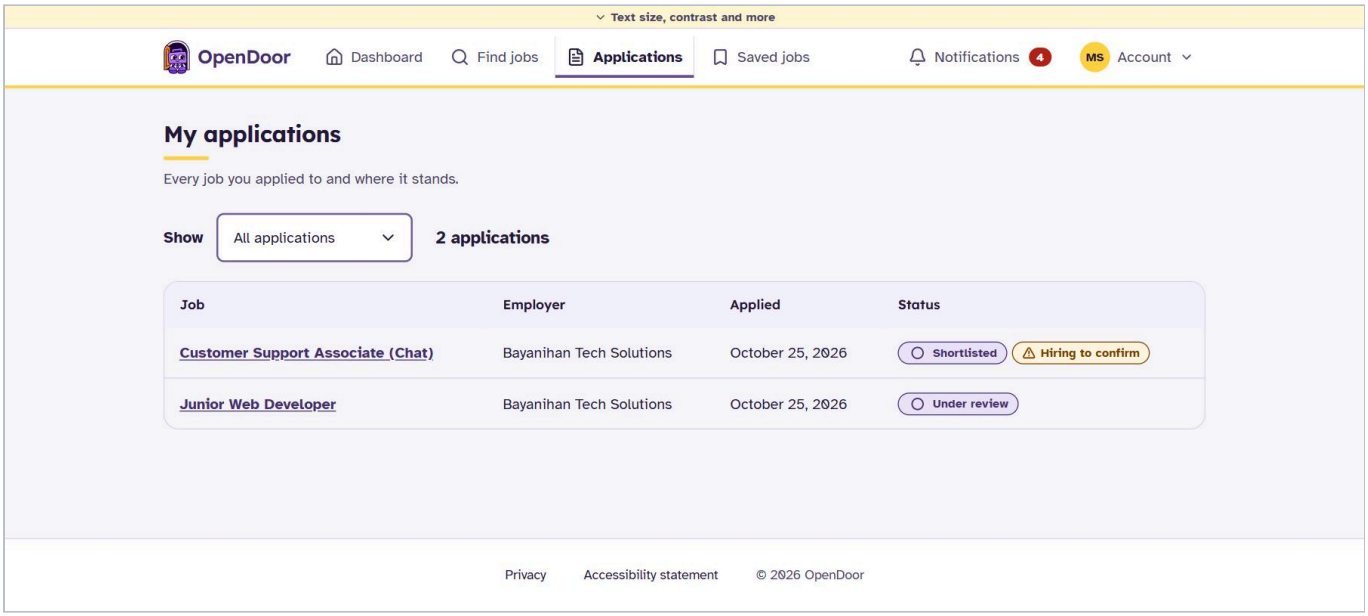

- Open an application
- Filter by stage

MESSAGES AND STATES

- "You have not applied to any jobs yet" + "Find jobs that match your needs"
- "No applications with this status"

API

```
GET /applications?status=&page=
```

Screenshot `/candidate/applications`

4.7 Application details

Route	`/candidate/applications/{id}`
Who	Job seeker (own applications)
Purpose	Follow one application and act on it.

ON THE SCREEN

- "‹ Back to my applications"; h1 job title; "View the job · {company}" and the stage badge; "Read this application aloud"
- "Where it stands" NEW: Submitted → Under review → Shortlisted → Contacted → Hired with dates and what each means
- Details card: Applied, Contacted, Start date, Cover note, Interview request
- "Hiring confirmation" NEW: "Report that I was hired" with a start date, or the employer's report to answer, and the "History"
- "Withdraw application" (danger outline) with the hint "Once you and the employer confirm a hire, you can rate the accommodations 30 days after your start date."
- Hired: card "Rate your accommodations" with the date it opens or "Rate accommodations"

ACTIONS

- "Report that I was hired" → start date → "Reported. We asked the employer to confirm it."
- Answer the employer's report: "Confirm" (dialog: "Your application becomes Hired, starting {date}. 30 days after the start date you can rate whether the promised accommodations were provided. You cannot undo this."), "Not yet" (optional new start date) or "Incorrect"
- "Withdraw application" → confirm "The employer will no longer consider you for this job, and an open hiring report is cancelled. You cannot undo this."

MESSAGES AND STATES

- "The hire is confirmed." / "Your application was withdrawn."
- Job closed: "The employer closed this job. Your application stays at its stage, and a hire can still be reported."
- Error "The status was not changed"

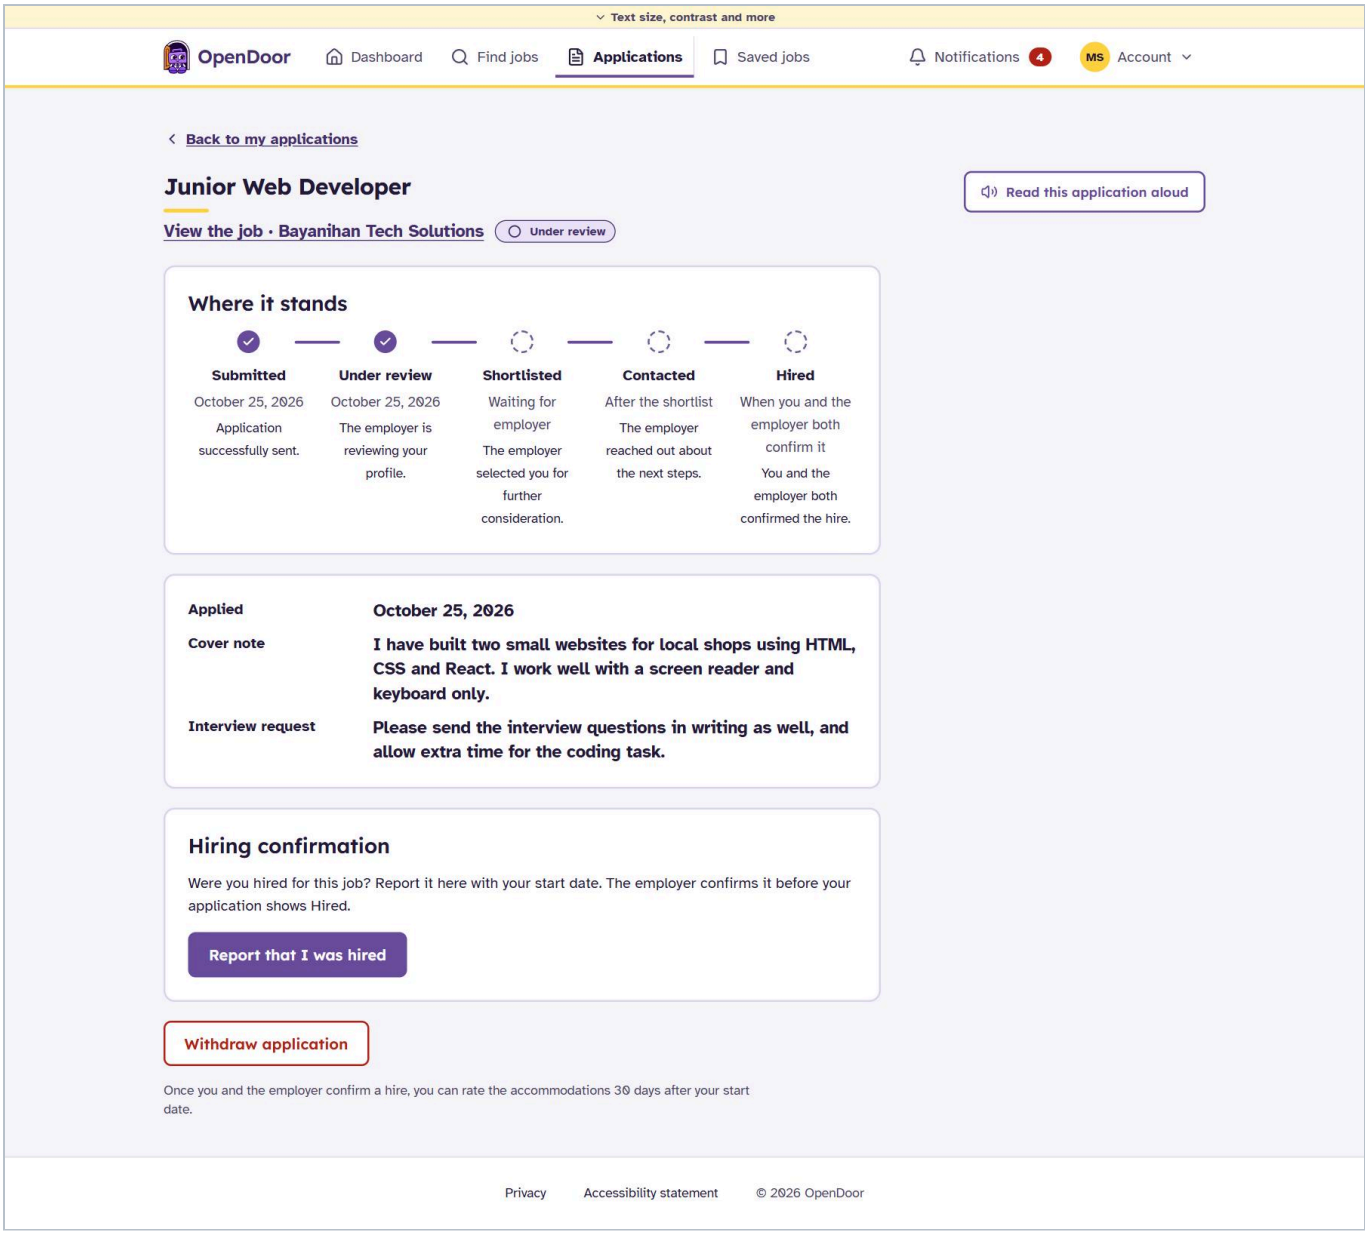

API

`GET /applications/{id} (stage dates, hiring_reports , feedback_opens_on )`

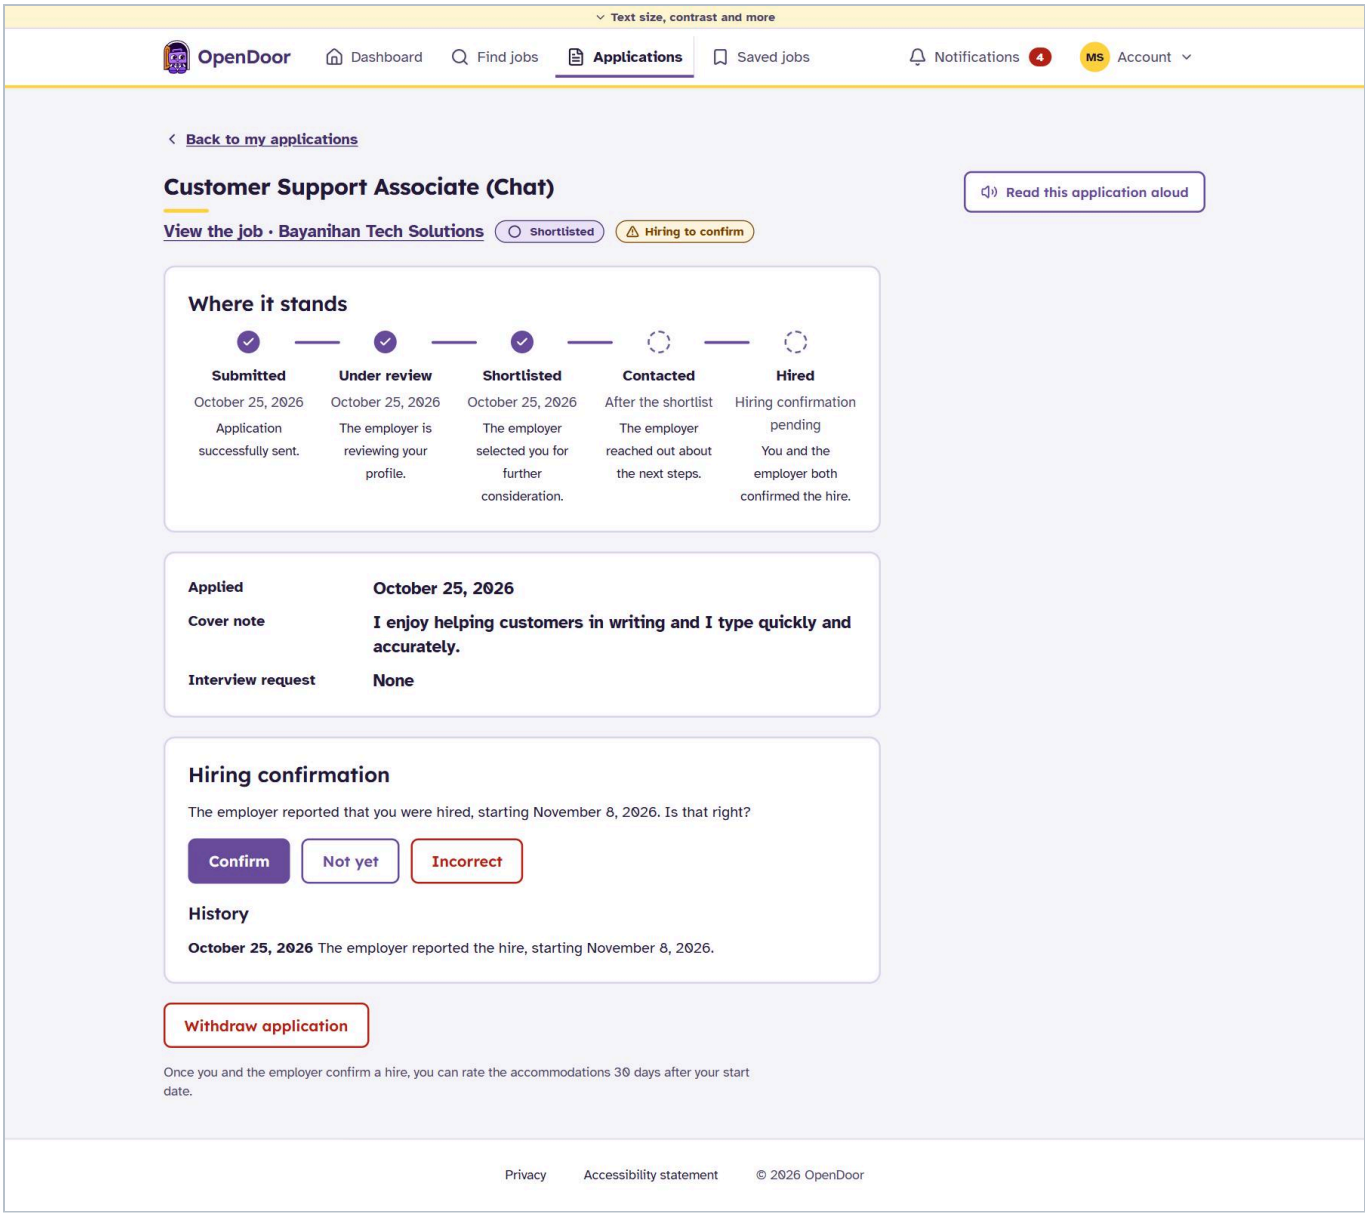

`POST /applications/{id}/hiring-reports {start_date}`

`POST /applications/{id}/hiring-reports/{report}/response {answer, start_date?}`

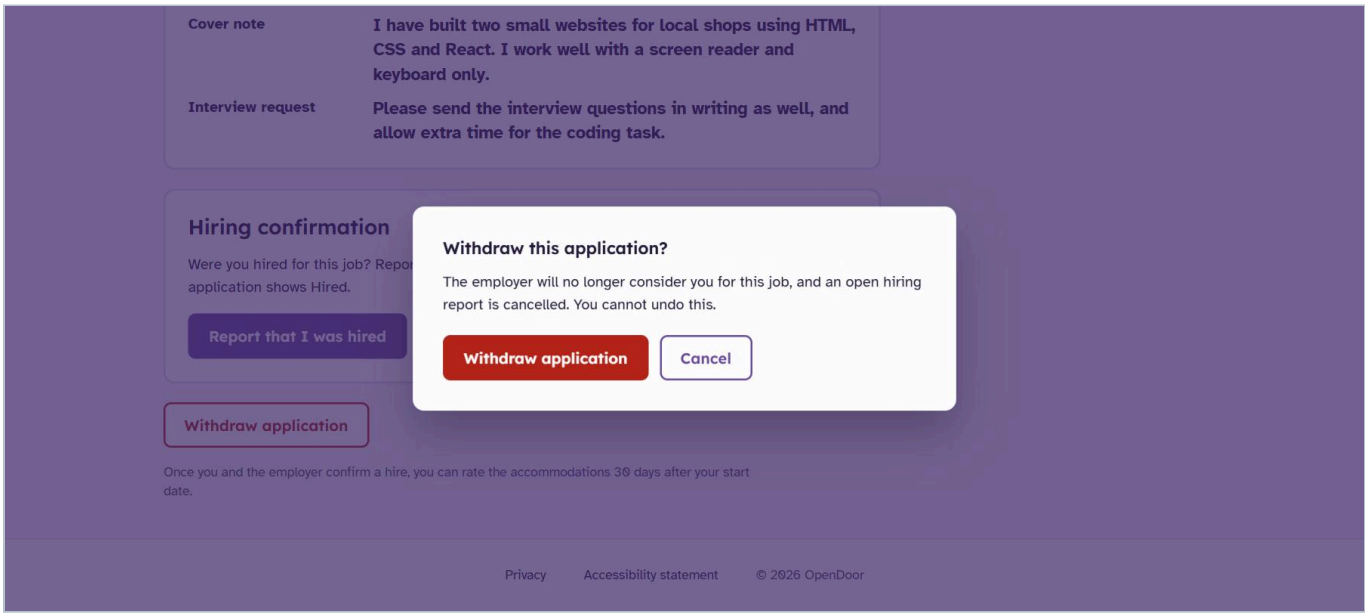

`PATCH /applications/{id}/status {withdrawn}`

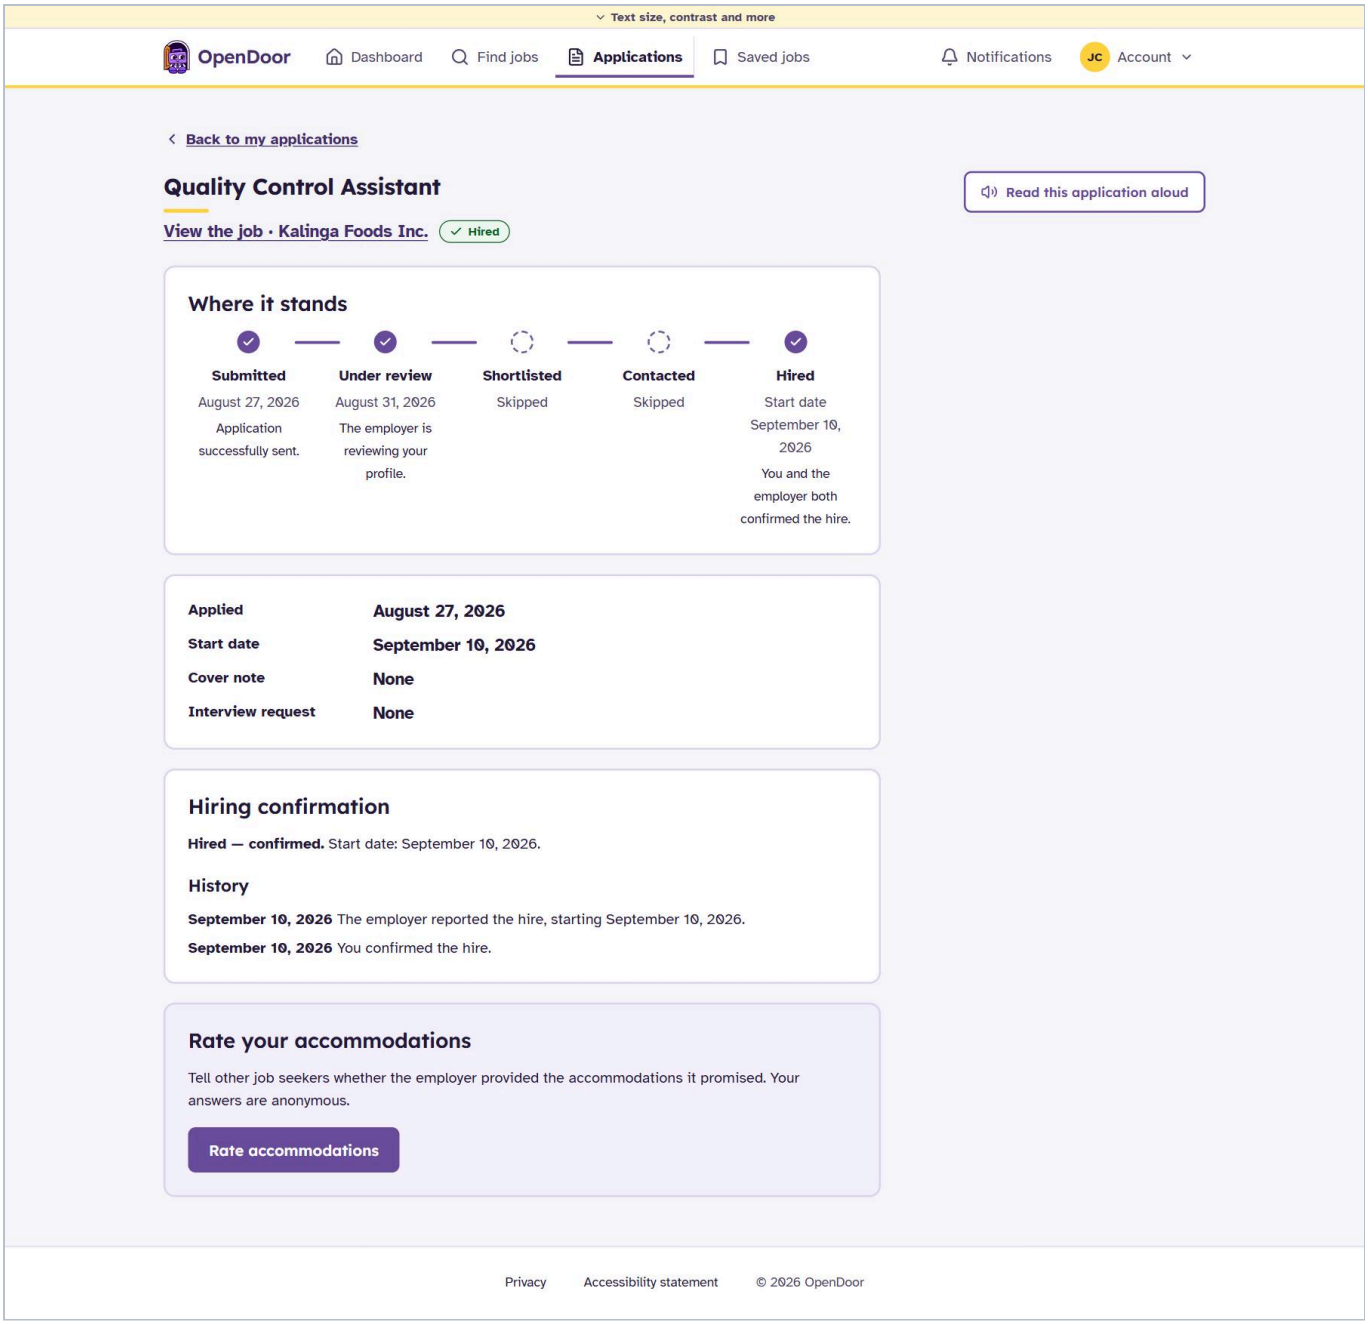

Screenshot `/candidate/applications/7`

The employer reported the hire: Confirm, Not yet or Incorrect `/candidate/applications/8`

Confirm dialog for withdrawing (focus starts on Cancel) `/candidate/applications/7`

A confirmed hire: the rating card `/candidate/applications/6`

4.8 Rate your accommodations

Route	`/candidate/applications/{id}/feedback`
Who	Job seeker with a confirmed hire, from day 30 after the start date
Purpose	Anonymous rating of every accommodation the posting promised when the hire was confirmed – this feeds the employer's trust score.

ON THE SCREEN

- "‹ Back to application"; subtitle "Were the promised accommodations really provided? Your answers are anonymous. The employer sees only the combined score."
- One card per accommodation with the required choice Delivered / Partly delivered / Not delivered
- Comments ("Optional. Do not include names.", 2,000 characters, Speak)
- "Submit ratings"

ACTIONS

- Submit → "Thank you – Your ratings are saved. They help other job seekers know which employers keep their promises."

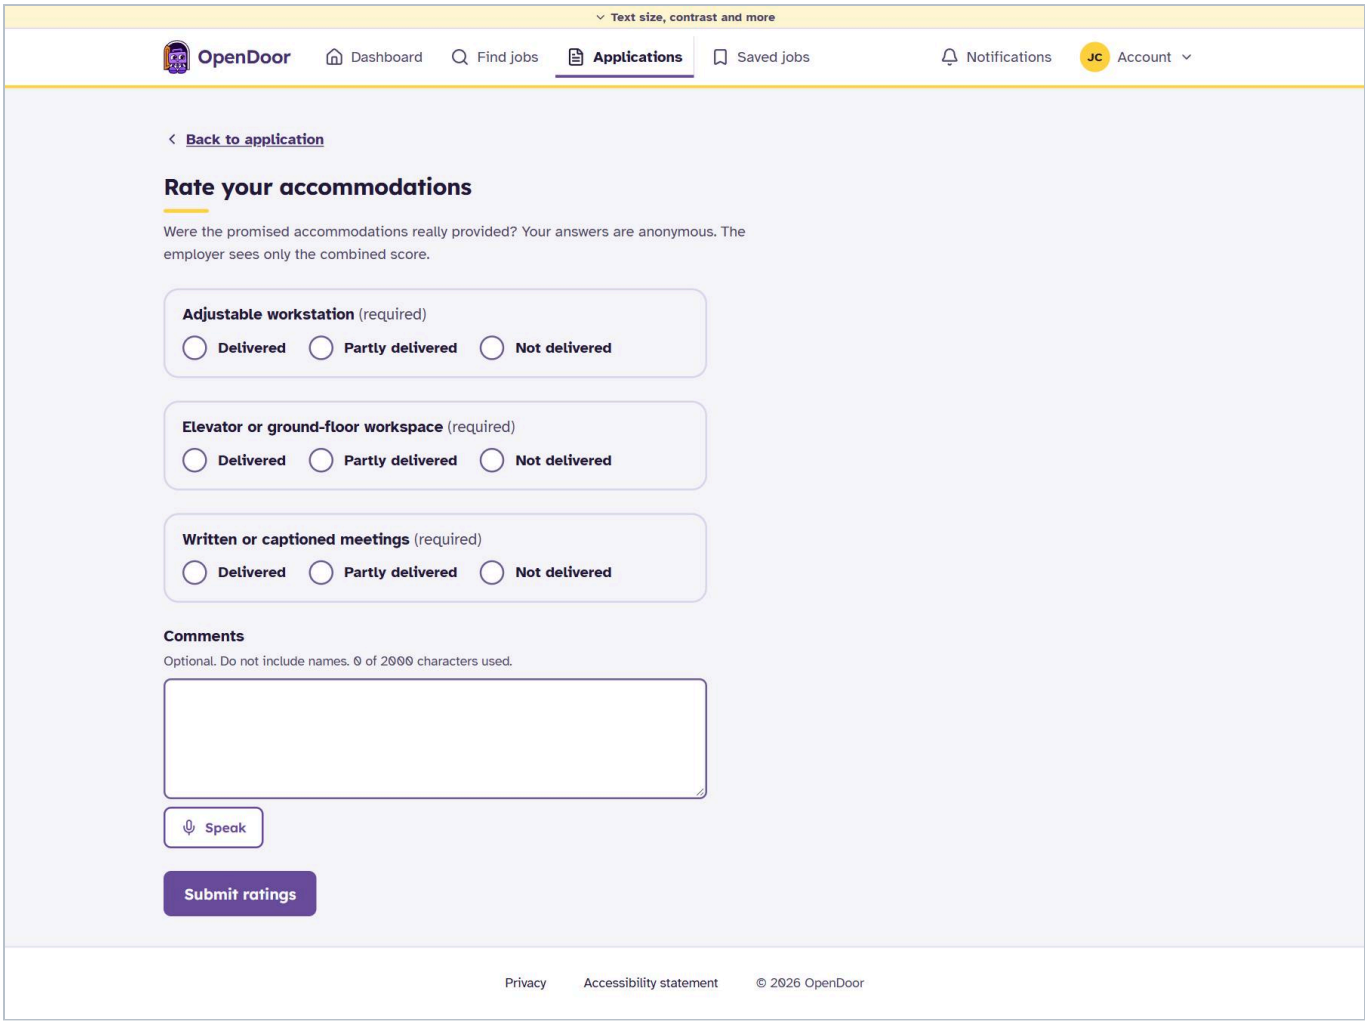

MESSAGES AND STATES

- Missing rating: error per card "Choose a rating for “…”." and error summary
- "Already rated" (each hire is rated once)
- "Not open yet – You can rate the accommodations from {date}, 30 days after your confirmed start date."
- "Nothing to rate" (the posting listed no accommodations)

API

```
GET /applications/{id}/feedback-form
```

```
POST /applications/{id}/feedback {items[{accommodation_id, rating}], comments}
```

Screenshot `/candidate/applications/6/feedback`

4.9 Saved jobs

Route	`/candidate/saved-jobs`
Who	Job seeker
Purpose	Bookmarked jobs, newest saved first.

ON THE SCREEN

- Subtitle "Jobs you bookmarked, newest first."
- Job cards, each with "Remove"
- After removing: "Removed “Data Encoder” from saved jobs." and an "Undo" button
- Pagination (12 per page)

ACTIONS

- Open a job
- Remove → focus moves to "Undo"
- Undo → the job is saved again and focus returns to its "Remove"

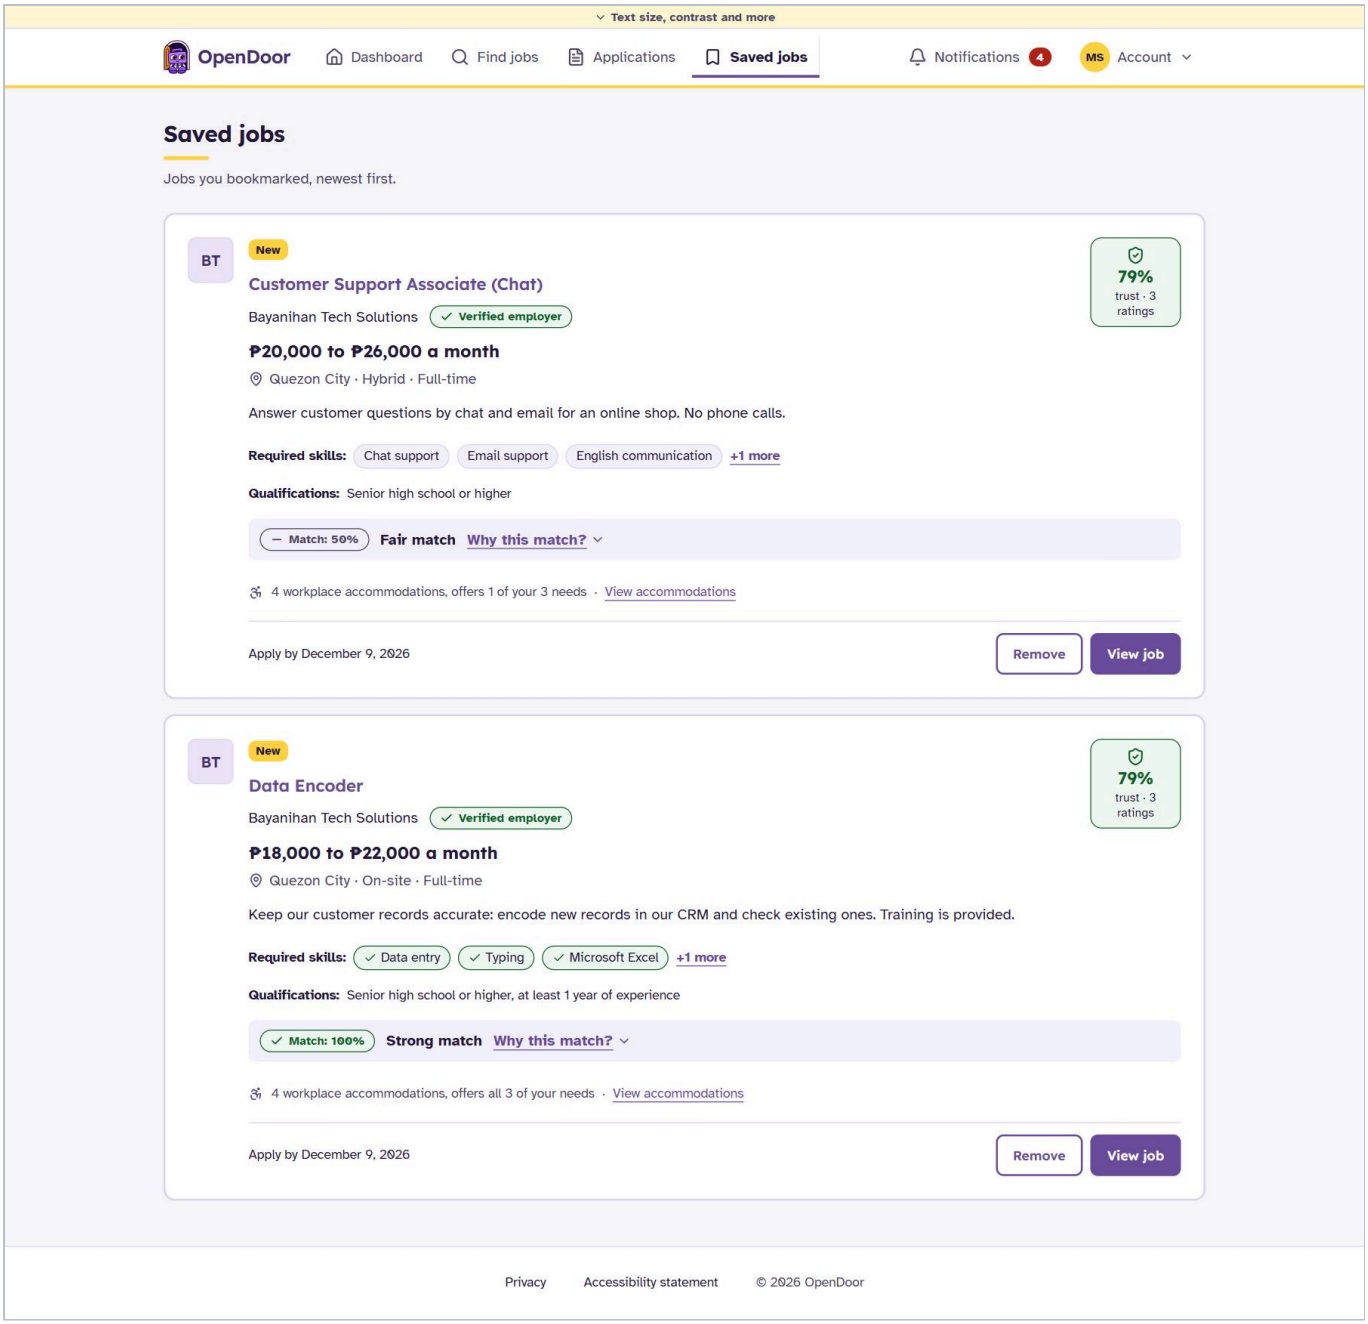

MESSAGES AND STATES

- Empty: the sad mascot, "No saved jobs – Use “Save job” on a job’s page to keep it here." and "Find jobs"
- Closed or hidden jobs disappear from the list and come back if they reopen

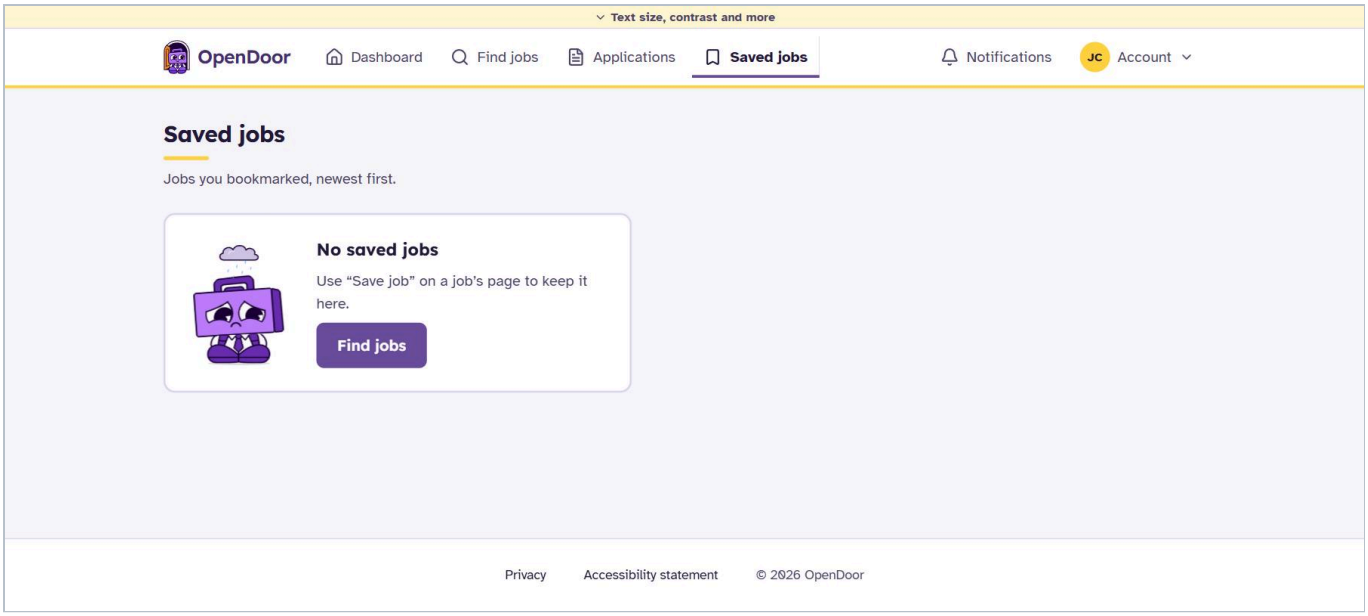

API

`GET /candidate/saved-jobs?page=`

`DELETE, POST /candidate/saved-jobs/{id}`

Screenshot `/candidate/saved-jobs`

Empty state `/candidate/saved-jobs`

5 Employer screens

Demo: Ana Reyes (`employer@opendoor.test`, Bayanihan Tech Solutions, verified, trust score 79%) and Ramon Villanueva (`employer2@opendoor.test`, Kalinga Foods Inc., waiting for verification). Menu: Dashboard · Job postings · Company · Trust score | Notifications · Account ("Job postings" stays marked on the applicant pages).

