OpenDoor UI Reference

Features, modules, components and screens for every user role

A backup reference for the team designing the OpenDoor user interface. It shows what the working system does today: every screen of every role, what is on it, what the user can do there, the messages it shows and the API it uses. Screenshots were taken from the running application with the seeded demo data.

Prepared	October 12, 2026
Built from	commit `548d51c` (branch `main`), local stack with the seeded demo data
Contents	4 user roles · 13 modules · 32 screens · 51 screenshots · 19 shared components
Status	Backup reference for the team's UI work. The running application and `docs/openapi.yaml` stay the source of truth.

SIA 1 and IPT final project · PWD job-matching platform

1 About this document

A backup reference for the team designing the OpenDoor user interface. It shows what the working system does today: every screen of every role, what is on it, what the user can do there, the messages it shows and the API it uses. Screenshots were taken from the running application with the seeded demo data.

How to read the screen pages

- Every screen has the same blocks: **Route** (address in the app), **Who** (roles that can open it), **Purpose**, **On the screen**, **Actions**, **Messages and states** and **API** (calls made through the gateway, base `/api`).
- Labels in quotes are the exact texts used today. A redesign can change the look, but keep the meaning of the texts, the order of steps and the accessibility behaviour described in sections 10–11 and Appendix D.
- NEW marks features added after the first SIA screen list (October 10–12, 2026). PLANNED marks work that is being built now and has no screen yet.
- Screenshots are 1,200 px wide (desktop) unless the caption says otherwise. Long pages are cut into parts. The demo people and companies are fictional.

System in one paragraph

OpenDoor matches persons with disabilities (PWDs) with employers by the **workplace accommodations** a job offers and the job seeker needs, and lets hired employees confirm 30 days later whether those accommodations were really provided (the employer's **trust score**). The React app talks only to the API gateway; behind it the Laravel Core Service holds the data, the Insights Service builds the Workplace Accessibility Snapshot from public map and place data, and a SOAP business registry checks employer registrations.

2 Users, modules and what is new

User roles

Guest

Not logged in

Browses and searches open jobs, reads job details with the Accessibility Snapshot and public employer pages, logs in or creates an account.

Navigation: Find jobs · Log in · Create account

Job seeker

Role `candidate` – person with a disability looking for work

Saves accommodation needs and profile, finds jobs ranked by the needs they meet, applies, follows applications, saves jobs, reports postings, rates the promised accommodations 30 days after being hired.

Navigation: Dashboard · Find jobs · My applications · Saved jobs · Profile and needs · Notifications · Account

Employer

Role `employer` – company that hires

Creates the company profile (checked against the DTI/SEC registry), posts jobs with structured accommodations, reviews applicants, hires or declines, follows its trust score.

Navigation: Dashboard · Job postings · Company profile · Trust score · Notifications · Account

Administrator

Role `admin` – OpenDoor staff

Verifies employers with the business registry, approves or removes postings, suspends users, handles reports, moderates feedback, maintains categories and accommodation types, sees analytics.

Navigation: Dashboard · Employers · Postings · Users · Reports · Feedback · Master data · Account

Modules and features

#	Module	Features	Users	Screens
M1	Authentication and accounts	Register (job seeker or employer, with data-privacy consent), log in, log out, change password, session expiry. Login limited to 5 tries per minute; suspended accounts are refused.	All	Log in, Create account, Account settings
M2	Job seeker profile and needs	Accommodation needs (grouped checklist), headline, skills, experience, home location (PSGC), optional disability type with a separate "show to employers" choice, PDF résumé (5 MB).	Job seeker	Profile and needs
M3	Company profile and verification	Company details, DTI/SEC registration number, office location, logo. An administrator checks the registration with the SOAP business registry and approves or rejects with a reason.	Employer, Admin	Company profile, Employers, Employer verification
M4	Job postings	Create, edit, save as draft, submit for approval, close, reopen, delete. Each posting lists accommodations with optional details. Admin approves, rejects with a reason or removes.	Employer, Admin	Job postings, Post a new job, Edit posting, Admin postings

#	Module	Features	Users	Screens
M5	Search and matching	Keyword, category, "must offer" accommodations, sort (best match, newest, closing soon). "Matches my needs" ranks jobs by how many of the job seeker's needs they meet.	Guest, Job seeker	Find jobs, Job details
M6	Applications	Apply with a cover note and an interview accommodation request; statuses Submitted → Reviewed → Hired / Not selected, or Withdrawn by the job seeker.	Job seeker, Employer	Job details, My applications, Application details, Applicants, Application review
M7	Feedback and trust score	30 days after a hire the employee rates each promised accommodation (delivered, partly, not delivered). The employer's trust score is published from 3 responses.	Job seeker, Employer, public	Rate your accommodations, Trust score, Employer page
M8	Dashboards	Summary numbers per role that link to the matching lists.	All signed-in roles	Dashboards
M9	Notifications	In-app notices for application changes and admin decisions, unread count in the header.	Job seeker, Employer	Notifications
M10	Moderation	Suspend and reactivate users, handle posting reports, hide abusive feedback.	Admin (reports filed by job seekers)	Users, Reports, Feedback
M11	Master data	Job categories and accommodation types (5 groups). In-use items are retired instead of deleted.	Admin	Master data
M12	Saved jobs NEW	Bookmark jobs from the job page; list and remove them.	Job seeker	Job details, Saved jobs
M13	Accessibility settings NEW	Text size, high contrast and reduced motion saved to the account. Email notifications switch PLANNED.	All	Account settings
–	Accessibility Snapshot (Insights mashup)	On every job page: employer claims, community verification and wheelchair-accessible places within 500 m (OpenStreetMap), official place names (PSGC).	Everyone	Job details
–	Read aloud and Voice input NEW	Browser text-to-speech on job and application pages; browser speech-to-text on search and long text fields (privacy notice first).	Everyone	Job details, Application details, forms

What is new since the first screen list

Date (2026)	Feature	What changed for the UI
Oct 10	Saved jobs (M12)	"Save job" toggle on the job page and a Saved jobs page.
Oct 10	Moderation (M10)	Admin Users (suspend/reactivate), Reports (dismiss / take action with a note) and Feedback (hide / show again) screens.
Oct 10	Dashboards (M8) and notifications (M9)	Real numbers on all three dashboards; notices for admin decisions on verification and postings.
Oct 10	Admin removal of postings	"Remove" on any posting, with a reason that the employer receives.

Date (2026)	Feature	What changed for the UI
Oct 10	Suspended employers	Postings of a suspended employer are hidden from job seekers until the account is reactivated.
Oct 11	Display settings follow the account (M13)	Text size, contrast and motion saved with the account and applied at login on any device.
Oct 11	Read aloud	"Read this job aloud" / "Read this application aloud" with pause, resume and stop.
Oct 11	Voice input	"Speak" button under the search keyword and long text fields, with a one-time privacy notice.
Oct 11	WCAG 2.1 AA audit fixes	Result counts announced also when zero, scrollable trust-score table, autocomplete on personal fields, unique page titles.
Oct 11–12	Snapshot reliability	Second map server and background retry; the snapshot says when it shows an older saved copy.
Oct 12	Email notifications PLANNED	Backend switch done; Account settings switch and a rating reminder are being built (section 9).

Business rules that shape the screens

- Postings appear in search only when **open, approved, not deleted and the employer is not suspended**. Drafts and postings waiting for approval are visible only to their owner and admins.
- Applications: Submitted → Reviewed (employer opens it) → Hired or Not selected (employer); the job seeker can withdraw while Submitted or Reviewed and can confirm "I was hired" while Reviewed. One application per job.
- Applying closes on the "Apply by" date (Philippine time); a daily job closes expired postings at 00:05.
- Feedback opens on calendar day 30 after the hire, once per hire, and rates the accommodations the posting listed at the time of hire.
- Trust score = delivered ÷ rated, partly delivered counts as half, shown as a whole percent, published from 3 responses.
- Needs are used only for matching; employers see them only for applications to their own jobs. Disability type is optional, never used for matching and shown to employers only if the job seeker allows it.
- The business registry result is advice: an administrator always decides. Changing the registration number removes the Verified badge until checked again.

3 Public screens (guest)

Open to everyone. The header shows "Log in" and "Create account"; the only tab is "Find jobs".

3.1 Home

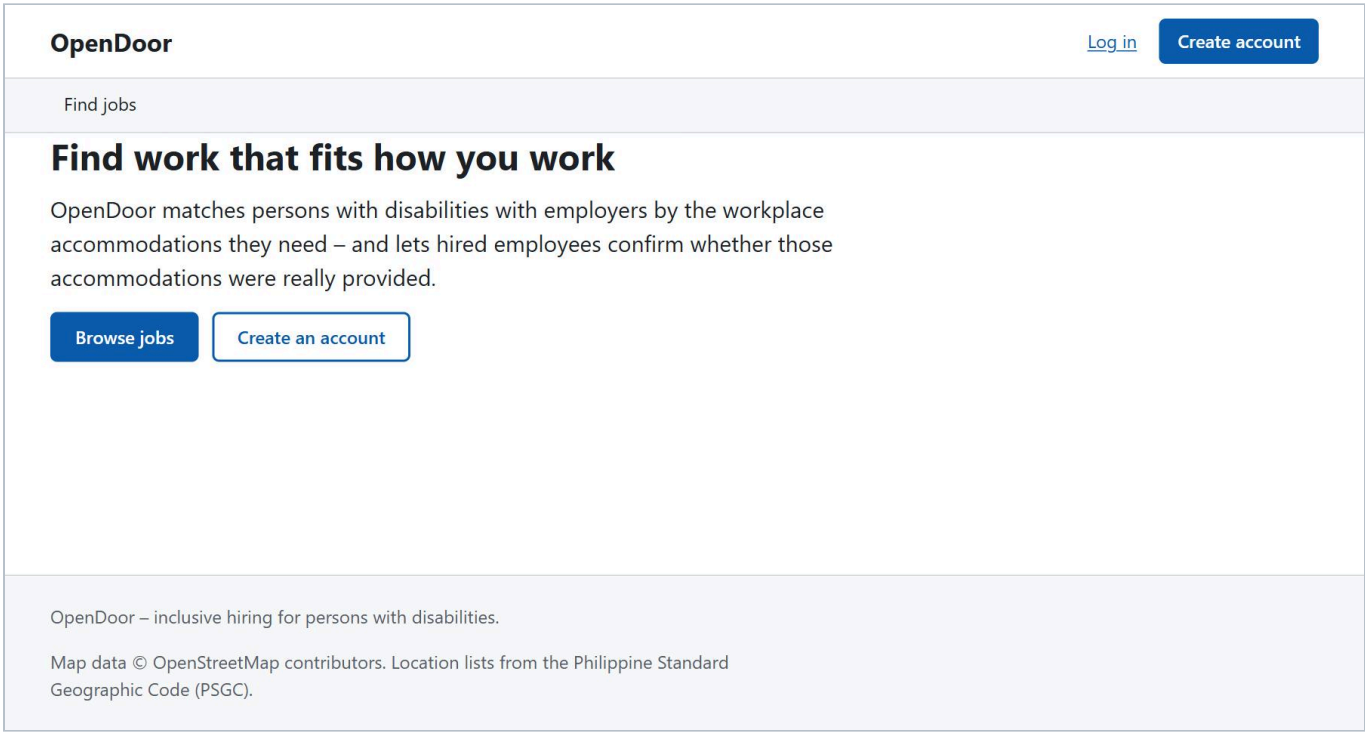

Route	`/`
Who	Everyone
Purpose	Explains OpenDoor in one sentence and sends visitors to the jobs or to registration.

ON THE SCREEN

- h1 "Find work that fits how you work"
- Lead paragraph: matching by workplace accommodations, and hired employees confirm whether they were provided
- Buttons "Browse jobs" (primary) and "Create an account" (secondary)

ACTIONS

- Browse jobs → Find jobs
- Create an account → Create account

Screenshot /

3.2 Find jobs

Route	`/jobs (guest), /candidate/jobs (job seeker – see 4.3)`
Who	Everyone
Purpose	Search and filter open, approved jobs.

ON THE SCREEN

- Filter panel (left on wide screens): Keyword (hint "Job title, description or company name.", with Speak button), Category ("All categories"), Sort by (Best match, Newest, Closing soon), collapsible "Must offer these accommodations" with the grouped checklist; "Clear filters" appears when a filter is set
- Results: announced count "3 jobs found", list of job cards, pagination

ACTIONS

- Typing filters after a short pause (300 ms) – no search button
- Every filter is kept in the address, so a search can be shared or bookmarked
- Open a job card title → Job details

MESSAGES AND STATES

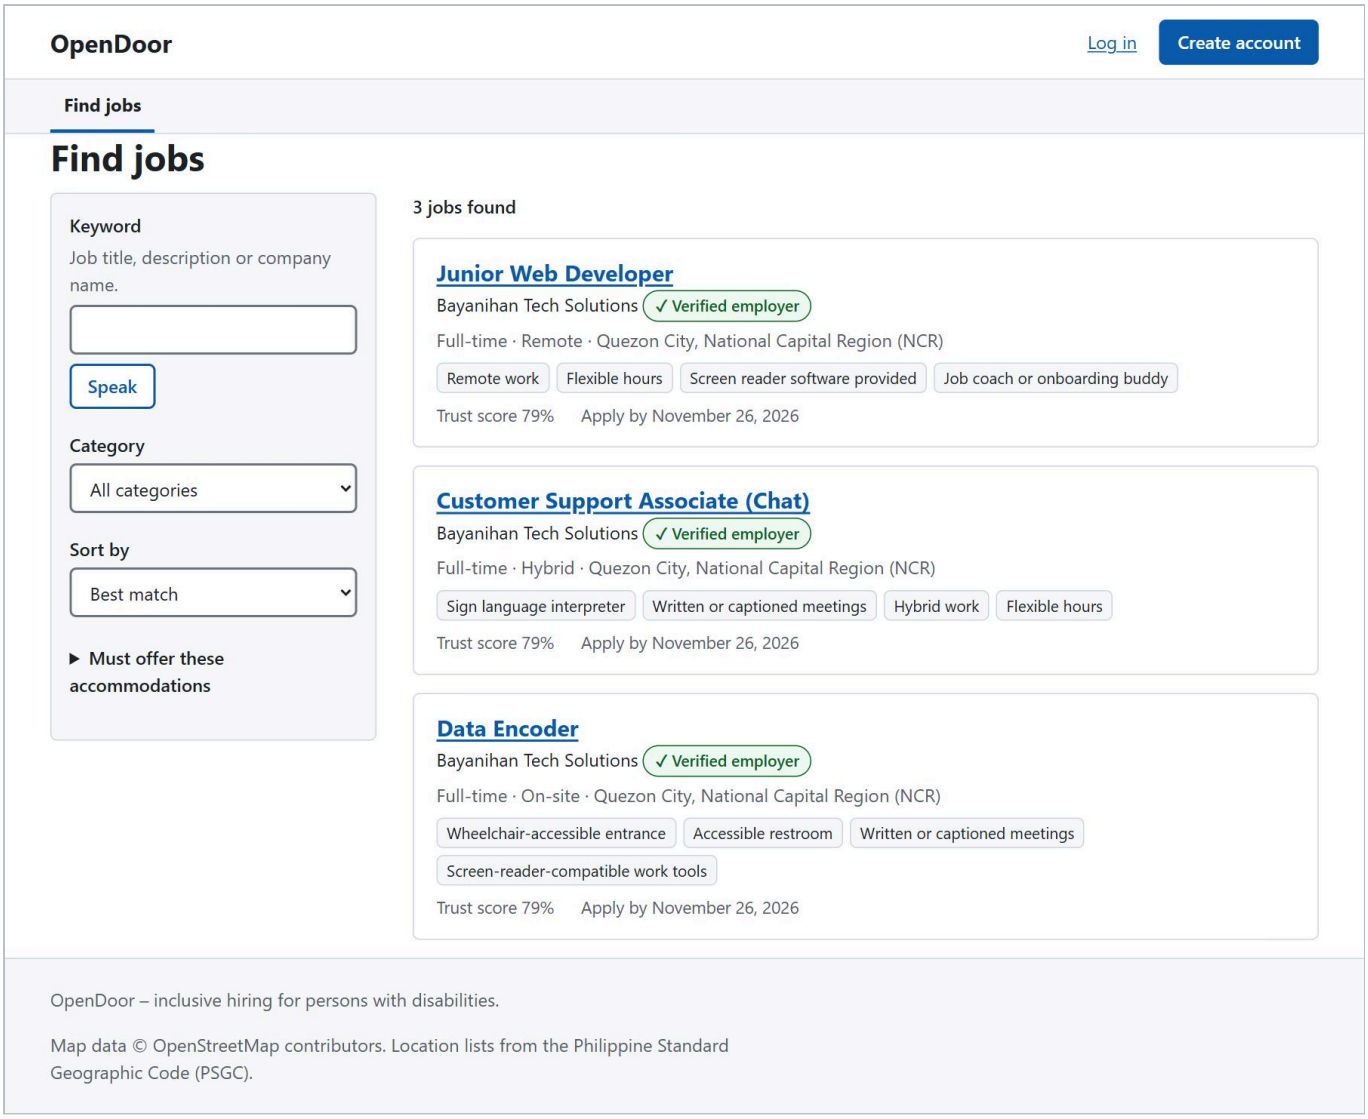

- "Searching jobs…" on first load
- Empty: "No jobs match these filters – Try fewer filters or a different keyword."
- Error: "Jobs could not be loaded" with reference id

API

`GET /job-postings?q=&category=&accommodations[]=&sort=&page=`

`GET /categories`

`GET /accommodations`

Screenshot `/jobs`

3.3 Job details

Route	`/jobs/{id}`
Who	Everyone (job seekers see their own version – 4.4)
Purpose	Everything about one job: the offer, the accommodations, the employer's trust score and the Accessibility Snapshot.