5.1 Dashboard NEW

Route	`/employer/dashboard`
Who	Employer
Purpose	Postings, applications, hires and trust score at a glance.

ON THE SCREEN

- h1 "Welcome, {name}", subtitle "Manage your jobs and connect with candidates.", "Post a job" on the right
- Not verified: "Your business registration is waiting for verification. You can prepare jobs as drafts and publish them once an administrator has verified your company." (or the reason it was not approved) with "View company profile"
- Tiles: Open jobs, New applications, Pending hire confirmations, Confirmed hires
- "Your job postings" with tabs Open / Draft / Closed and their counts: table Job title (with setup · type) · Applicants · Deadline · "Manage"; "View all"
- Beside the postings (below them on a phone): "Needs attention" – new applications per job with "Review applicants", hiring reports by candidates with "Review confirmation", or "You're all caught up." – and under it the "Accommodation trust score" card with "See each accommodation"
- Chart "Applications, last 12 weeks" (applications and confirmed hires) next to "Application overview" (each stage with its count and a bar beside the label, "Show as a table"); both rows share one 3:2 column split
- "Recent activity" (latest 8: applications received, hiring reports and answers – names only)

ACTIONS

- Post a job, open postings, applicants, an application or the trust score

MESSAGES AND STATES

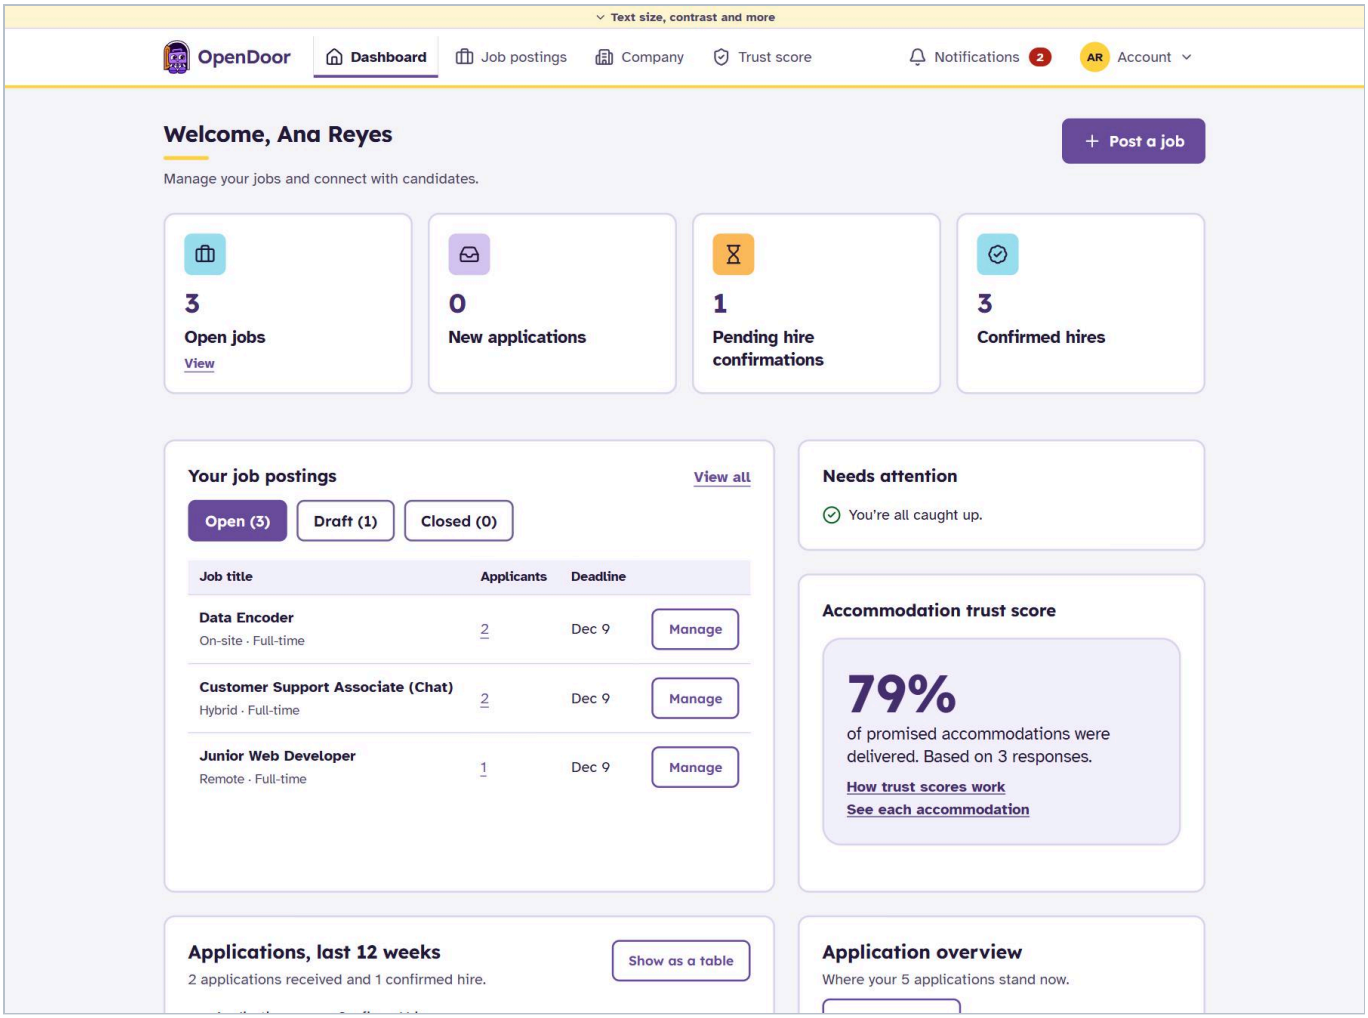

- "No activity yet. New applications and hiring reports show up here."
- The "Get started" list (first-time users) sits above the tiles until every step is done

API

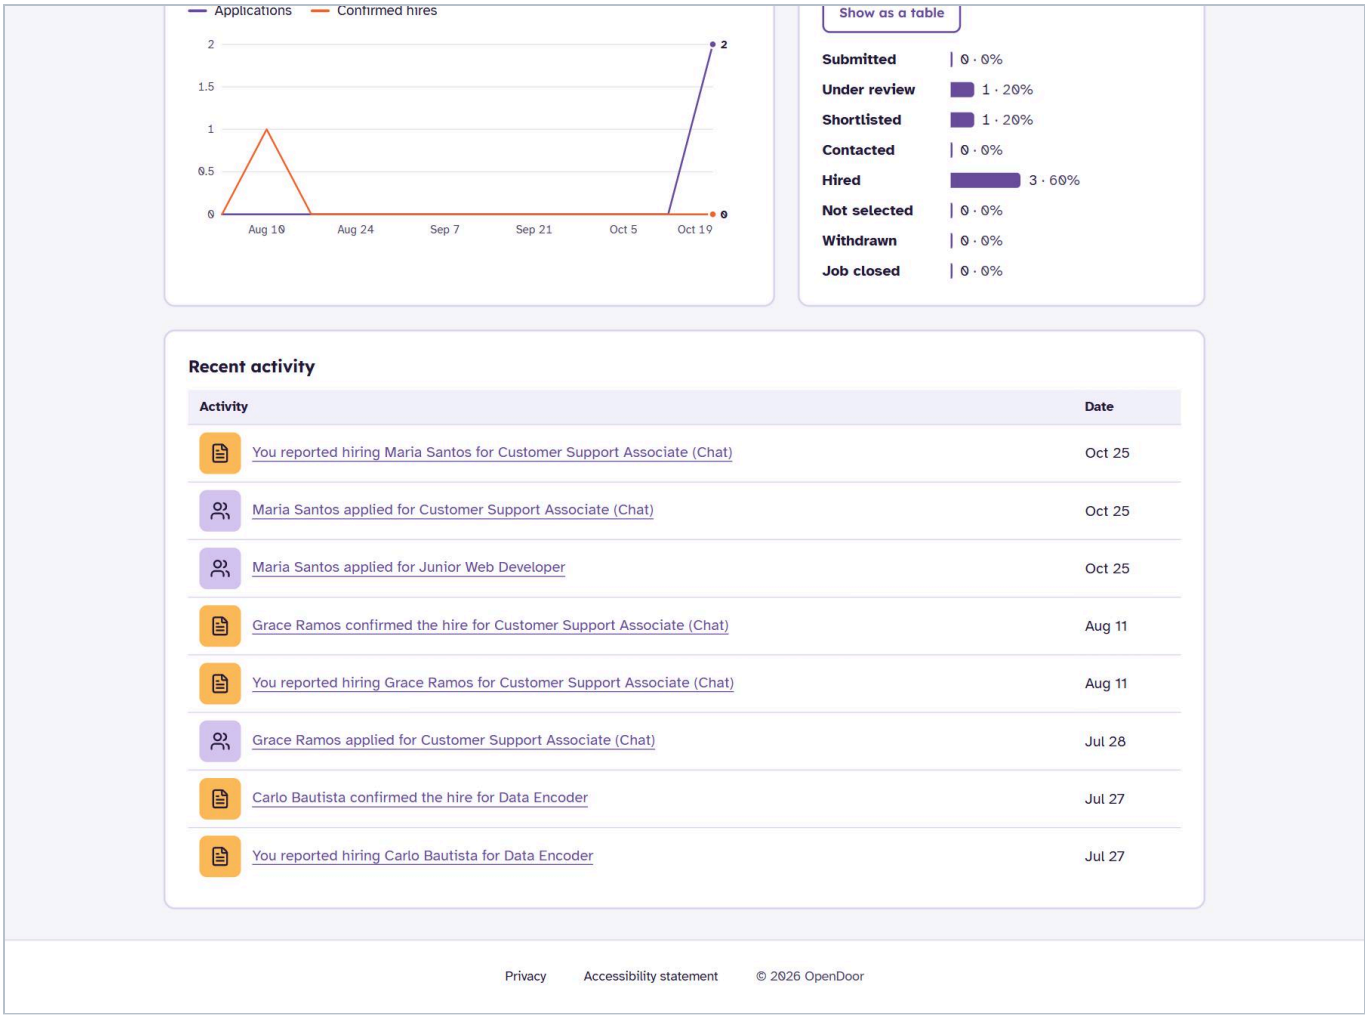

`GET /employer/dashboard (attention, recent_activity, weeks)`

`GET /employer/job-postings?status=`

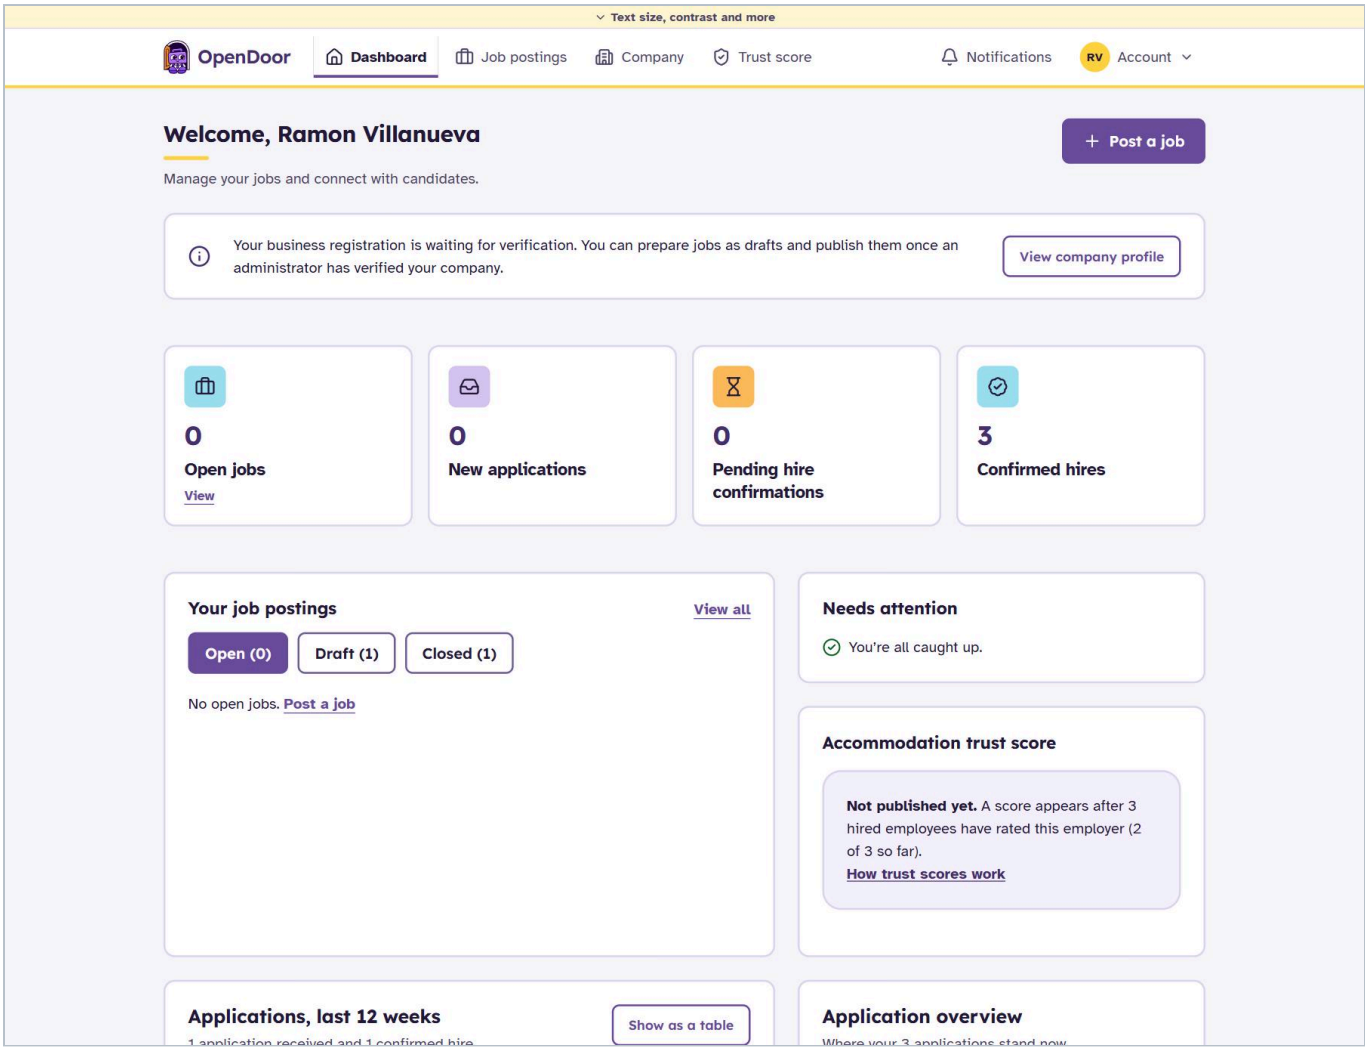

`PATCH /me/onboarding {checklist_hidden}`

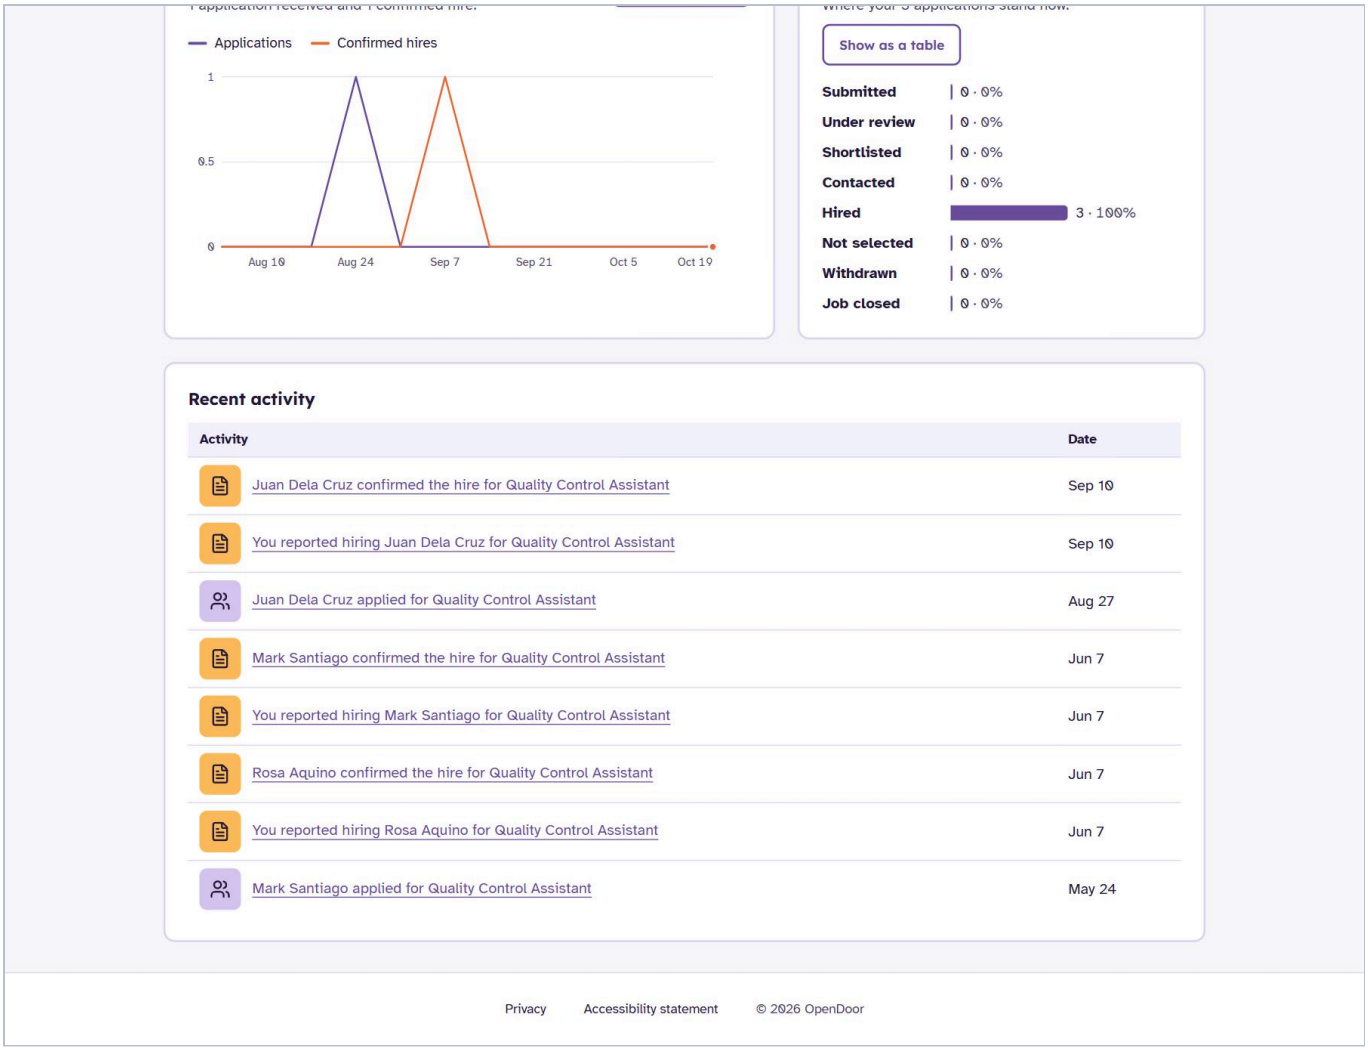

Screenshot – part 1 of 2 `/employer/dashboard`

Screenshot – part 2 of 2 `/employer/dashboard`

An employer whose company is not verified yet – part 1 of 2 `/employer/dashboard`

An employer whose company is not verified yet – part 2 of 2 `/employer/dashboard`

5.2 Company profile

Route	`/employer/company`
Who	Employer
Purpose	Company details that an administrator checks with the DTI/SEC business registry.

ON THE SCREEN

- Subtitle "Checked against the DTI and SEC registry before your jobs go live."
- Verification alert: success "Verified employer – Checked on {date}. Your jobs show the Verified badge." / warning "Waiting for verification" / error "Verification was not approved – Reason: …"
- Form: Company name, Business registration number, Registered with (DTI / SEC), Industry, Office address, City or municipality
- Box "More details: about the company and logo": About the company (optional, Speak), Logo ("Optional. PNG, JPG or WebP, up to 2 MB.")
- "Save company profile"

ACTIONS

- Save → "Your company profile is saved."
- Changing a verified registration number warns: "Changing this number removes your Verified badge until it is checked again."
- Saving after a rejection sends the company back to the admin queue

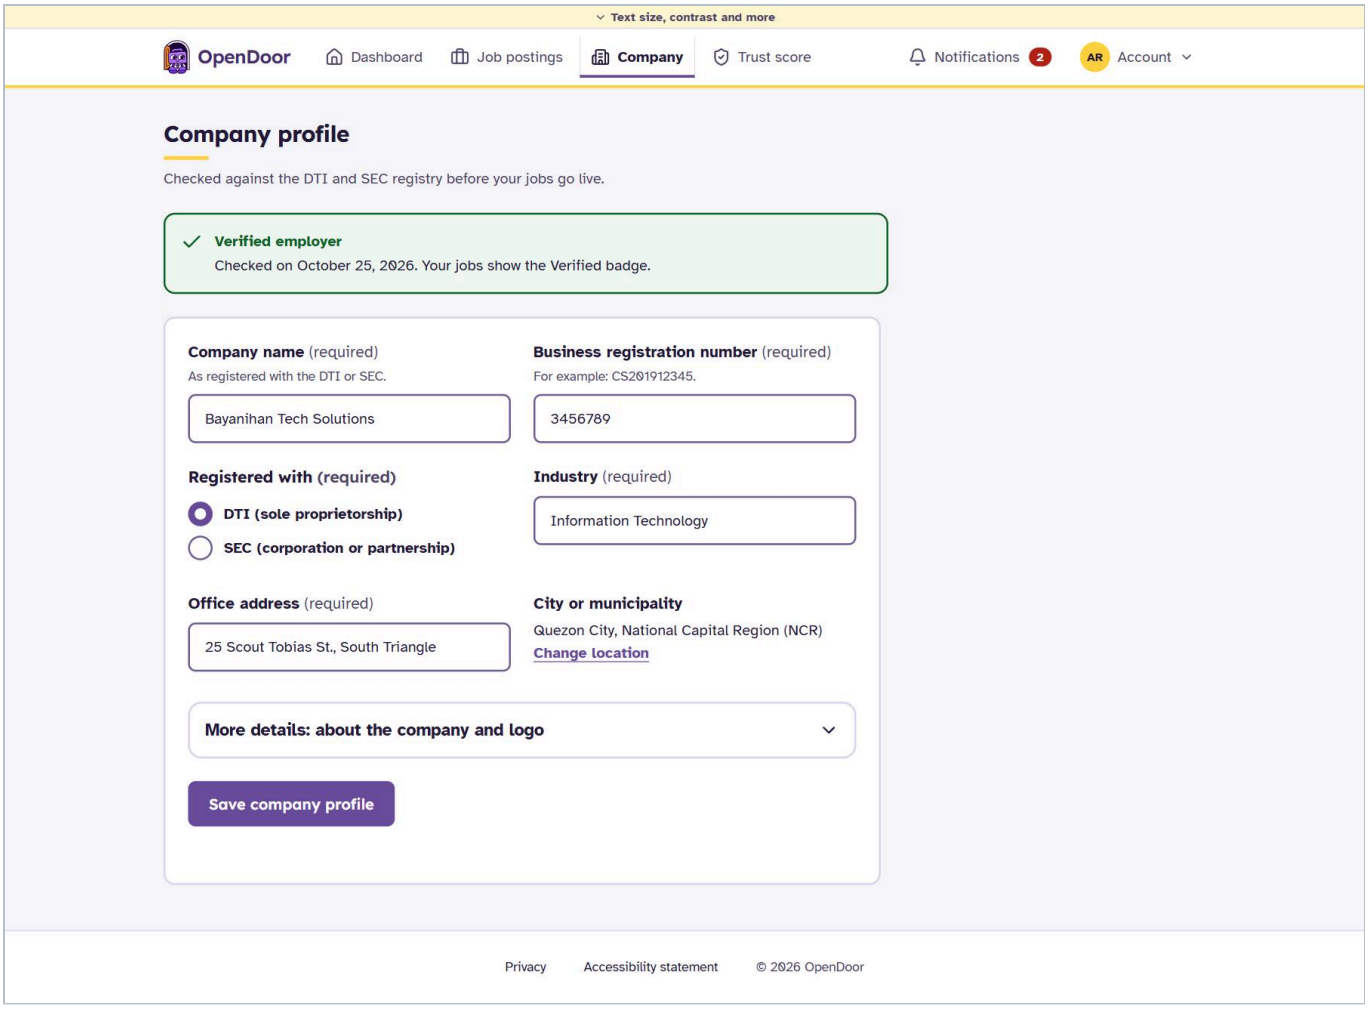

MESSAGES AND STATES

- New employer: empty form with a welcome message; an administrator checks the registration before jobs can be published

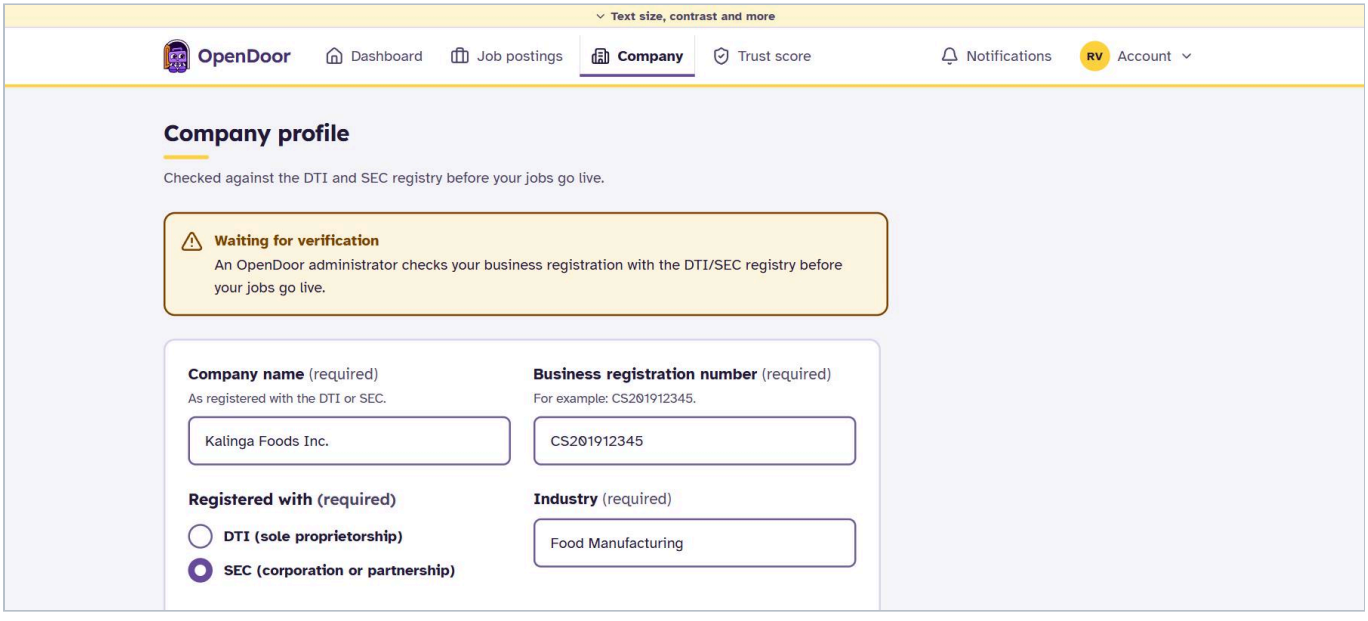

API

`GET /employer/company`

`PUT /employer/company (POST + _method=PUT when a logo is sent)`

Screenshot `/employer/company`

Waiting for verification (warning) `/employer/company`

5.3 Job postings

Route	`/employer/jobs`
Who	Employer
Purpose	All own postings and their state.

ON THE SCREEN

- Subtitle "All your postings and their state."
- Filter "Show" by status, count, "Post a new job" at the end
- Table: Job (link) · Status badge · Applicants · Closes · Actions ("Edit", "Close" or "Reopen", "Delete")

ACTIONS

- Close / Reopen → "“…” is closed to new applications." / "is open again." (reopen only for a verified company, before the closing date)
- Delete → confirm "The job disappears from search. Applications already received stay available to you and the applicants."

MESSAGES AND STATES

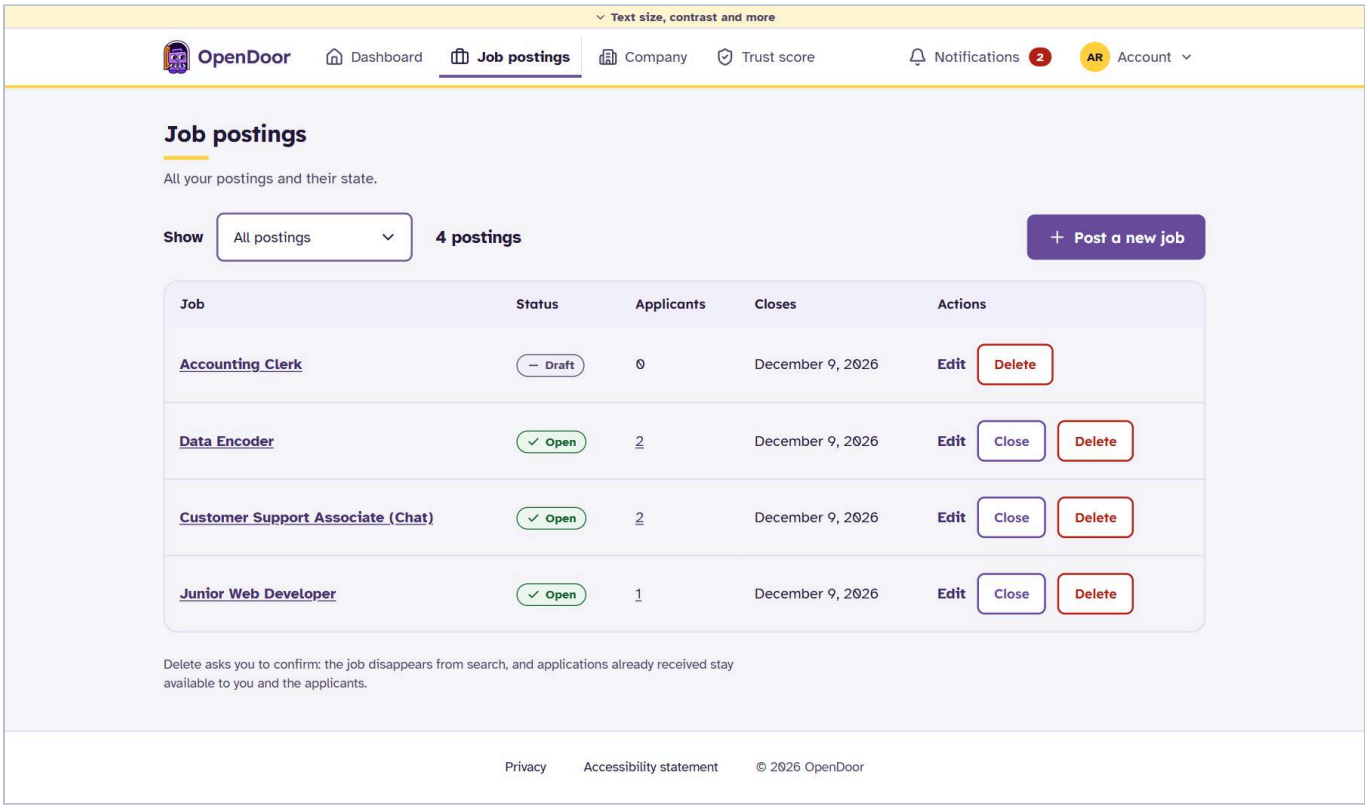

- "You have not posted any jobs yet"

API

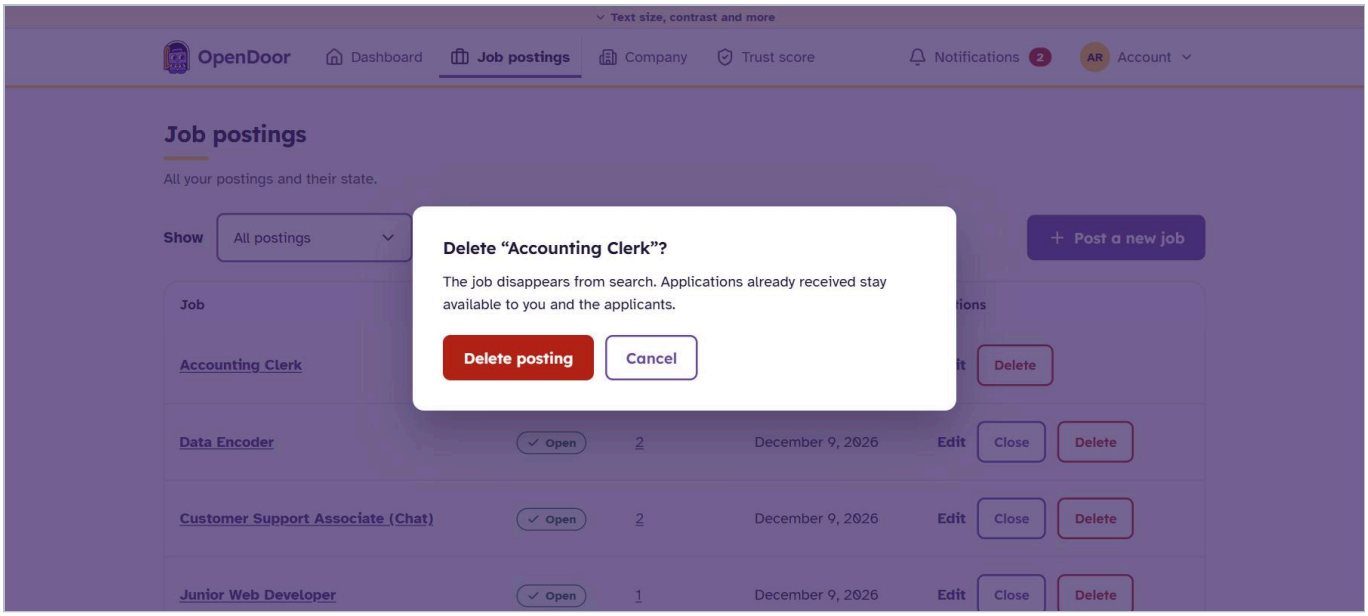

`GET /employer/job-postings?status=&page=`

`PATCH /job-postings/{id}/status {open|closed}`

`DELETE /job-postings/{id}`

Screenshot `/employer/jobs`

Delete confirmation (danger: focus starts on Cancel) `/employer/jobs`

5.4 Post a new job (6 steps) / Edit posting

Route	`/employer/jobs/new, /employer/jobs/{id}/edit`
Who	Employer (own postings)
Purpose	Write a job with skills, pay and structured accommodations and publish it.

ON THE SCREEN

- "Step n of 6 · …" with progress bars; the intro per step ("Your job goes live as soon as you publish it.", "Describe the work, when and where it happens.", "What the person needs to do the job…", "Job seekers look at the pay first. Everything on this step is optional.", "Tell people what support you offer.", "Check everything, then publish the job.")
- Step 1 Job basics: Job title, Category, Employment type, Work setup
- Step 2 Description and place: Job description, Main responsibilities (one per line), Schedule, Interview format, Workplace address, City or municipality, Applications close on
- Step 3 Skills and qualifications NEW: skills from the shared list (at least one to publish), Minimum education, Minimum years of experience, Other qualifications
- Step 4 Salary and applying NEW: Lowest and highest salary in pesos, Salary paid per (hour, day, month, year), Benefits, Anything else applicants should send
- Step 5 Accommodations: warning "List only what you really provide – Hired employees will rate each one."; checklist in two columns with "Details for “…” (optional)"
- Step 6 Review and publish: a card per step with "Change"
- Buttons "Back", "Save as draft", "Next" / "Publish job" ("Publish changes" when editing a published job)

ACTIONS

- Publish → the job is open at once – only for a verified company; otherwise it can only be saved as a draft
- Save as draft → status "Draft"

MESSAGES AND STATES

- No company yet: "Your company profile is missing" + link "Set up your company profile"
- Each step shows only its own errors; server errors jump to the first step with an error
- Tab title "Post a new job (step n of 6) – OpenDoor"