ON THE SCREEN

- h1 job title, "Read this job aloud" button
- Employer name (link to the employer page) + Verified badge; status badge only when the job is not open
- Details list: Category, Employment, Work setup, Interview, Address, Apply by
- "About the job" description; "Accommodations offered" grouped, each with the employer's note (e.g. "– Ramp at the main entrance…")
- Trust score card
- Guest card "Interested?" with "Log in to apply" (returns to this job after login) or "create an account"
- Workplace Accessibility Snapshot (section below the job; see component AccessibilitySnapshot)

ACTIONS

- Log in to apply
- Read aloud
- Open the employer page

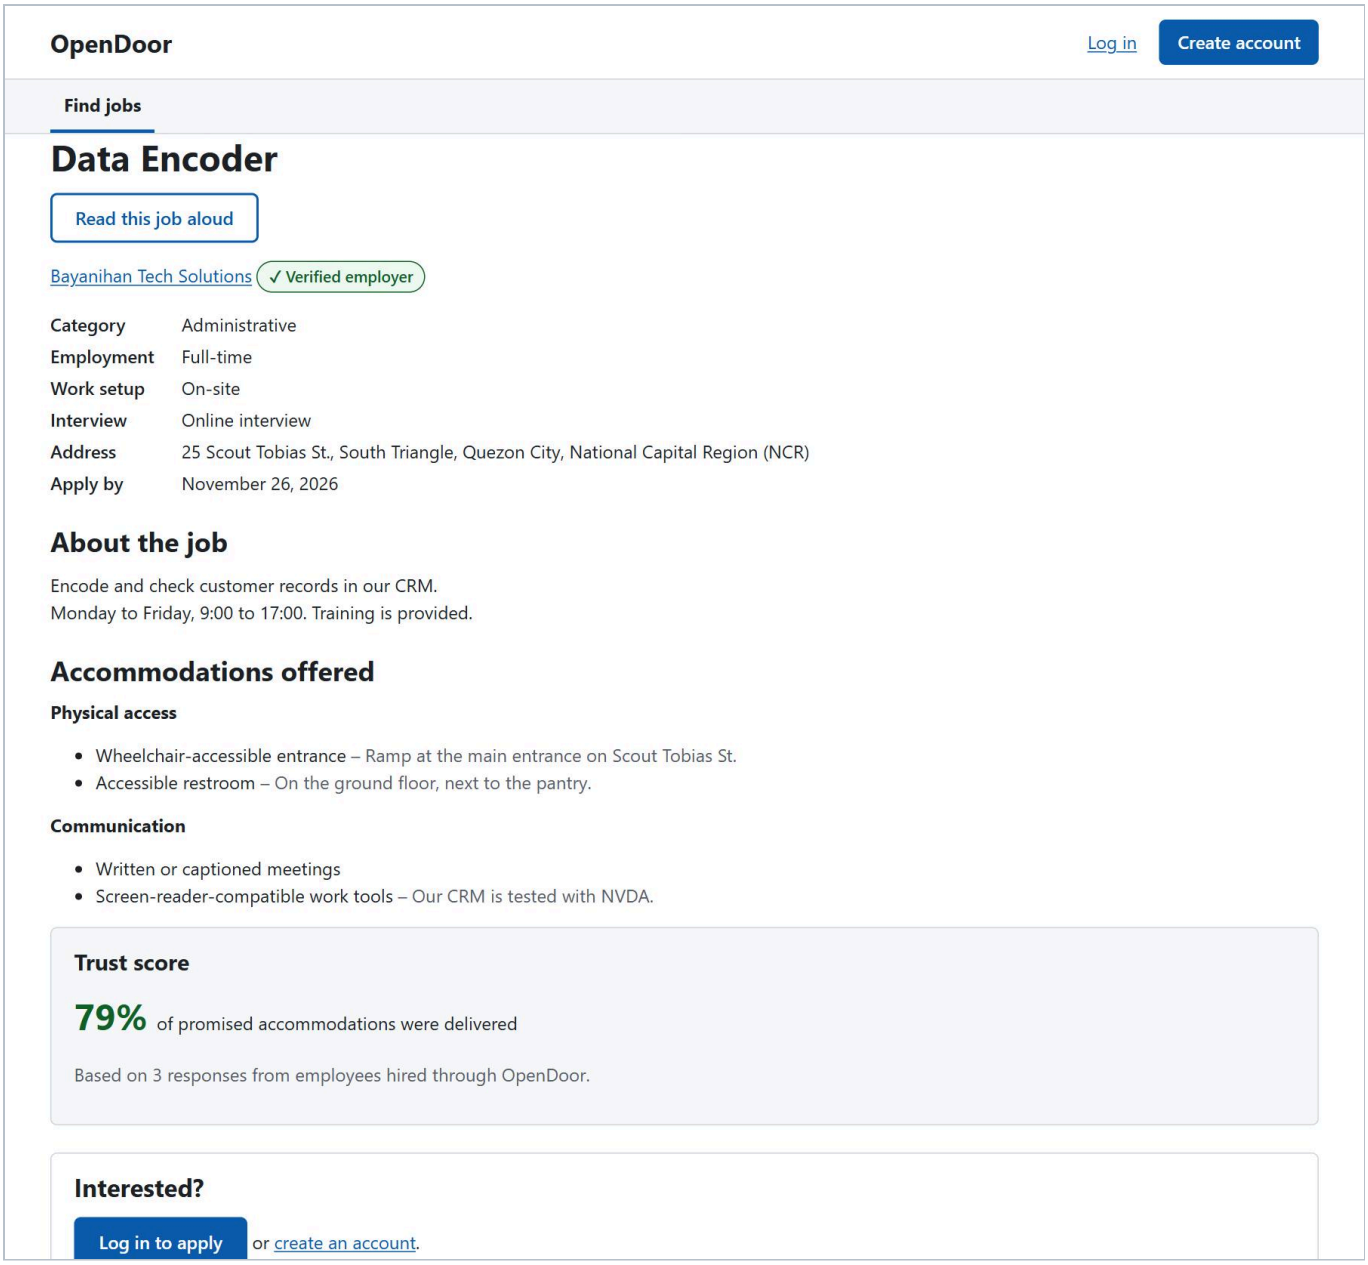

MESSAGES AND STATES

- Snapshot loads separately: "Loading the accessibility snapshot…"
- Snapshot failed: warning "The accessibility snapshot is not available right now. The job details above are complete."
- Partial data notes, e.g. "Nearby places could not be loaded right now." or "Some map information is from an older saved copy…"
- Unknown or unpublished job: "This job could not be loaded"

API

`GET /job-postings/{id}`

`GET /insights/job-postings/{id} (Insights mashup: Core summary + PSGC + Nominatim + Overpass)`

Screenshot – part 1 of 2 `/jobs/1`

Workplace Accessibility Snapshot

Location: Quezon City, National Capital Region (NCR)

What the employer says

Physical access

- Accessible restroom
- Wheelchair-accessible entrance

Communication

- Screen-reader-compatible work tools
- Written or captioned meetings

What hired employees say

79% of promised accommodations were delivered, based on 3 responses.

Accessible places nearby

Places within 500 m that are marked wheelchair accessible on OpenStreetMap.

Transport stops

None found nearby.

Toilets

None found nearby.

Parking

None found nearby.

Other places

- The Marketplace – 427 m away, partly wheelchair accessible
- Army Navy – 447 m away, wheelchair accessible

Screenshot – part 2 of 2 `/jobs/1`

3.4 Employer page

Route	`/employers/{id}`
Who	Everyone
Purpose	Public profile of a company with its trust score and open jobs.

ON THE SCREEN

- h1 company name, logo, Verified badge, "industry · location"
- About the company
- Trust score card with the per-accommodation table "Each accommodation, as rated by hired employees"
- "Open jobs" as job cards

ACTIONS

- Open a job

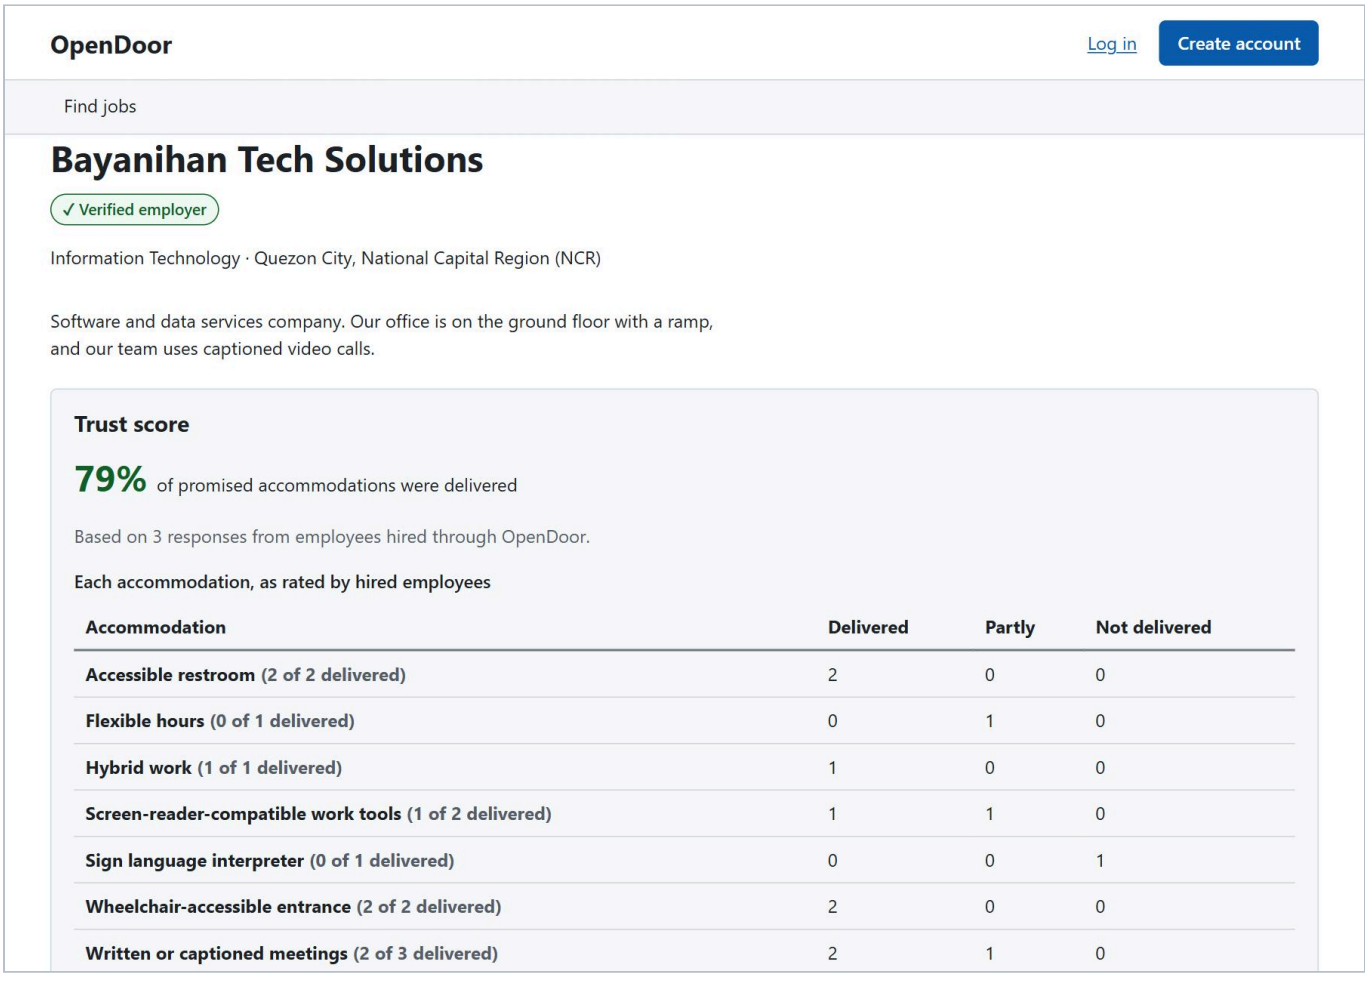

MESSAGES AND STATES

- No jobs: "No open jobs right now"
- Unpublished score: "Not published yet. A score appears after 3 hired employees have rated this employer (2 of 3 so far)."

API

`GET /employers/{id}`

`GET /employers/{id}/trust-score`

OpenDoor – inclusive hiring for persons with disabilities.

Map data © OpenStreetMap contributors. Location lists from the Philippine Standard Geographic Code (PSGC).

Screenshot – part 2 of 2 `/employers/1`

3.5 Log in

Route	`/login`
Who	Guests (signed-in users are sent to their dashboard)
Purpose	Sign in with email and password.

ON THE SCREEN

- Email address (required), Password (required)
- "Log in" button ("Logging in…" while busy)
- "New to OpenDoor? Create an account"

ACTIONS

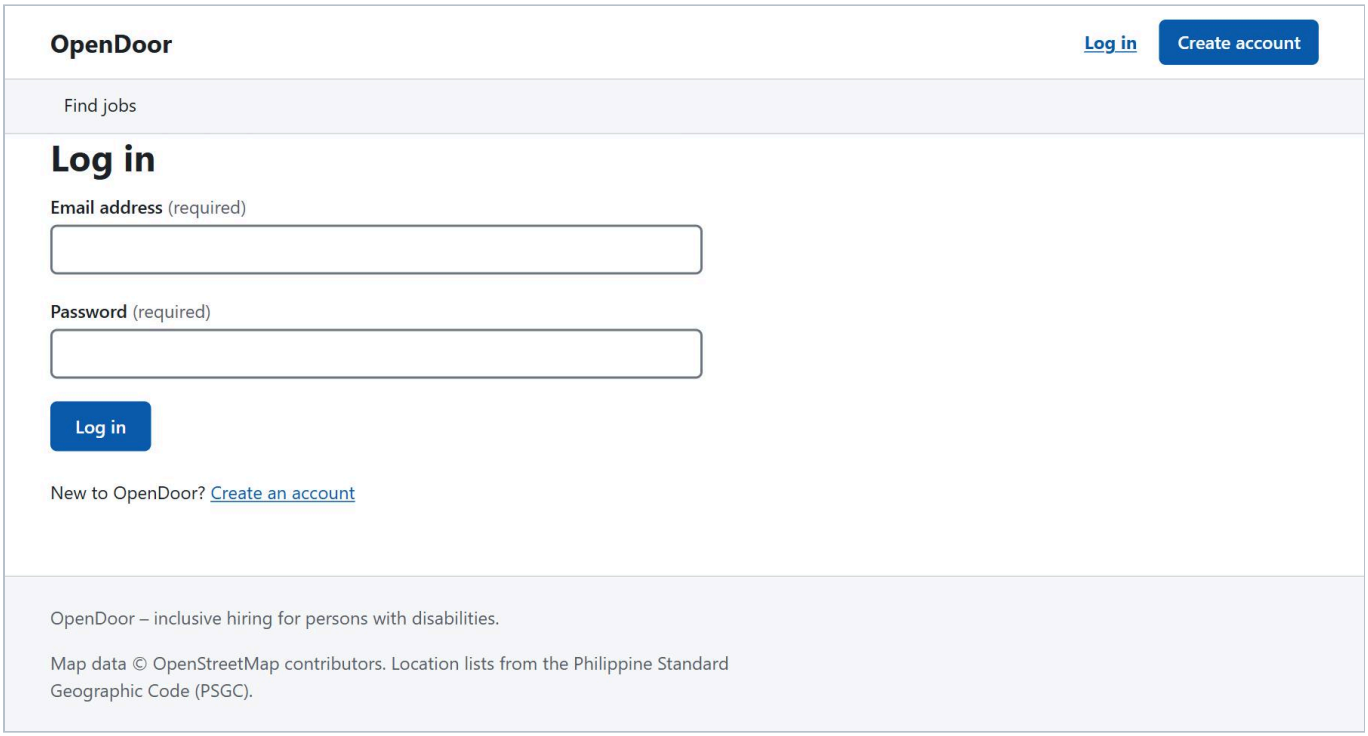

- Log in → the role's dashboard, or back to the page the user was sent from (only inside their own portal)

MESSAGES AND STATES

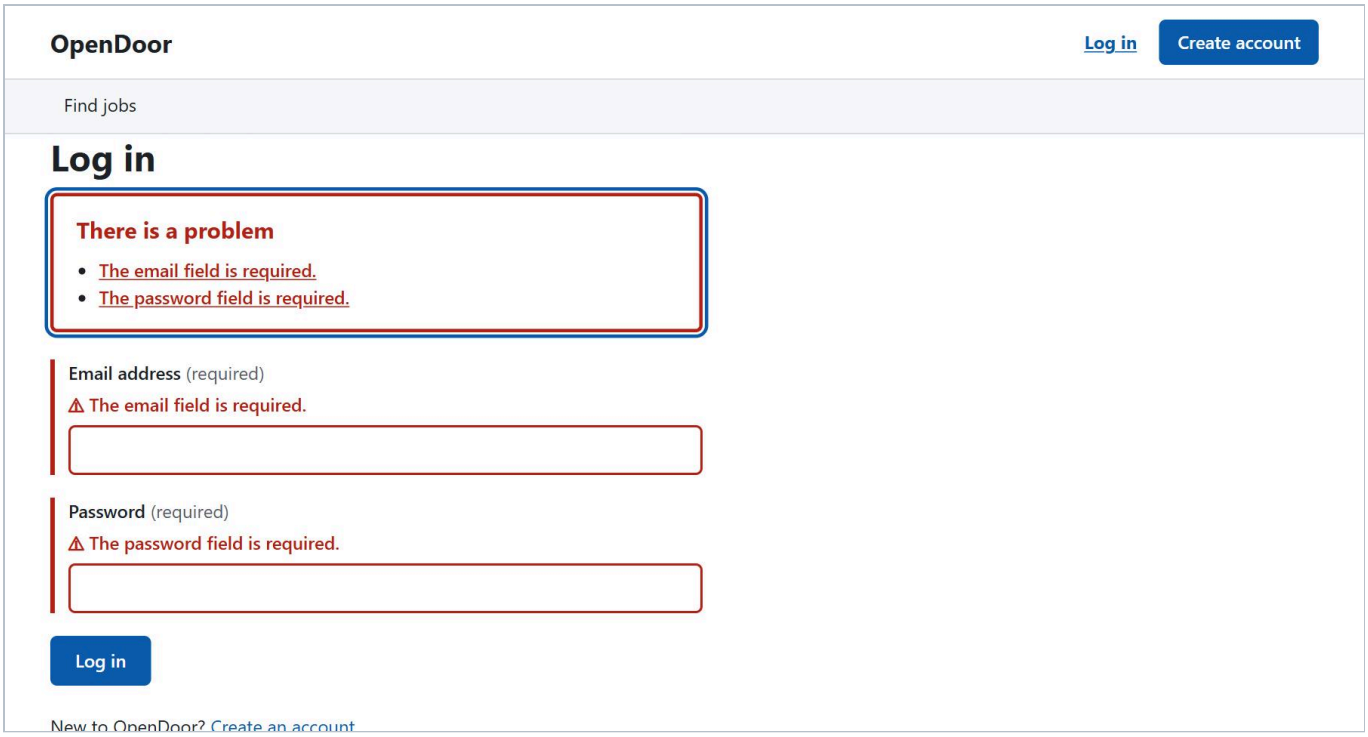

- "Your session has ended – Please log in again to continue." (expired token)
- Wrong email or password: error under Email
- "Your account is suspended – Please contact the OpenDoor administrator…"
- "Too many login attempts – For your security, please wait one minute and try again." (5 per minute)

API

`POST /login`

Screenshot `/login`

After "Log in" with empty fields: error summary and field errors `/login`

3.6 Create account

Route	`/register`
Who	Guests
Purpose	Create a job seeker or employer account with data-privacy consent.