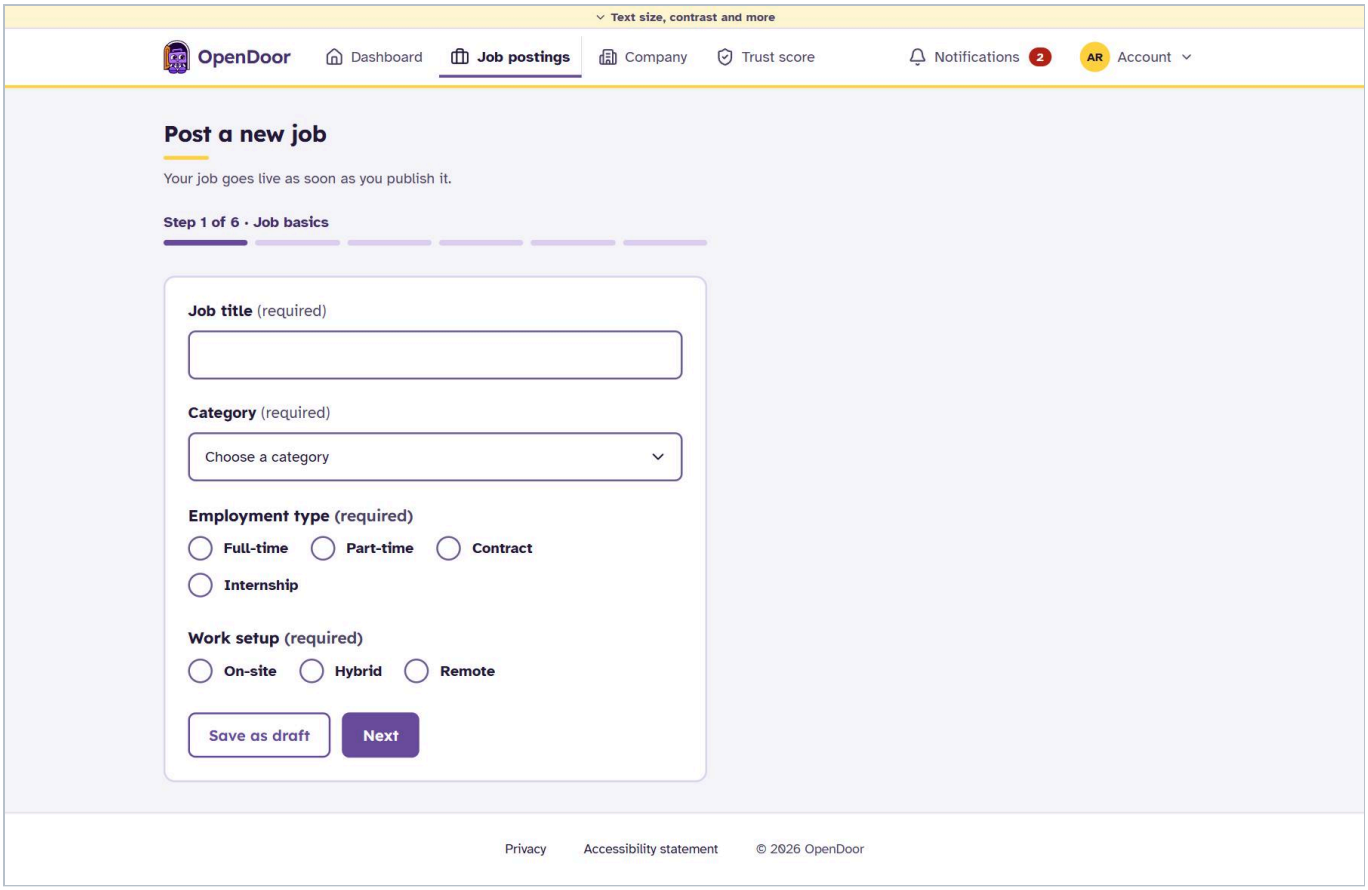

API

`POST /job-postings`

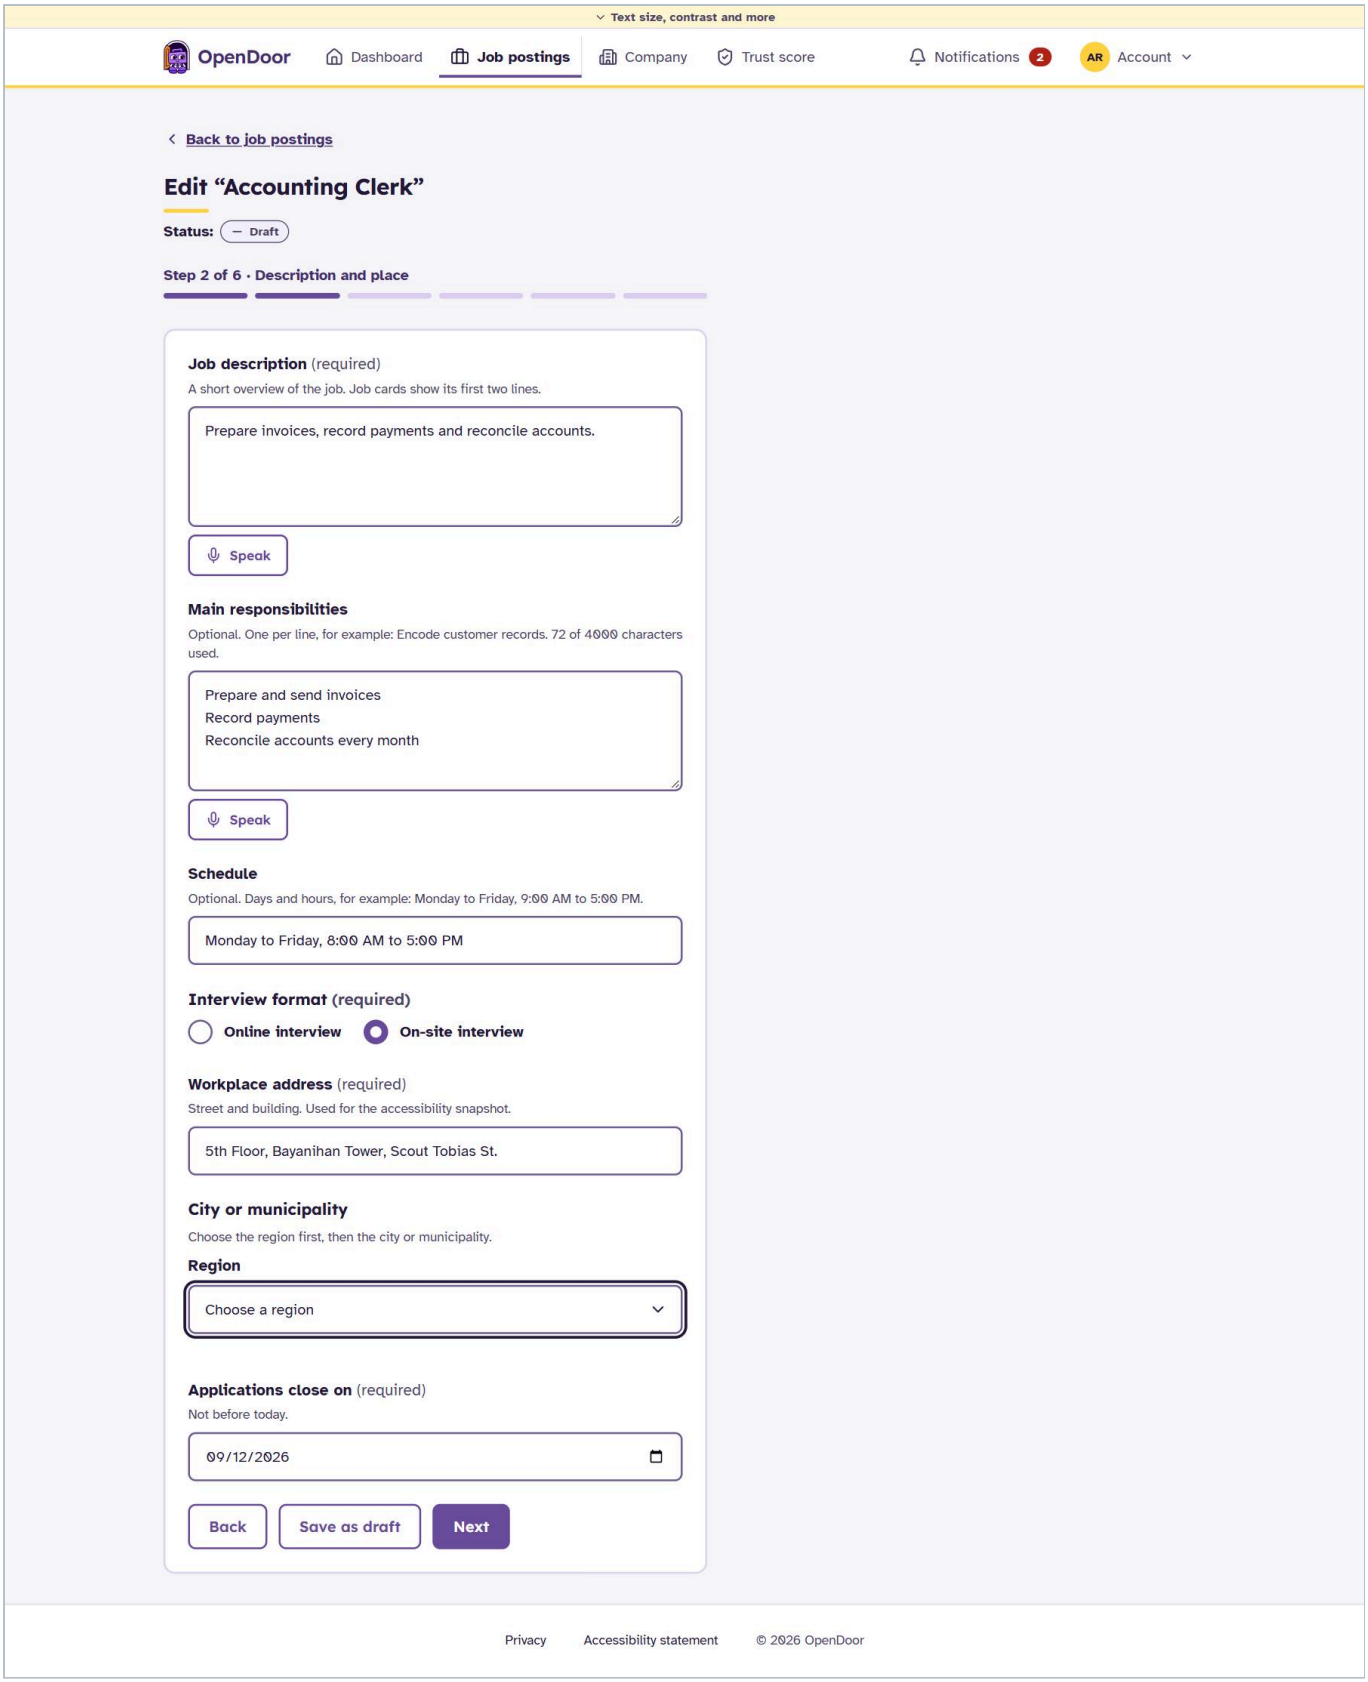

`PUT /job-postings/{id}`

`GET /job-postings/{id}`

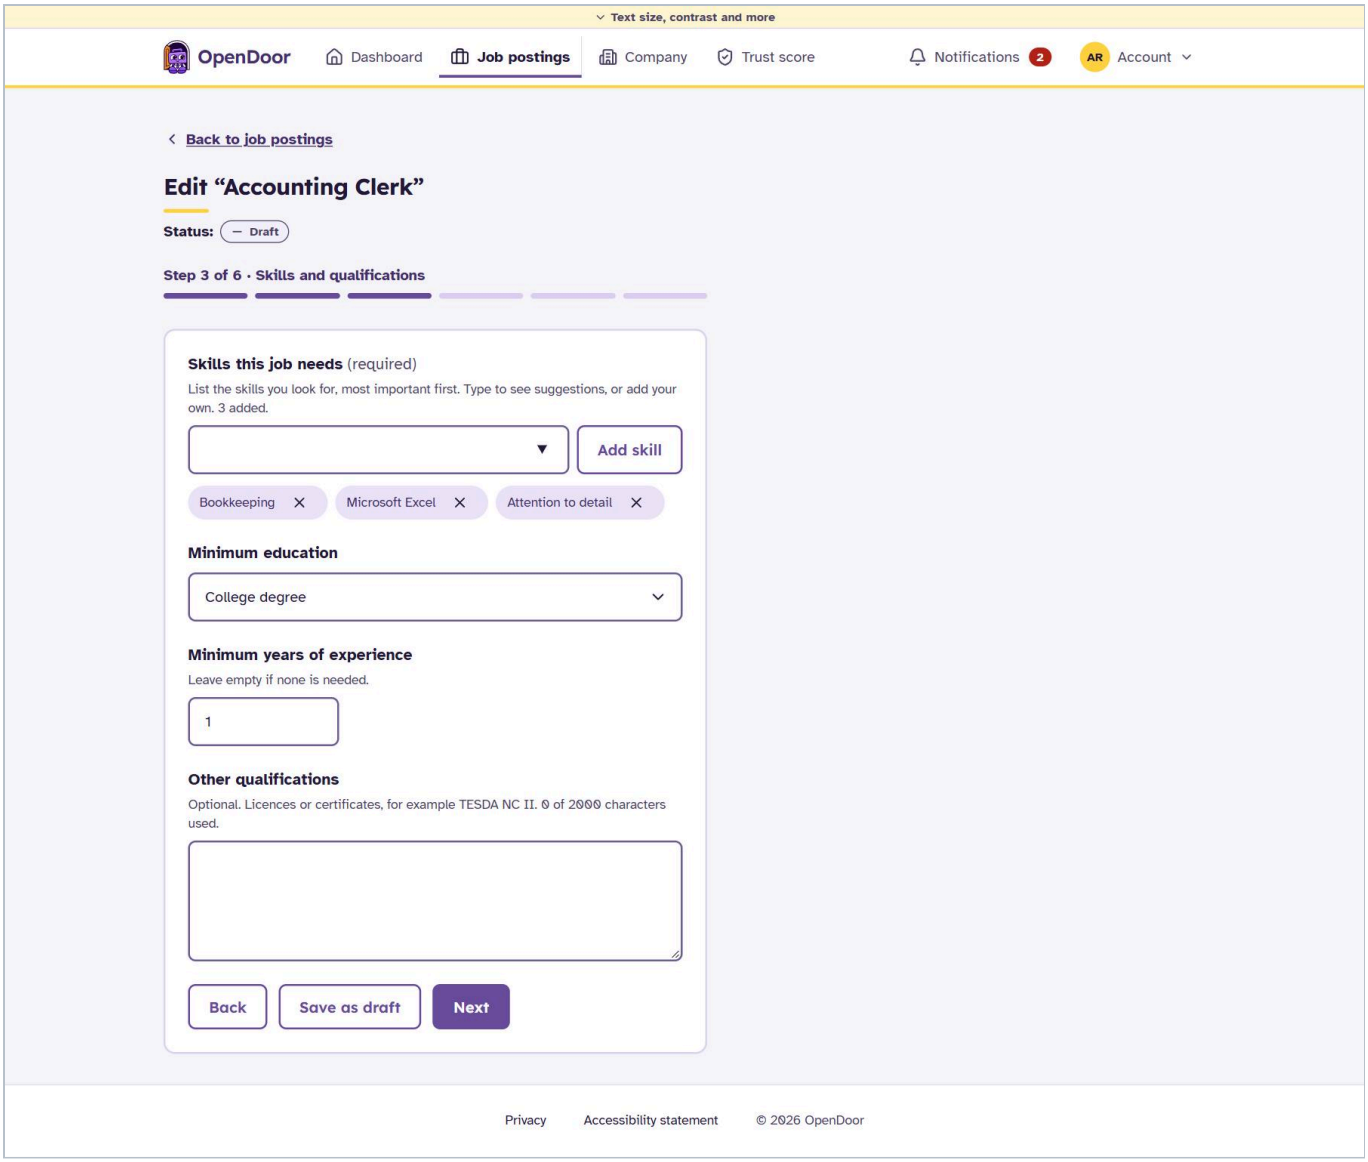

`GET /categories, /accommodations, /skills`

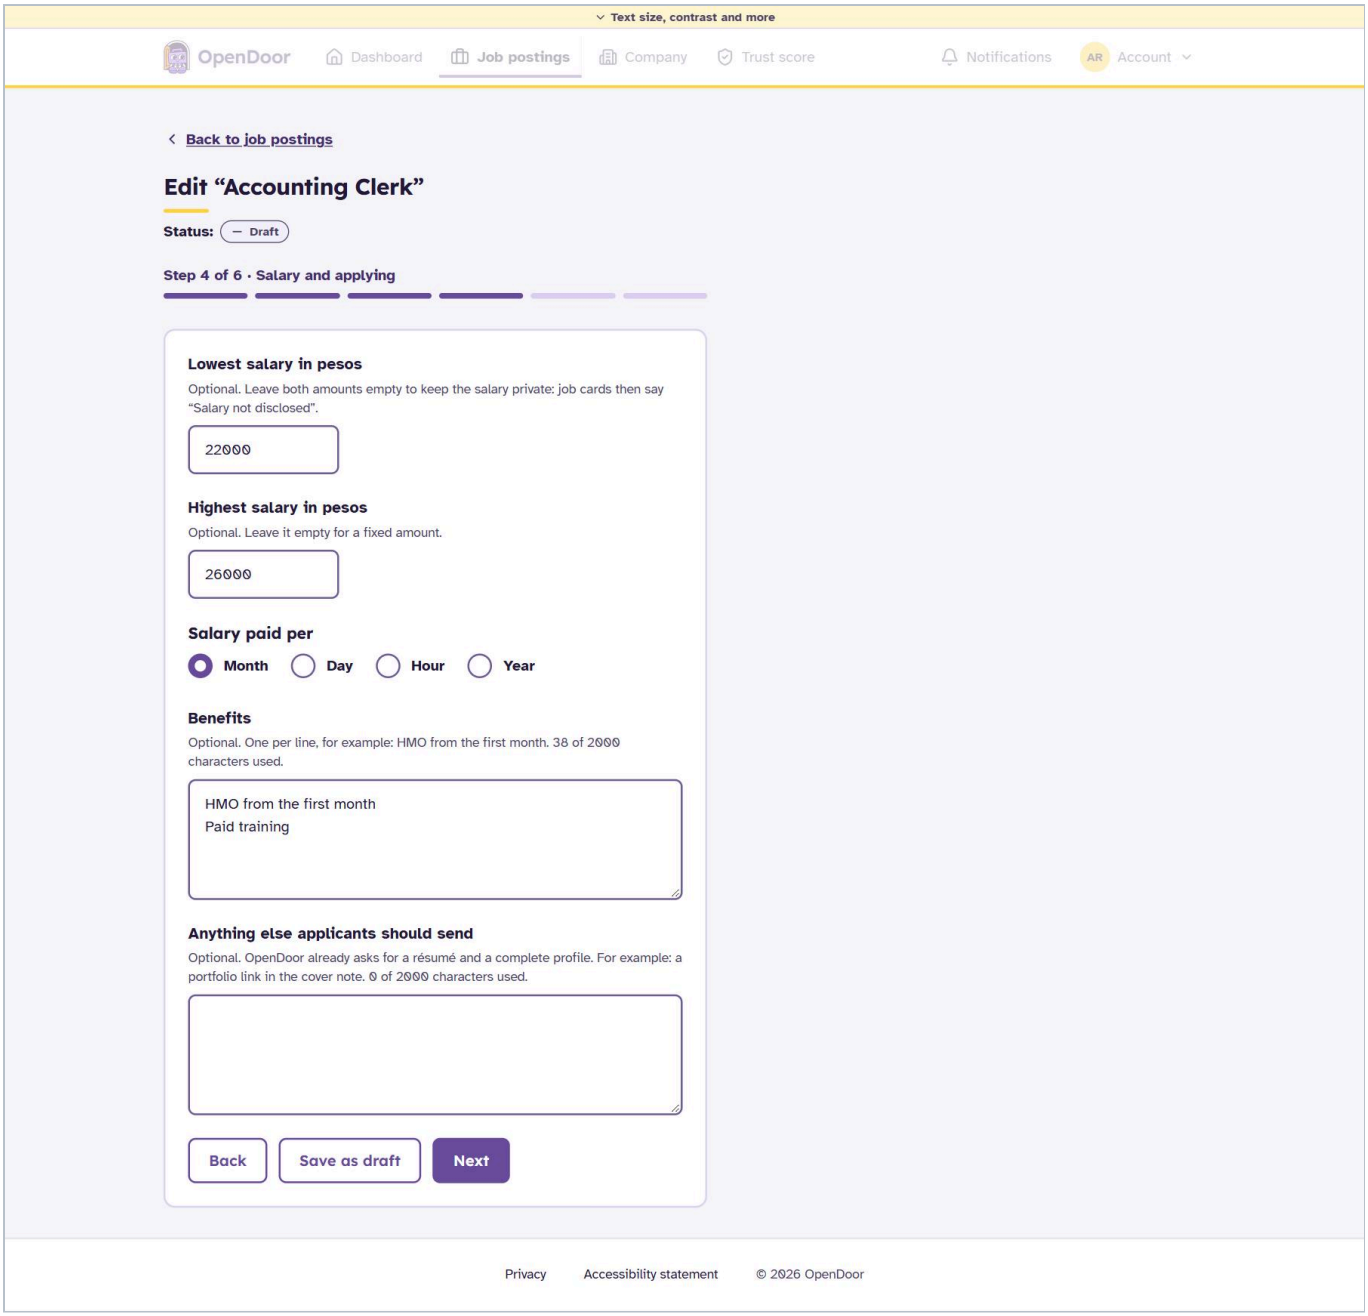

Step 1 · Job basics `/employer/jobs/new`

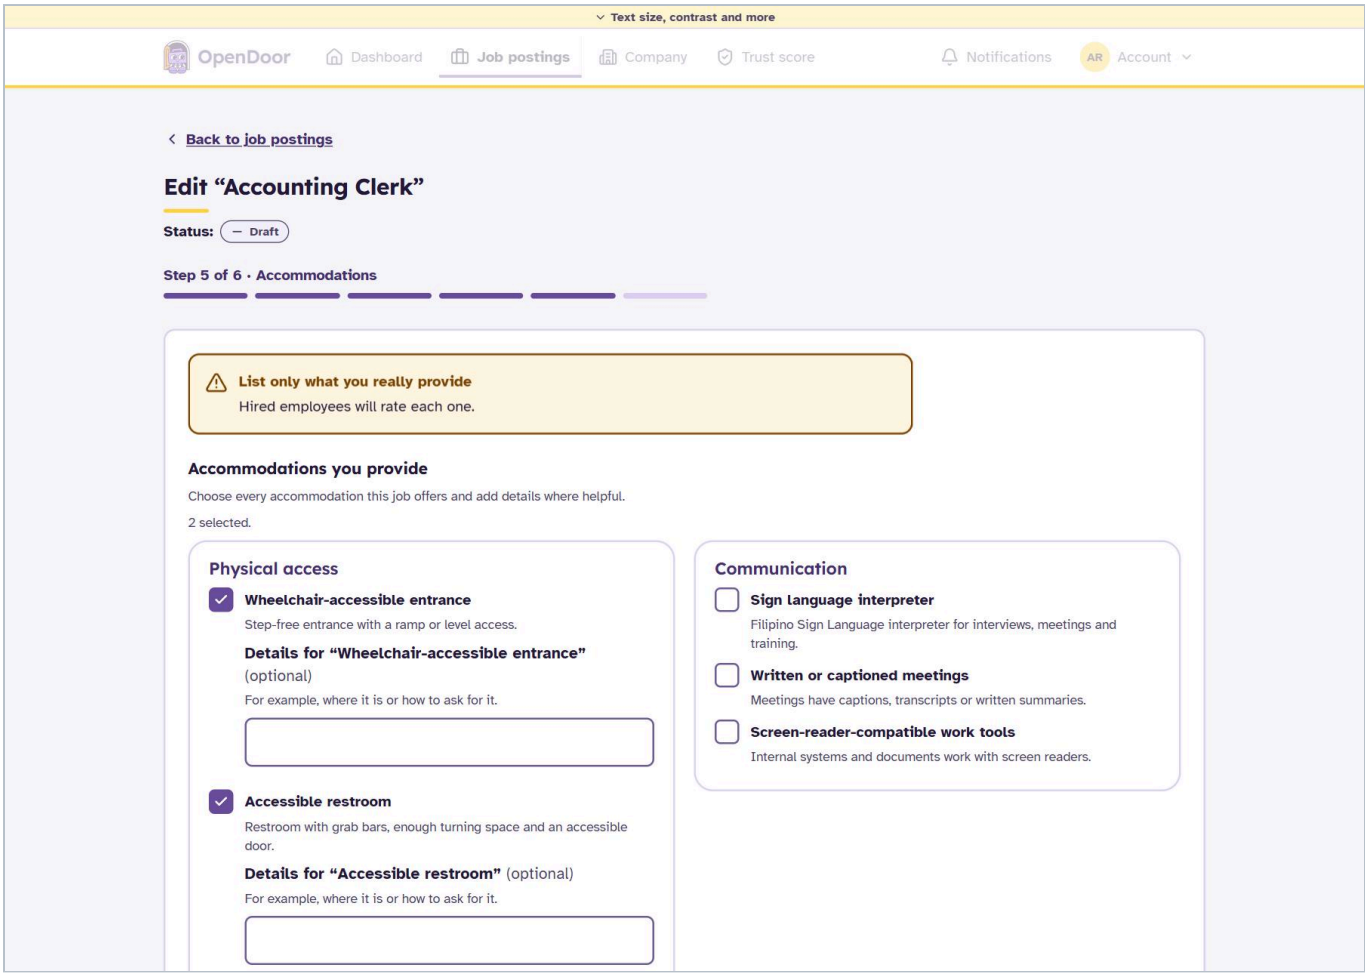

Step 2 · Description and place (location picker opened) `/employer/jobs/6/edit`

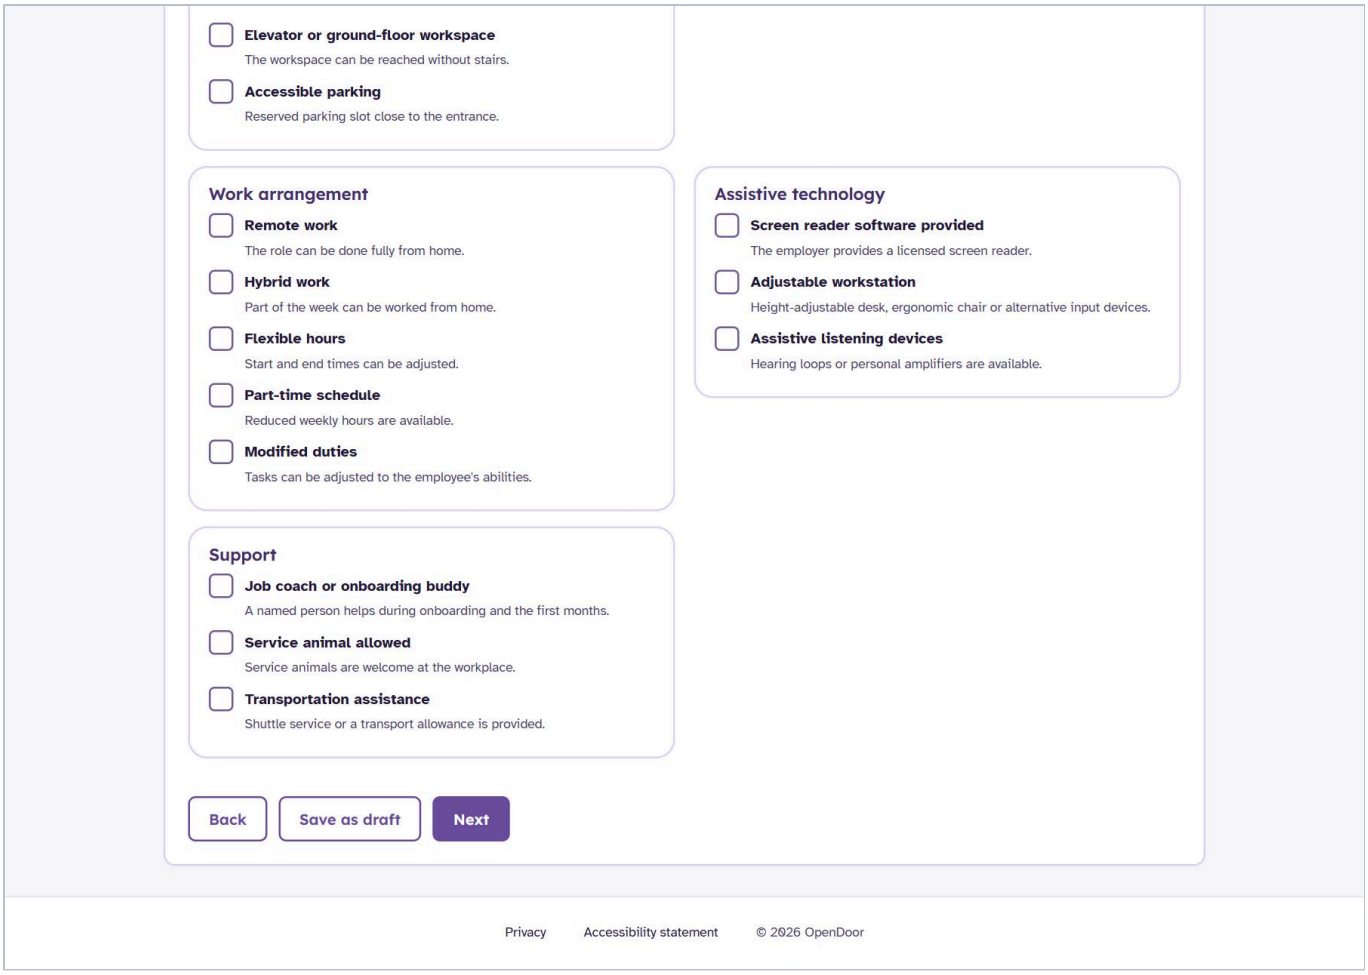

Step 3 · Skills and qualifications `/employer/jobs/6/edit`

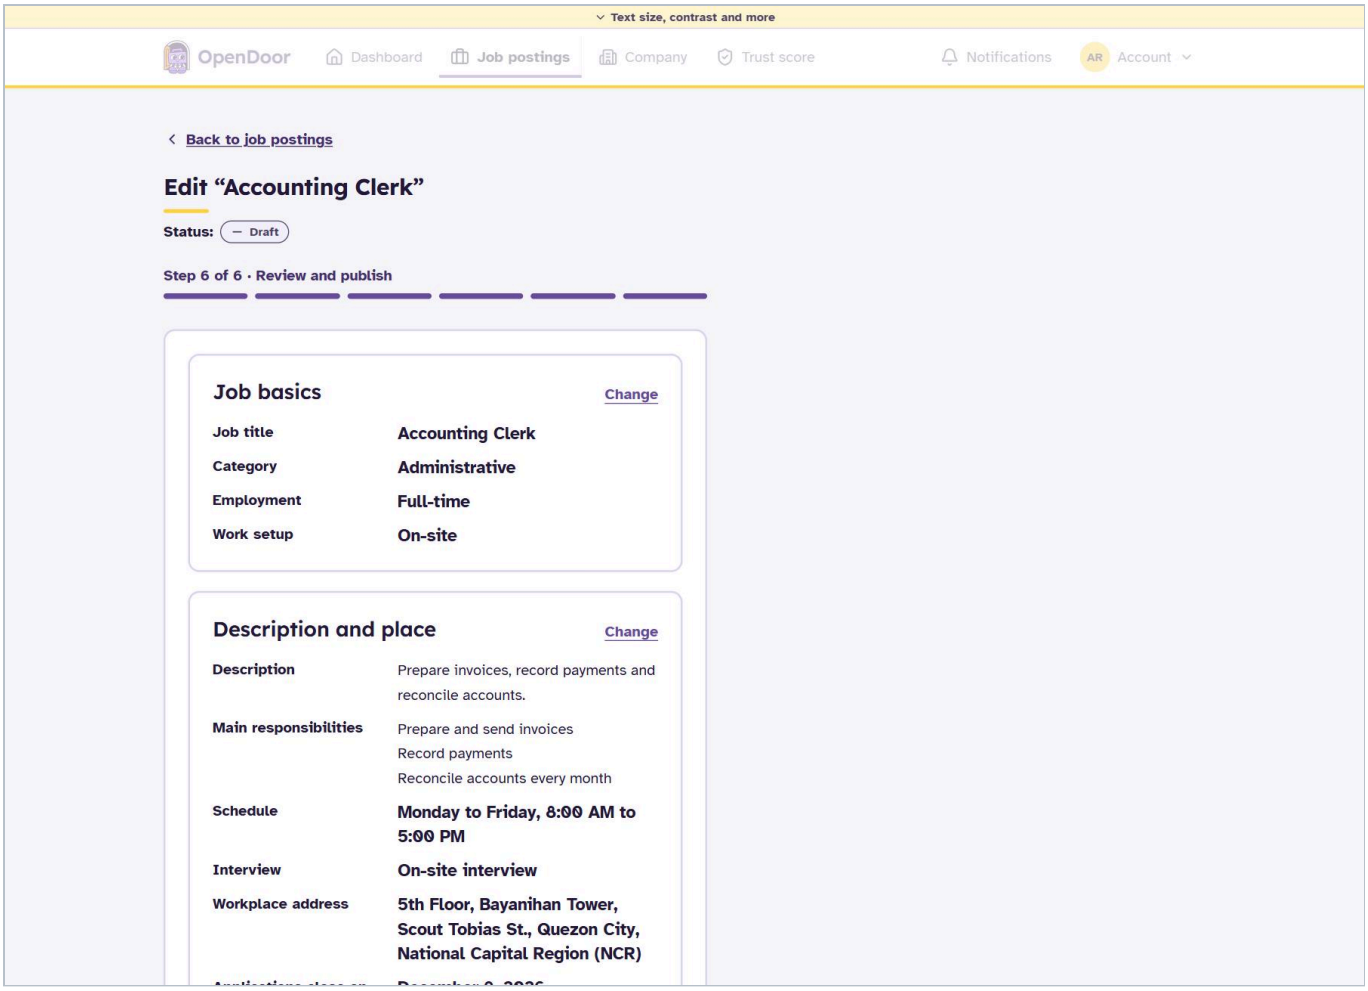

Step 4 · Salary and applying `/employer/jobs/6/edit`

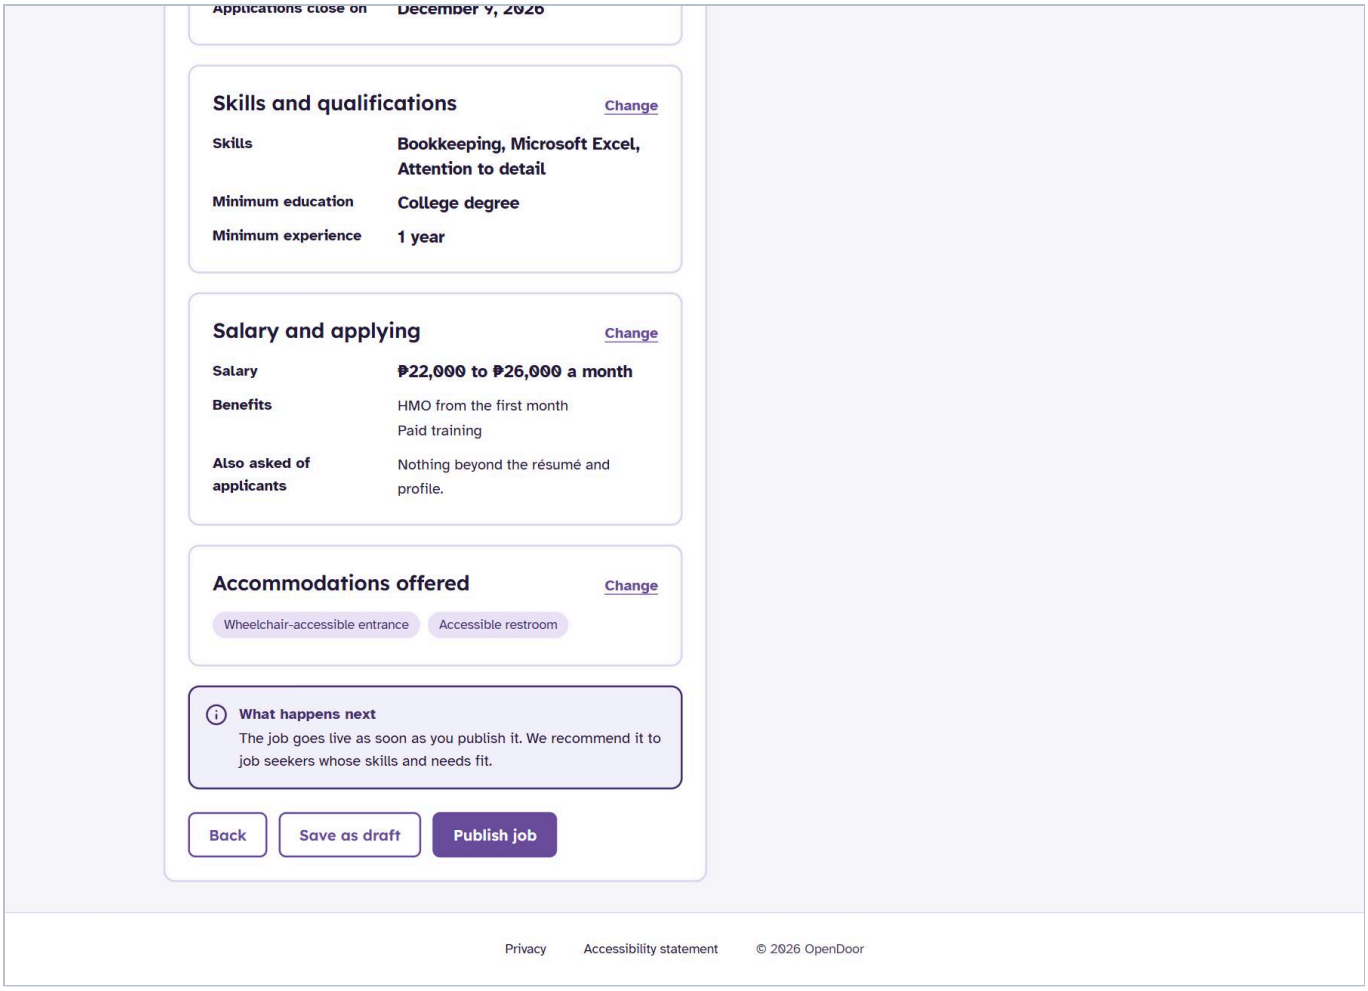

Step 5 · Accommodations – part 1 of 2 `/employer/jobs/6/edit`

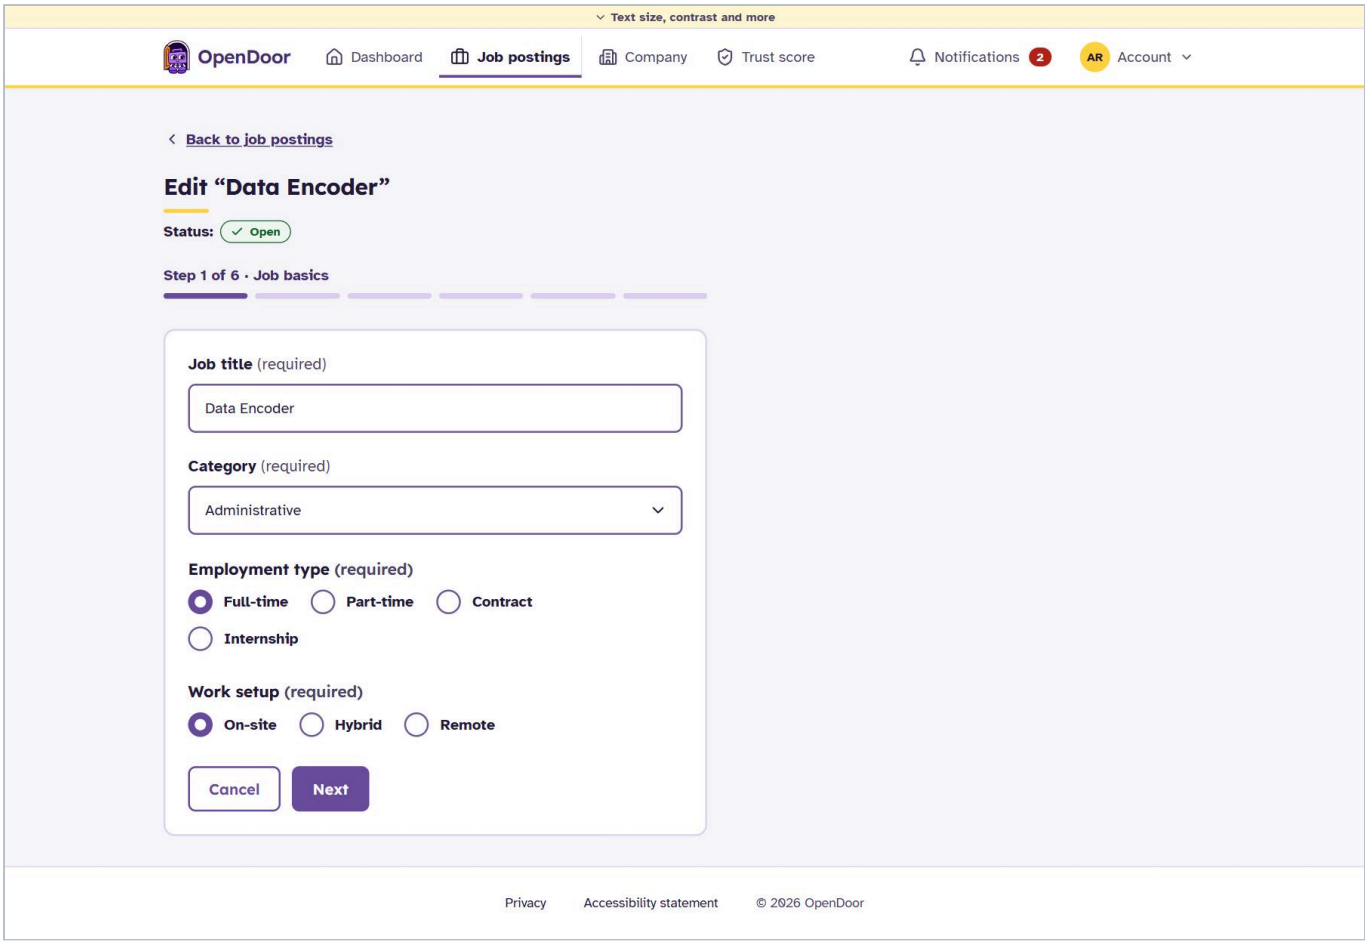

Step 5 · Accommodations – part 2 of 2 `/employer/jobs/6/edit`

Step 6 · Review and publish – part 1 of 2 `/employer/jobs/6/edit`

Step 6 · Review and publish – part 2 of 2 `/employer/jobs/6/edit`

Editing an open posting `/employer/jobs/1/edit`

5.5 Applicants

Route	`/employer/jobs/{id}/applicants`
Who	Employer (own postings)
Purpose	Everyone who applied to one job.

ON THE SCREEN

- "‹ Back to job postings"; h1 "Applicants for “{job}”", subtitle "Everyone who applied to this job."
- Filter "Show" by stage with the count
- Table: Applicant (link) · Headline · Applied · Status

ACTIONS

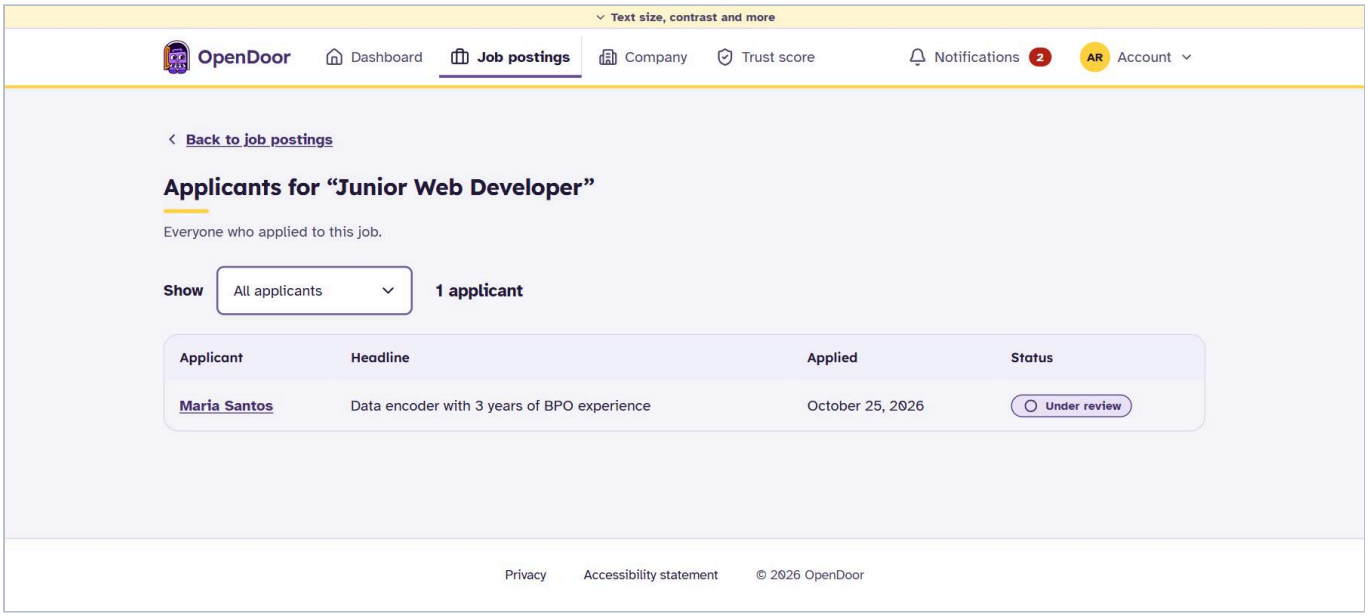

- Open an application

MESSAGES AND STATES

- "No applicants yet"

API

`GET /applications?job_posting_id=&status=&page=`

Screenshot `/employer/jobs/3/applicants`

5.6 Application review

Route	`/employer/applications/{id}`
Who	Employer (applications to own postings)
Purpose	Read one application, move it through the stages and report the hire. Opening a Submitted application marks it Under review and tells the job seeker.

ON THE SCREEN

- "‹ Back to applicants"; h1 applicant name; stage badge and "Applied for {job} on {date}"
- Warning "Interview accommodation requested" with the request
- "Accommodations this applicant needs": badges "offered in your posting" (✓) or "not listed in your posting" (⚠)
- Cards "Cover note" and "About the applicant": Skills, Highest education, Years of experience, Work experience, Disability (only when shared), "Open the résumé (PDF, opens in a new tab)"
- "Hiring confirmation" NEW: "Did you hire this applicant? Report it here with the start date. The applicant confirms it before the application shows Hired." with "Report hiring", then the waiting report and the "History"
- "Shortlist", "Mark as contacted" and "Not selected" (danger outline) NEW; hint "Each step asks you to confirm and cannot be undone; “Not selected” is final. The applicant is notified."

ACTIONS

- Shortlist → "Add this applicant to your shortlist?"
- Mark as contacted → "Use this once you have reached out about the next steps… When you hire them, use “Report hiring”."
- Not selected → danger confirm: final, an open hiring report is cancelled
- Report hiring → start date → "Reported. We asked the applicant to confirm it."

MESSAGES AND STATES

- "The applicant is on your shortlist." / "…marked as contacted." / "…marked as not selected."
- Job closed: "This job is closed. The application keeps its stage, and you can still report a hire."

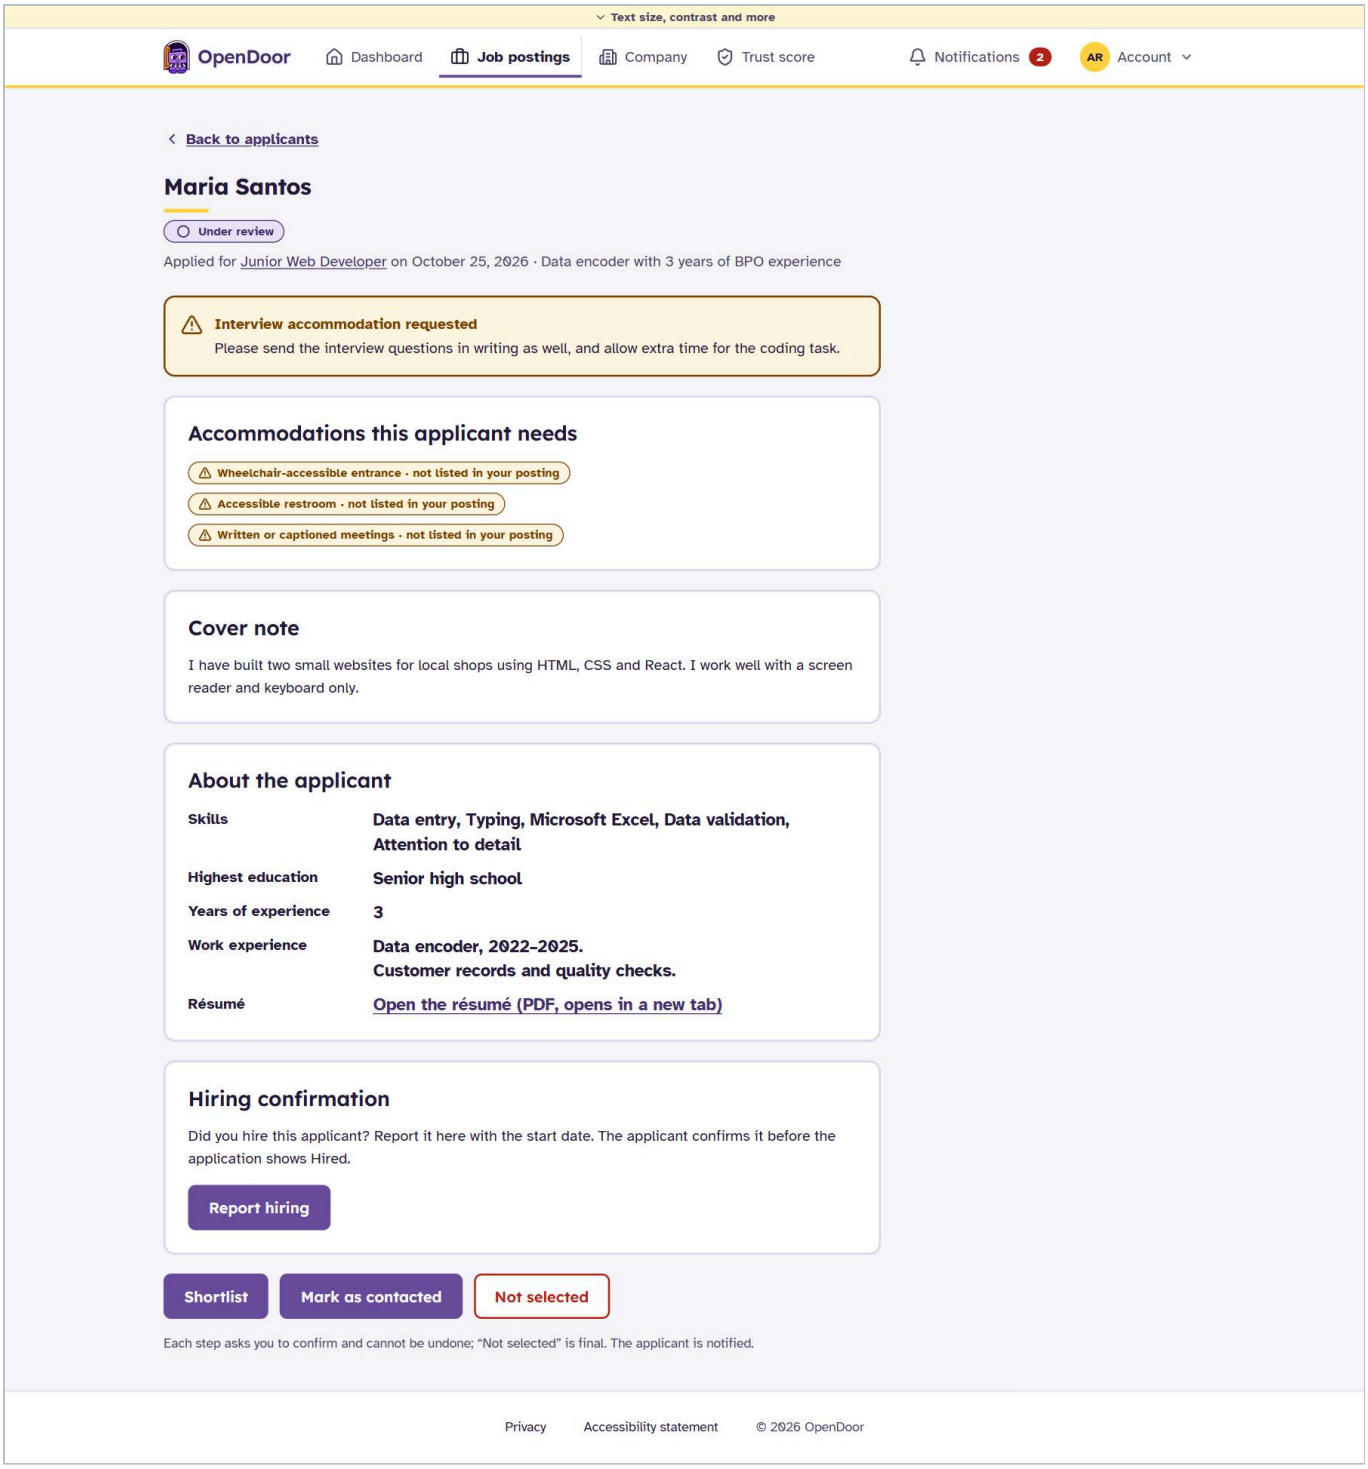

API

`GET /applications/{id}`

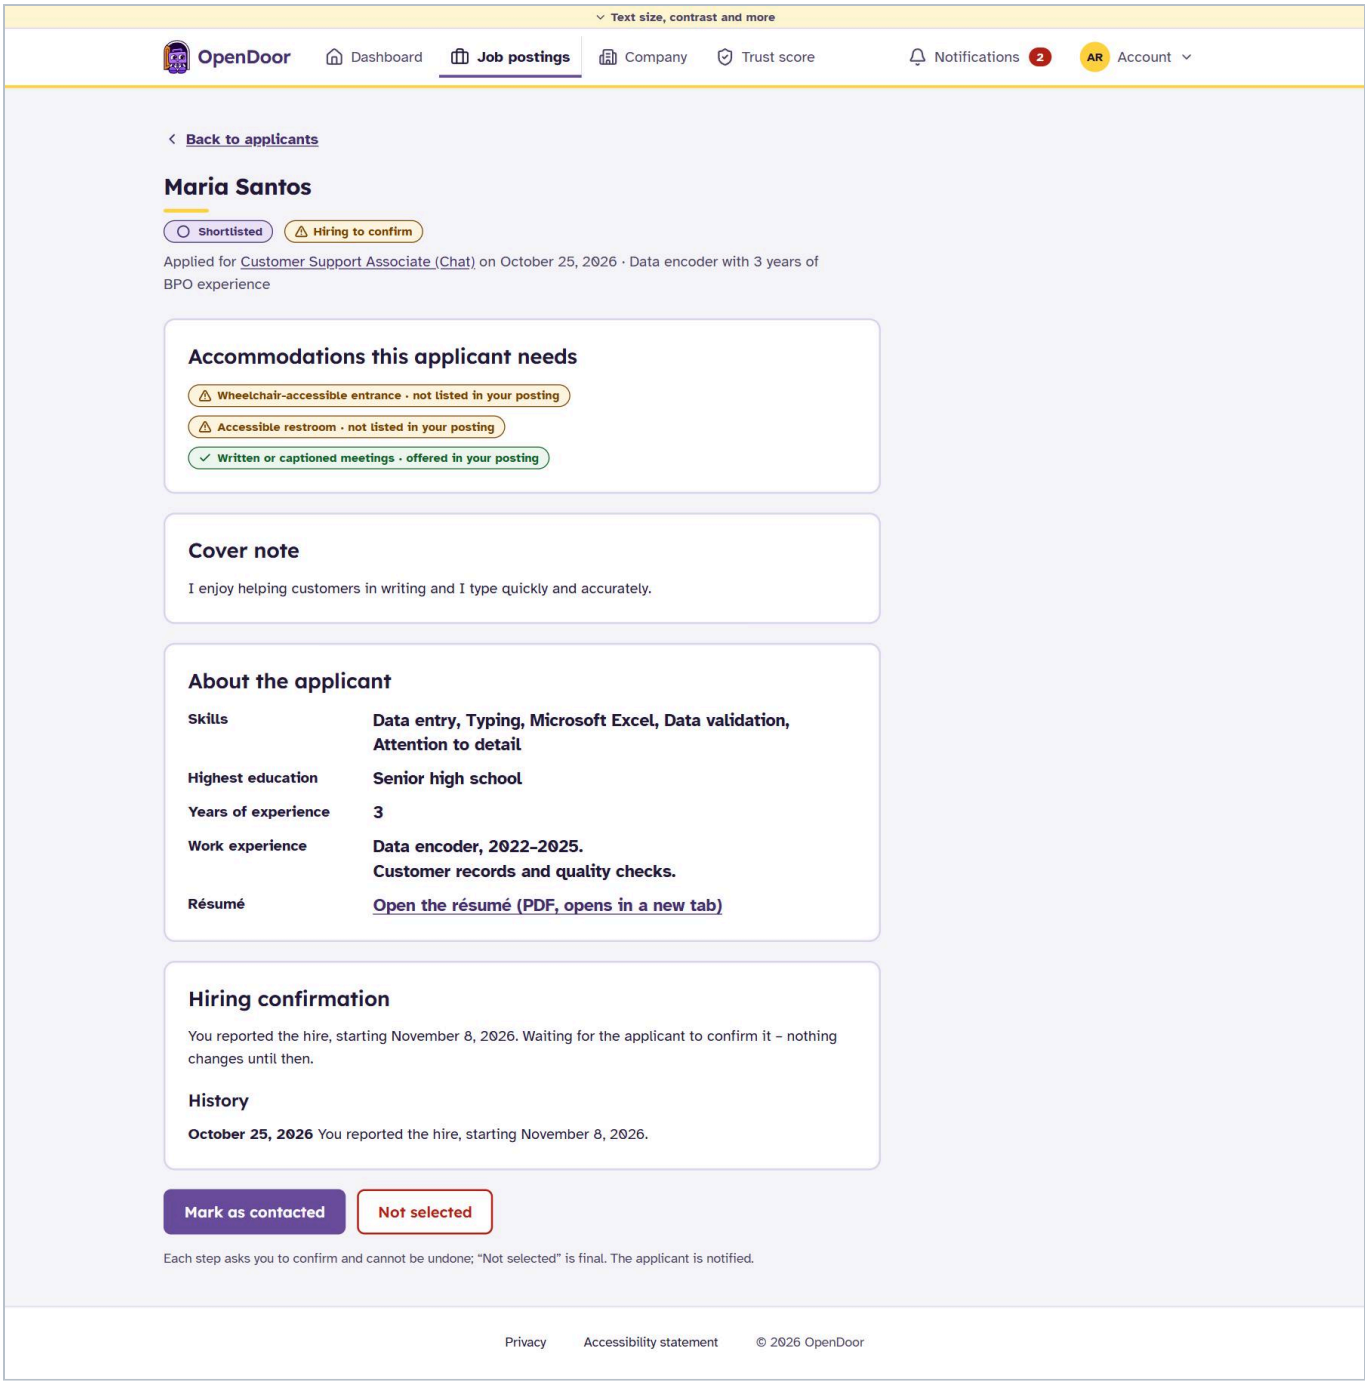

`PATCH /applications/{id}/status {shortlisted|contacted|rejected}`

`POST /applications/{id}/hiring-reports {start_date}`

`POST /applications/{id}/hiring-reports/{report}/response`

Screenshot `/employer/applications/7`

After "Report hiring": waiting for the applicant `/employer/applications/8`

5.7 Trust score

Route	`/employer/trust-score`
Who	Employer
Purpose	The employer's own score: totals and per-accommodation counts, never individual answers.

ON THE SCREEN

- Subtitle "Whether you keep your accommodation promises."
- Card "Your trust score" and info "How it works – Hired employees rate each promised accommodation 30 days after their confirmed start date. Partly delivered counts as half. Answers are anonymous. A score is shown from 3 responses."
- Table "Each accommodation" (Delivered / Partly / Not delivered) and "Tip: keep your job postings accurate to keep your score high."

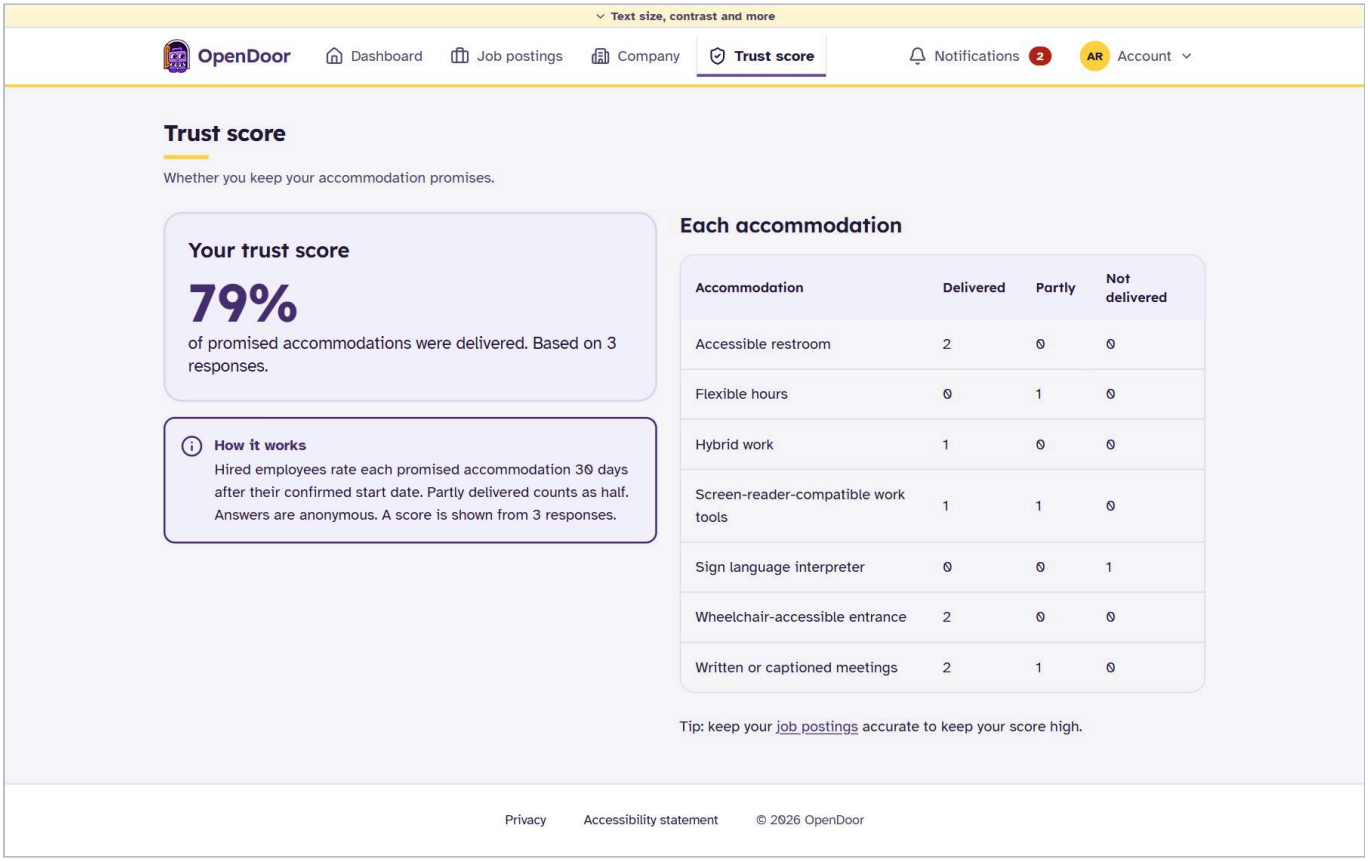

MESSAGES AND STATES

- "Your trust score could not be loaded" (e.g. no company yet)

API

`GET /employer/company`

`GET /employers/{id}/trust-score`

Screenshot `/employer/trust-score`

6 Administrator screens

Demo: OpenDoor Admin (`admin@opendoor.test`). Menu: Dashboard · Employers · Postings · Users · Reports · Feedback · Data | Account. Administrators receive no notifications, so the header has no Notifications link.

6.1 Administration dashboard

Route	`/admin/dashboard`
Who	Administrator
Purpose	Work queues, platform numbers and how hiring is going.

ON THE SCREEN

- h1 "Administration", subtitle "Work queues, platform numbers and how hiring is going."
- "Waiting for you": Employers to verify, Open reports – each with "Open queue"
- Charts (NEW), each with "Show as a table": "Activity per week" (applications, confirmed hires, new accounts over 12 weeks), "Applications per stage" (how far applications get; a skipped stage counts as passed), "Ratings of promised accommodations" (delivered, partly, not delivered) and "Most needed accommodations and how many open jobs offer them"
- "Users", "Job postings" and "Verification after hire" tiles; "Manage categories and accommodation types"

ACTIONS

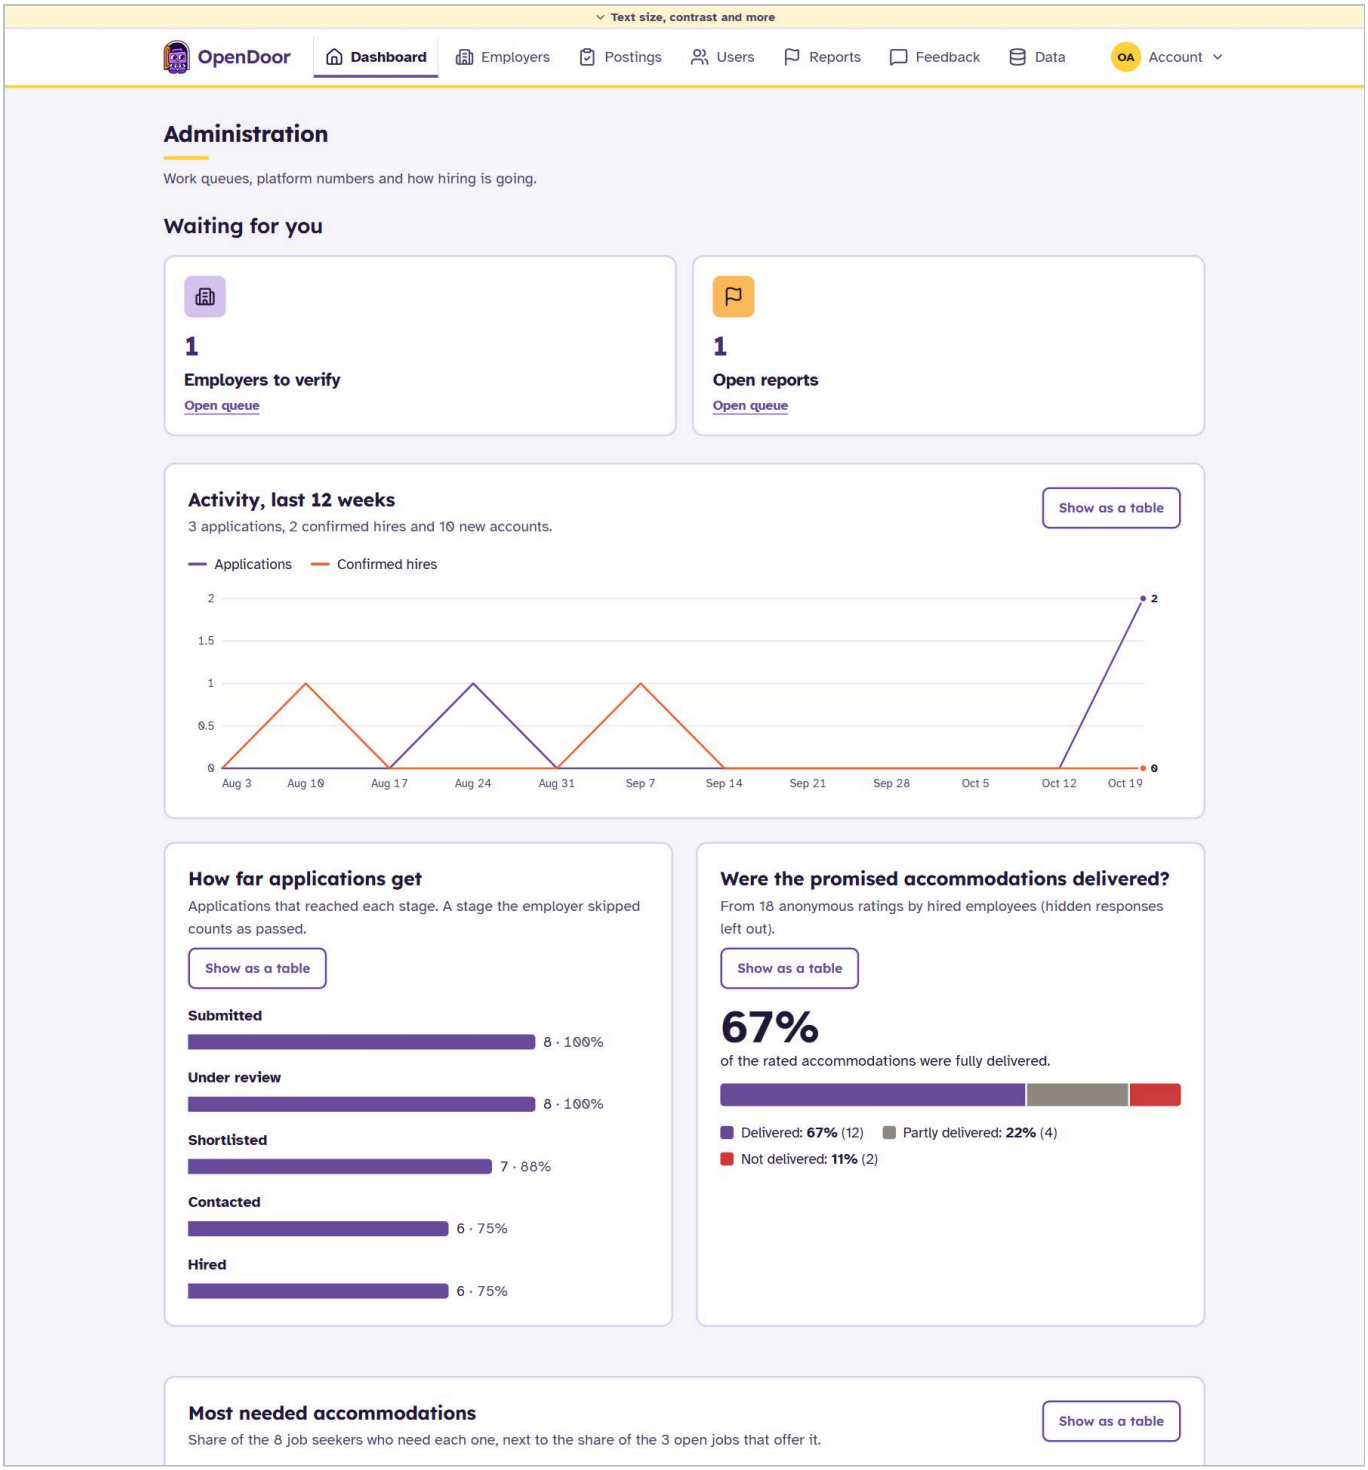

- Open a queue or a filtered list
- Show a chart as a table

MESSAGES AND STATES

- "No ratings yet. Hired employees can rate 30 days after their start date."

API

`GET /admin/dashboard (with analytics)`

Screenshot – part 1 of 2 `/admin/dashboard`

Screenshot – part 2 of 2 `/admin/dashboard`

6.2 Employers

Route	`/admin/employers`
Who	Administrator
Purpose	Verification queue and company list.

ON THE SCREEN

- Subtitle by status (e.g. "Companies waiting to be verified.")
- Filter row: "Show" (Waiting for verification – default, Verified, Not approved), "Company or registration number", "Search"; count
- Table: Company (link) · Registration · Latest registry check · Account (email)

ACTIONS

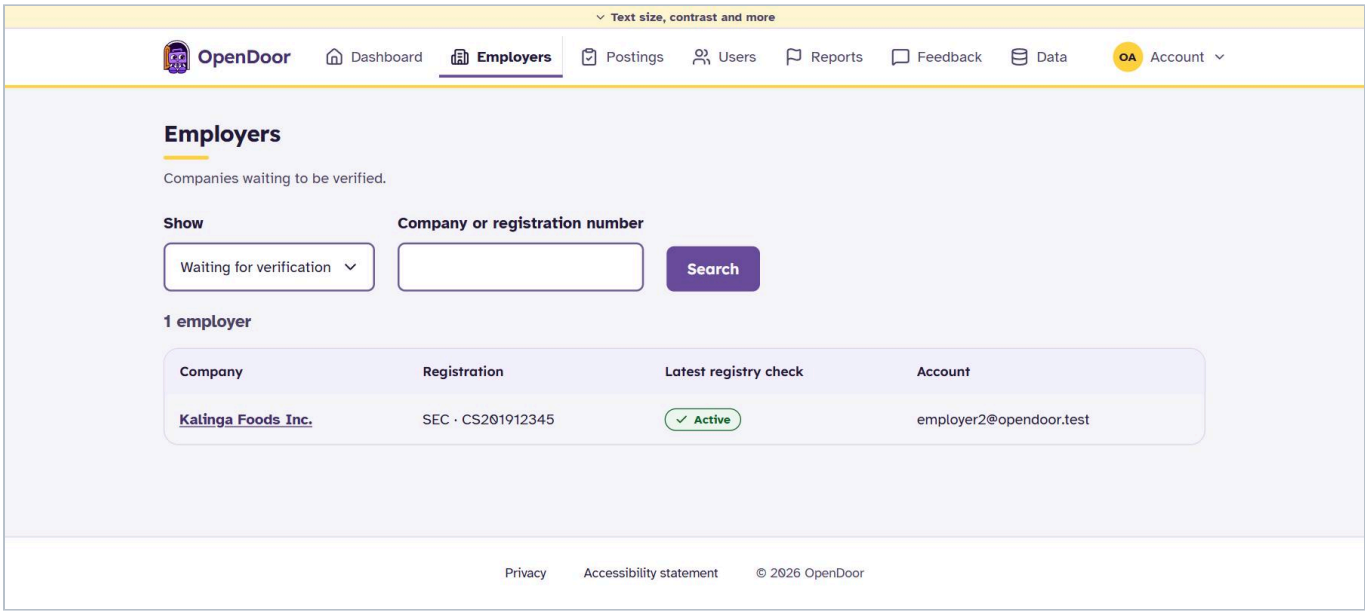

- Open an employer

MESSAGES AND STATES

- "No employers here"

API

`GET /admin/employers?status=&q=&page=`

Screenshot `/admin/employers`

6.3 Employer verification

Route	`/admin/employers/{id}`
Who	Administrator
Purpose	Check the registration with the (simulated) DTI/SEC SOAP registry, then decide.

ON THE SCREEN

- "‹ Back to employers"; h1 company; status badge
- Card "Company" (Registered with, Number, Industry, Address, Account) and card "Business registry result" (status badge – Active, Expired, Cancelled, Not found, Check failed; Registered name, Name match %, Checked; warning when not active or the name matches less than 80%)
- "Check with the business registry" (again); info "You decide – The registry result is advice only. Approving lets this company post jobs."
- "Approve" and "Do not approve", or "Remove verification" when verified

ACTIONS

- Check → "The registry check is done."
- Approve → confirm; the company can now publish and its published jobs become visible
- Do not approve / Remove verification → reason dialog "Reason shown to the employer" → employer notified

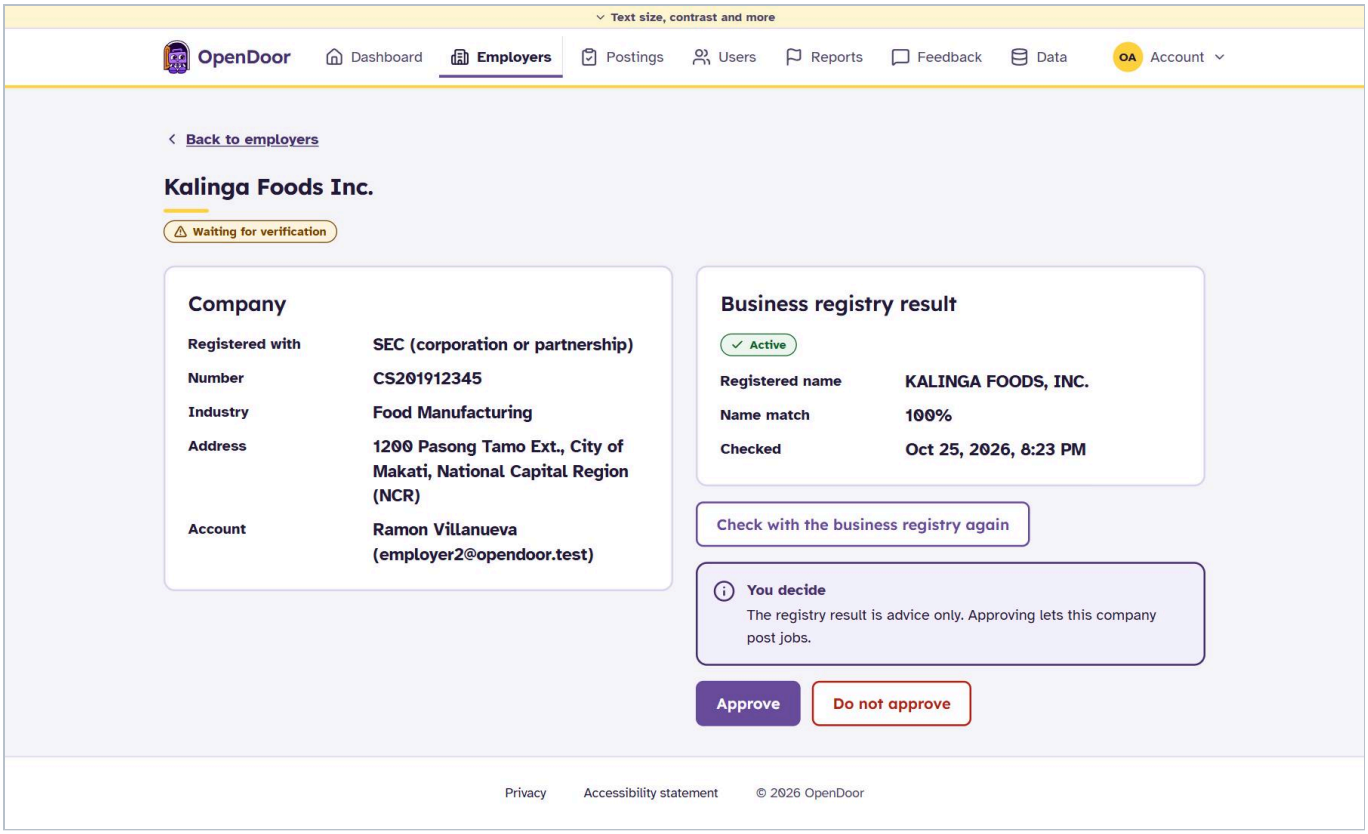

MESSAGES AND STATES

- "This employer has not been checked against the business registry yet."
- "The business registry did not respond. You can try again later or decide manually."

API

`GET /admin/employers/{id}`

`PATCH /admin/employers/{id}/verify {action: check|approve|reject, reason}`

Screenshot `/admin/employers/2`

6.4 Postings

Route	`/admin/job-postings`
Who	Administrator
Purpose	See every posting and remove any that breaks the rules – there is no approval step NEW.

ON THE SCREEN

- h1 "Postings", subtitle "Jobs of verified companies go live without approval. Remove any posting that breaks the rules."
- Filter "Show" (All postings or one status) with the count
- Posting cards: title, company + status badge, details line, box "Description and accommodations"
- "Remove" (danger outline) on every posting

ACTIONS

- Remove → "Remove “…”?" with the required "Reason shown to the employer" → "“…” was removed. The employer was told why." Applications are kept.

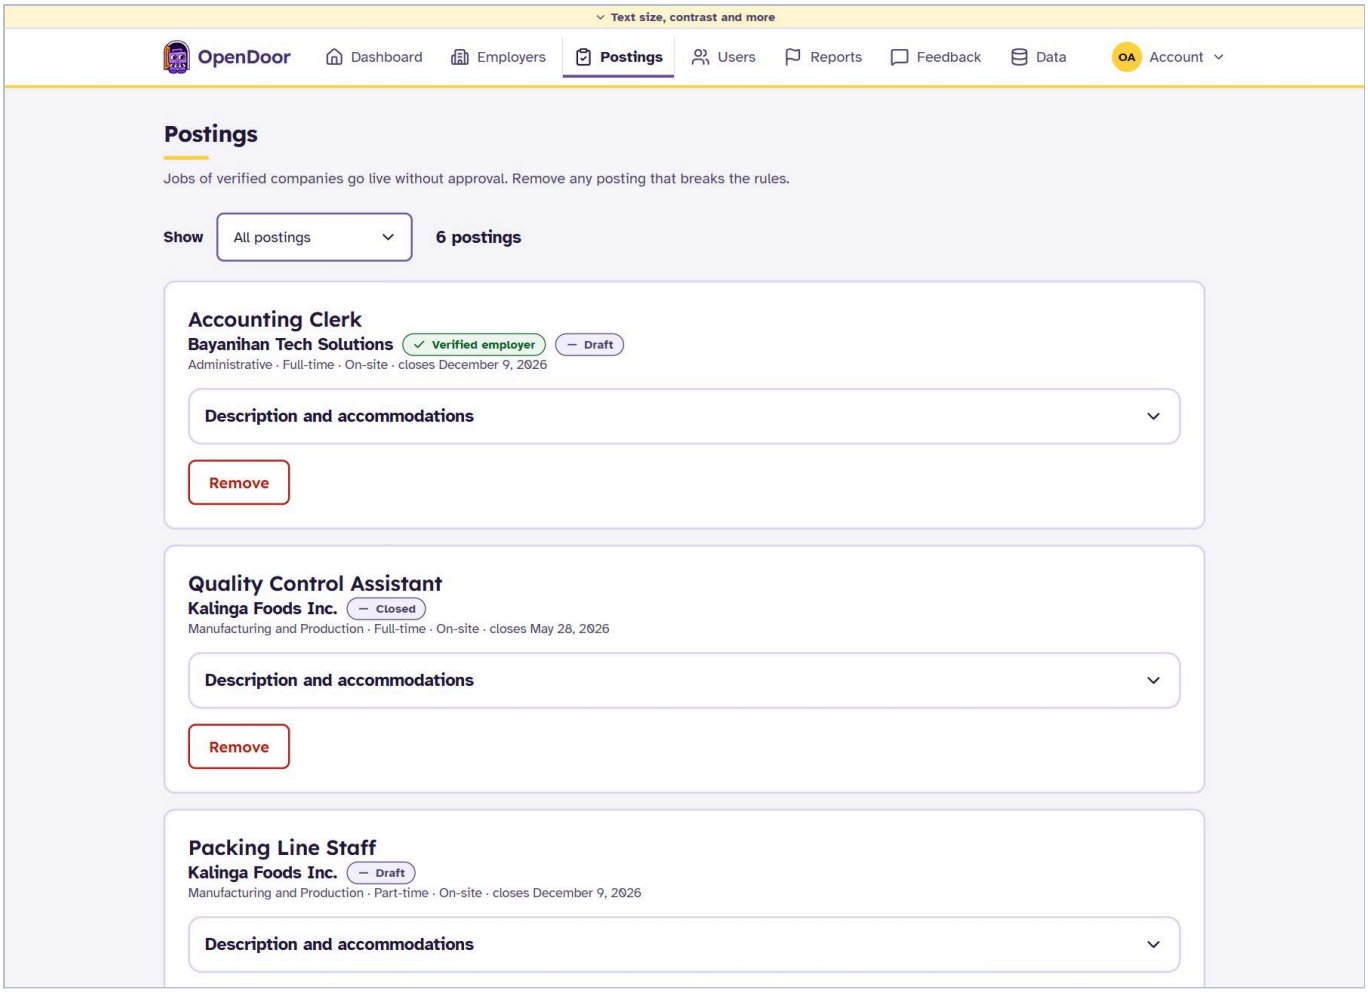

MESSAGES AND STATES

- "No postings here"

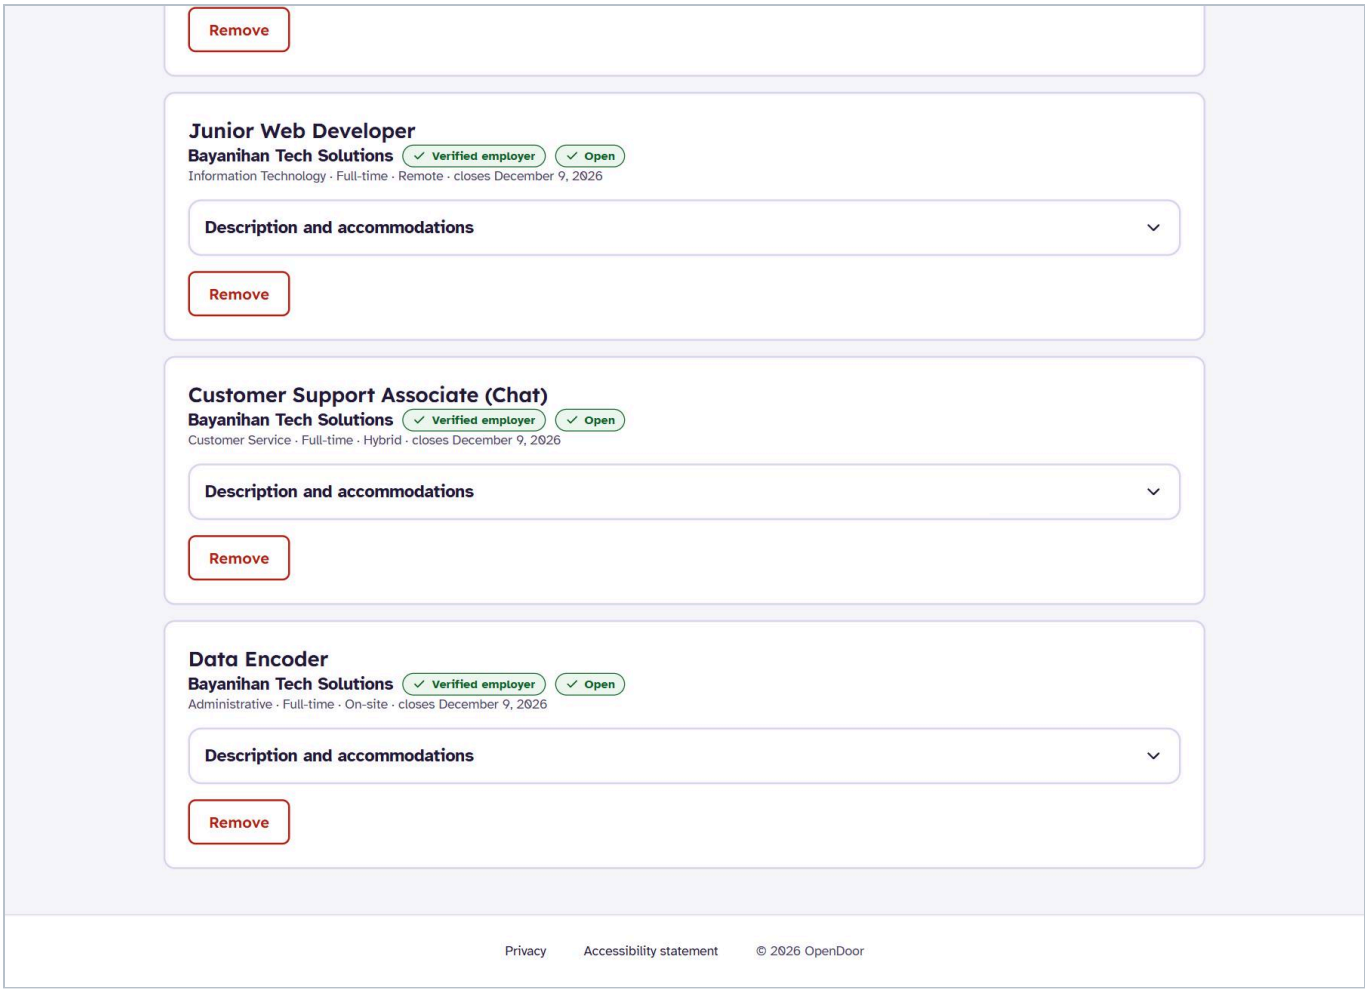

API

`GET /admin/job-postings?status=&page=`

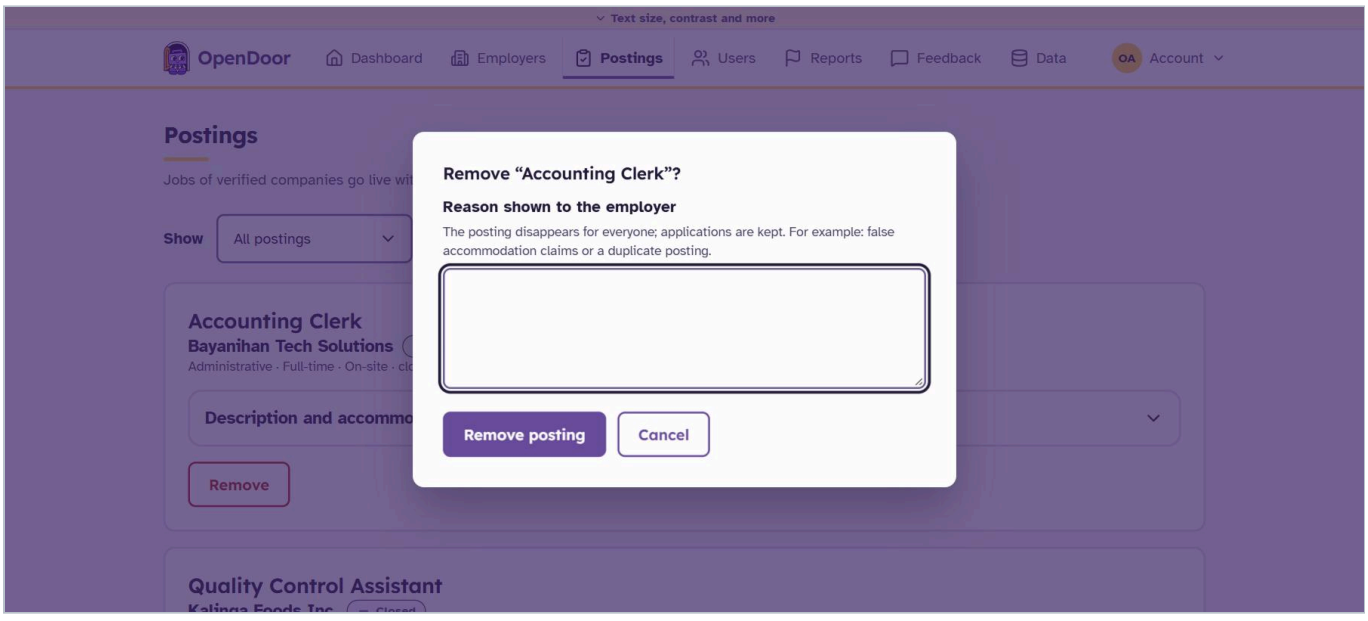

`DELETE /admin/job-postings/{id} {reason}`

Screenshot – part 1 of 2 `/admin/job-postings`

Screenshot – part 2 of 2 `/admin/job-postings`

"Remove" reason dialog `/admin/job-postings`

6.5 Users

Route	`/admin/users`
Who	Administrator
Purpose	Find accounts; suspend or reactivate them.

ON THE SCREEN

- Subtitle "Find accounts. Suspend or reactivate them."
- Filter row: Role, "Name or email", "Search"; count
- Table: Name · Email · Role · Status · Action ("Suspend" / "Reactivate"; own row says "This is you")

ACTIONS

- Suspend → danger confirm: signed out on every device, cannot log in; an employer's postings are hidden while suspended
- Reactivate → confirm; employer postings are shown again

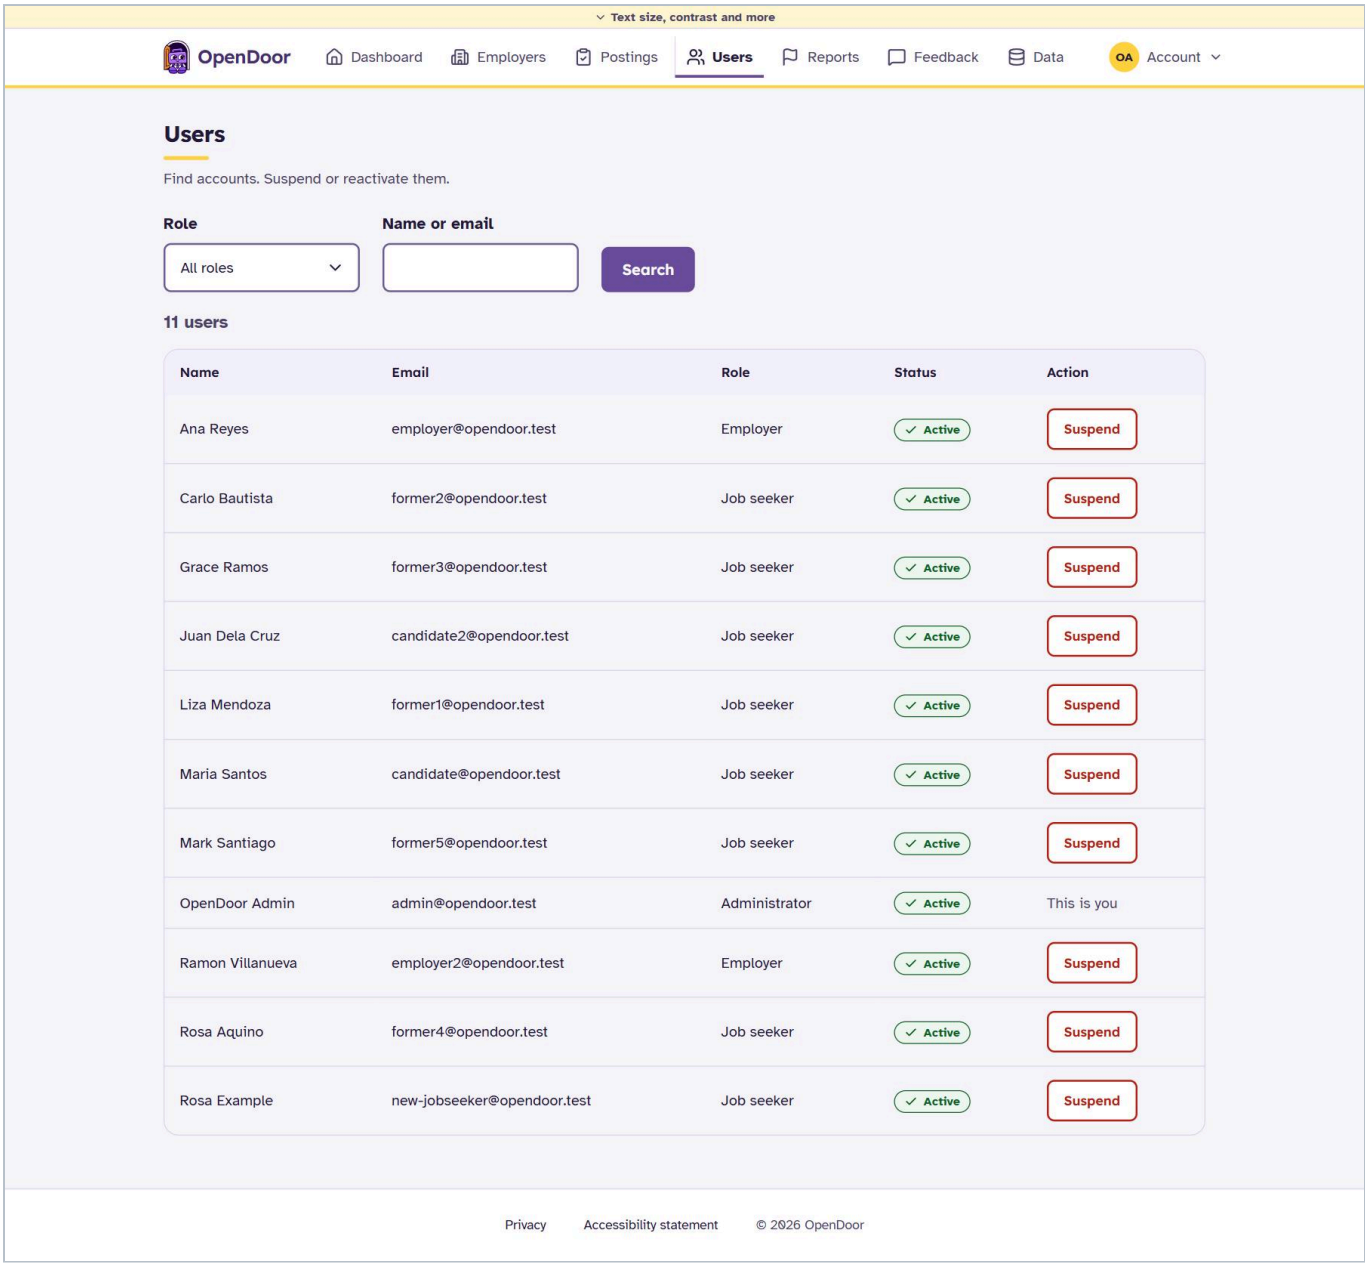

MESSAGES AND STATES

- "No users found"

API

`GET /admin/users?role=&q=&page=`

`PATCH /admin/users/{id}/suspend {suspended}`

Screenshot `/admin/users`

6.6 Reports

Route	`/admin/reports`
Who	Administrator
Purpose	Postings reported by job seekers.