ON THE SCREEN

- Radio group "What brings you to OpenDoor?": "I am looking for a job" (hint: find postings that offer the accommodations you need) / "I am hiring"
- Full name, Email address, Password ("At least 8 characters."), Confirm password
- "Your privacy" notice (needs used only for matching, seen by employers only when you apply, disability type optional and never used for matching – Data Privacy Act RA 10173)
- Consent checkbox "I agree that OpenDoor may process my personal data as described above."
- "Create account" button; "Already have an account? Log in"

ACTIONS

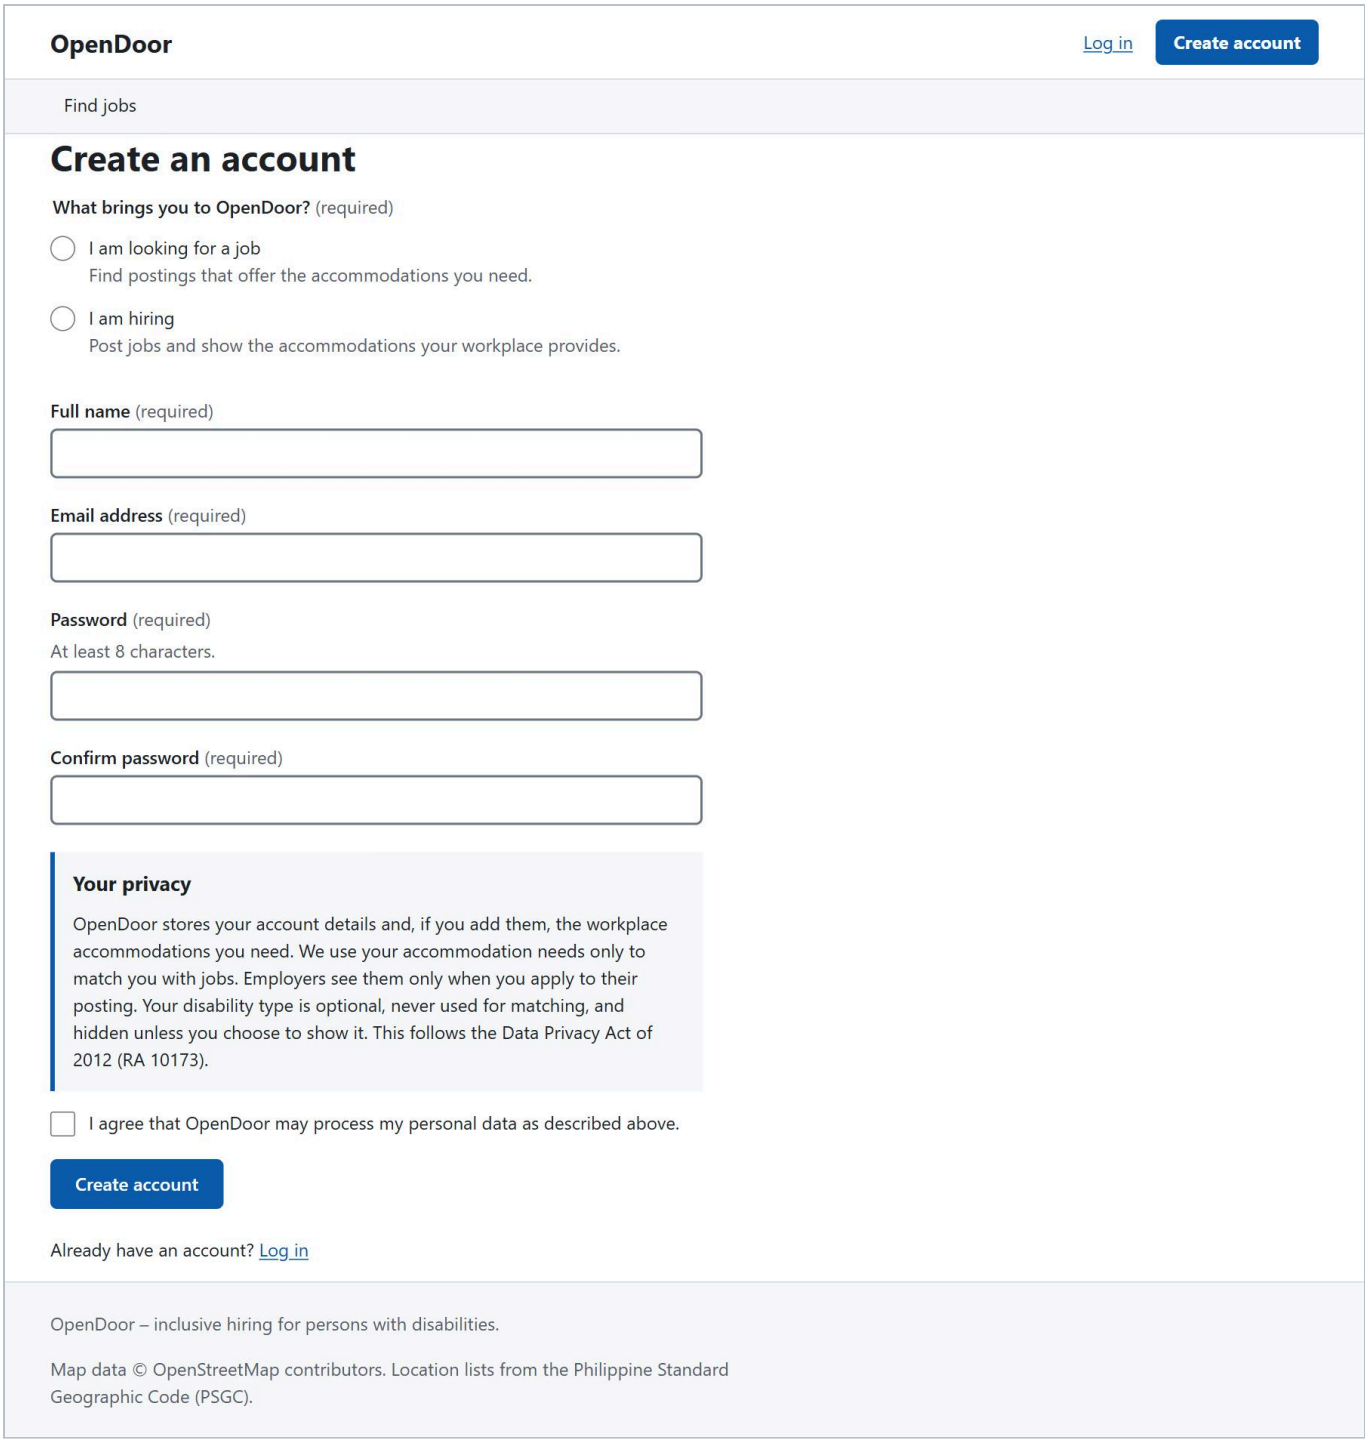

- Create account → job seekers go to Profile and needs, employers to Company profile, each with a "Welcome to OpenDoor" message

MESSAGES AND STATES

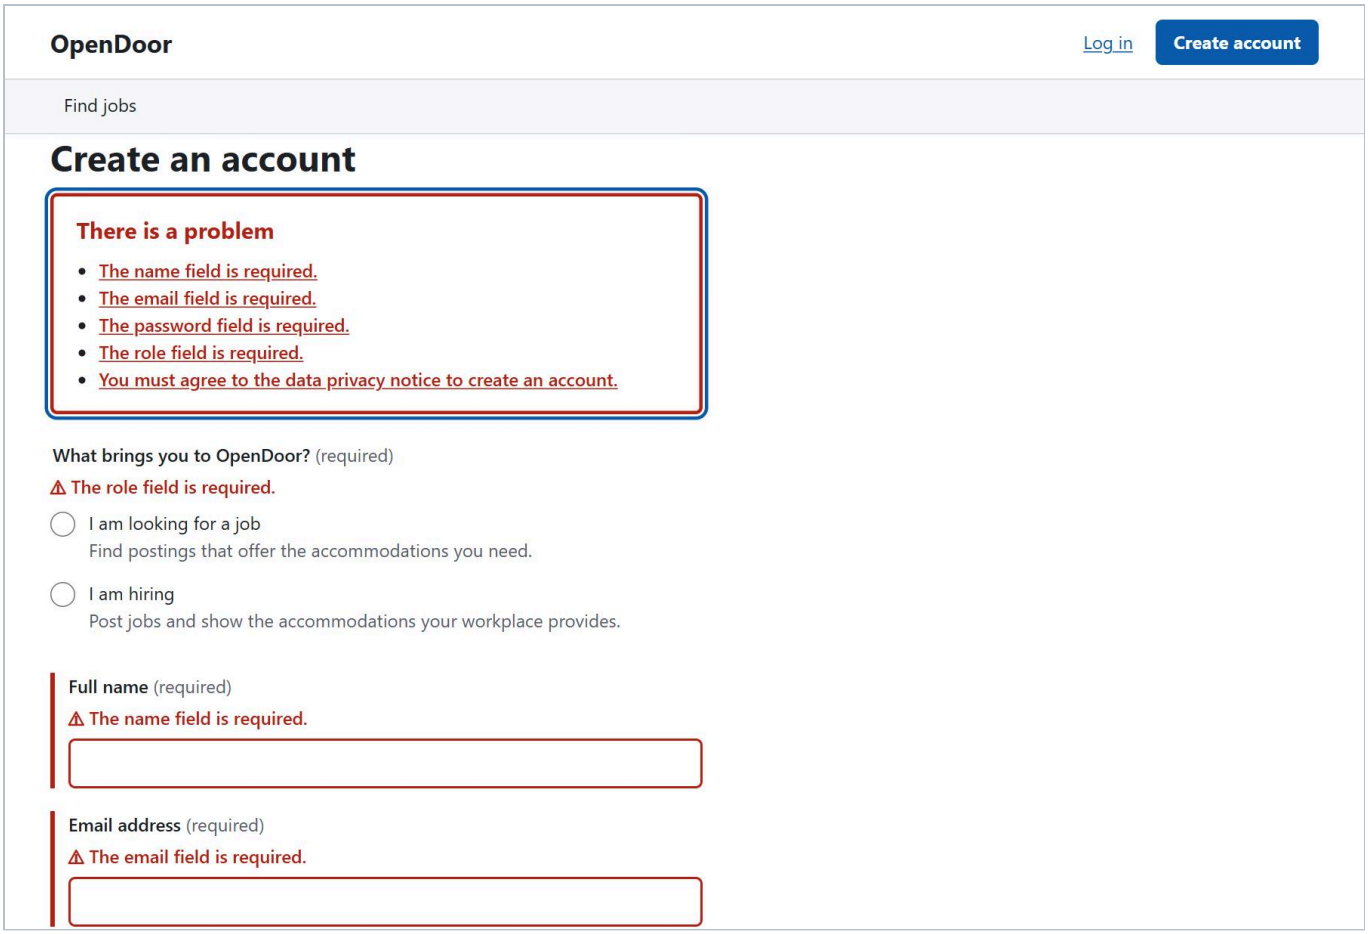

- Error summary with links to the fields (e.g. email already used, passwords do not match, consent missing)

API

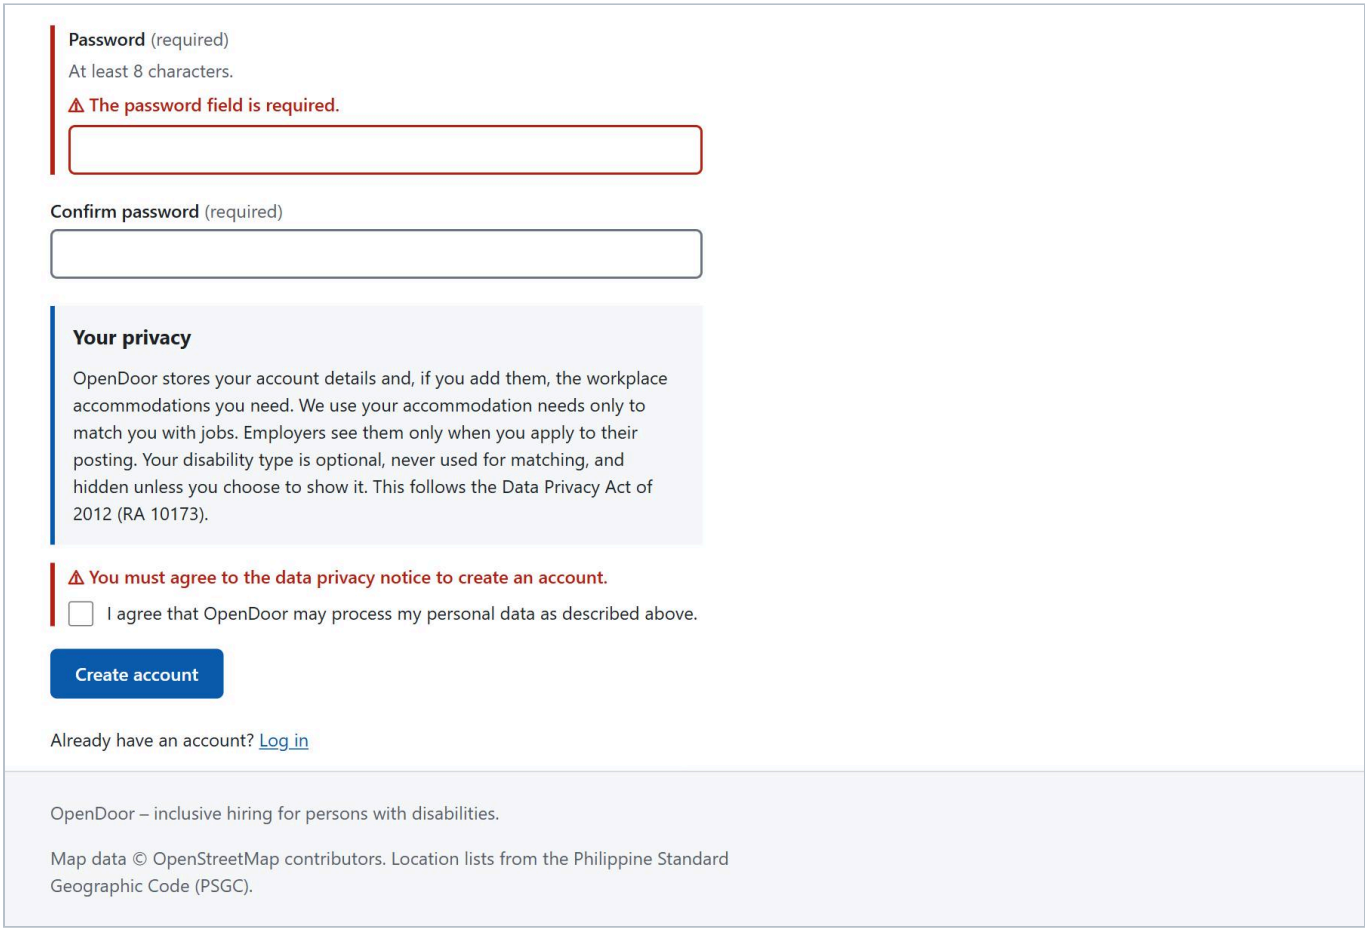

`POST /register`

Screenshot `/register`

After "Create account" with empty fields – part 1 of 2 `/register`

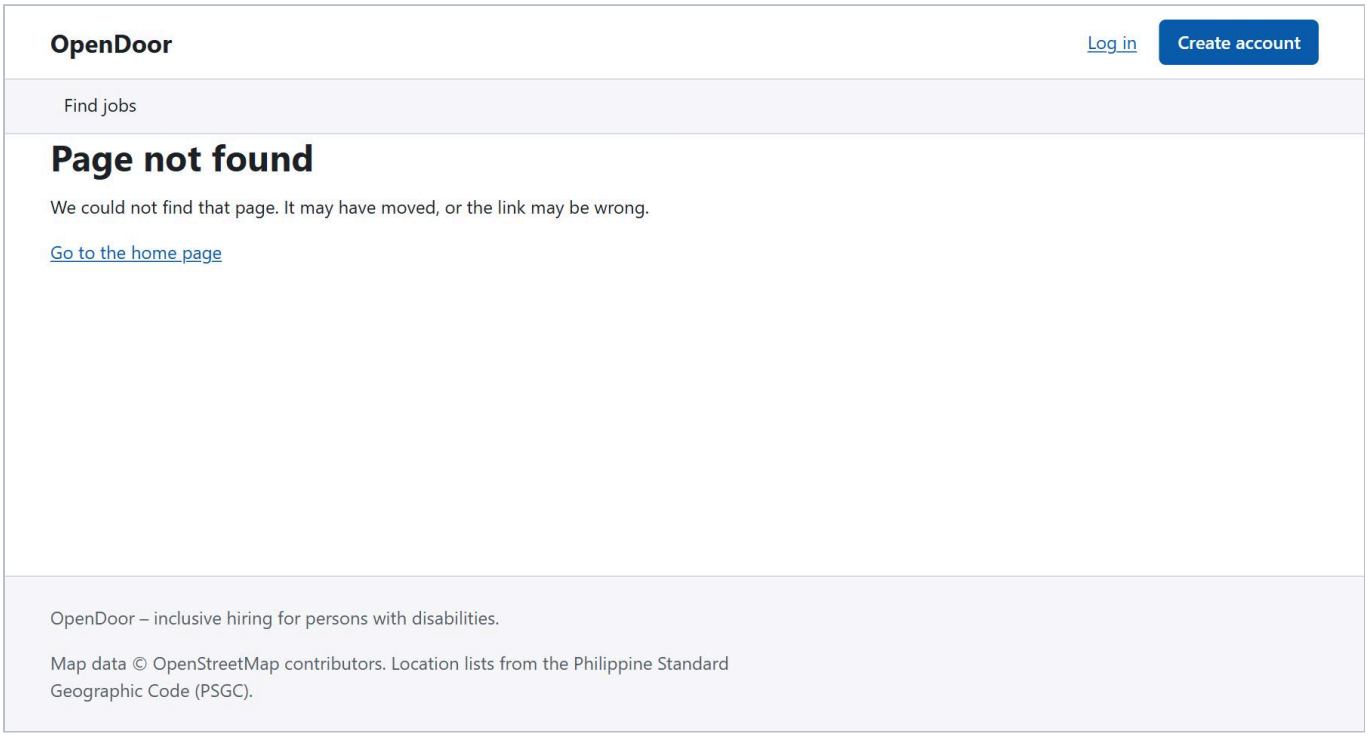

After "Create account" with empty fields – part 2 of 2 `/register`

3.7 Page not found

Route	`any unknown address`
Who	Everyone
Purpose	Friendly 404.

ON THE SCREEN

- "We could not find that page. It may have moved, or the link may be wrong."
- Link "Go to the home page"

Screenshot `/no-such-page`

4 Job seeker screens

Demo: Maria Santos (`candidate@opendoor.test`, needs saved) and Juan Dela Cruz (`candidate2@opendoor.test`, hired, can rate). Tabs: Dashboard · Find jobs · My applications · Saved jobs · Profile and needs. Header: Notifications (unread count), "Maria Santos (Job seeker)" → Account settings, Log out.

4.1 Dashboard

Route	`/candidate/dashboard`
Who	Job seeker
Purpose	Start page after login: where my applications stand and what to do next.