ON THE SCREEN

- Subtitle "Postings that job seekers reported."
- Filter "Show" (Open – default, oldest first; Dismissed; Action taken) with the count
- Report cards: posting title, "company · Reported {date} · status badge", the reason as a quote; resolved cards add the date and note
- "Dismiss" and "Take action" on open reports

ACTIONS

- Dismiss / Take action → dialog with an optional "Note" → "The report was dismissed." / "...marked as actioned."

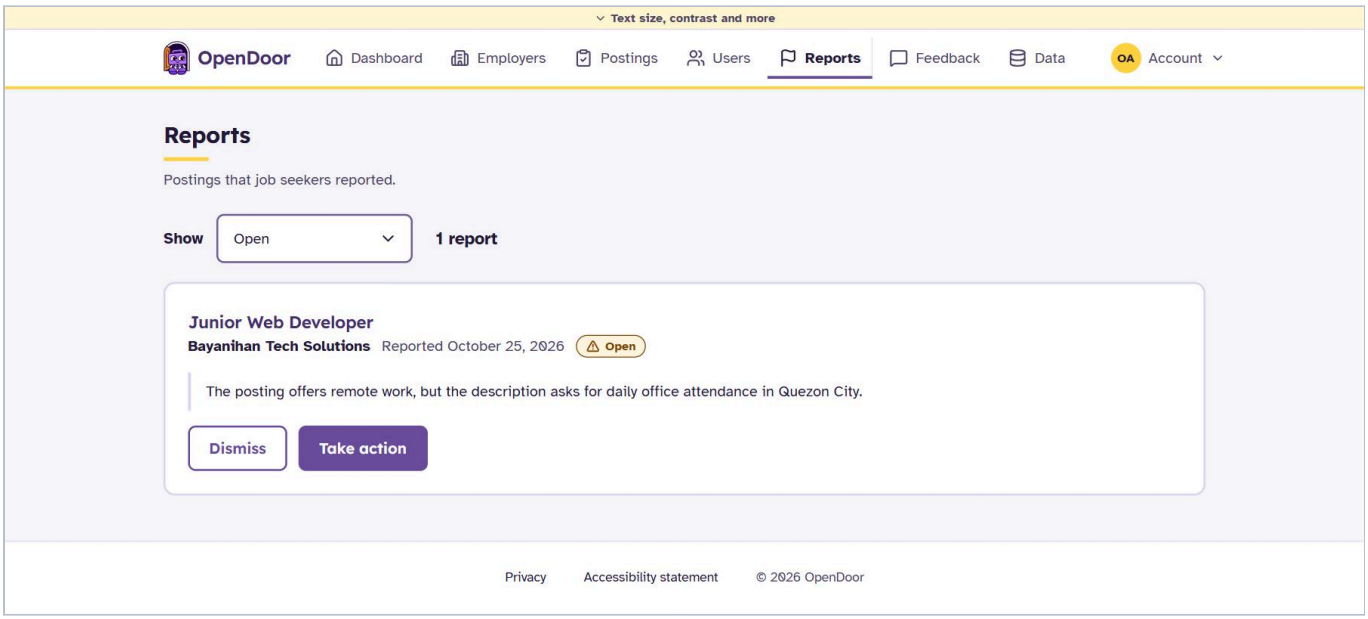

MESSAGES AND STATES

- "No reports here"

API

`GET /admin/reports?status=&page=`

`PATCH /admin/reports/{id} {status, note}`

Screenshot `/admin/reports`

6.7 Feedback

Route	`/admin/feedback`
Who	Administrator
Purpose	Moderate the anonymous ratings behind the trust scores.

ON THE SCREEN

- h1 "Feedback", subtitle "Moderate the anonymous ratings behind trust scores."
- Info "Hide only abusive, off-topic or clearly false responses. – The trust score is recalculated."
- "Show": All responses, Counted in the score, Hidden; count
- Cards: "{company} – {job}", "Submitted {date}", ratings as tags, comment quote, "Hide response" / "Show again"

ACTIONS

- Hide (danger confirm) / Show again → the employer's trust score is recalculated

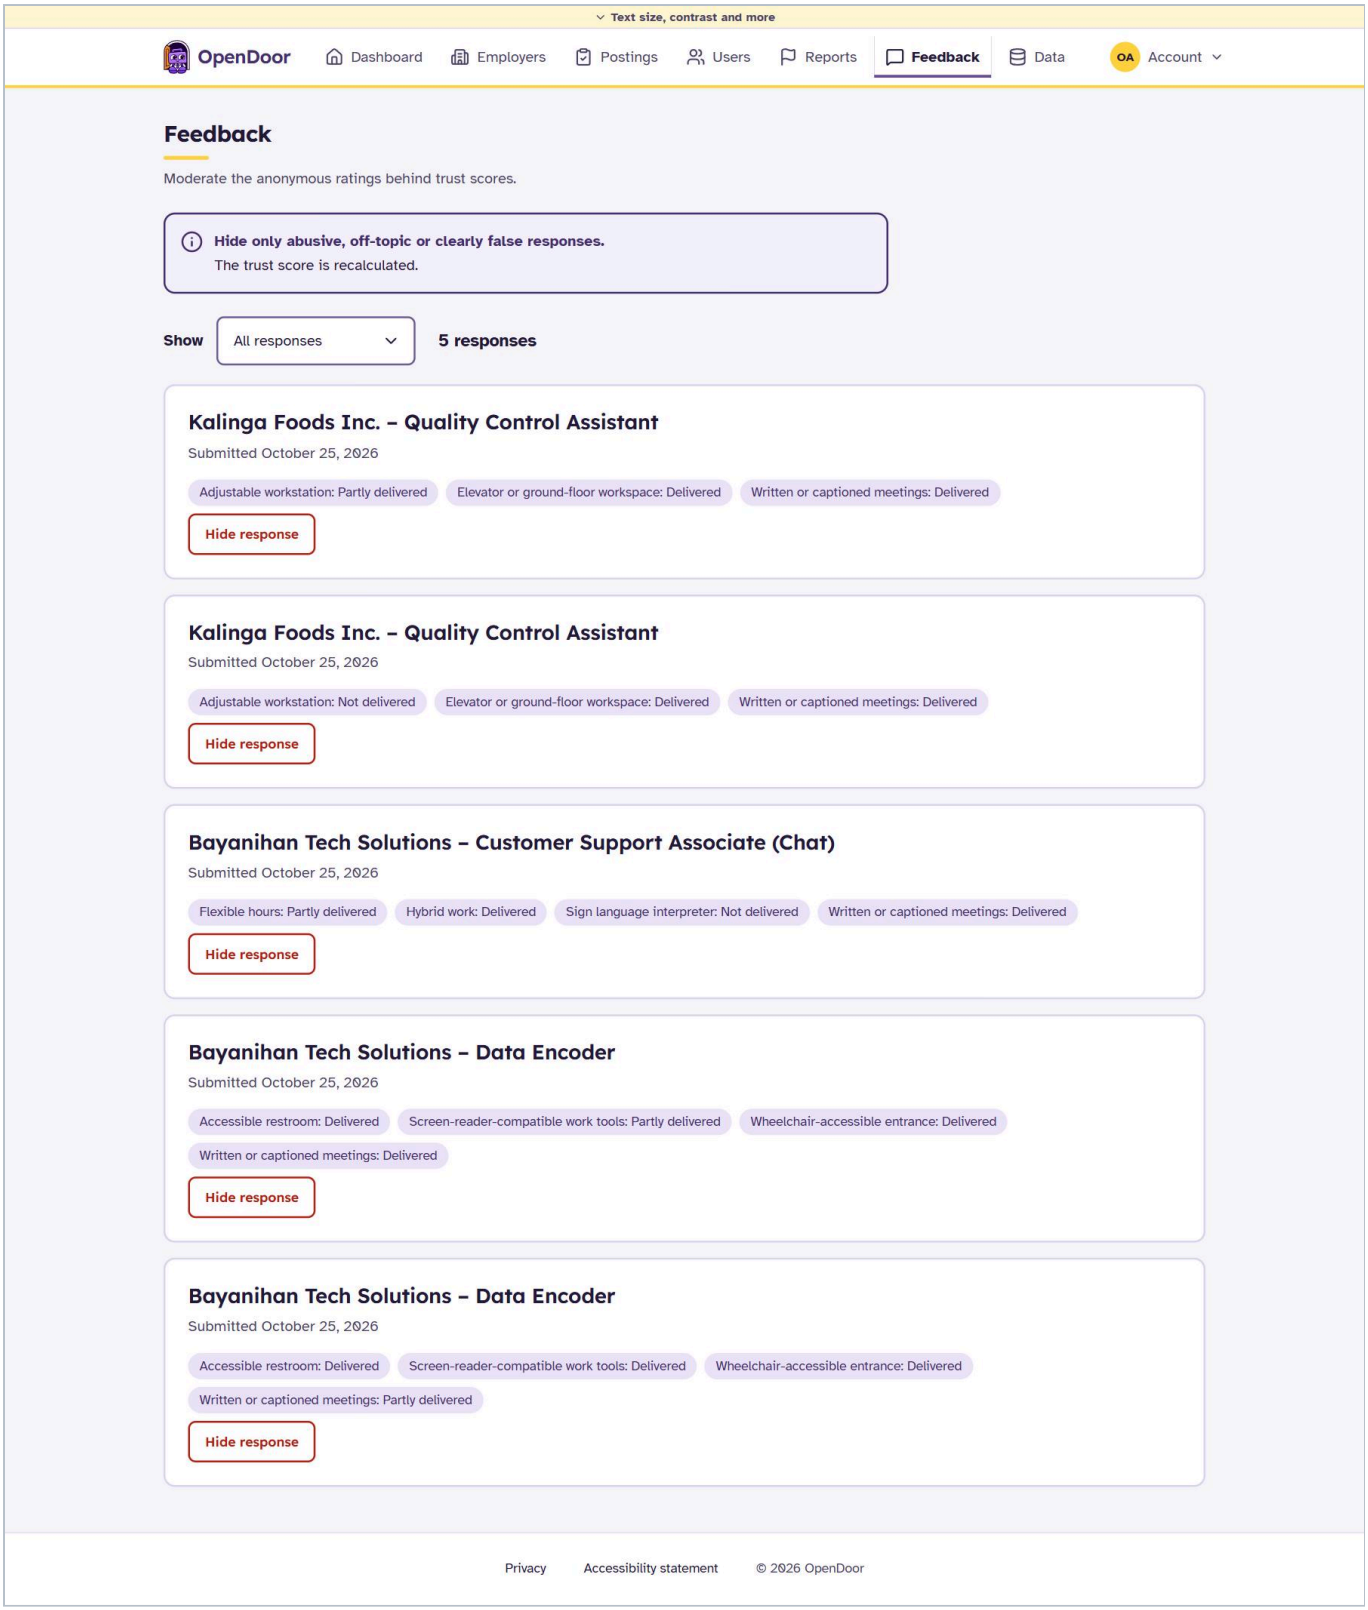

MESSAGES AND STATES

- "No feedback responses here"

API

`GET /admin/feedback?hidden=&page=`

`PATCH /admin/feedback/{id}/hide {hidden}`

Screenshot `/admin/feedback`

6.8 Master data

Route	`/admin/master-data`
Who	Administrator
Purpose	Job categories and accommodation types used everywhere in the forms.

ON THE SCREEN

- Card "Job categories": table Name · Actions ("Rename", "Delete"); "New category" and "Add category"
- Card "Accommodation types": Name – description · Group · Status (In use / Retired) · Actions (Edit, Delete or Restore); "Add accommodation type"

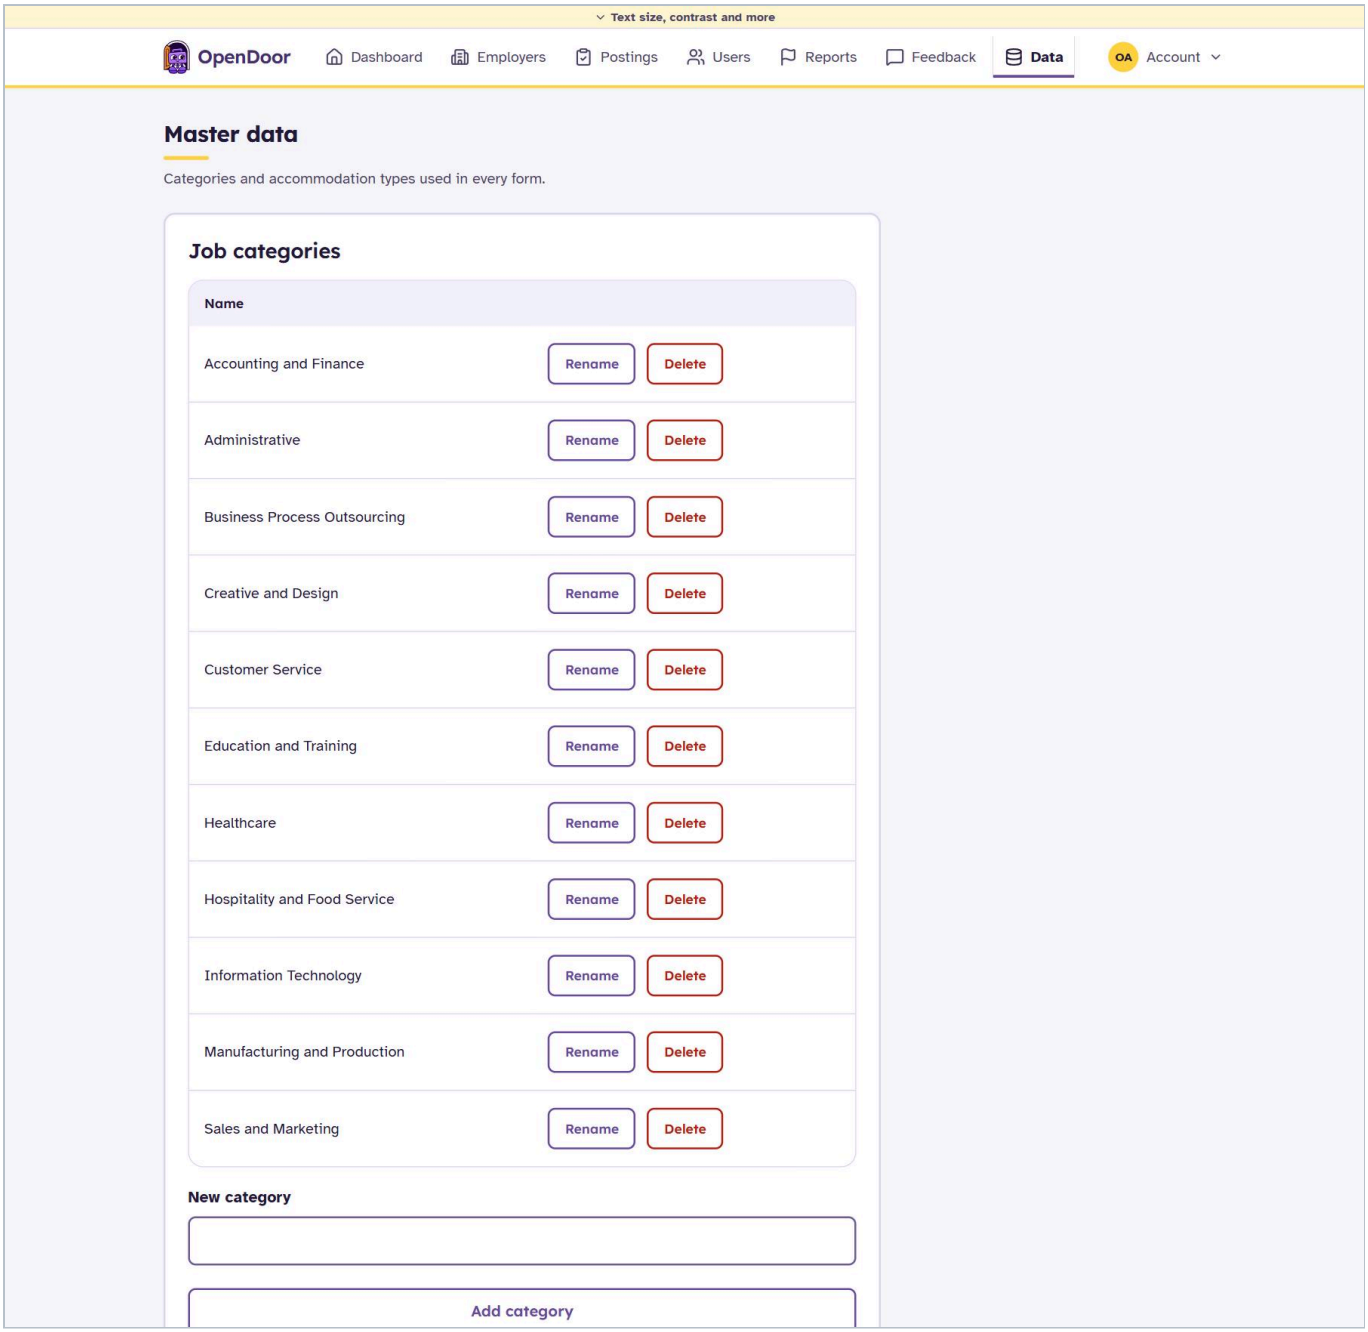

ACTIONS

- Delete a category in use → refused: "Categories used by job postings cannot be deleted. Rename them instead."
- Delete an accommodation in use → retired instead; Restore makes it available again

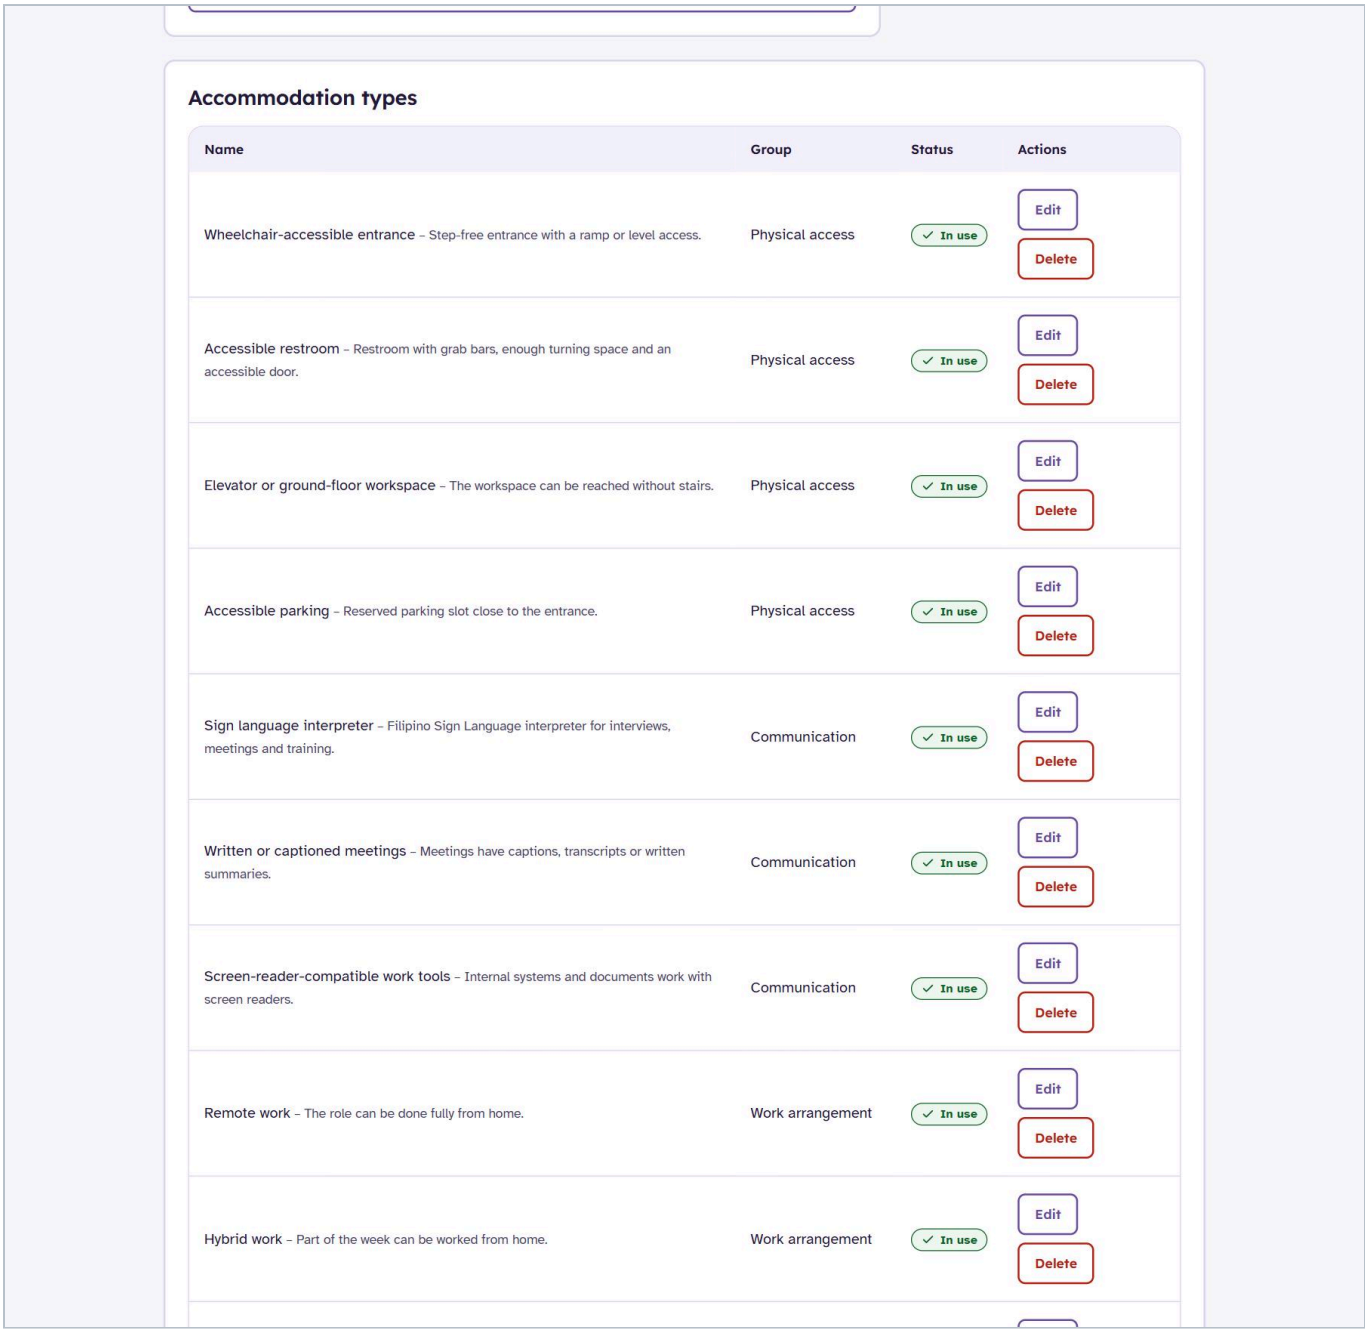

API

`GET /categories, POST/PUT/DELETE /admin/categories`

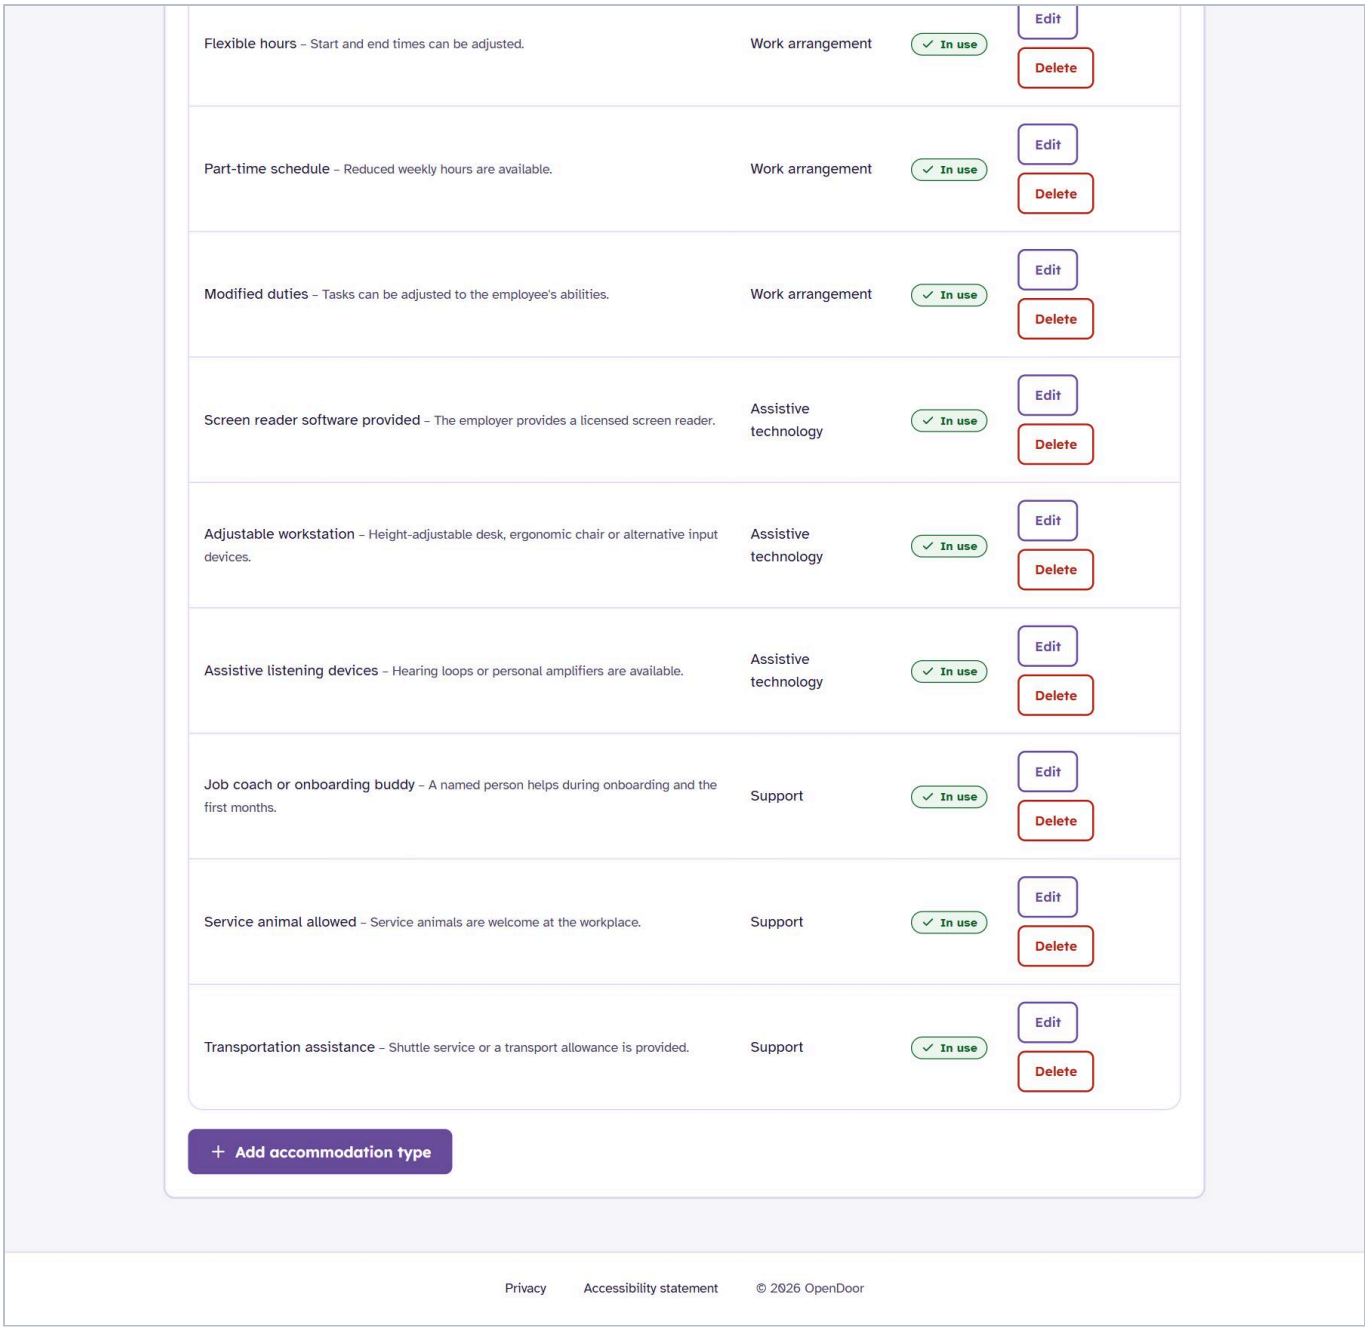

`GET/POST /admin/accommodations, PUT/DELETE /admin/accommodations/{id}`

Screenshot – part 1 of 3 `/admin/master-data`

Screenshot – part 2 of 3 `/admin/master-data`

Screenshot – part 3 of 3 `/admin/master-data`

7 Screens for every signed-in user

Reached from the header: the Notifications link (job seekers and employers) and the Account menu.

7.1 Notifications

Route	`/notifications`
Who	Job seeker, Employer
Purpose	In-app notices, newest first (12 per page).

ON THE SCREEN

- Subtitle "Updates about your applications and postings."
- "N unread notifications" / "Everything is read." and "Mark all as read"
- Each notice is a card: unread ones are tinted with a "New" badge; the message links to the related page; date and time; "Mark as read"
- Each notice is also emailed unless the user turned emails off in Account (section 9)

ACTIONS

- Open a notice → its page, and it is marked read
- Mark all as read → "All notifications are marked as read."

MESSAGES AND STATES

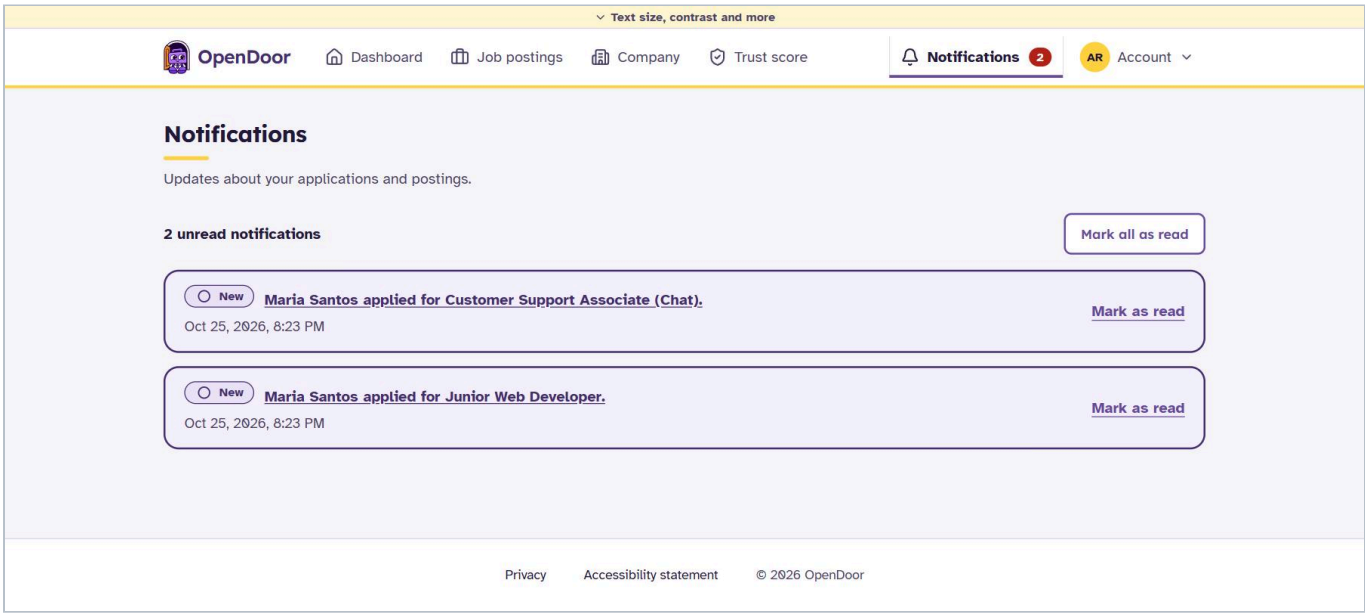

- "No notifications yet – You will be told here when an application or posting changes."

API

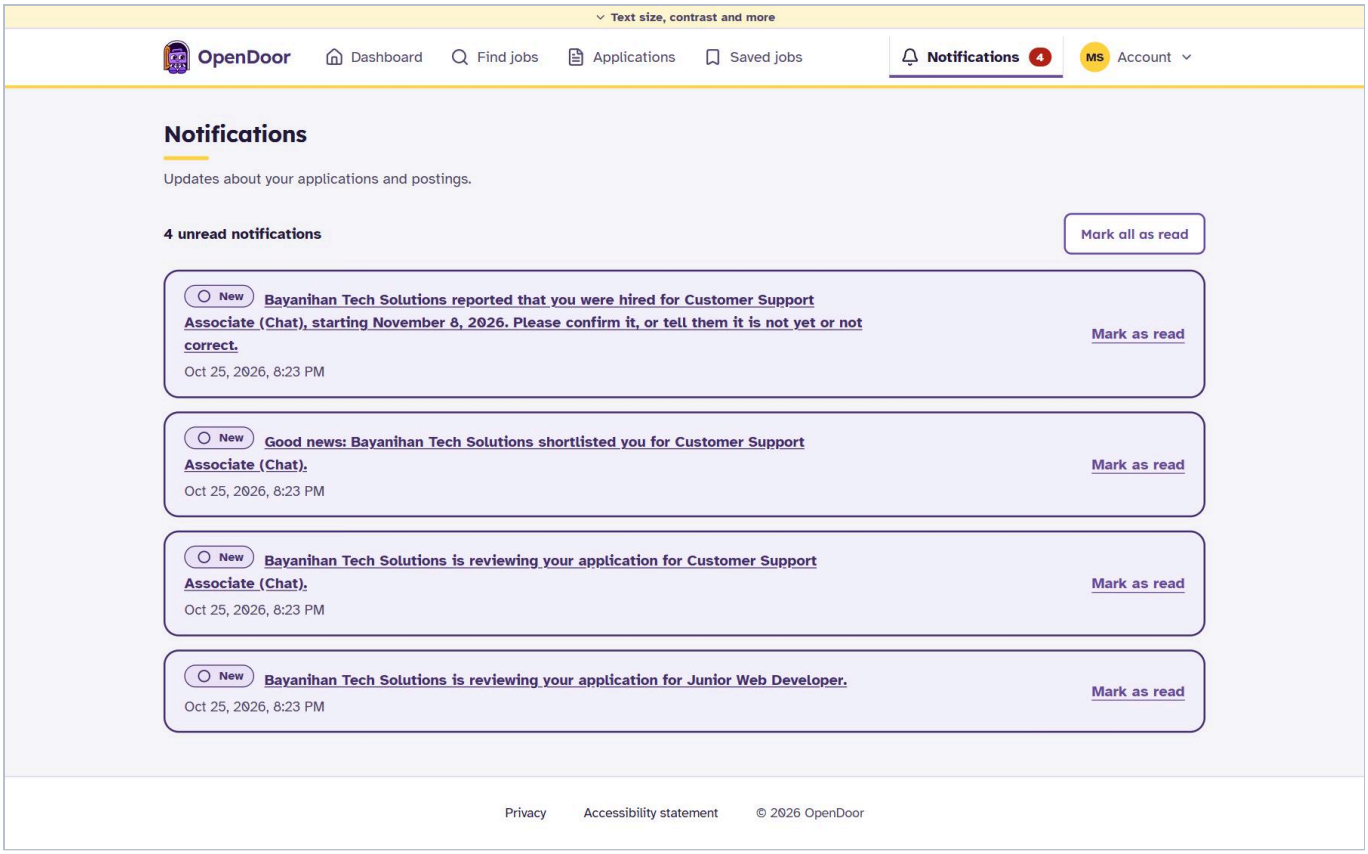

`GET /notifications?page=`

`PATCH /notifications/{id}/read`

`PATCH /notifications/read-all`

Employer `/notifications`

Job seeker `/notifications`

7.2 Account

Route	`/account (?tab=password, ?tab=email, ?tab=onboarding)`
Who	All signed-in users
Purpose	Display settings, password, email notifications and onboarding.