ON THE SCREEN

- h1 "Welcome, {name}"
- Callout "Add your accommodation needs so we can show which jobs offer them." + "Add my needs" (only when no needs are saved)
- Tiles "Your applications": Submitted, Reviewed, Hired, Not selected, Withdrawn – each opens My applications filtered by that status
- "Jobs for you": "1 open job offers all the accommodations you need. See matching jobs"
- "Ratings to give": hired, unrated jobs – "rate the accommodations now" link, or "you can rate from {date}"

ACTIONS

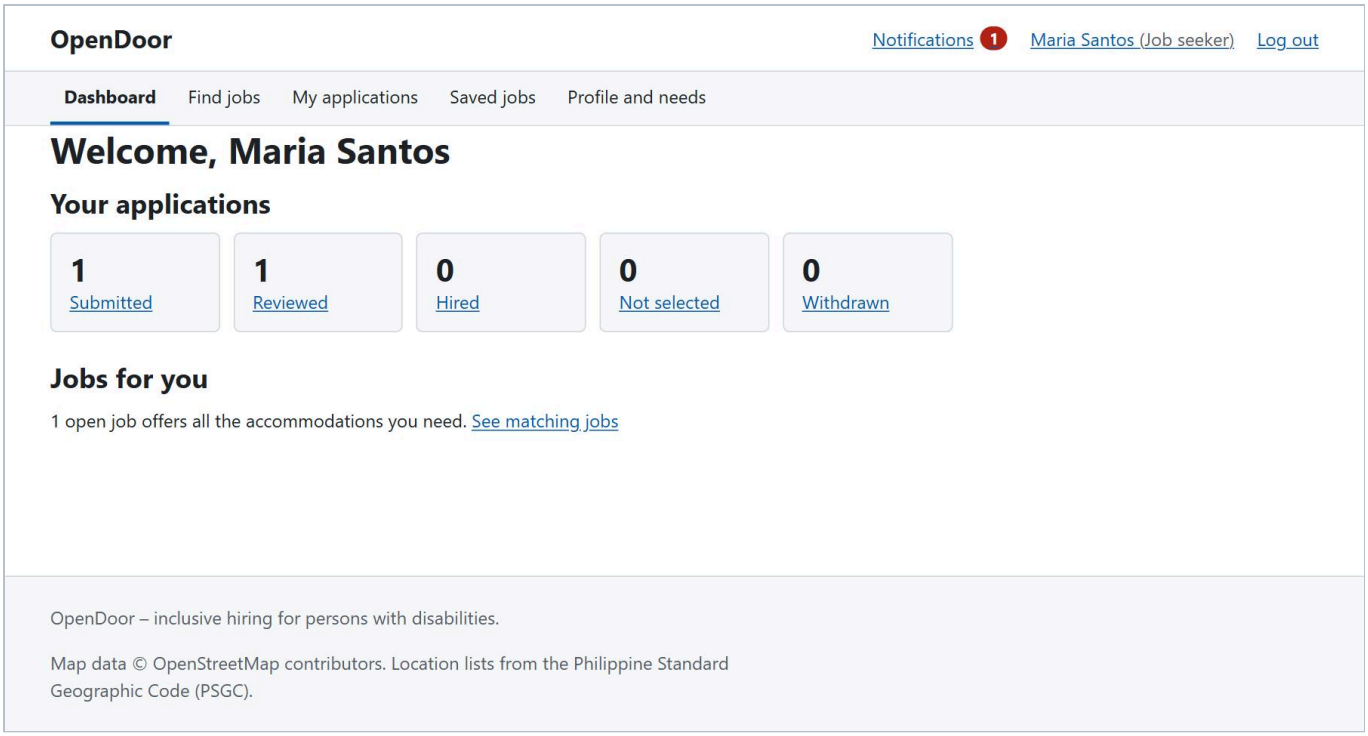

- Jump to filtered applications, matching jobs, profile or the feedback form

MESSAGES AND STATES

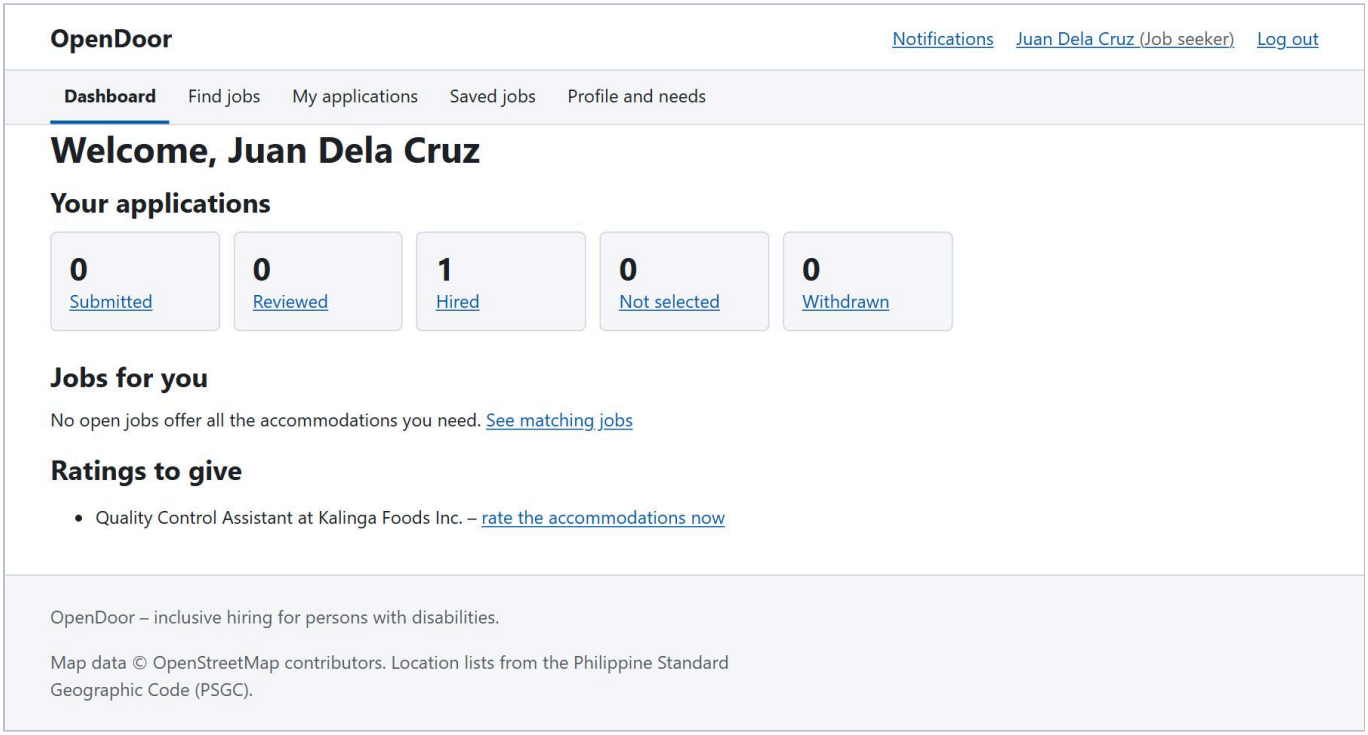

- "Loading your summary…"

API

`GET /candidate/dashboard`

Screenshot `/candidate/dashboard`

A hired job seeker: "Ratings to give" `/candidate/dashboard`

4.2 Profile and needs

Route	`/candidate/profile`
Who	Job seeker
Purpose	The data used for matching and shown to employers when applying.

ON THE SCREEN

- Card "Accommodations you need": explanation (matching only; employers see them only when you apply), grouped checklist with descriptions and "3 selected.", button "Save my needs"
- Card "About you": Headline (hint "Data encoder with 3 years of experience."), Skills ("Separate skills with commas."), Work experience (with Speak), "Where you live" location picker, fieldset "Disability (optional)" with Disability type and – only when filled – checkbox "Show my disability type to employers I apply to"; button "Save profile"
- Card "Résumé": link "View your current résumé (PDF, opens in a new tab)" or "You have not uploaded a résumé yet."; file input "Upload / Replace résumé" ("PDF only, up to 5 MB."); button "Upload"

ACTIONS

- Each card saves on its own and confirms below its button ("Your needs are saved.", "Your profile is saved.", "Your résumé is uploaded.")

MESSAGES AND STATES

- First visit after registering: success "Welcome to OpenDoor – Start by choosing the accommodations you need…"
- Résumé checks before upload: "Choose a PDF file.", "The file is larger than 5 MB."