ON THE SCREEN

- h1 "Account", subtitle "{name} · {email} · {role}"; tabs "Display", "Password", "Email notifications" and "Getting started" (the last two not for administrators)
- Display: "Changes apply right away and are saved to your account. Decoration and the top menu are kept on this device only."; Text size (Standard, Large (125%), Extra large (150%)), Colours (Standard colours, High contrast), Motion (Allow animations, Reduce motion), Decoration (Show sparkles and colours, Quiet: plain and calm), Top menu (Show all links, Compact: one Menu button)
- Password: "Change password" – Current password, New password, Confirm new password
- Getting started: "Show the “Get started” list on my dashboard", "The welcome tour shows you, page by page, where everything is." with "Show the welcome tour" (or "Continue the welcome tour")
- Email notifications: checkbox "Send me an email for each notification" and an "Example email" preview

ACTIONS

- A display change applies at once and is saved to the account
- "Email notifications are on." / "Email notifications are off. You still see every notice under Notifications."
- "The “Get started” list is on your dashboard until every step is done." / "…is hidden."
- Change password → "Your password is changed." and "You were signed out on your other devices."

MESSAGES AND STATES

- "Display settings applied on this device, but not saved to your account. Change a setting to try again."
- "Your choice was not saved. Please try again."

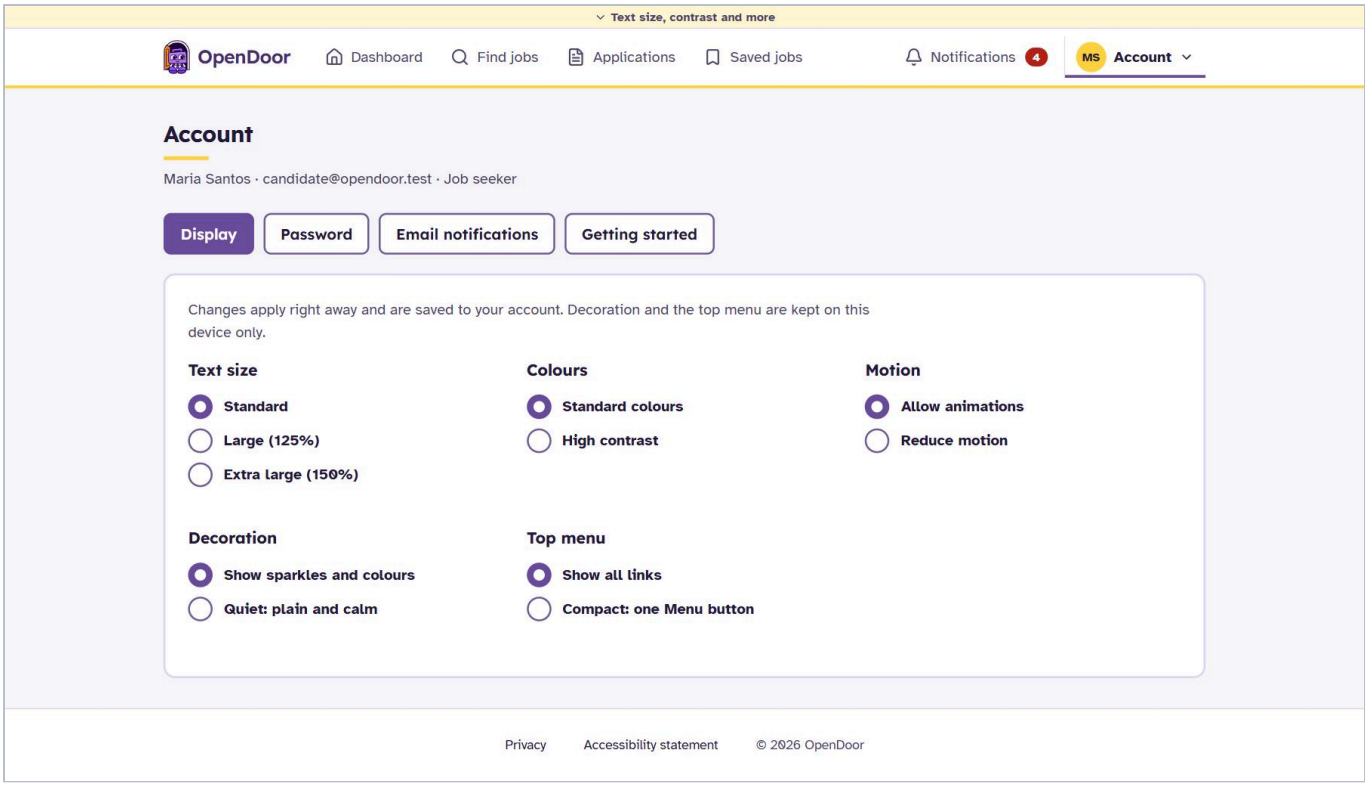

API

`PUT /me/display-prefs {text_size, contrast, motion}`

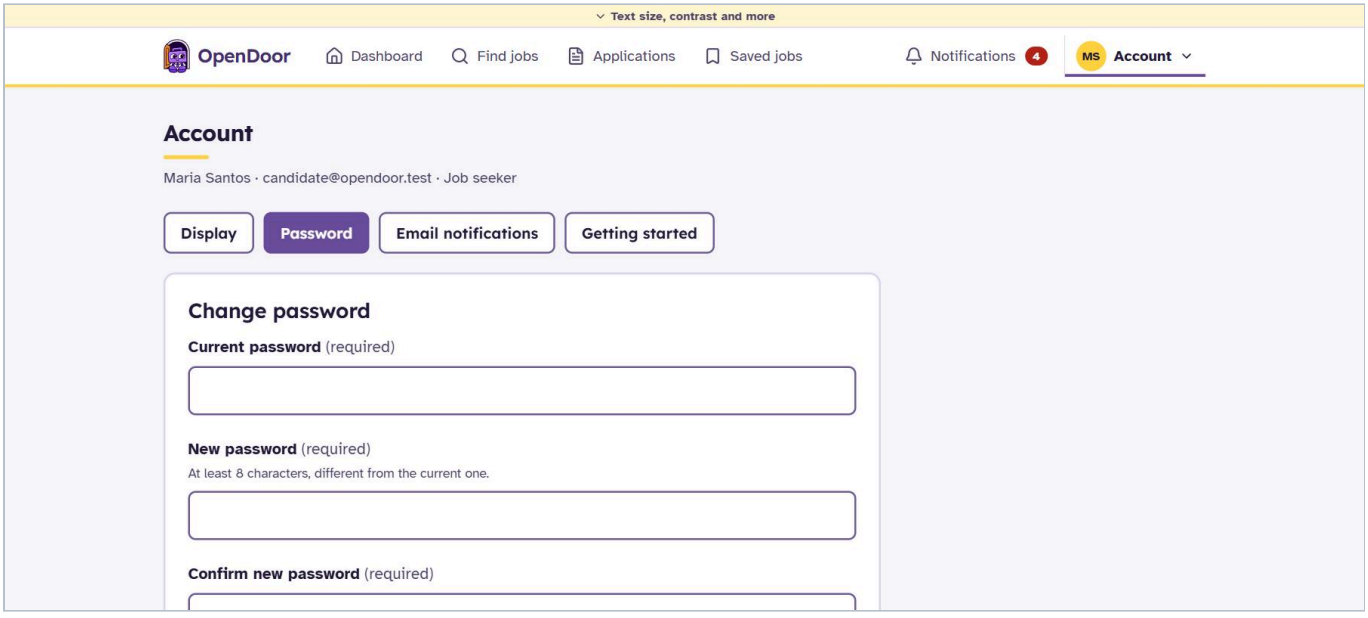

`PUT /me/email-notifications {enabled}`

`PATCH /me/onboarding {tour_done, checklist_hidden}`

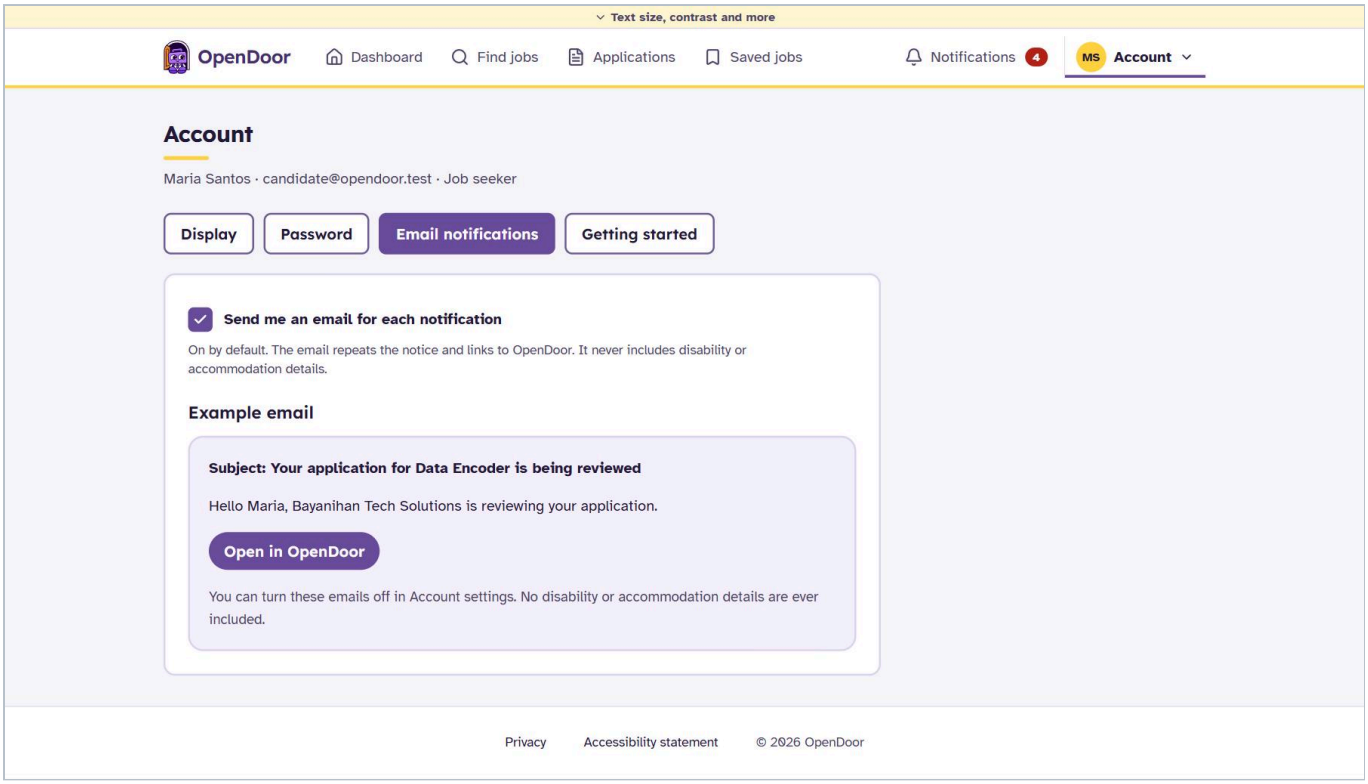

`PUT /me/password`

Tab "Display" `/account`

Tab "Password" `/account?tab=password`

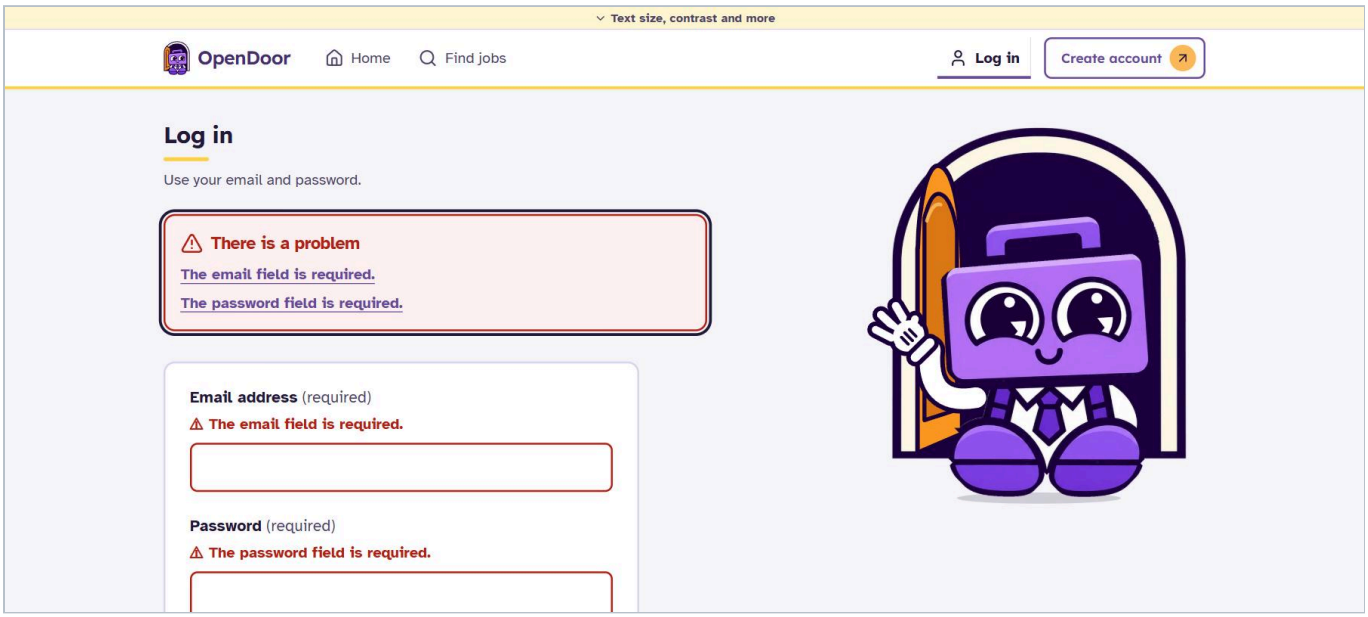

Tab "Email notifications" with the example email `/account?tab=email`

8 Dialogs, states and phone layout

Patterns the new UI must keep. Most of them already appear on the screen pages; here they are side by side.

8.1 Error summary after a failed submit

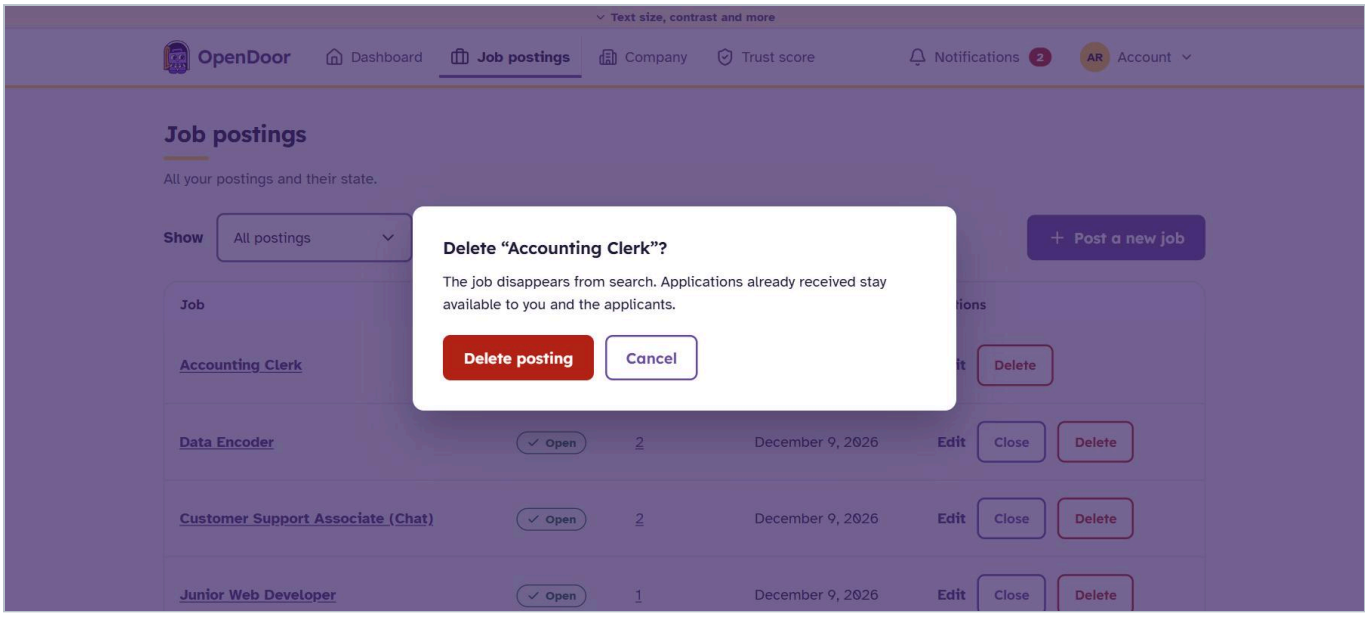

Focus moves to the summary; each line links to its field; each field shows its error under the label and gets a red border.

Screenshot `/login`

8.2 Confirm dialog (dangerous action)

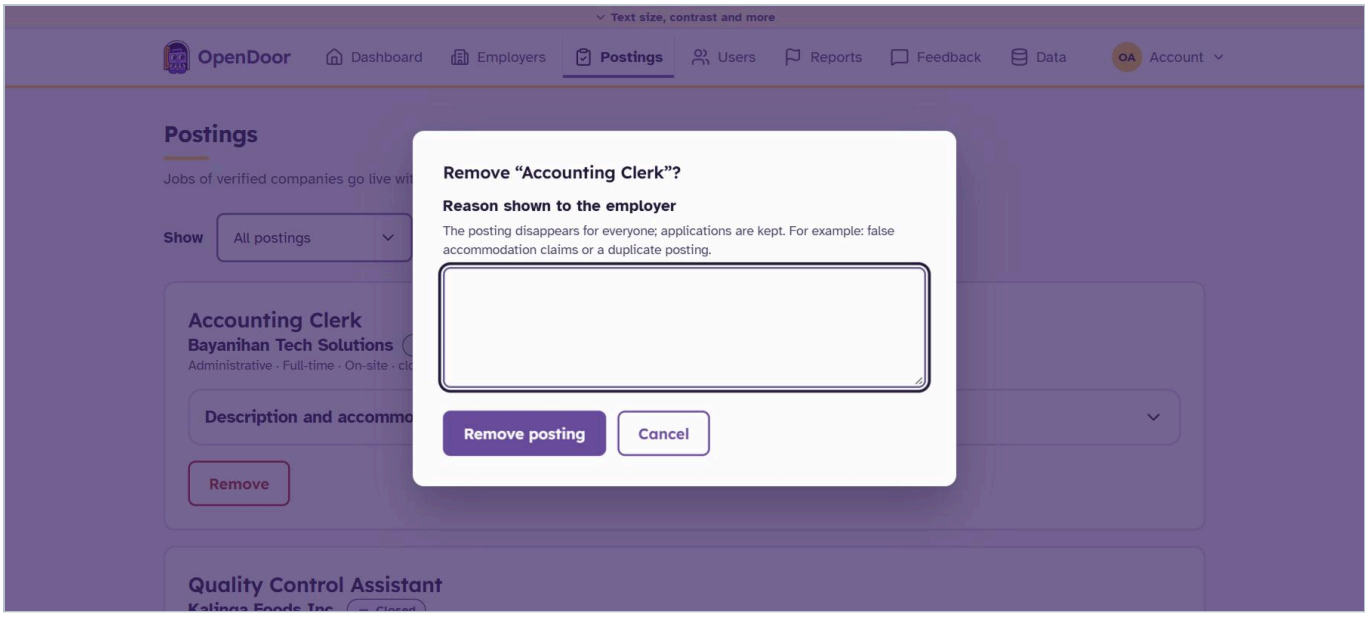

Red confirm button, focus starts on Cancel, Escape closes, focus returns to the button that opened it.

Screenshot `/employer/jobs`

8.3 Reason dialog

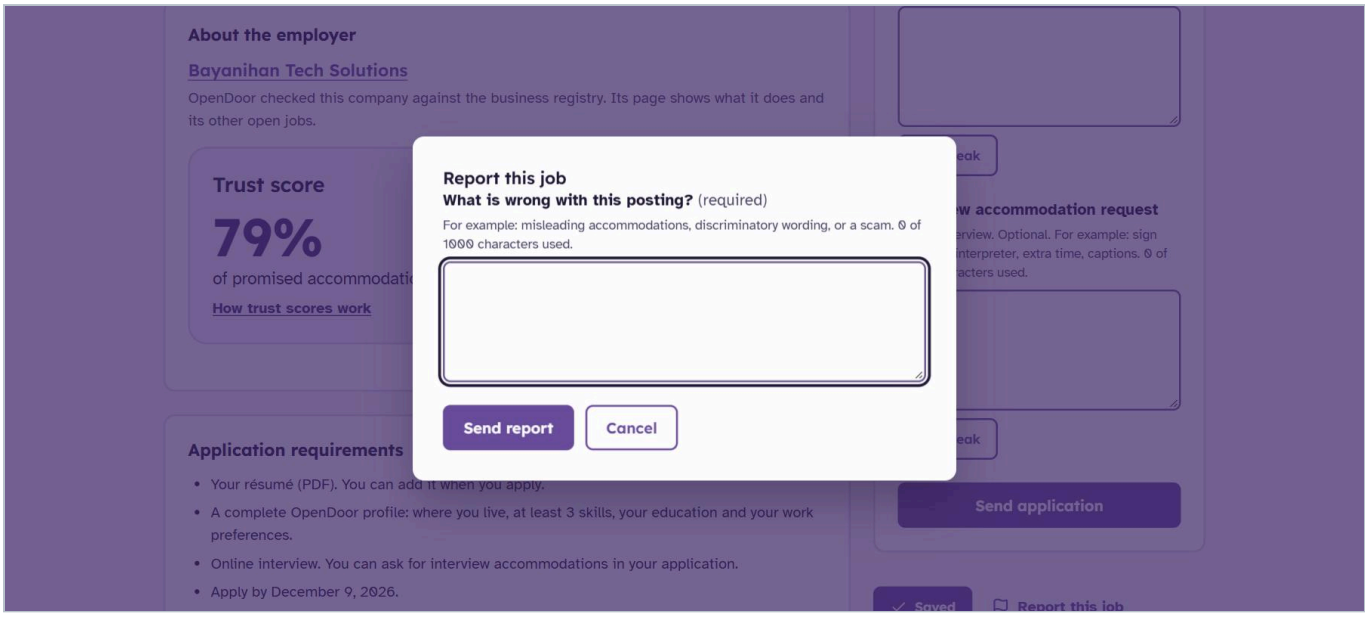

Required reason with an inline error "Enter a reason."; used for removing postings, rejecting employers and resolving reports (optional note).

Screenshot `/admin/job-postings`

8.4 Form in a dialog

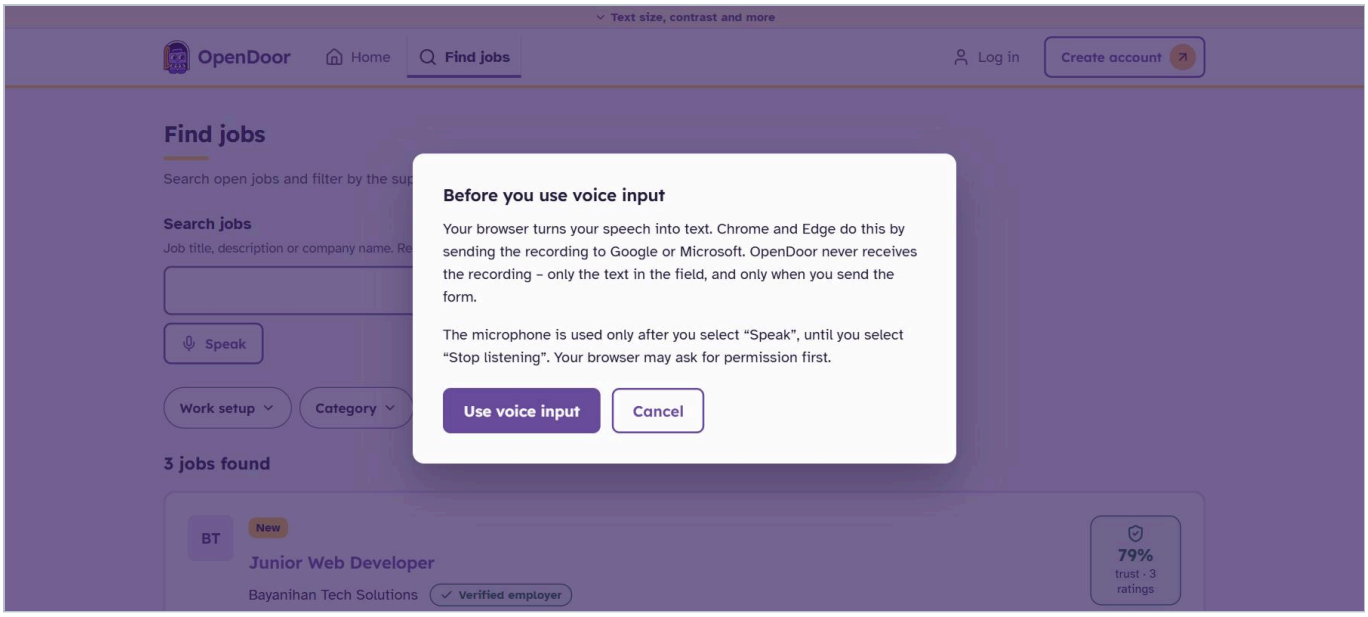

Report this job: required text area with counter and hint, "Send report" / "Cancel".

Screenshot `/candidate/jobs/1`

8.5 Voice input privacy notice

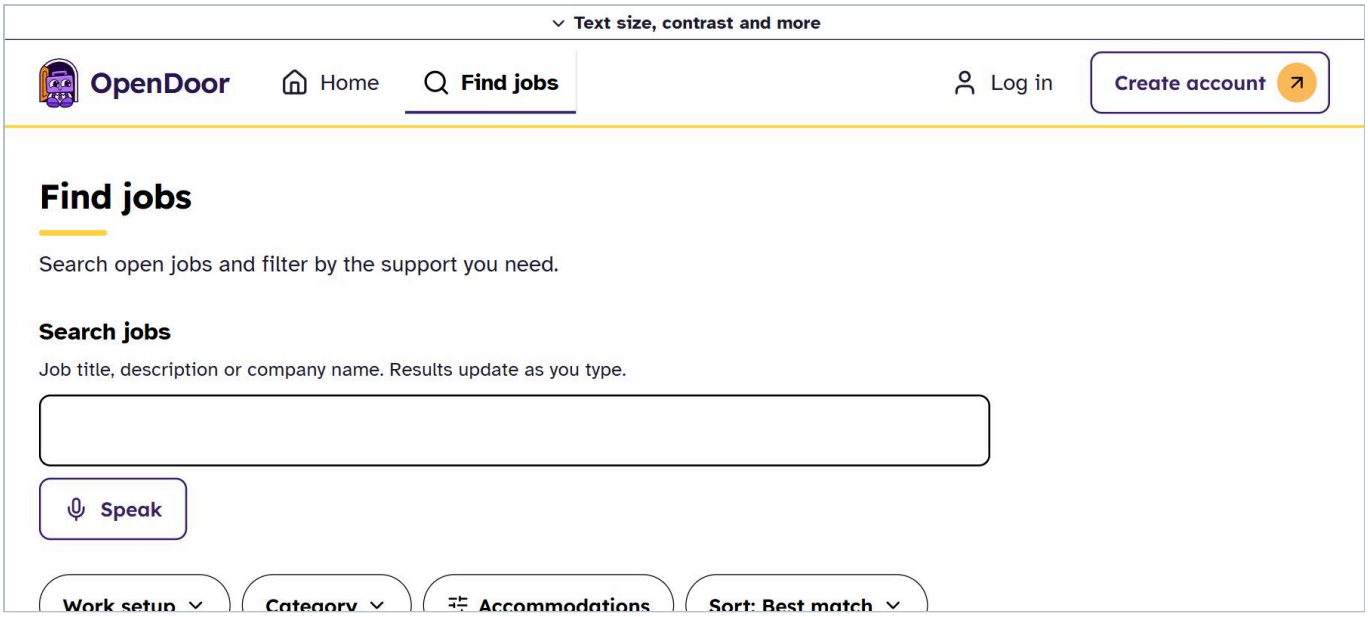

Shown once before the first use of "Speak": the browser (Chrome/Edge) sends the recording to Google or Microsoft; OpenDoor receives only the text.

Screenshot `/jobs`

8.6 High contrast and 150 % text

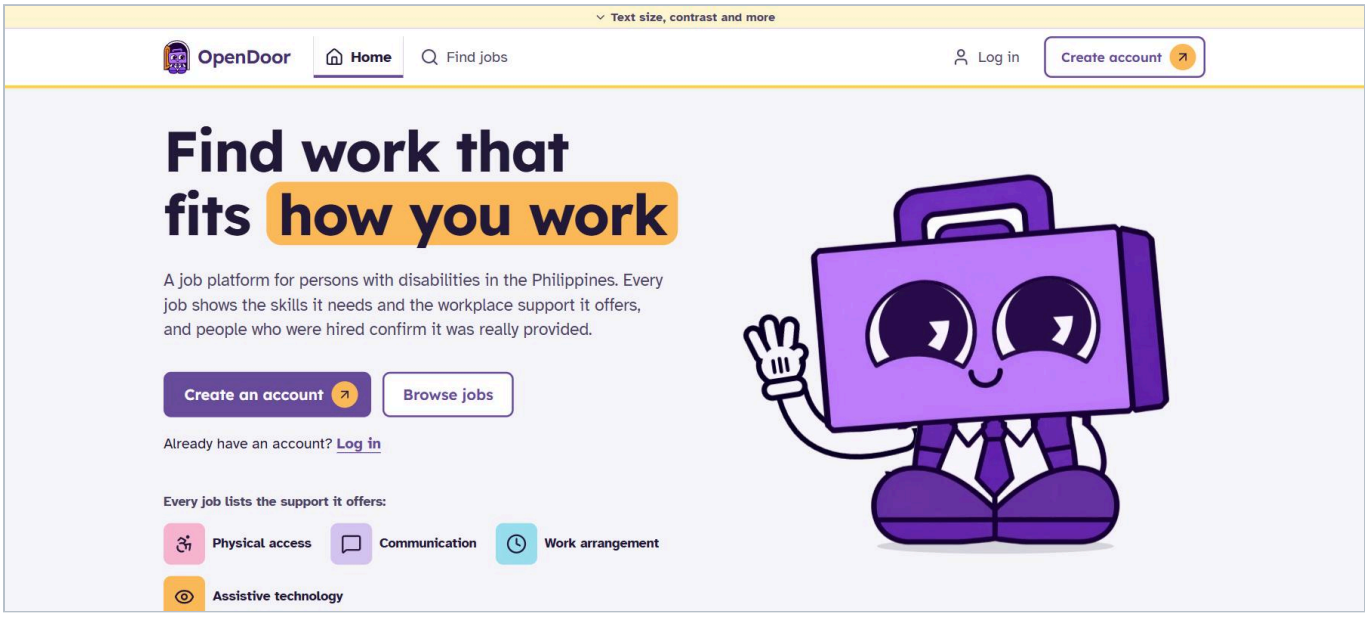

Display bar or Account → Display. Darker text, borders and buttons, white surfaces, thicker focus ring. When the full menu does not fit at the larger text size, the header shows the Menu button. Nothing is cut off.

Screenshot `/jobs`

8.7 Quiet mode

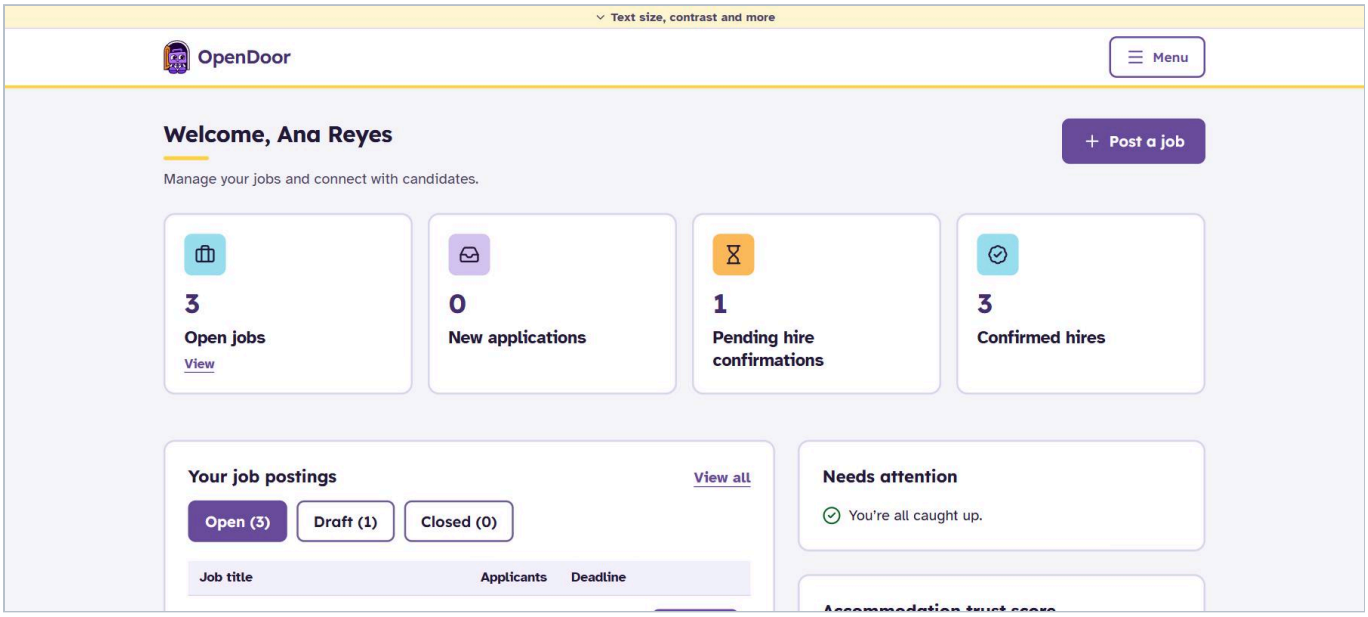

Display bar → "Quiet mode": no sparkles or decorative highlights, calm colours, no animations, the mascot stands still. Kept on this device.