API

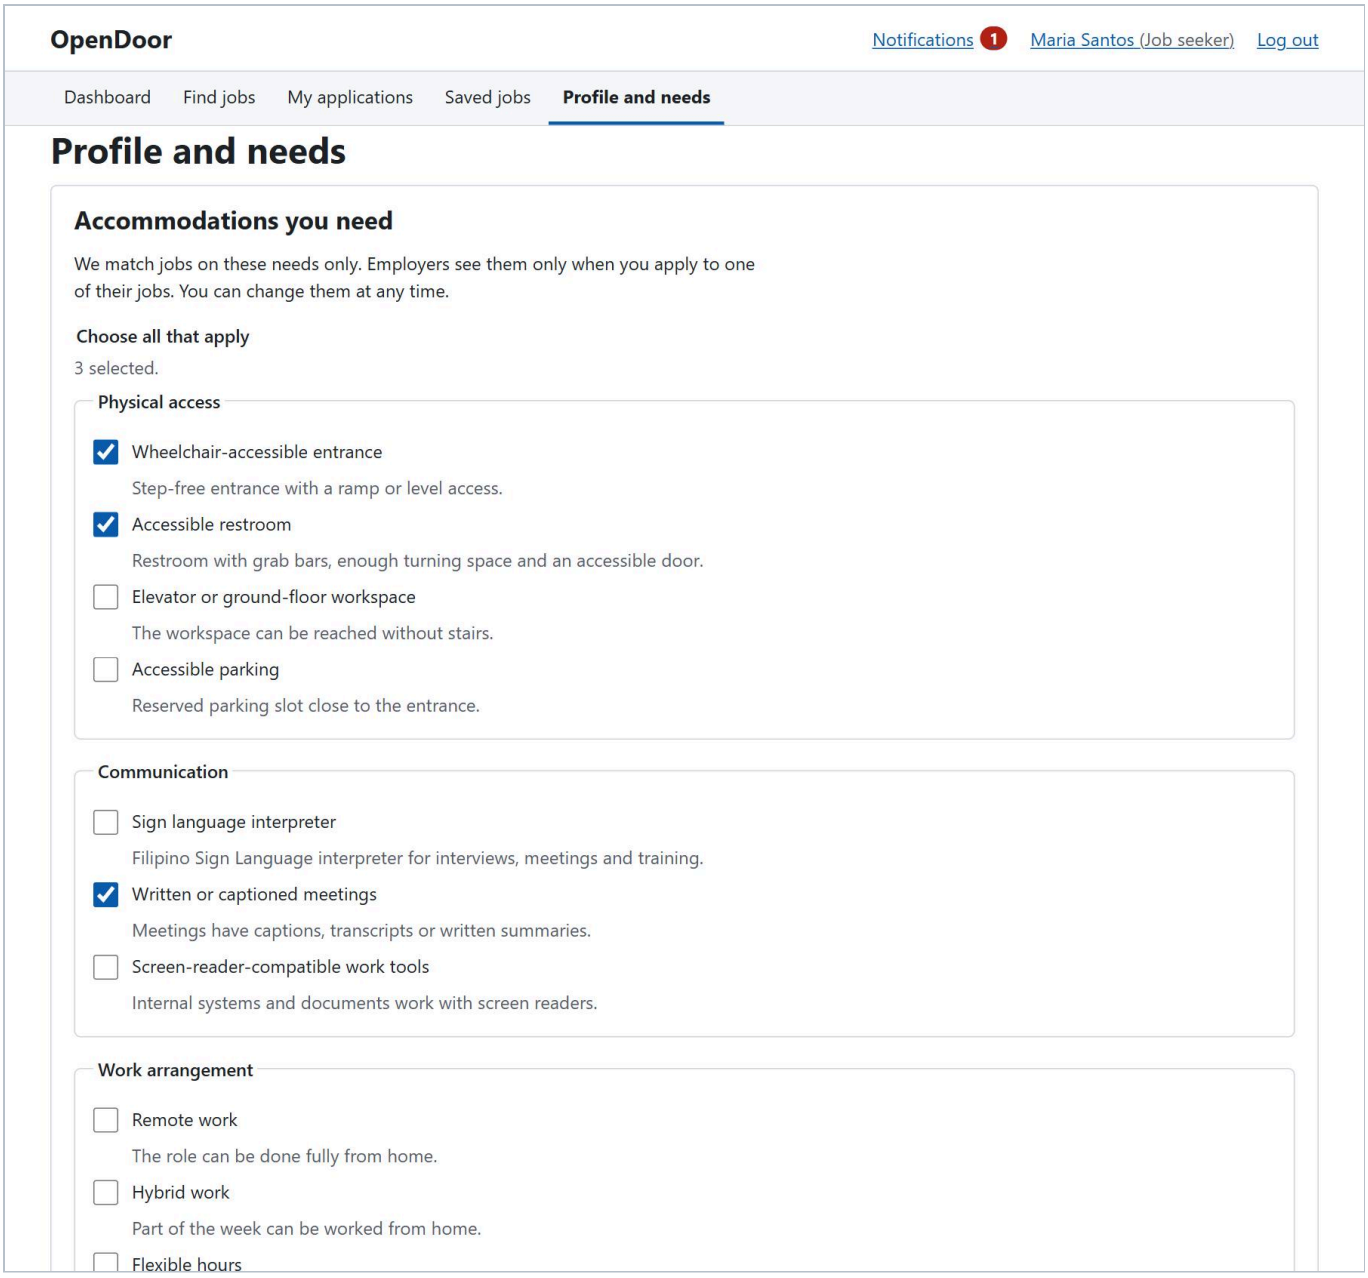

`GET, PUT /candidate/profile`

`PUT /candidate/accommodations {accommodation_ids}`

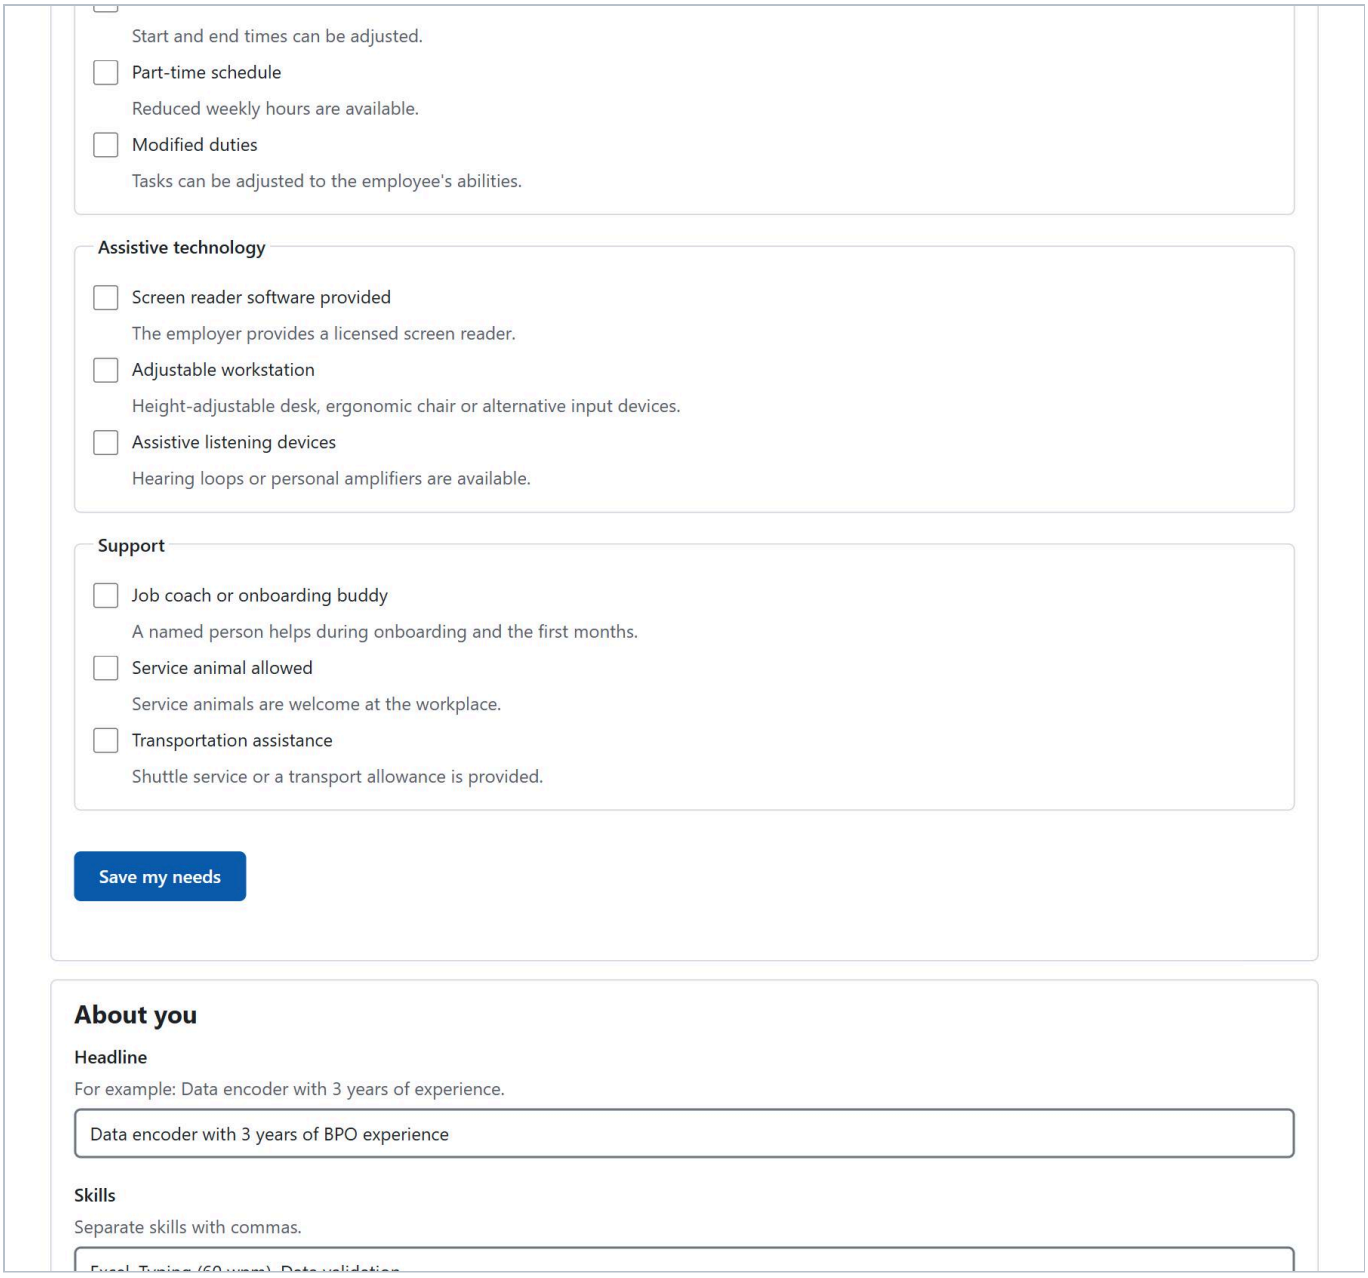

`POST /candidate/resume (multipart)`

`GET /accommodations`

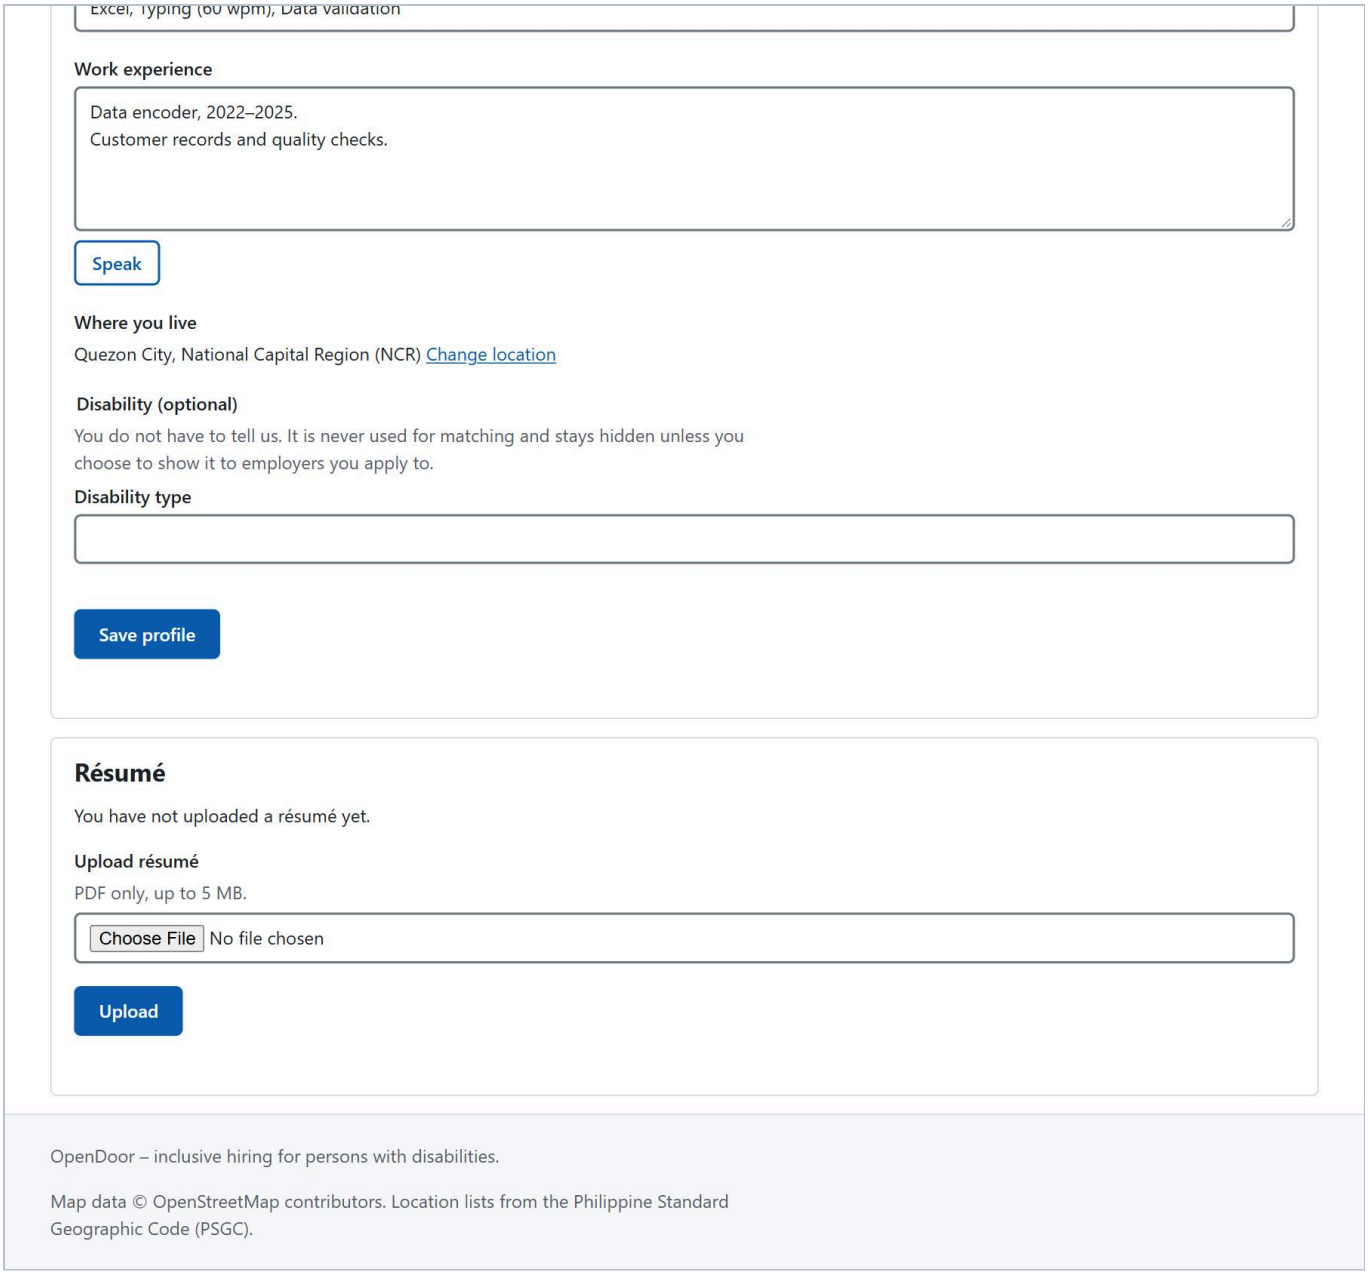

`GET /insights/locations/{regions|provinces|cities}`

Screenshot – part 1 of 3 `/candidate/profile`

Screenshot – part 2 of 3 `/candidate/profile`

Screenshot – part 3 of 3 `/candidate/profile`

4.3 Find jobs with "Matches my needs"

Route	`/candidate/jobs`
Who	Job seeker
Purpose	The guest search plus ranking by the job seeker's needs.

ON THE SCREEN

- Everything from 3.2
- Checkbox "Matches my needs" (on by default; hint "Show jobs that offer the accommodations in your profile first.")
- Match badge on each card

ACTIONS

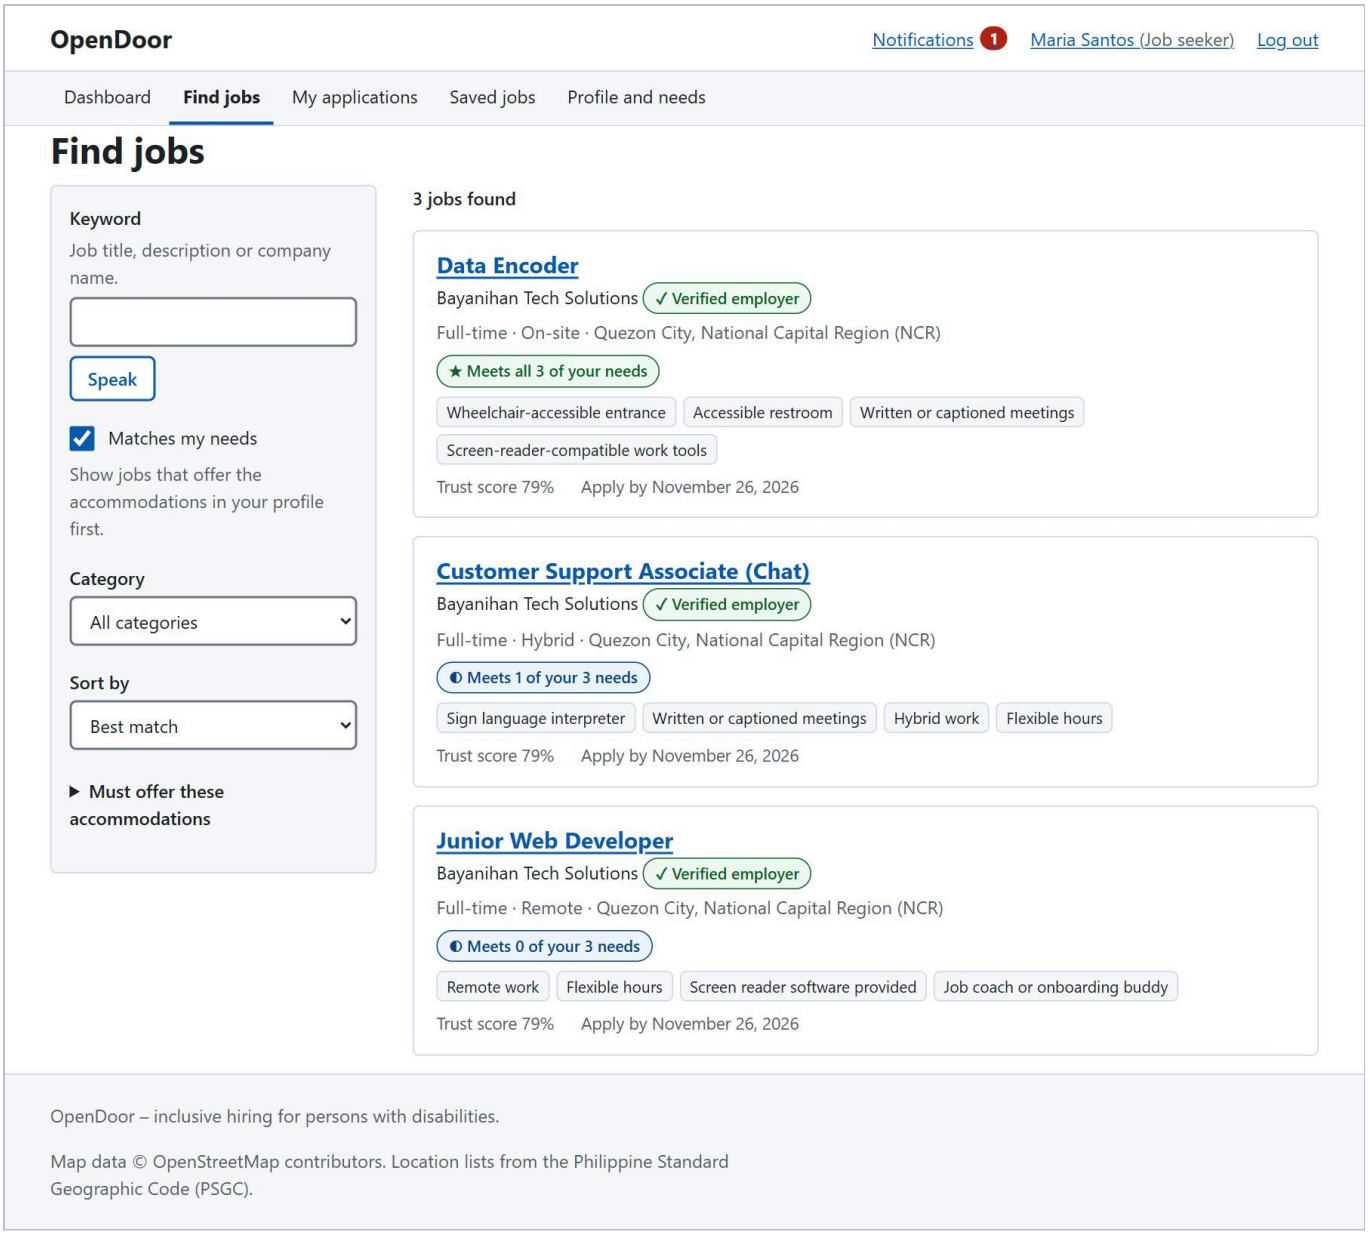

- "Best match" sorts by needs met, then newest
- Untick "Matches my needs" for a plain search

MESSAGES AND STATES

- No needs saved: info "Add the accommodations you need to your profile to see which jobs match them."

API

`GET /job-postings?…&match=1`

Screenshot `/candidate/jobs`

4.4 Job details – apply, save, report

Route	`/candidate/jobs/{id}`
Who	Job seeker
Purpose	Decide, apply, bookmark or report.

ON THE SCREEN

- Everything from 3.3, plus the detailed match badge: "Not mentioned in this posting: …" and "You can ask the employer about these when you apply."
- Card "Apply for this job": Cover note (optional, 2,000 characters, Speak, counter), Interview accommodation request (optional, 1,000 characters; hint names the interview format and examples "sign language interpreter, extra time, captions"), button "Send application"
- Already applied: card "Your application" – "You applied on {date}. Status: {badge} View your application"
- "Save job" toggle (pressed state "Saved") NEW and link-style "Report this job"

ACTIONS

- Send application → success "Application sent – The employer will review it. You can follow its status in My applications."
- Save job / Saved (announced: "Saved. Find it under Saved jobs.")
- Report → dialog "What is wrong with this posting?" (required, 1,000 characters; hint "misleading accommodations, discriminatory wording, or a scam") → "Send report"; the link becomes "Reported – thank you"

MESSAGES AND STATES

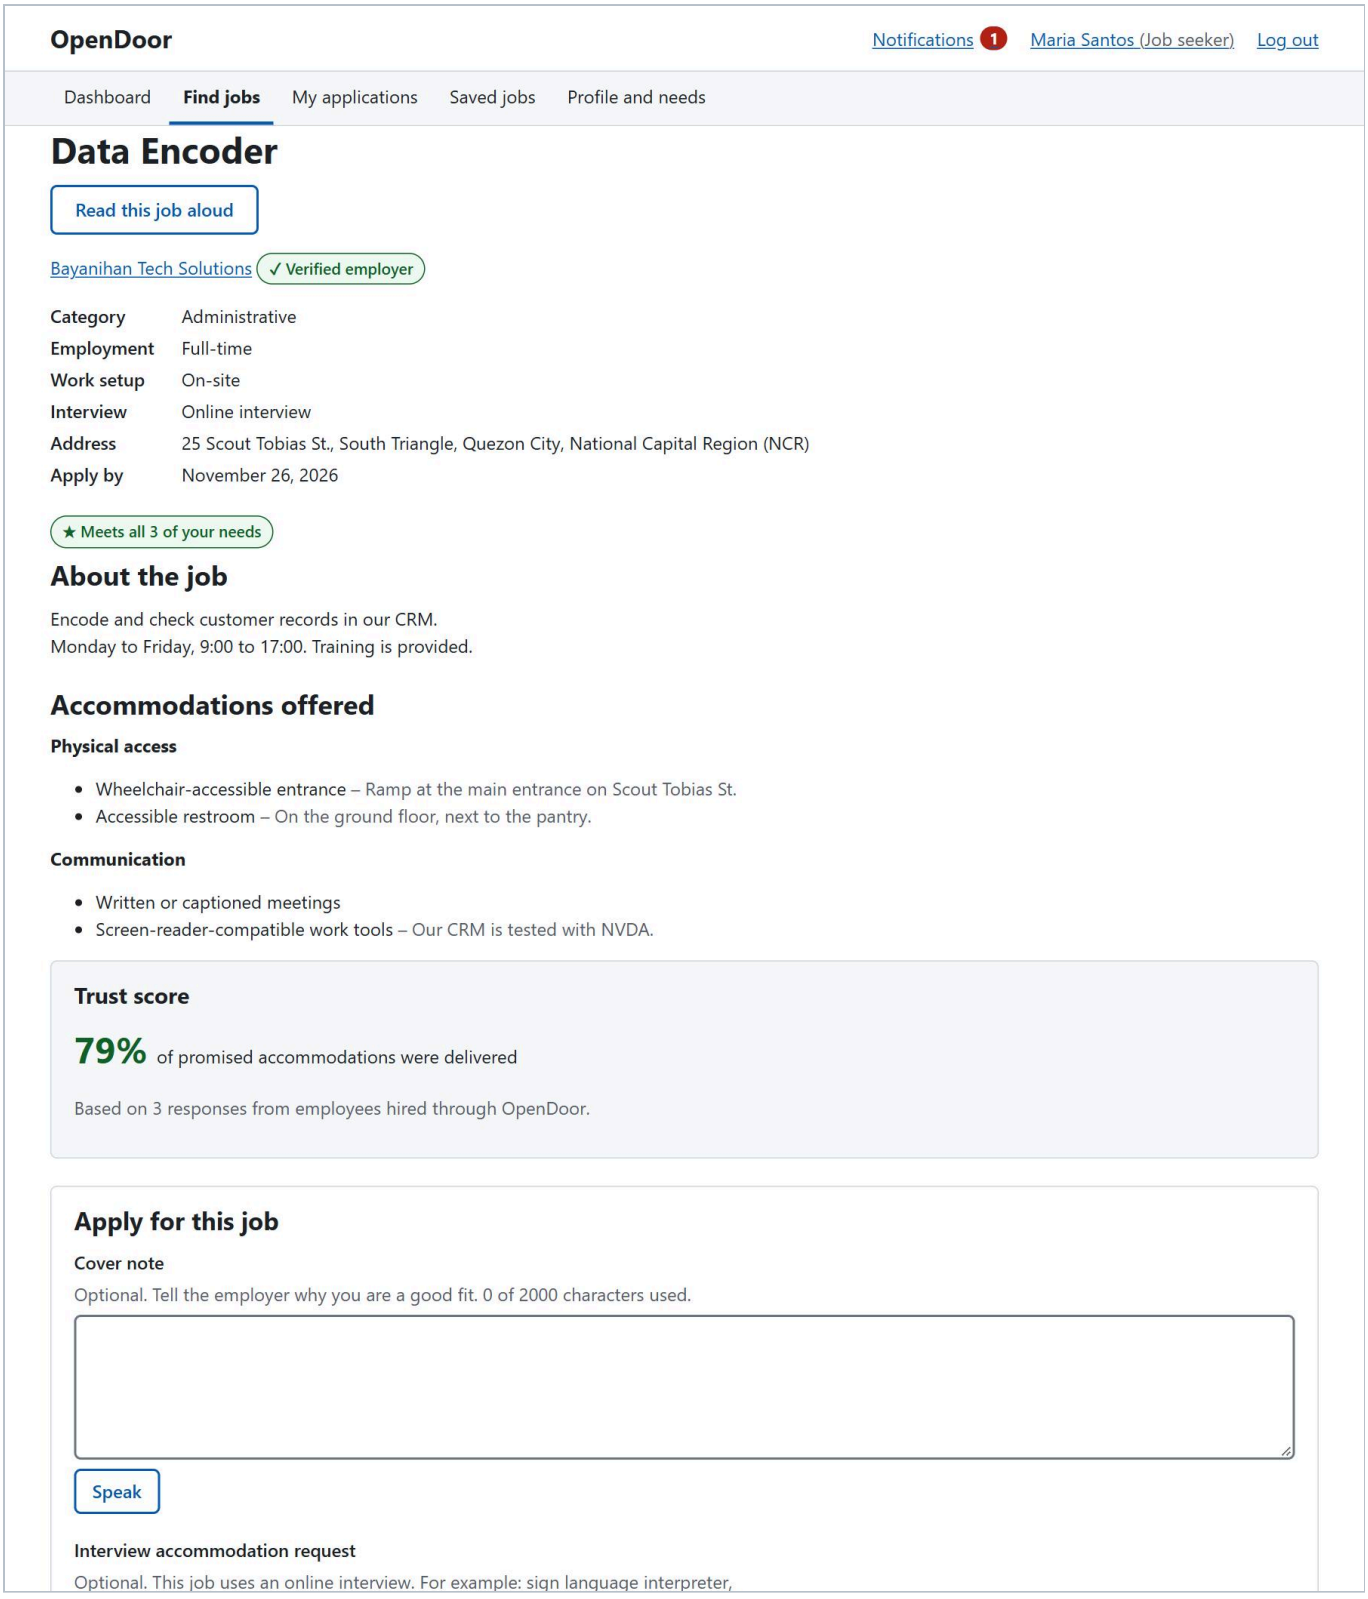

- "You have already applied to this job. You can follow it in My applications."
- "This job is no longer accepting applications."
- Only one open report per job seeker and job

API

`POST /job-postings/{id}/applications`

`POST, DELETE /candidate/saved-jobs/{id}`

`POST /job-postings/{id}/reports {reason}`

Screenshot – part 1 of 2 `/candidate/jobs/1`

extra time, captions. 0 of 1000 characters used.

Screenshot – part 2 of 2 `/candidate/jobs/1`

A job that meets only part of the needs: the badge lists what is missing `/candidate/jobs/3`

"Report this job" dialog `/candidate/jobs/1`

4.5 My applications

Route	`/candidate/applications`
Who	Job seeker
Purpose	All applications with their status.