Screenshot /

8.8 Compact menu

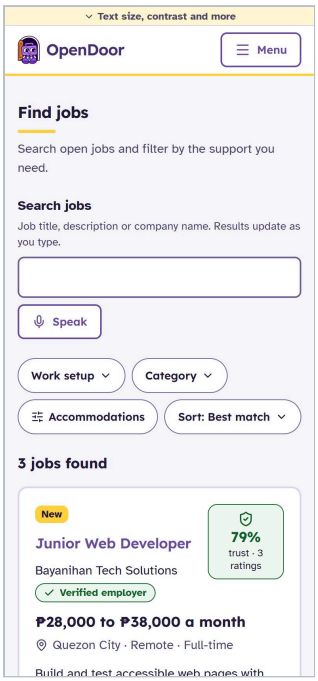

Display bar → "Compact menu": only the logo, "Menu" and Account at the top, on any screen width. "Show all links" brings the full menu back.

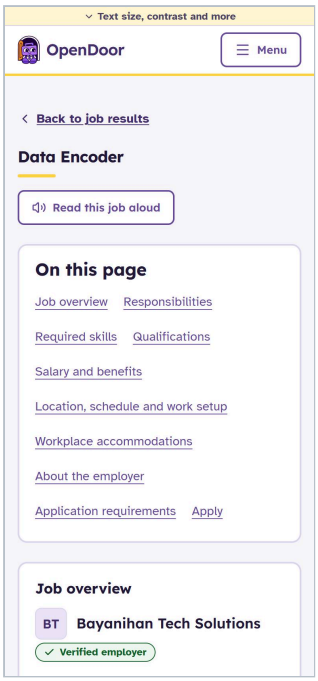

Screenshot `/employer/dashboard`

8.9 Phone width (390 px)

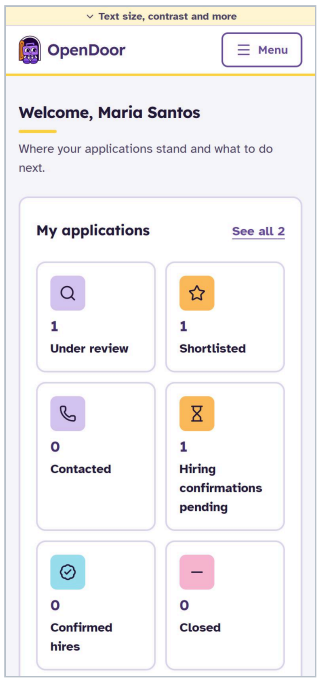

The header shows the logo and "Menu"; the Menu panel lists the links. The filter chips wrap under the search field, job cards and dashboard tiles stack and the "Where it stands" timeline turns vertical.

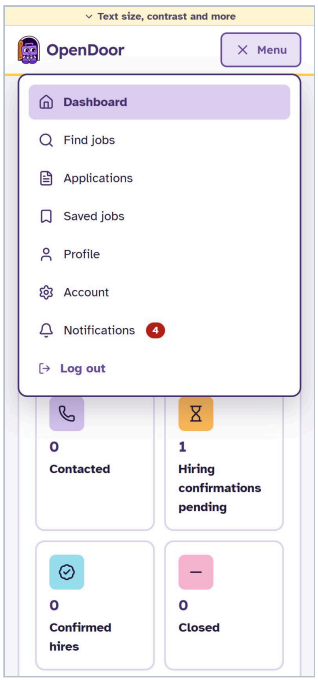

Find jobs (guest)

Job details (guest)

Job seeker dashboard

The Menu panel opened

9 Email notifications NEW

The second half of M13 (on by default, can be turned off). Every in-app notice is also sent by email to job seekers and employers. Administrators receive no notices and have no switch.

Account – "Email notifications" tab	Checkbox "Send me an email for each notification", saved at once with the result as an alert, and an example email. Value: `email_notifications` in `GET /me` and the login response. Save: `PUT /me/email-notifications {"enabled": true|false}`.
Which emails	The same events as the in-app notices (Appendix C): new application (employer), stage changed by the other side, hiring reports and their answers (both sides), employer verification decision and posting removal (employer, with the admin's reason), and the rating reminder (job seeker). Suspended accounts get no email.
Email content	Subject such as "New application for Data Encoder", "Hiring confirmation: Data Encoder" or "Rate the accommodations for Data Encoder"; greeting with the name, the notice text, a button "Open in OpenDoor" to the same page as the in-app link, and a footer explaining how to turn the emails off in Account settings. No disability, accommodation-need or interview-request details.
Timing and failures	Sent right after the action has answered, so a slow mail server never delays the user. A mail failure is logged and never undoes the action; the in-app notice is always there.
Rating reminder	Notice type `feedback_reminder` (in-app and email) to a job seeker with a confirmed hire on the day the feedback form opens – day 30 after the start date (daily run at 08:00, Philippine time). Once per hire; missed days are caught up; suspended accounts get it after reactivation.
Mail provider	Production sends through Brevo's HTTPS API (Railway blocks outbound SMTP on its trial plans); locally the emails are written to the Core log.

10 Design foundations

Current values from `frontend/src/styles/tokens.css`. Contrast ratios are against white. A new visual design may change them, but must keep the contrast levels.

Colour tokens

	Token	Value	Use
	`--od-text-default`	`#241b3a`	Body text and headings (16.2:1)
	`--od-text-muted`	`#4e4568`	Hints, subtitles, secondary text (8.8:1)
	`--od-text-accent`	`#47306f`	Links (10.9:1)
	`--od-brand-primary`	`#6a4c9c`	Primary buttons, current menu item (6.7:1)
	`--od-brand-primary-dark`	`#47306f`	Hover, info alert text
	`--od-surface-page`	`#ffffff`	Cards
	`--od-surface-canvas`	`#f6f5f9`	The page behind the white cards
	`--od-surface-subtle`	`#f5f1fc`	Info backgrounds, soft panels
	`--od-surface-tint`	`#ebe3f7`	Tags, table header row, highlighted cards
	`--od-surface-current`	`#dccff1`	Current menu item, unread notices
	`--od-border-subtle`	`#ddd5ee`	Card borders and dividers (decorative only)
	`--od-border-input`	`#6f5f94`	Input and checkbox borders (5.6:1)
	`--od-border-focus`	`#241b3a`	Focus ring (3 px)
	`--od-accent-yellow / yellow-soft`	`#ffd23f`	Display bar, header line, highlights (also #fff6d2); never text
	`--od-accent-orange / pink / sky / lilac`	`#fdba5a`	Icon tiles and decoration (also #f8b5d1, #9adff0, #d4c4ef); never carry meaning
	`--od-chart-1 … 4`	`#6a4c9c`	Chart series: violet, sky #0f8fb8, orange #c9772b, pink #c2477a (checked for colour-blind separation)
	`--od-status-danger`	`#b42318`	Errors, danger buttons, unread count (6.6:1) on #fef1f1
	`--od-status-success`	`#116329`	Success text and badges (7.4:1) on #eef8f0
	`--od-status-warning`	`#7a4300`	Warning text (7.4:1) on #fff6e1

Type, layout and behaviour

Typography	**Lexend** for headings, numbers and buttons; **Atkinson Hyperlegible** (made for readers with low vision) for text. Both are served by OpenDoor itself (no calls to Google). Base 16 px, line height 1.5; paragraphs at most about 70 characters wide.

Layout	Content up to 72 rem centred on a violet-grey canvas, in white cards with a 2 px border. Dashboards, job details and the employer page use a main column and a side column on wide screens; everything stacks on narrow screens and at large text sizes.
Styling	Tailwind CSS 4 utilities on top of the shared kit (`styles/kit.css`) and the tokens in `styles/tokens.css`. The look follows Francis Ruzgal's `opendoor-ipt`; routes, API calls and behaviour are OpenDoor's own.
Buttons	Primary (filled purple), secondary (purple outline), small, link-style, danger outline (red outline: Withdraw, Delete, Suspend, Not selected, Remove…) and danger (filled red, inside confirm dialogs). At least 48 px high (44 px small). Busy buttons keep focus and say what is happening ("Saving…").
Status	Always icon + word + colour, never colour alone: ✓ success (green), ✕ danger (red), ⚠ warning (amber), ○ info (purple), – neutral (grey).
Mascot	The briefcase mascot (waving on Home, happy after "Application sent", sad on empty and error states, a door while loading). Decorative: it never carries meaning and stays still with reduced motion or Quiet mode.
Display settings	Text size 100 / 125 / 150 % (root font size), high contrast (darker text, borders and buttons, thicker focus ring) and reduced motion are saved to the account. Quiet mode (no sparkles or decoration, calm colours, no animation), the compact menu and "Keep open" for the display bar stay on the device. Applied as `data-text-size`, `data-contrast`, `data-motion`, `data-quiet`, `data-menu` and `data-bar` on `<html>`; the system "reduce motion" setting is also respected.
Responsive	Works at 320 px width and at 200 % text without sideways scrolling; wide tables scroll inside their own labelled box.

11 Shared components

Building blocks in `frontend/src/components`, reused across the screens. The pictures are cut from the screenshots at their real size.

UtilityBar (display bar)

Yellow bar at the top of every page: "Skip to main content", "Text size" (opens the Text size panel), "High contrast", "Quiet mode", "Compact menu" / "Show all links" and "Keep open". On mouse screens it folds to a thin line "Text size, contrast and more" until it is hovered or focused. Toggles say whether they are on (pressed state); each change is announced ("Quiet mode is on.").

Signed in, text size and contrast are also saved to the account. The same choices are in Account → Display.

TextSizeSlider NEW

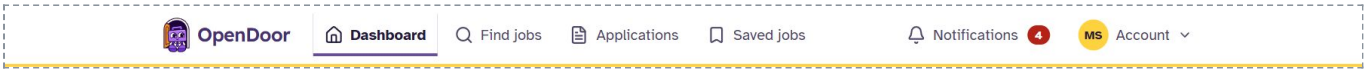

Panel under "Text size": a slider, "Smaller" / "Larger" buttons, a preview line, the quick picks Standard, Large and Extra large, and "Done".

Limited to the three sizes the account can save.

SiteHeader

Logo on the left, icon links for the role (the current page underlined in violet), a yellow line under the header. Signed in: "Notifications" with the unread count and an account menu (initials, name, email, then Profile for job seekers, Account and Log out). When the full menu does not fit (narrow screen, large text, or Compact menu chosen) it shows the logo and a "Menu" button with the links.

The full menu is measured, so it never wraps onto two lines.

SiteFooter

One line: "Privacy", "Accessibility statement" and "© 2026 OpenDoor".

The OpenStreetMap credit is on the Accessibility Snapshot.

Page and BackLink

Every screen starts with one h1 (with a short yellow underline), an optional subtitle and optional actions (Read aloud). Sets the browser tab title ("Find jobs – OpenDoor") and moves focus to the h1 when the address changes (not when only the search part changes, so typing in a filter keeps focus). "‹ Back to …" links return to where the user came from, filters included.

Button

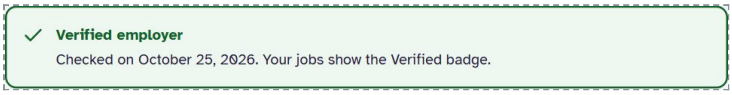

Button that stays focusable while unavailable (`aria-disabled` instead of `disabled`) and ignores repeated clicks while a request runs.

Variants: primary, secondary, small, link, danger outline, danger.

Alert / ApiErrorAlert

Message box in four types (info, success, warning, error), each with an icon, a coloured border and a bold title. API errors show a plain-language message and a "Reference: …" request id for support.

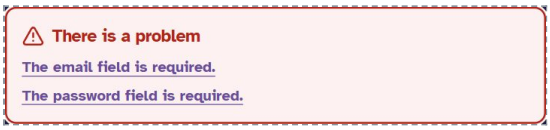

Results are announced politely; blocking errors assertively.

ErrorSummary

"There is a problem" box above a form after a failed submit, listing every error as a link to its field. It takes focus.

GOV.UK error-summary pattern; each field also shows its own error (red border and message) under the label.

Form fields

TextField, TextArea (with "N of M characters used" counter), SelectField, CheckboxField and RadioGroup (26 px custom boxes; inline or as whole-card choices). Label above, then hint, then error, then the input; required fields say "(required)" in text. "Show password" checkboxes on password forms.

`voice` adds the Speak button (VoiceInput).

Tabs

ARIA tabs: Left/Right arrows, Home and End move between tabs; the open tab is kept in the address (`?tab=about`), so it can be linked. All panels stay loaded, so unsaved edits survive switching tabs.

Used on Profile, Account and the employer dashboard's postings.

WizardProgress

"Step 2 of 6 · Description and place" heading with one bar per step (decorative). The heading takes focus on each step; the tab title says the step. "Next" checks only the fields of that step; server errors send the user to the first step that has one.

Used by Create account (3 steps) and Post a new job / Edit posting (6 steps).

FilterChips NEW

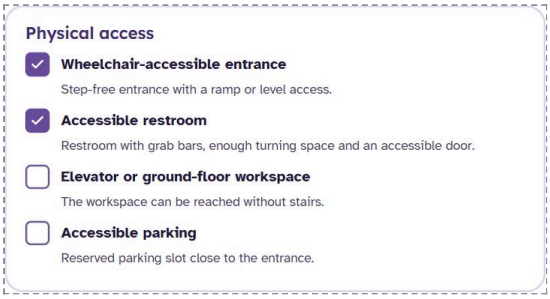

Row of pill buttons under the search field: "Recommended for me" (job seekers; a toggle), "Work setup", "Distance" (job seekers with a place: 10, 25, 50, 100 km – "Remote jobs are always shown."), "Category", "Accommodations" (a dialog: "Show jobs that provide every one you tick." with "Untick all" and "Show jobs") and "Sort". A chip names what is chosen ("Category: Information Technology") and Escape closes its panel and returns focus to it.

Every choice is kept in the address, so a search can be shared.

AccommodationPicker

Grouped checkboxes for the accommodation types (Physical access, Communication, Work arrangement, Assistive technology, Support) with short descriptions and a live "N selected." line. In job postings, each checked item gets an optional "Details for ..." input.

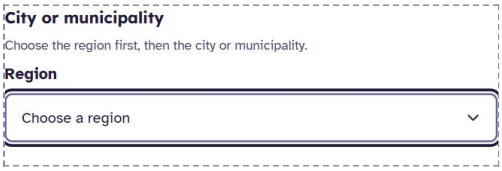

Used for needs, posting accommodations (two columns) and the Accommodations filter.

LocationPicker

Region → Province → City or municipality selects from the official PSGC lists (NCR has no provinces). Shows the saved place with a "Change location" button until the user edits it.

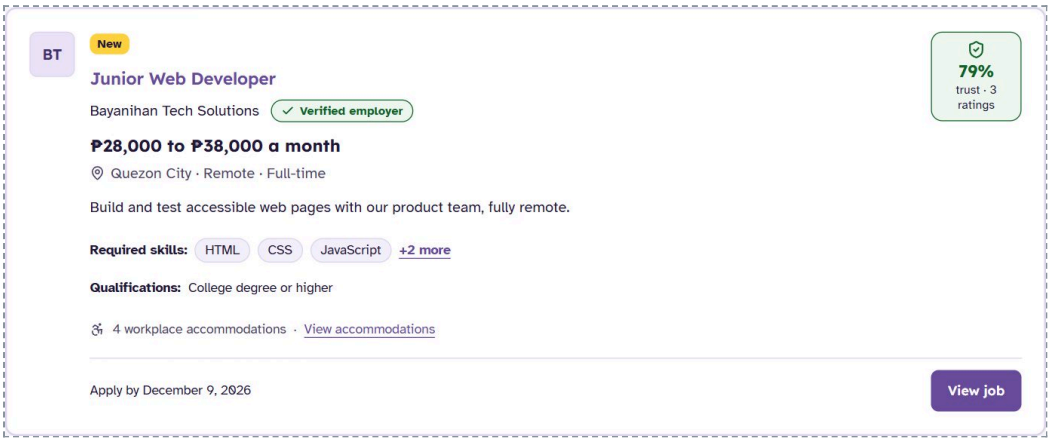

Lists come from the Insights Service; a failed list is announced.

JobCard and SaveJobButton

Search result NEW: initials tile, "New" / "Closing soon", title link, company + Verified badge, salary ("₱18,000 to ₱22,000 a month" or "Salary not disclosed"), "City · Work setup · Type", a two-line summary, up to 3 required skills (matched ones first, "+N more"), "Qualifications", for job seekers "Match: N% · label" with "Why this match?", "N workplace accommodations · View accommodations", "Apply by …", "Save" and "View job". The trust score sits in the corner ("79% trust · 3 ratings" or "Not rated yet").

Also used on Saved jobs (with Remove), the home page and the employer page.

Match (score and parts) NEW

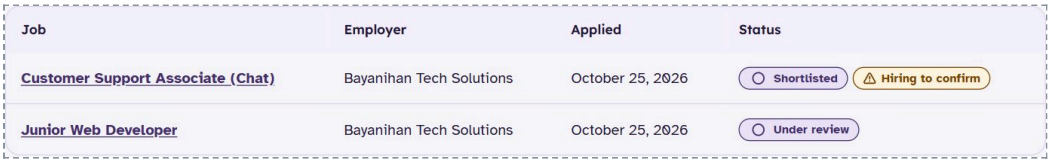

"Match: 100%" badge with "Strong match", "Good match", "Fair match" or "Low match" and "Why this match?" listing each part with ✓ or ○: "You have 4 of the 4 required skills", "In your city, less than 1 km away", "Your education meets the minimum", "A work setup you prefer", "Offers all 3 of your accommodation needs"… On the job page the same parts form "How this job fits you".

For job seekers with a profile. Disability type is never used.

StatusBadge / VerifiedBadge

Pill-shaped status with icon for applications, postings, registry checks and reports (see Appendix B); "Job closed" replaces the stage when the job closed during the process, and "Hiring to confirm" is added while a hiring report waits. "✓ Verified employer" for checked companies.

IconTile and StatCards

Dashboard tiles: coloured icon tile, big number (Lexend) and label, optionally a "View" link that covers the whole tile and is named with the number.

The tile draws the focus ring when its link is focused.

StatusTimeline

"Where it stands" NEW: Submitted → Under review → Shortlisted → Contacted → Hired, each with its date and what it means ("The employer reached out about the next steps."), or "Skipped", "Not shortlisted", "Hiring confirmation pending", "Start date …"; the step being waited for is marked as current.

Stacks below 48 rem.

HiringSection NEW

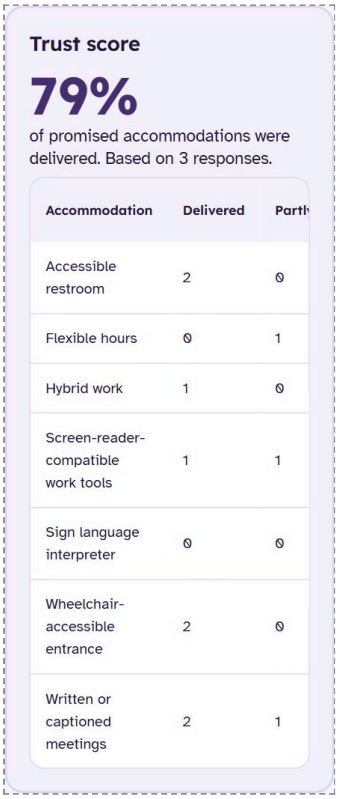

"Hiring confirmation" card on both sides of an application: "Report hiring" / "Report that I was hired" with a start date; the other party sees "… reported that you were hired, starting {date}. Is that right?" with "Confirm", "Not yet" (optional new date) and "Incorrect"; "Hired — confirmed. Start date: …"; and the "History" of every report and answer.

Never automatic. A withdrawal or "Not selected" cancels an open report.

TrustScoreCard

"79% of promised accommodations were delivered. Based on 3 responses." with "How trust scores work", or "Not published yet … (2 of 3 so far)". Optional table per accommodation (Delivered / Partly / Not delivered).

Compact on the job page and dashboards; with the table on the employer and trust-score pages.

Charts NEW

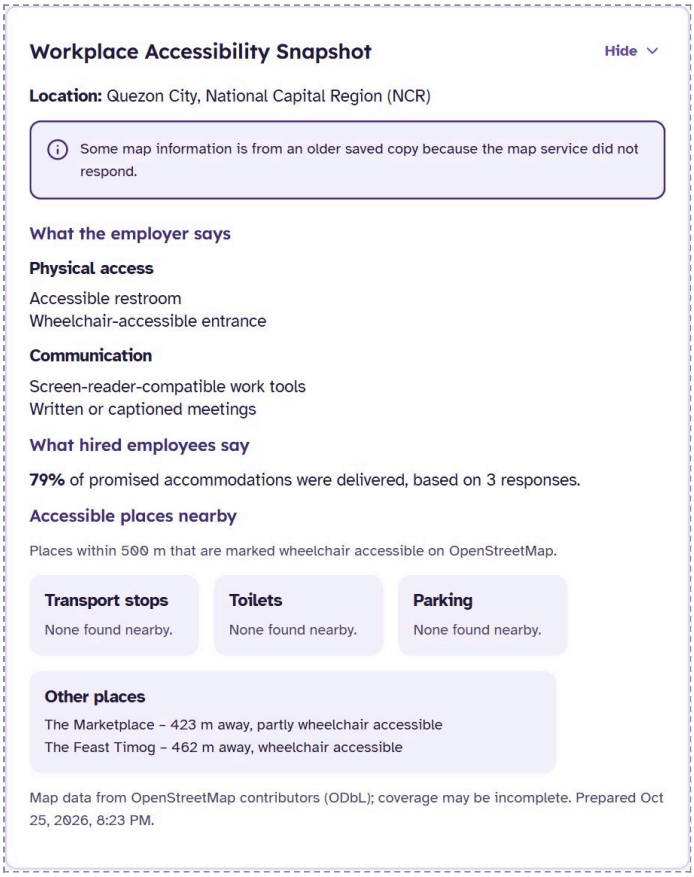

ChartCard with a title, a one-line summary and "Show as a table"; LineChart (weeks; hover, or arrow keys on the chart, show each week's values), BarRows (value at each bar's tip) and StackedBar.

Inline SVG, no chart library; validated colours; every chart has the same data as a table.

AccessibilitySnapshot

Insights mashup on the job page, as a closed card with "Show Workplace Accessibility Snapshot": location, "What the employer says", "What hired employees say", "Accessible places nearby" (transport stops, toilets, parking, other places with distance and wheelchair status), source note.

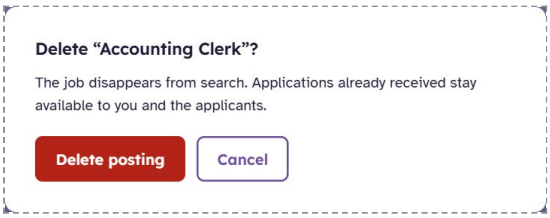

Loads only when opened; failures never block the job page; says when it shows an older saved copy.

Dialog / ConfirmDialog / ReasonDialog

Modal on the native `<dialog>`: traps focus, Escape closes, focus returns to the button that opened it. ConfirmDialog asks yes/no; ReasonDialog asks for a (required or optional) reason or note.

Dangerous actions start with focus on Cancel and use a red confirm button.

NotificationsLink

Header link "Notifications" with a red count badge; its name says "Notifications 2 unread". Refreshes on every page change and after marking as read.

AsyncContent, Loading, EmptyState, ResultCount, Pagination, ActionFeedback

Shared states: loading with the door mascot; error with "Try again"; empty state with the sad mascot, a title and the next step; announced result count ("4 postings"); pagination ("Previous page", "Page 1 of 3", "Next page", 12 items per page); success/error message after an action.

Unavailable pagination buttons stay focusable instead of disappearing.

ReadAloud

"Read this job aloud" button: reads the title and main content with the browser's own voice. While reading: "Pause reading" / "Resume reading" and "Stop reading".

Hidden when the browser cannot speak. Nothing leaves the device.

Welcome tour NEW

"Quick introduction" in 6 steps per role that opens each page and points at one part of it; the rest of the page is dimmed and blurred. Job seeker: Make OpenDoor comfortable · Your starting point · Your profile and your needs · Find jobs that fit you · Follow your applications · Updates and ratings. Employer: Make OpenDoor comfortable · Your starting point · Set up your company and get verified · Post jobs and review applicants · Earn a trust score · Stay up to date. Buttons "Back", "Next" / "Finish", "Finish later", "Close".

Starts on the dashboard after the first sign-in. Close, Escape and Finish save it as done with the account; "Finish later" keeps the step on this device for "Continue the welcome tour"; Account → Getting started shows it again.

GetStarted

"Get started" card on the dashboards: "n of 4 done", a ✓ or an empty circle per step (with hidden "Done:" / "To do:"), a short hint and a button for each open step, "Show the welcome tour" and "Hide this list".

Steps come from the user's own data, so they tick themselves. Gone when all are done or hidden; Account → Getting started shows it again. The demo accounts start with both done.

ResumeSkillSuggestions NEW

"Suggest skills from my résumé": "Reading your résumé…", then "We found N skills in your résumé. Untick any that are not right." with "Add selected skills" / "Cancel"; or "We found no new skills in your résumé." / "We could not read any text in your résumé. A scanned résumé has no text; please add your skills yourself."

The résumé text is read on the server only to find skills and is never stored.

VoiceInput

"Speak" button under a text field; adds what the user says to the field until "Stop listening". First use shows a notice that Chrome/Edge send the audio to their speech service.

Hidden where the browser has no speech recognition (e.g. Firefox) or no speech service (Brave).

A Route map

Signed-in users who open a page of another role are sent to their own dashboard; guests who open a protected page are sent to Log in and come back after logging in.

Route	Screen	Who
`/`	Home	Everyone
`/jobs`	Find jobs	Everyone
`/jobs/{id}`	Job details	Everyone
`/employers/{id}`	Employer page	Everyone
`/privacy`	Privacy	Everyone
`/accessibility`	Accessibility statement	Everyone
`/trust-scores`	How trust scores work	Everyone
`/login`	Log in	Guests
`/forgot-password`	Forgot password	Guests
`/reset-password`	Reset password (from the email)	Guests
`/register`	Create account	Guests
`/candidate/setup`	Complete your profile	Job seeker
`/candidate/dashboard`	Dashboard	Job seeker
`/candidate/jobs`	Find jobs ("Recommended for me")	Job seeker

B Labels and statuses

API values and the words the user sees. Badge = icon and colour of the status badge.

Application

API value	Shown as	Badge
`pending`	Submitted	– neutral
`reviewed`	Under review	○ purple (info)
`shortlisted`	Shortlisted	○ purple (info)
`contacted`	Contacted	○ purple (info)
`hired`	Hired	✓ green
`rejected`	Not selected	– neutral
`withdrawn`	Withdrawn	– neutral
`job_closed`	Job closed (computed)	– neutral
`(report waiting)`	Hiring to confirm (extra badge)	⚠ amber

Hiring report

API value	Shown as
`pending`	Waiting for an answer
`confirmed`	Hired — confirmed
`disputed`	Not correct
`cancelled`	Cancelled (withdrawn or not selected)

Job posting

API value	Shown as	Badge
`draft`	Draft	– neutral
`open`	Open	✓ green
`closed`	Closed	– neutral

Match label

API value	Shown as
`≥ 80`	Strong match
`≥ 60`	Good match
`≥ 40`	Fair match
`< 40`	Low match

Registry check

API value	Shown as	Badge
`ACTIVE`	Active	✓ green
`EXPIRED`	Expired	✕ red
`CANCELLED`	Cancelled	✕ red
`NOT_FOUND`	Not found	✕ red
`ERROR`	Check failed	⚠ amber

Report

API value	Shown as	Badge
`open`	Open	⚠ amber
`dismissed`	Dismissed	– neutral
`actioned`	Action taken	✓ green

Feedback rating

API value	Shown as
`delivered`	Delivered
`partial`	Partly delivered (counts as half)
`not_delivered`	Not delivered

Education

API value	Shown as
`elementary`	Elementary
`high_school`	High school
`senior_high`	Senior high school
`vocational`	Vocational
`college`	College
`postgraduate`	Postgraduate

Employment type

API value	Shown as
`full_time`	Full-time
`part_time`	Part-time
`contract`	Contract
`internship`	Internship

Work setup

API value	Shown as
`onsite`	On-site
`hybrid`	Hybrid
`remote`	Remote

Salary paid per

API value	Shown as
`hour`	hour
`day`	day
`month`	month
`year`	year

Interview format

API value	Shown as
`online`	Online interview
`onsite`	On-site interview

Accommodation group

API value	Shown as
`physical_access`	Physical access
`communication`	Communication
`work_arrangement`	Work arrangement
`assistive_technology`	Assistive technology
`support`	Support

Role

API value	Shown as
`candidate`	Job seeker
`employer`	Employer
`admin`	Administrator

C Notification texts

Each notice has a message and a link; the emails repeat the same text (section 9).

To	When	Message	Opens
Employer	A job seeker applies	"Maria Santos applied for Junior Web Developer."	Application review
Job seeker	Employer opens the application	"Bayanihan Tech Solutions is reviewing your application for Junior Web Developer."	Application details
Job seeker	Employer shortlists / contacts	"Good news: {company} shortlisted you for {job}." / "{company} reached out to you about the next steps for {job}."	Application details
Job seeker	Employer marks as not selected	"{company} decided not to continue with your application for {job}."	Application details
Employer	Job seeker withdraws	"{candidate} withdrew the application for {job}."	Application review
The other side	A hire is reported	"{company} reported that you were hired for {job}, starting {date}. Please confirm it, or tell them it is not yet or not correct." (or "{candidate} reported being hired …")	Application details / review
The reporter	The report is answered	Confirm: "Congratulations! {company} confirmed that you were hired for {job}. You can rate the promised accommodations from {date}." / "{candidate} confirmed being hired for {job}. Hired — confirmed." Not yet: "… answered “Not yet” … The proposed start date is {date}." Incorrect: "… said the hiring report for {job} is not correct. The application stays at its current stage."	Application details / review
Employer	Admin approves or rejects the company	"{company} is now verified. Candidates see the Verified badge on your postings." / "{company} was not verified: {reason}. Update your company profile to be checked again."	Company profile
Employer	Admin removes a posting	"Your posting {job} was removed by an administrator: {reason}."	Job postings
Job seeker	Feedback form opens (day 30 after the start date; daily run at 08:00)	"You can now rate the accommodations {company} promised for {job}. Your answers are anonymous."	Rate your accommodations

D Accessibility rules to keep

OpenDoor targets WCAG 2.1 AA (latest axe run October 23, 2026: 0 violations on 33 pages of every role; Lighthouse 100 on the public pages, October 11). Any new UI must keep these behaviours.

- One h1 per screen; after moving to another screen, focus goes to its h1 and the browser tab title changes ("Saved jobs – OpenDoor").
- "Skip to main content" is the first link (in the display bar); landmarks: header with the navigation "Main", main, footer.
- Step-by-step forms: the "Step n of N · …" heading takes focus on each step, the tab title names the step, and "Next" checks only that step. Tabs follow the ARIA tabs pattern (arrow keys, Home, End) and keep the open tab in the address.
- Every input has a visible label; hints and errors sit between the label and the input and are linked to it; required fields say "(required)" in text.
- After a failed submit show the error summary at the top and move focus to it.
- Status is never shown by colour alone (text + icon + colour). Contrast at least 4.5:1 for text and 3:1 for borders and focus rings.
- Charts always have the same data as a table ("Show as a table"), visible labels and values that hover and keyboard focus both show.
- Buttons stay focusable while busy or unavailable; they say what is happening ("Saving…", "Please wait…").
- Dialogs: focus inside, Escape closes, focus returns to the opener; dangerous confirmations start on Cancel. The welcome tour can always be closed with Escape and never traps the user.
- Announce results and saves without moving focus: result counts ("3 jobs found", also "0"), "Your needs are saved.", "Saved. Find it under Saved jobs."
- If the focused element disappears (a deleted row), focus goes back to the page h1 instead of the top of the document.
- Touch targets at least 44 px; works at 320 px width, 200 % zoom and with the 125/150 % text setting without sideways scrolling.
- Decoration (sparkles, icon tiles, accent colours, the mascot) never carries meaning and stays still or disappears in Quiet mode; toggles in the display bar announce their new state.
- Dates in Philippine time, written out ("October 12, 2026"); distances as text ("423 m away"), never only on a map.
- Read aloud and Voice input appear only where the browser supports them and never start on their own.

E Demo accounts

Seeded by `php artisan migrate:fresh --seed`. All use the password in `DEMO_PASSWORD` (Core `.env`, not written here).

Email	Name	Shown in the screenshots as
`admin@opendoor.test`	OpenDoor Admin	Administrator
`candidate@opendoor.test`	Maria Santos	Job seeker: complete profile, 3 needs, résumé on file
`candidate2@opendoor.test`	Juan Dela Cruz	Job seeker, hired at Kalinga Foods 45 days ago, can rate
`employer@opendoor.test`	Ana Reyes	Bayanihan Tech Solutions – verified, trust score 79%
`employer2@opendoor.test`	Ramon Villanueva	Kalinga Foods Inc. – waiting for verification

Rebuilding this document

- Start the stack on a freshly seeded Core database (a copy such as `opendoor_core_test` keeps the main local data untouched).
- In `tests/a11y`: `node ui-reference/capture.mjs` (needs `DEMO_PASSWORD`; adds a few demo actions, then takes the screenshots), then `node ui-reference/build.mjs`.
- Screen texts live in `tests/a11y/ui-reference/content.mjs`.