ON THE SCREEN

- "Show" select: All applications or one status
- Announced count ("2 applications")
- Table: Job (link) · Employer · Applied · Status badge
- Pagination

ACTIONS

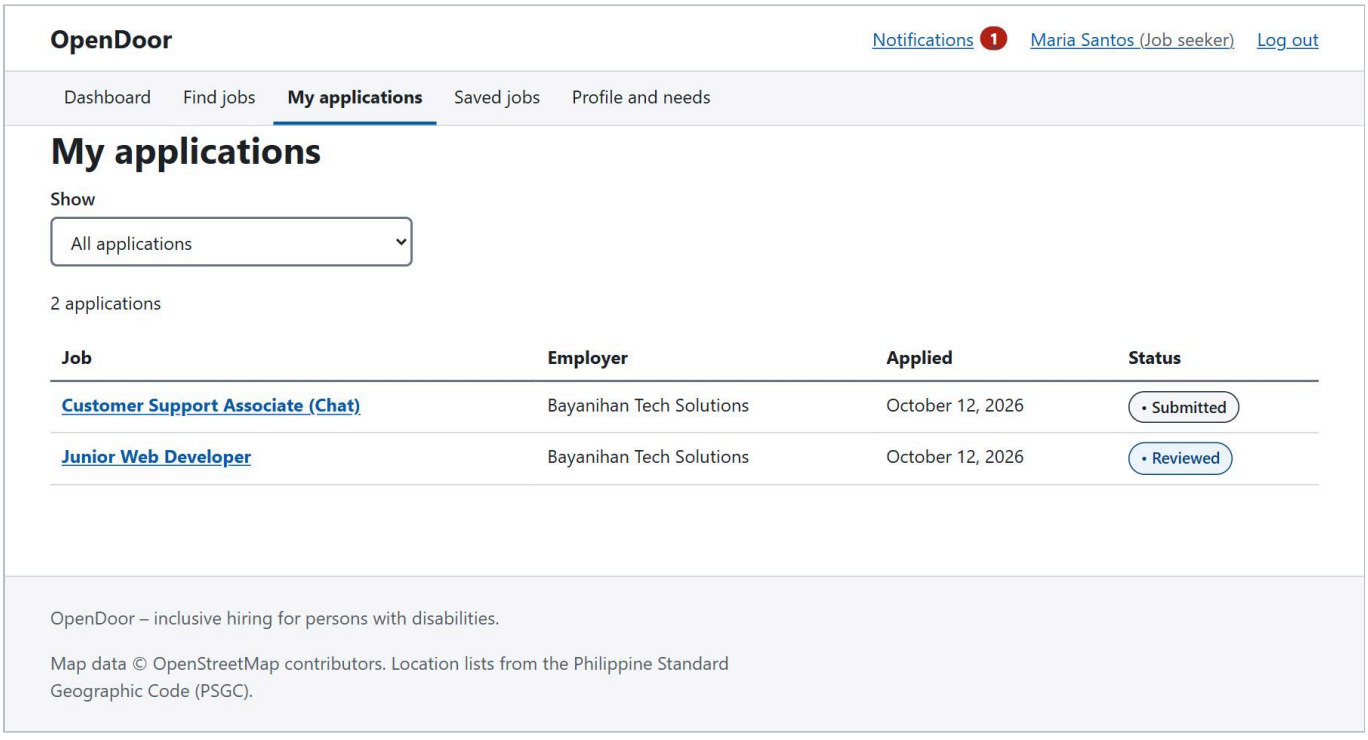

- Open an application
- Filter by status (also from the dashboard tiles)

MESSAGES AND STATES

- "You have not applied to any jobs yet" + "Find jobs that match your needs"
- "No applications with this status"

API

```
GET /applications?status=&page=
```

Screenshot `/candidate/applications`

4.6 Application details

Route	`/candidate/applications/{id}`
Who	Job seeker (own applications)
Purpose	Follow one application and act on it.

ON THE SCREEN

- h1 job title, "Read this application aloud"
- "View the job · {company}"
- Status badge
- Applied, Hired (date), Cover note, Interview request
- Hired only: card "Rate your accommodations"

ACTIONS

- "Withdraw application" (Submitted or Reviewed) → confirm "Withdraw this application? The employer will no longer consider you for this job. You cannot undo this."
- "I was hired" (Reviewed) → confirm "30 days after today you will be asked to rate whether the promised accommodations were provided."
- Rating card: before day 30 "You can rate the accommodations from {date} (30 days after your hire date)."; from day 30 button "Rate accommodations"; afterwards "You have rated … Thank you – your answers are anonymous."

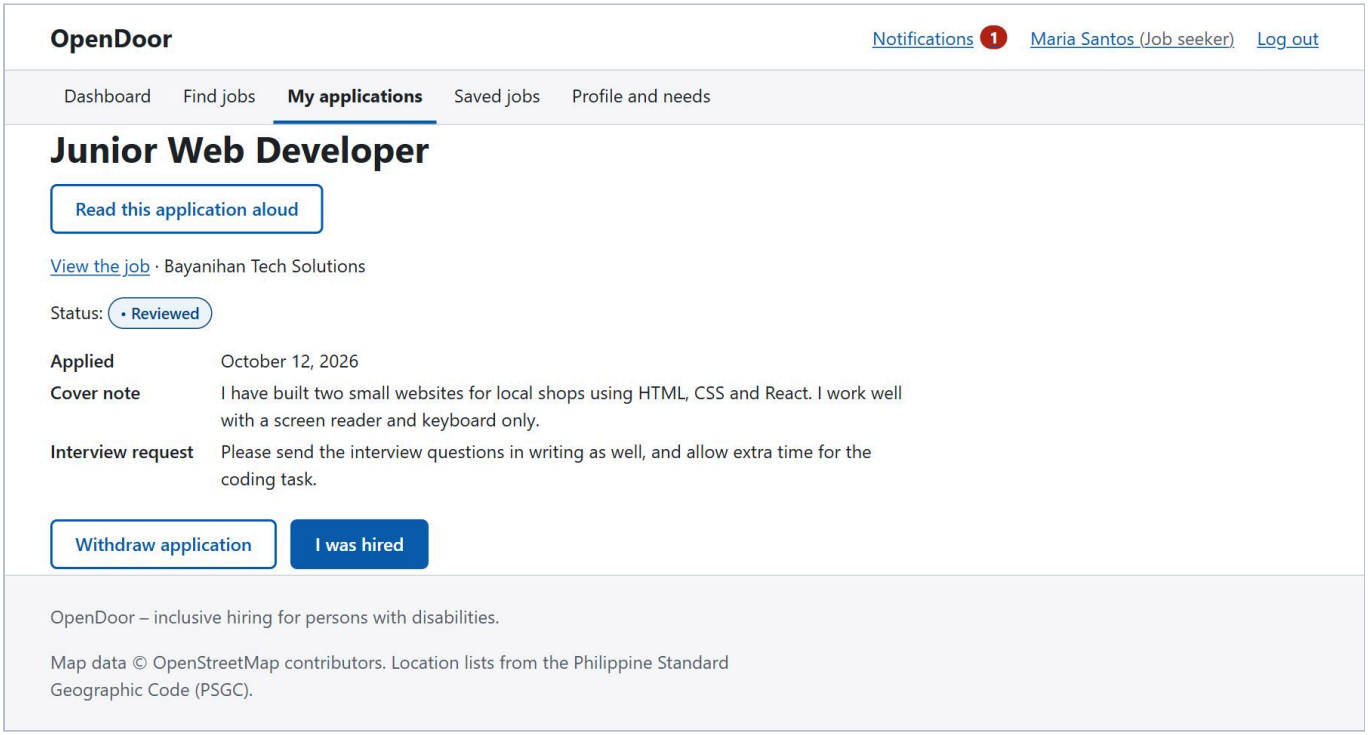

MESSAGES AND STATES

- "Congratulations! Your hire is recorded." / "Your application was withdrawn."
- Error "The status was not changed"

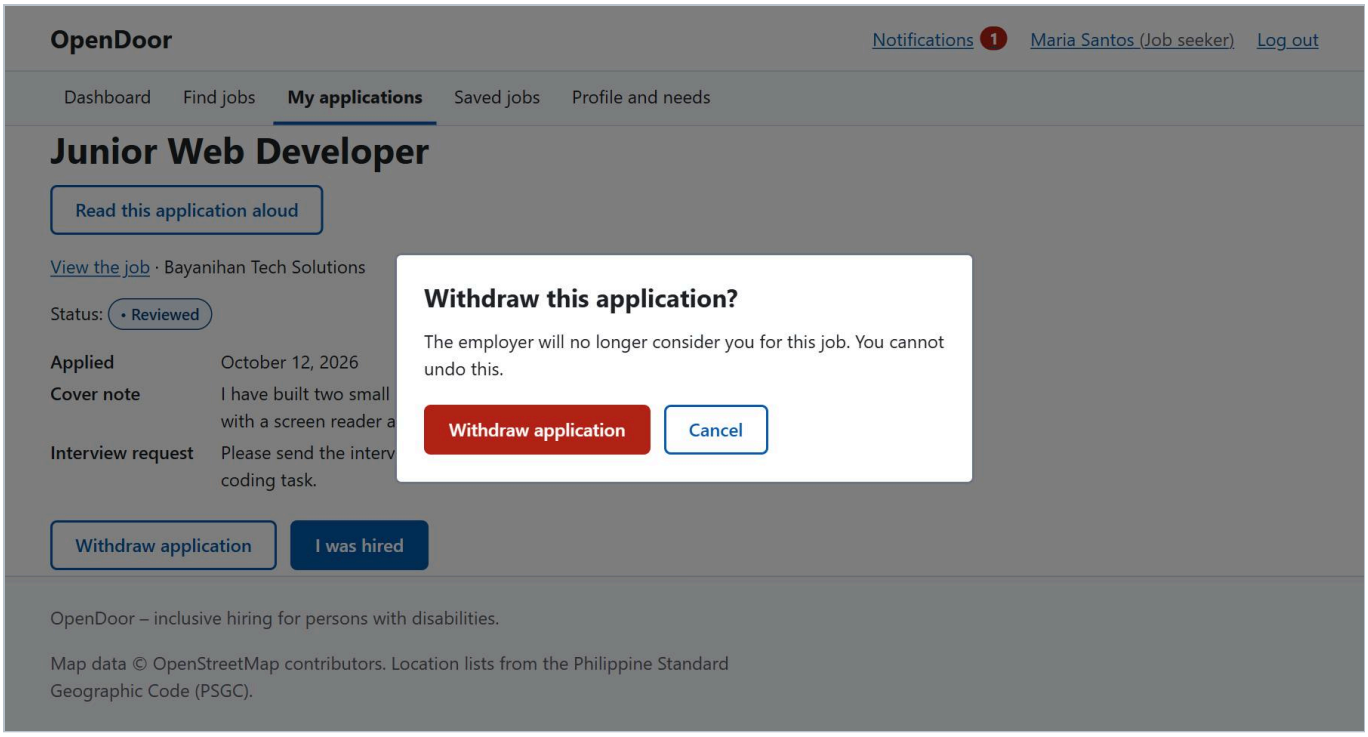

API

`GET /applications/{id}`

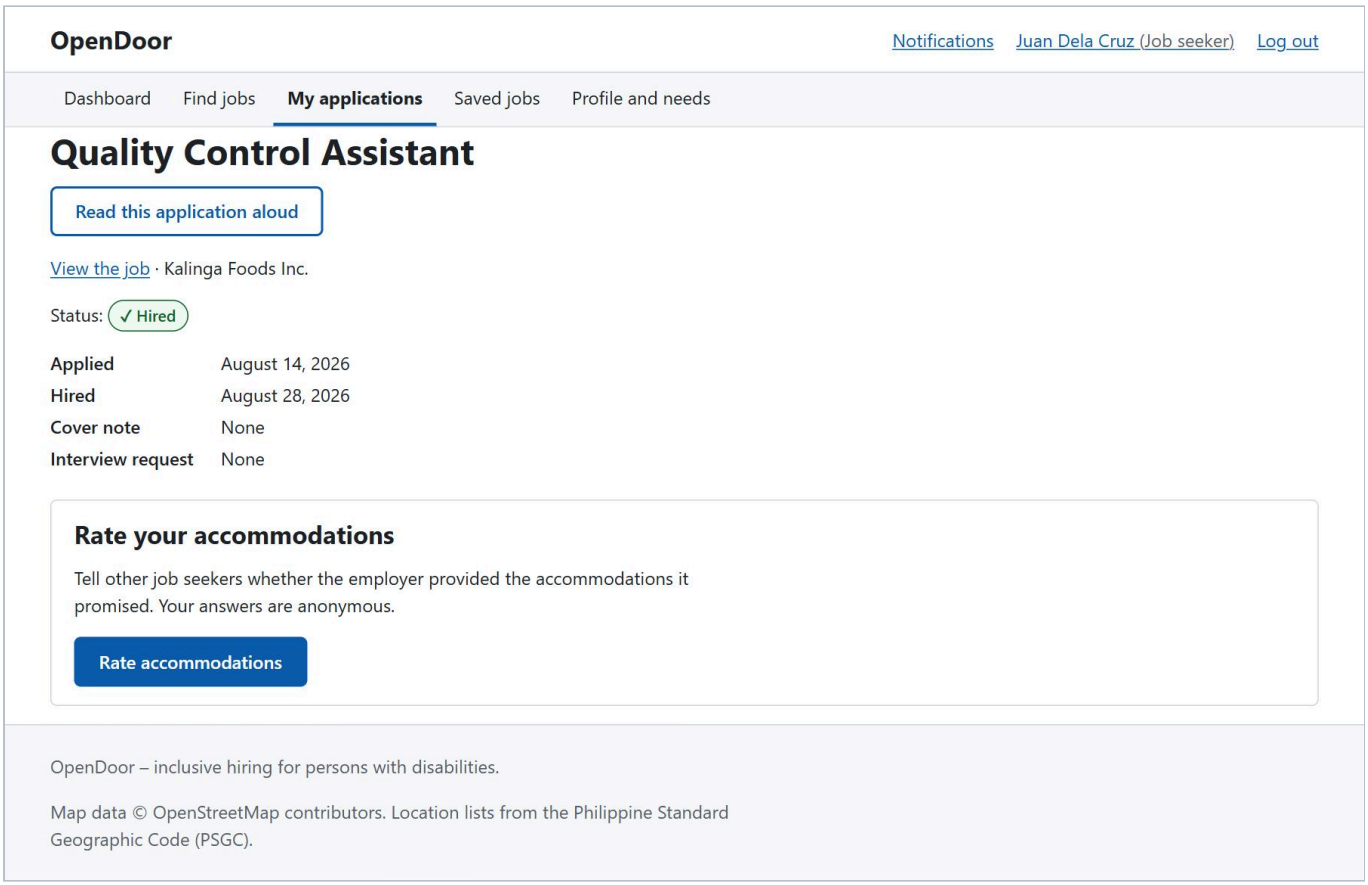

`PATCH /applications/{id}/status {withdrawn|hired}`

Screenshot `/candidate/applications/7`

Confirm dialog for withdrawing (focus starts on Cancel) `/candidate/applications/7`

A hired application: the rating card `/candidate/applications/6`

4.7 Rate your accommodations

Route	`/candidate/applications/{id}/feedback`
Who	Job seeker who was hired at least 30 days ago
Purpose	Anonymous rating of every accommodation the posting promised at the time of hire – this feeds the employer's trust score.

ON THE SCREEN

- Explanation (anonymous: the employer sees only the combined score)
- One required radio group per accommodation: Delivered / Partly delivered / Not delivered
- Comments (optional, "Do not include names.", 2,000 characters, Speak)
- Button "Submit ratings"

ACTIONS

- Submit → "Thank you – Your ratings are saved. They help other job seekers know which employers keep their promises."

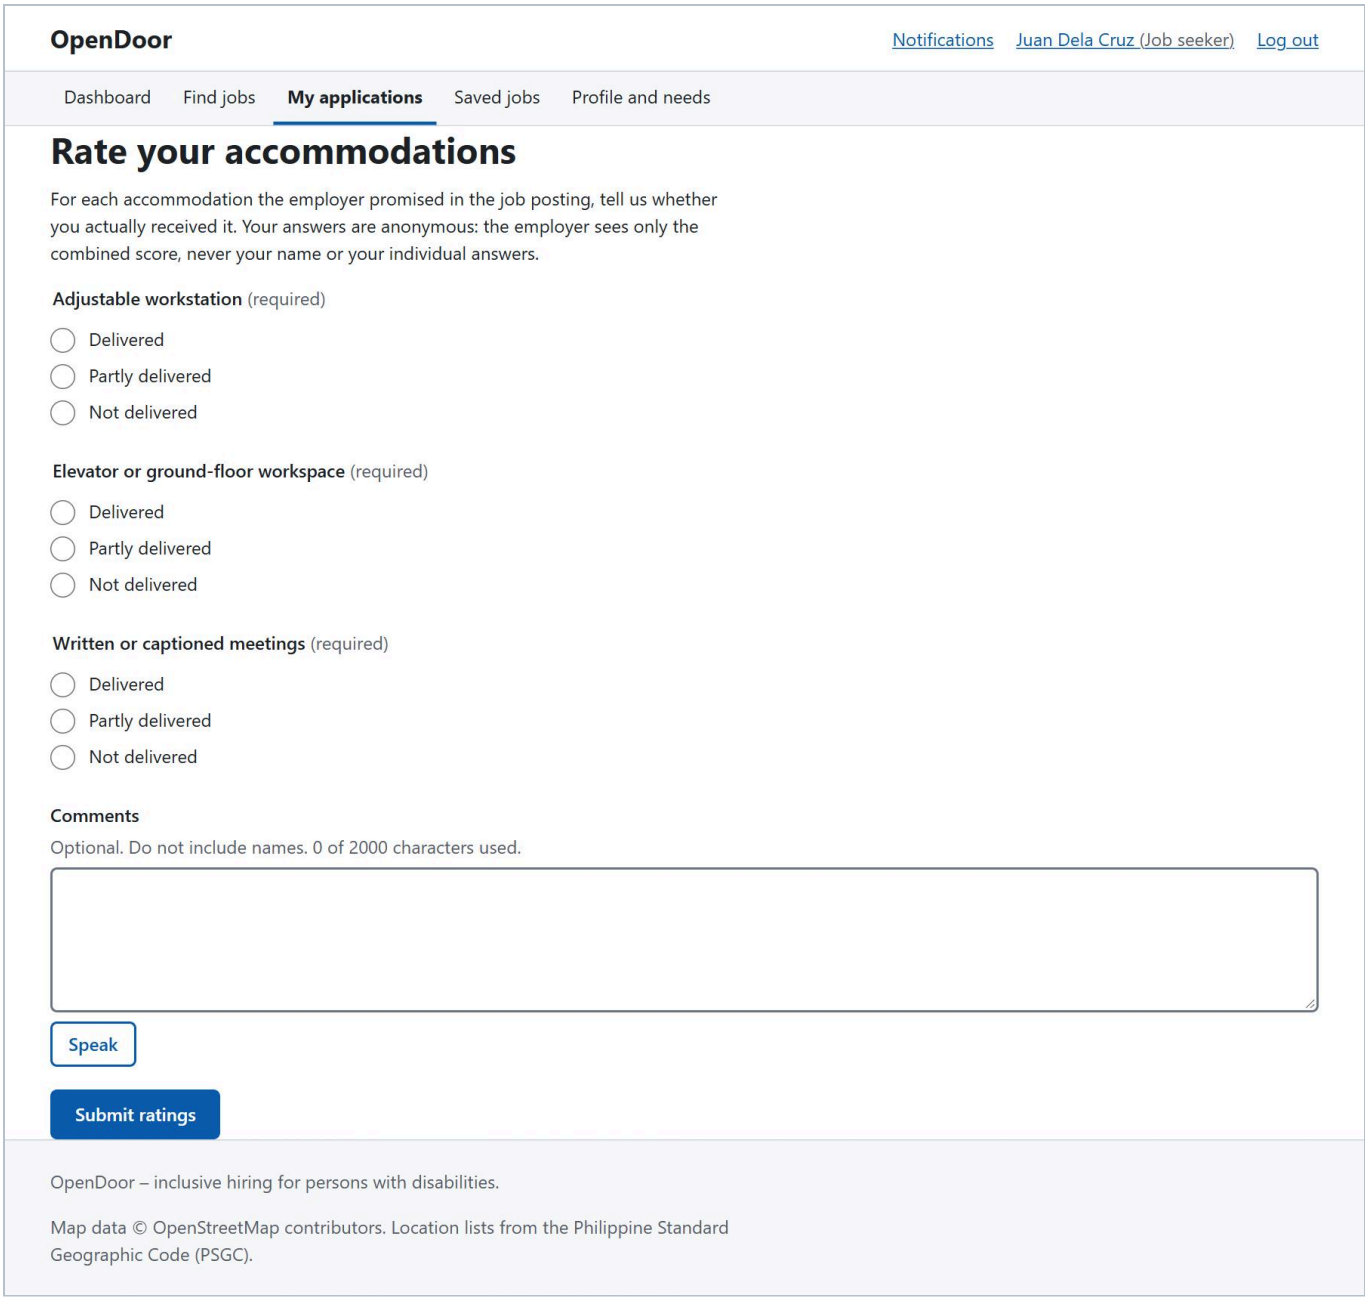

MESSAGES AND STATES

- Missing rating: error per group "Choose a rating for “…”." and error summary
- "Already rated" (each hire is rated once)
- "Not open yet – You can rate the accommodations from {date}, 30 days after your hire date."
- "Nothing to rate" (the posting listed no accommodations)

API

`GET /applications/{id}/feedback-form`

`POST /applications/{id}/feedback {items[{accommodation_id, rating}], comments}`

Screenshot `/candidate/applications/6/feedback`

4.8 Saved jobs NEW

Route	`/candidate/saved-jobs`
Who	Job seeker
Purpose	Bookmarked jobs, newest saved first.

ON THE SCREEN

- Job cards, each with a small "Remove" button
- Status line after removing: "Removed “Data Encoder” from saved jobs."
- Pagination (12 per page)

ACTIONS

- Open a job
- Remove

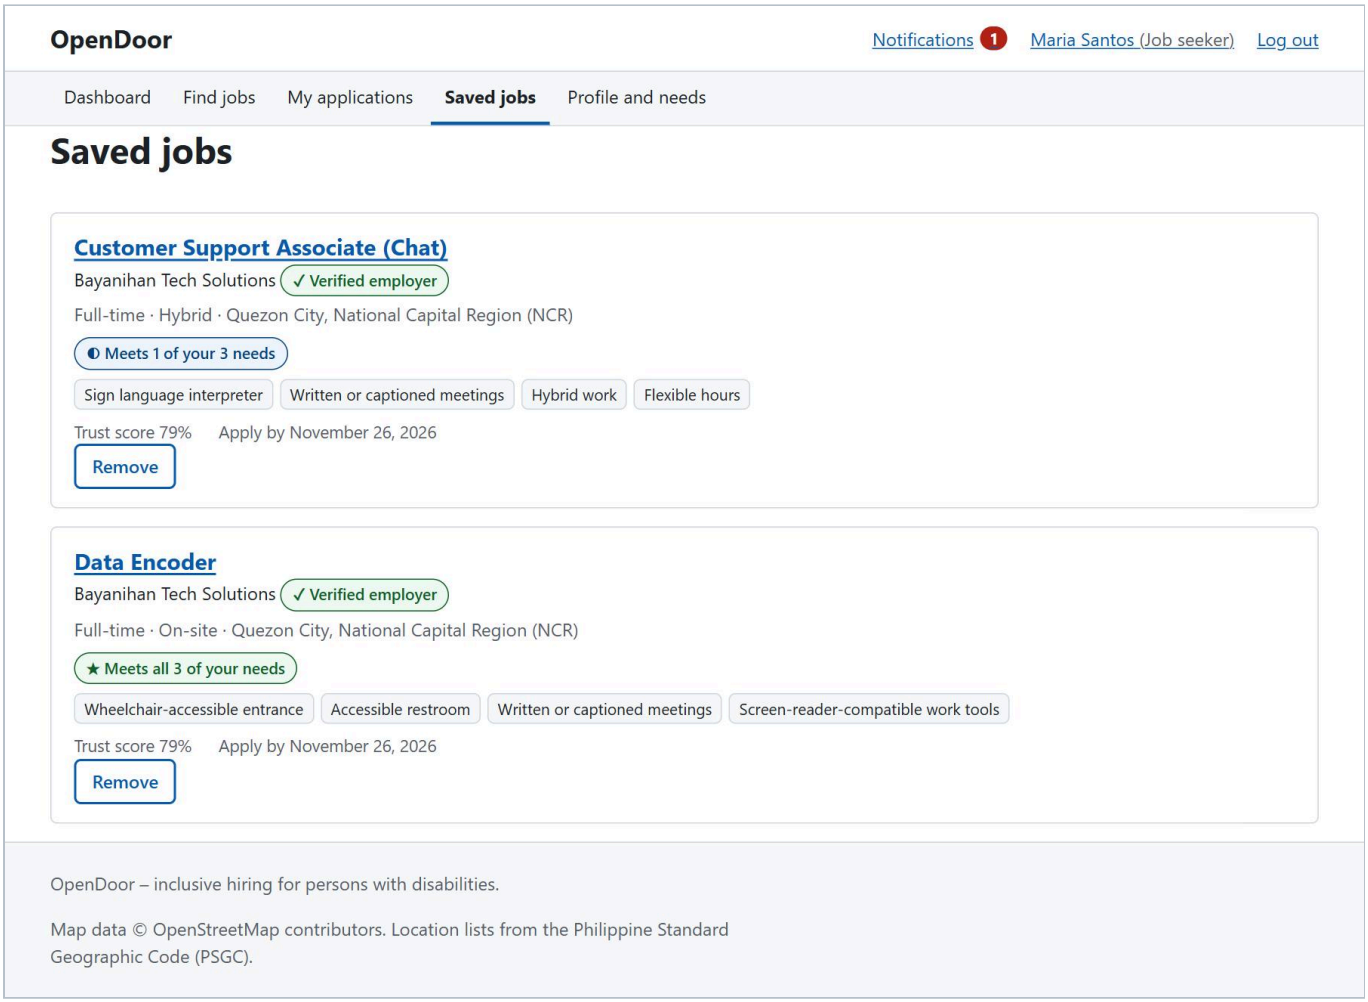

MESSAGES AND STATES

- Empty: "No saved jobs – Use “Save job” on a job’s page to keep it here. Find jobs"
- Closed or hidden jobs disappear from the list and come back if they reopen

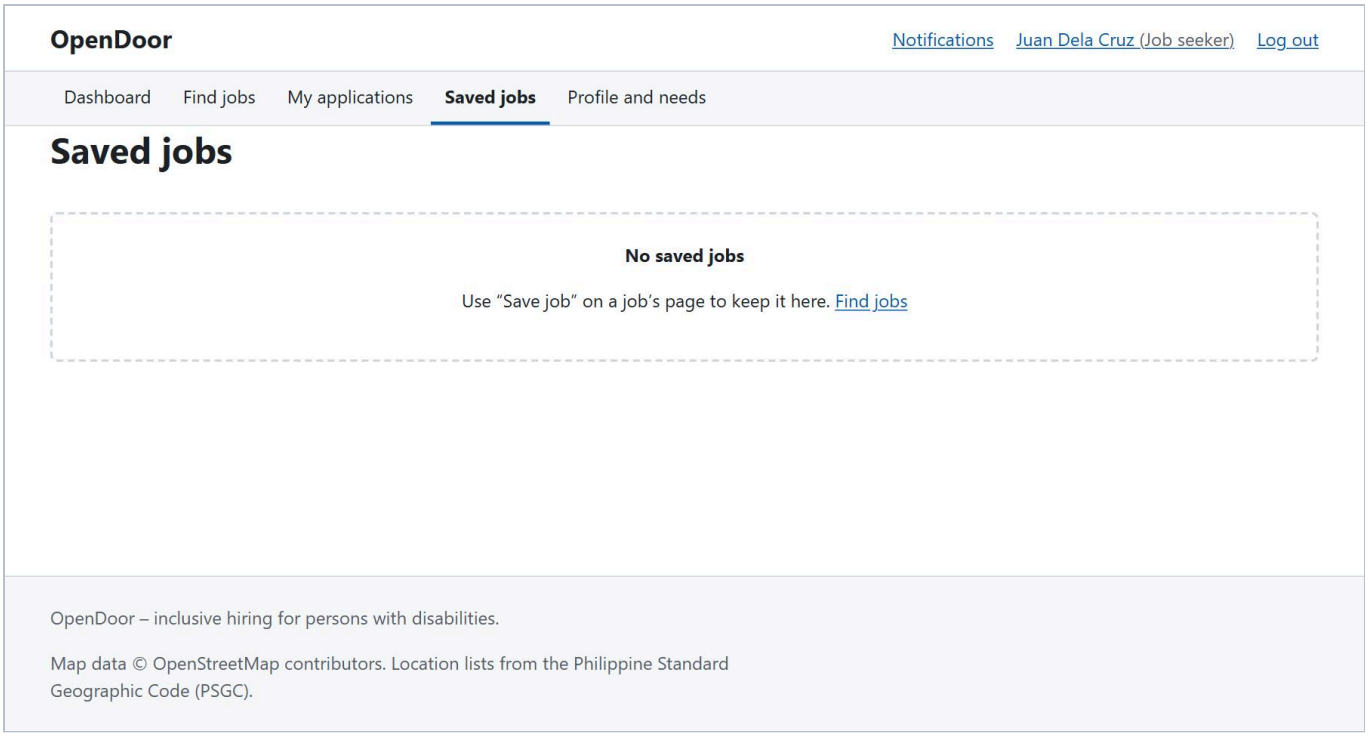

API

`GET /candidate/saved-jobs?page=`

`DELETE /candidate/saved-jobs/{id}`

Screenshot `/candidate/saved-jobs`

Empty state `/candidate/saved-jobs`

5 Employer screens

Demo: Ana Reyes (`employer@opendoor.test`, Bayanihan Tech Solutions, verified, trust score 79%) and Ramon Villanueva (`employer2@opendoor.test`, Kalinga Foods Inc., waiting for verification). Tabs: Dashboard · Job postings · Company profile · Trust score.

5.1 Dashboard

Route	`/employer/dashboard`
Who	Employer
Purpose	Postings, applications and trust score at a glance.

ON THE SCREEN

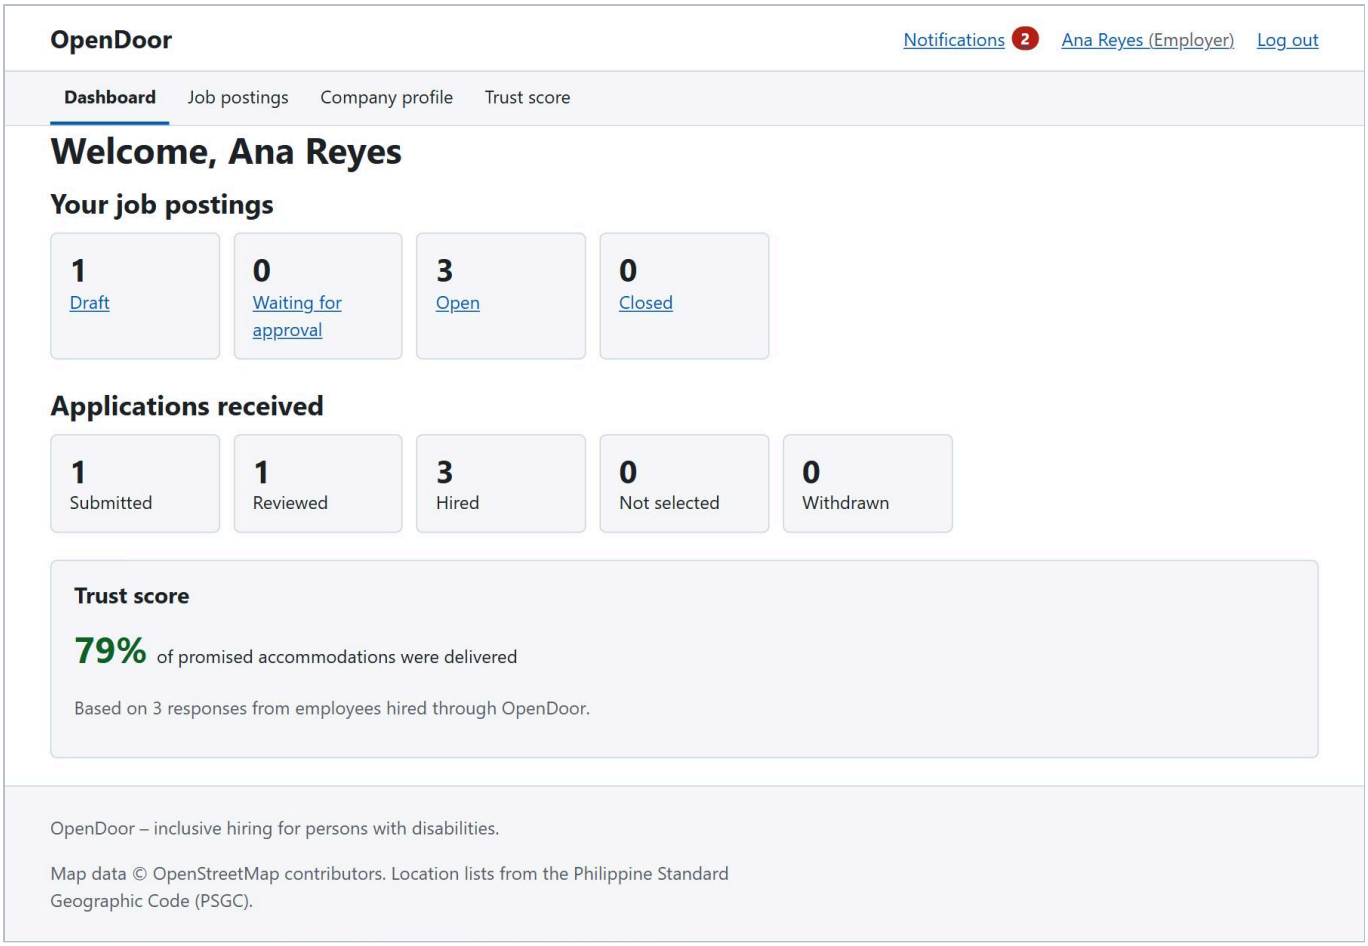

- h1 "Welcome, {name}"
- Callouts: no company → "Set up your company profile so an administrator can verify your business." + "Set up company"; not verified → "Your business registration is waiting for verification." or "Verification was not approved: {reason}" + "View company profile"
- Tiles "Your job postings": Draft, Waiting for approval, Open, Closed (link to the filtered list)
- Tiles "Applications received" by status
- Trust score card

ACTIONS

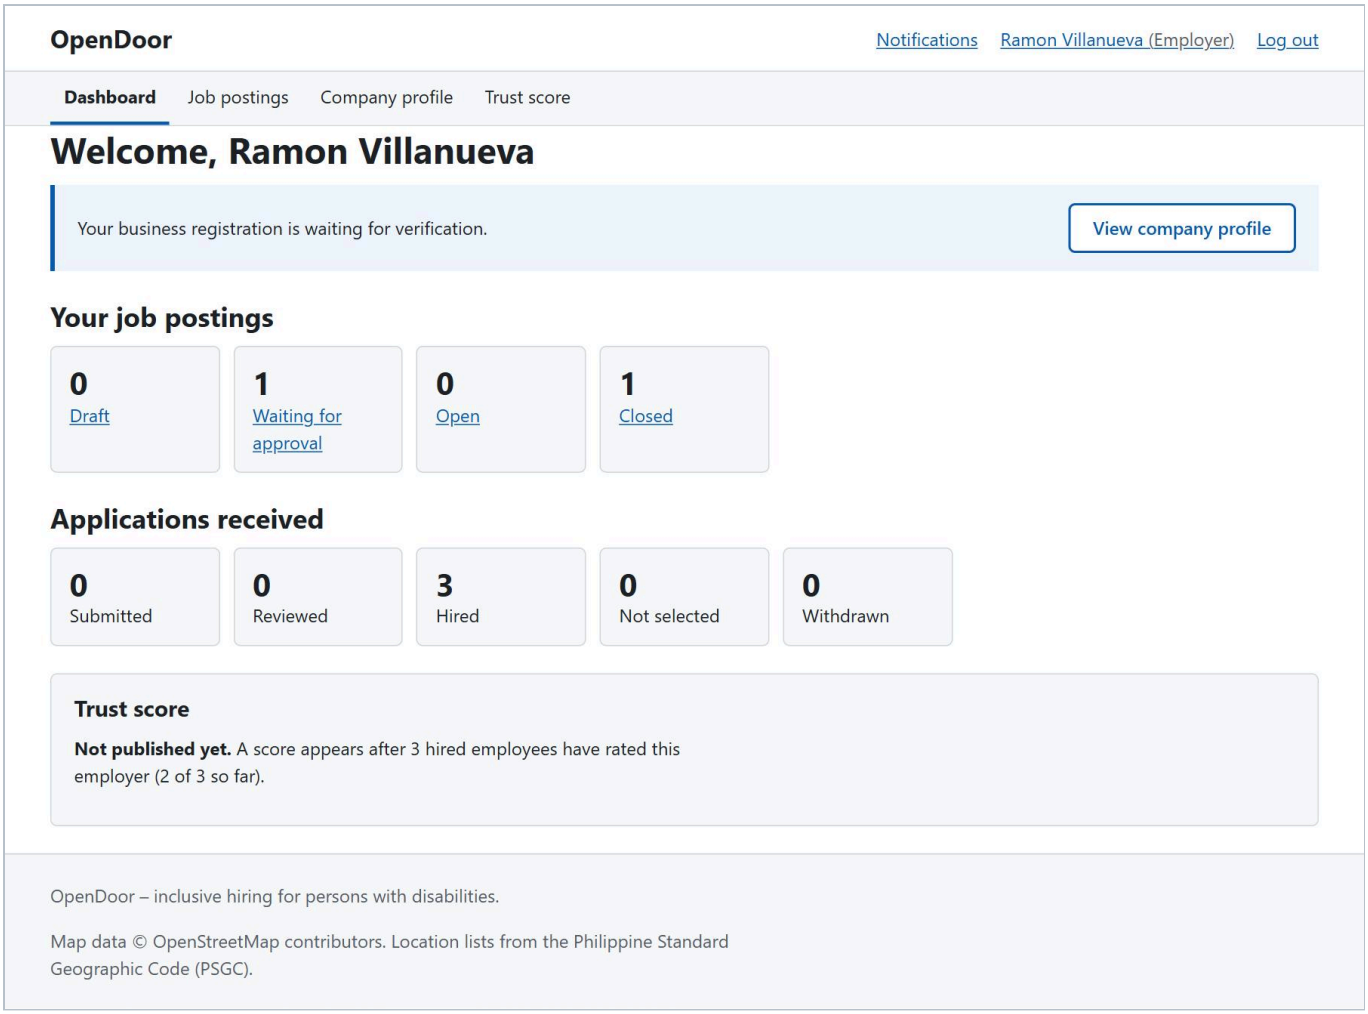

- Open filtered postings, company profile

API

`GET /employer/dashboard`

Screenshot `/employer/dashboard`

An employer whose company is not verified yet `/employer/dashboard`

5.2 Company profile

Route	`/employer/company`
Who	Employer
Purpose	Company details that an administrator checks with the DTI/SEC business registry.

ON THE SCREEN

- Verification alert: "Verified employer – checked on {date}" / "Verification was not approved – Reason: …" / "Waiting for verification"
- Company name (required, "As registered with the DTI or SEC."), radio "Registered with": DTI (sole proprietorship) / SEC (corporation or partnership), Business registration number, Industry, Office address, "City or municipality" location picker, About the company (optional, Speak), current logo + Logo file ("PNG, JPG or WebP, up to 2 MB.")
- Button "Save company profile"

ACTIONS

- Save → "Your company profile is saved." and "Next: post a job."
- Changing a verified registration number warns: "Changing this number removes your Verified badge until it is checked again."
- Saving after a rejection sends the company back to the admin queue

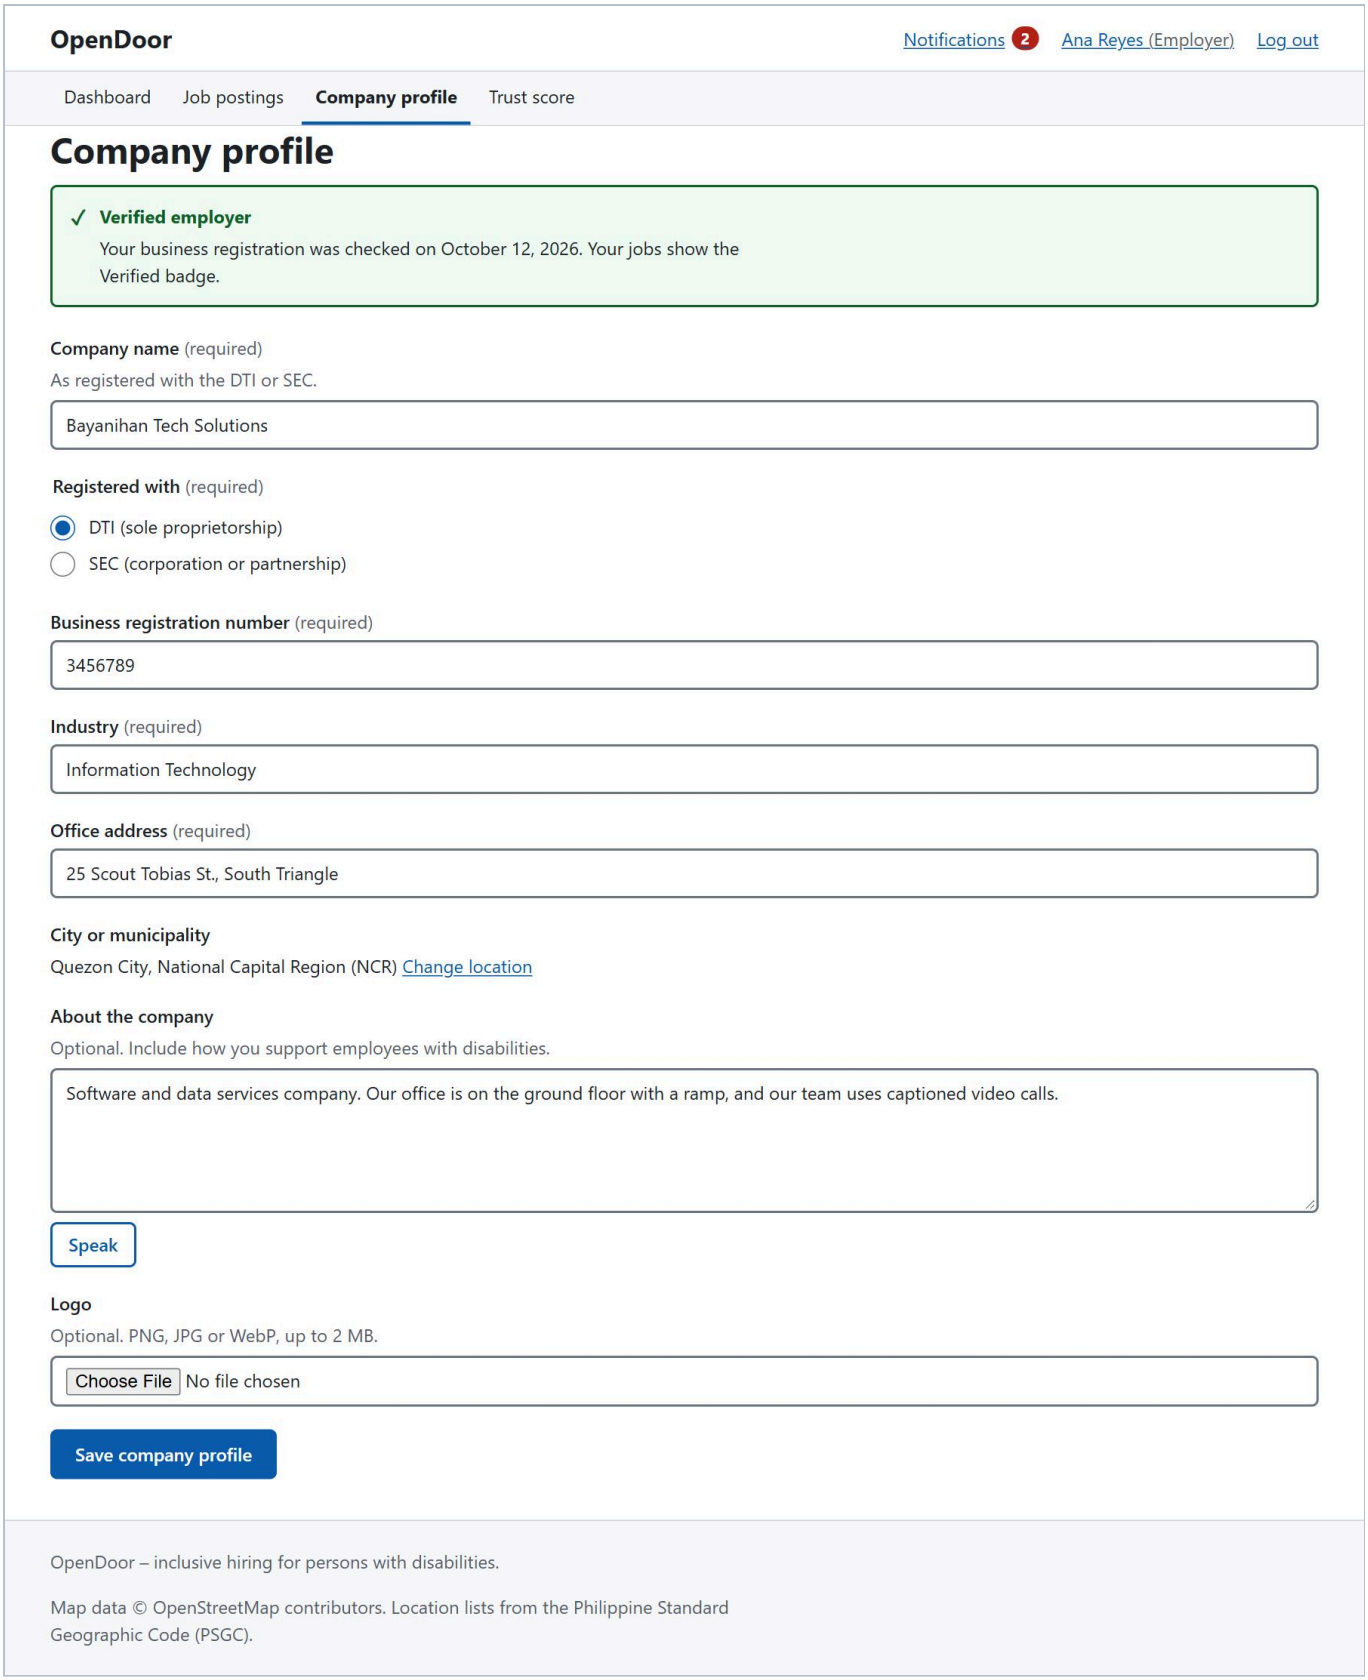

MESSAGES AND STATES

- New employer: empty form with "Welcome to OpenDoor – … An OpenDoor administrator checks your business registration before your jobs go live."

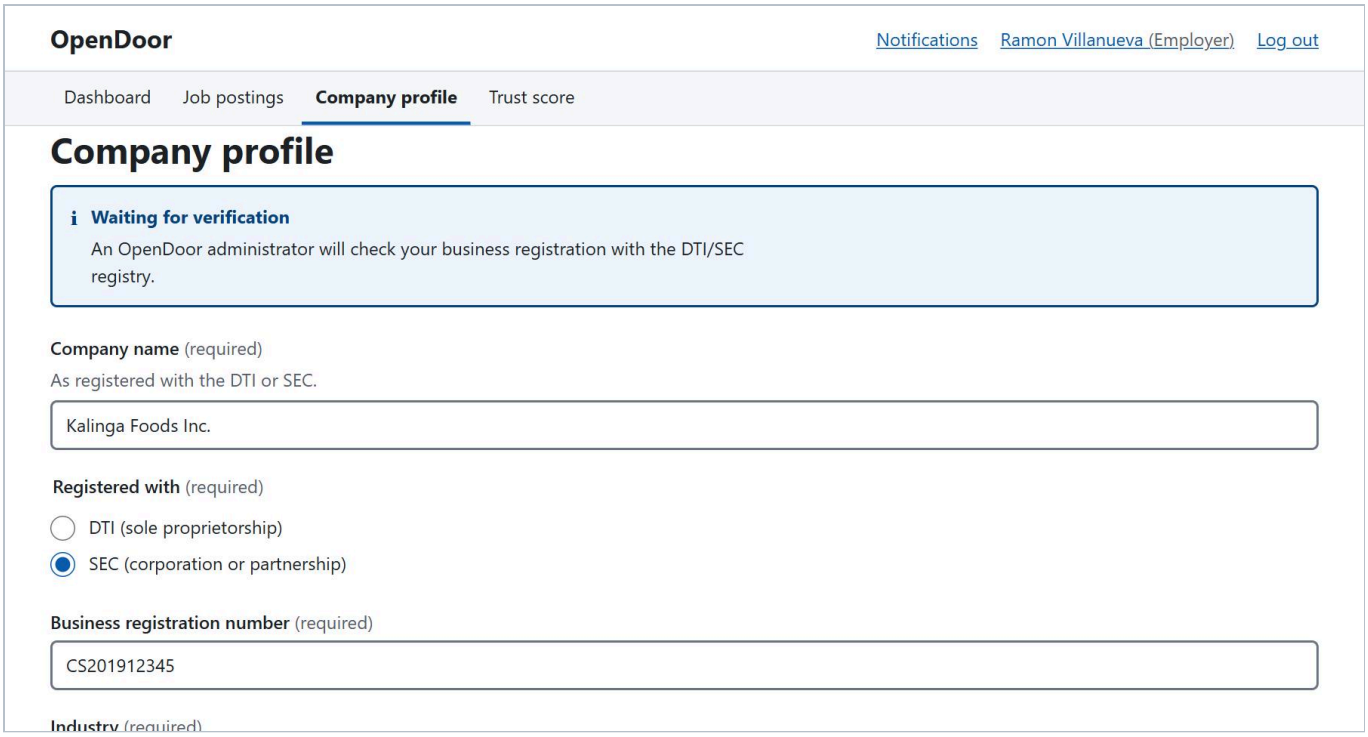

API

`GET /employer/company`

`PUT /employer/company (POST + _method=PUT when a logo is sent)`

Screenshot `/employer/company`

Waiting for verification `/employer/company`

5.3 Job postings

Route	`/employer/jobs`
Who	Employer
Purpose	All own postings and their state.

ON THE SCREEN

- Button "Post a new job"
- "Show" select by status, announced count
- Table: Job (link → edit) · Status badge · Applicants (number links to the applicants) · Closes · Actions
- Actions: "Close" (open jobs), "Reopen" (closed jobs), "Delete"

ACTIONS

- Close / Reopen → "“…” is closed to new applications." / "is open again."
- Delete → confirm "The job disappears from search. Applications already received stay available to you and the applicants."

MESSAGES AND STATES

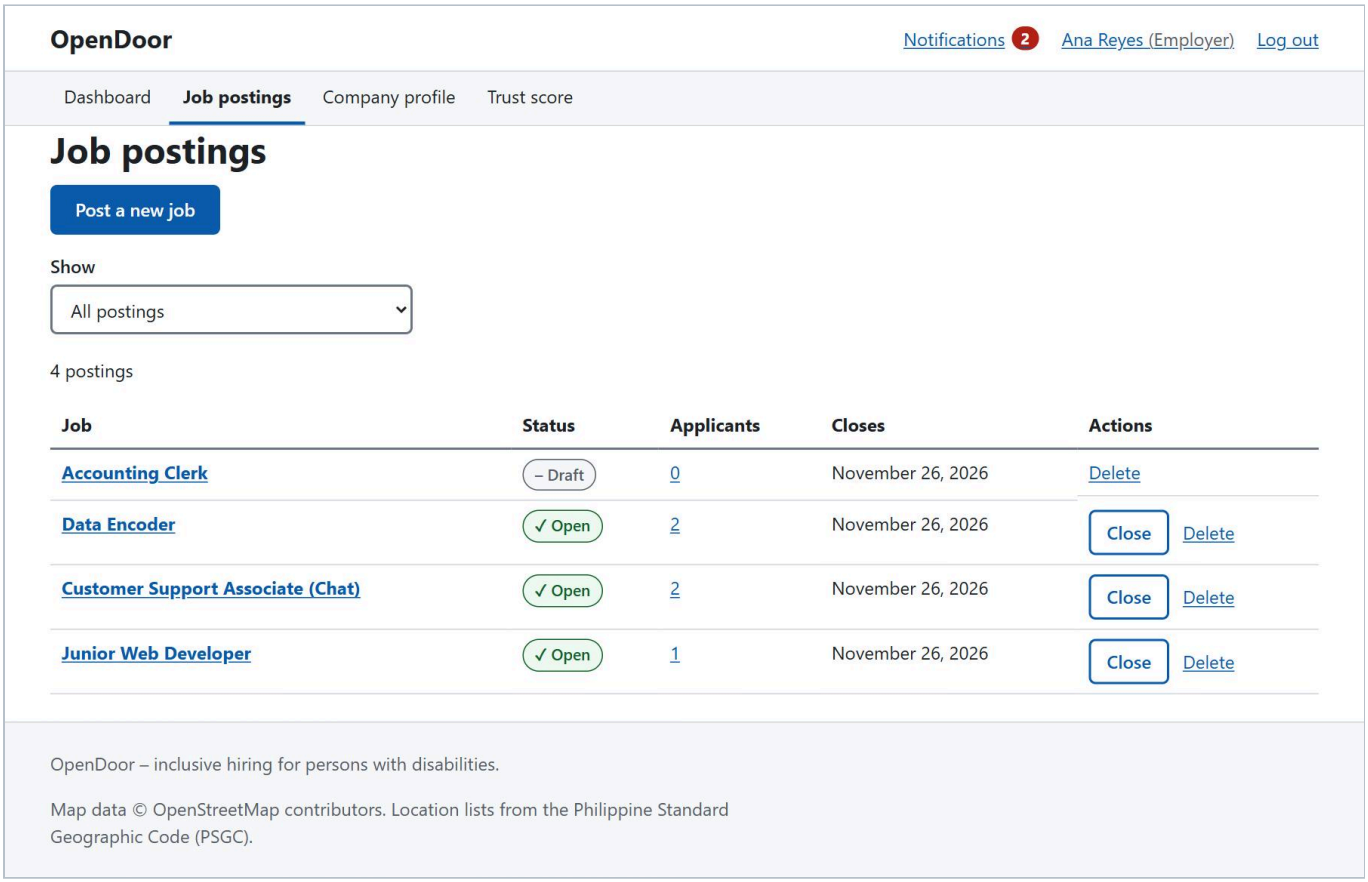

- "You have not posted any jobs yet"
- Message carried over from the form: "“…” was sent for approval." / "was saved as a draft."

API

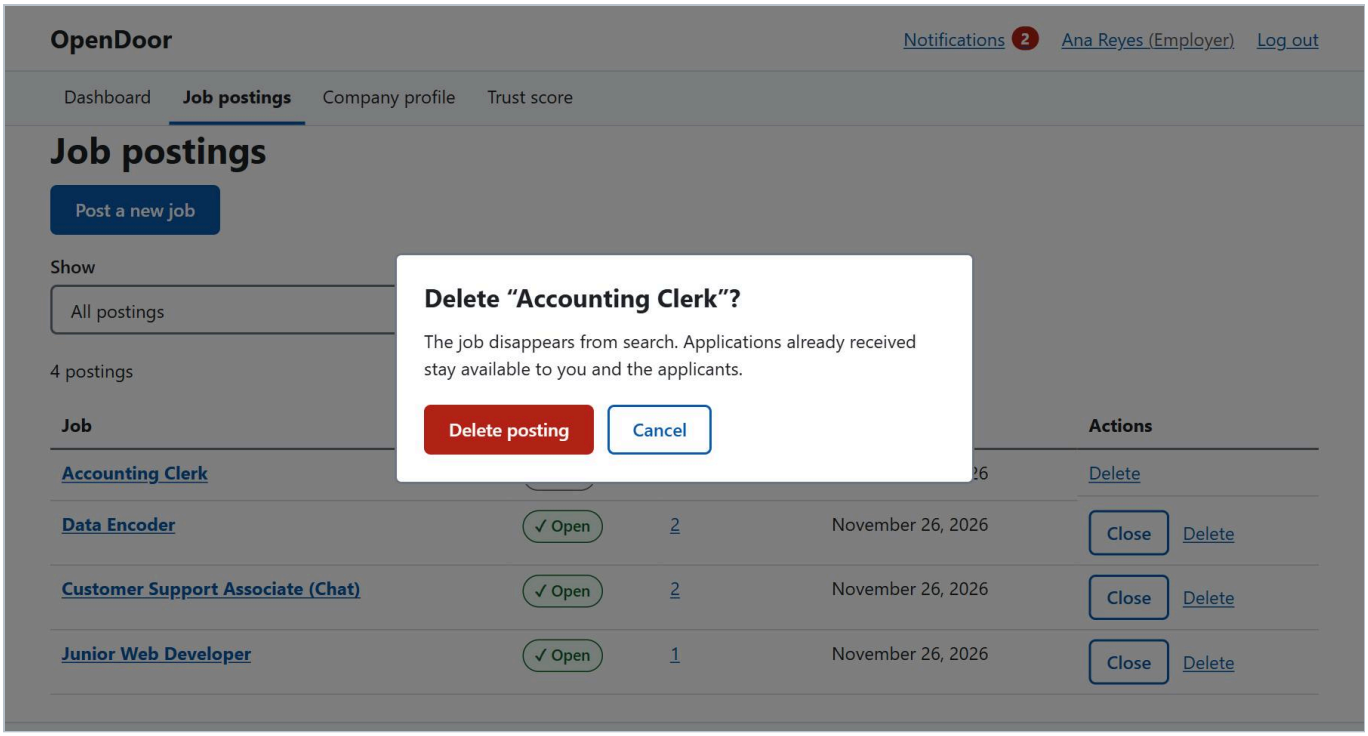

`GET /employer/job-postings?status=&page=`

`PATCH /job-postings/{id}/status {open|closed}`

`DELETE /job-postings/{id}`

Screenshot `/employer/jobs`

Delete confirmation (danger: focus starts on Cancel) `/employer/jobs`

5.4 Post a new job / Edit posting

Route	`/employer/jobs/new, /employer/jobs/{id}/edit`
Who	Employer (own postings)
Purpose	Write a job with structured accommodations and send it for approval.

ON THE SCREEN

- Intro: an administrator approves every job; list only accommodations you really provide – hired employees will rate them
- Edit only: "Status: {badge}"; after a rejection: alert "This posting was not approved – Reason: …"
- Job title, Job description (Speak; hint "Duties, qualifications and working hours."), Category, Employment type (Full-time, Part-time, Contract, Internship), radio Work setup (On-site, Hybrid, Remote), radio Interview format (Online interview, On-site interview), Workplace address ("Used for the accessibility snapshot."), City or municipality, Applications close on (date, not before today)
- "Accommodations you provide": grouped checklist; each checked item gets "Details for “…” (optional)" with placeholder "For example: ramp at the main entrance"
- Buttons "Submit for approval" and – for new jobs and drafts – "Save as draft"

ACTIONS

- Submit for approval → status "Waiting for approval"; editing an open job sends it back for approval
- Save as draft → status "Draft"

MESSAGES AND STATES

- No company yet: "Your company profile is missing" + link "Set up your company profile"
- Error summary listing every missing field

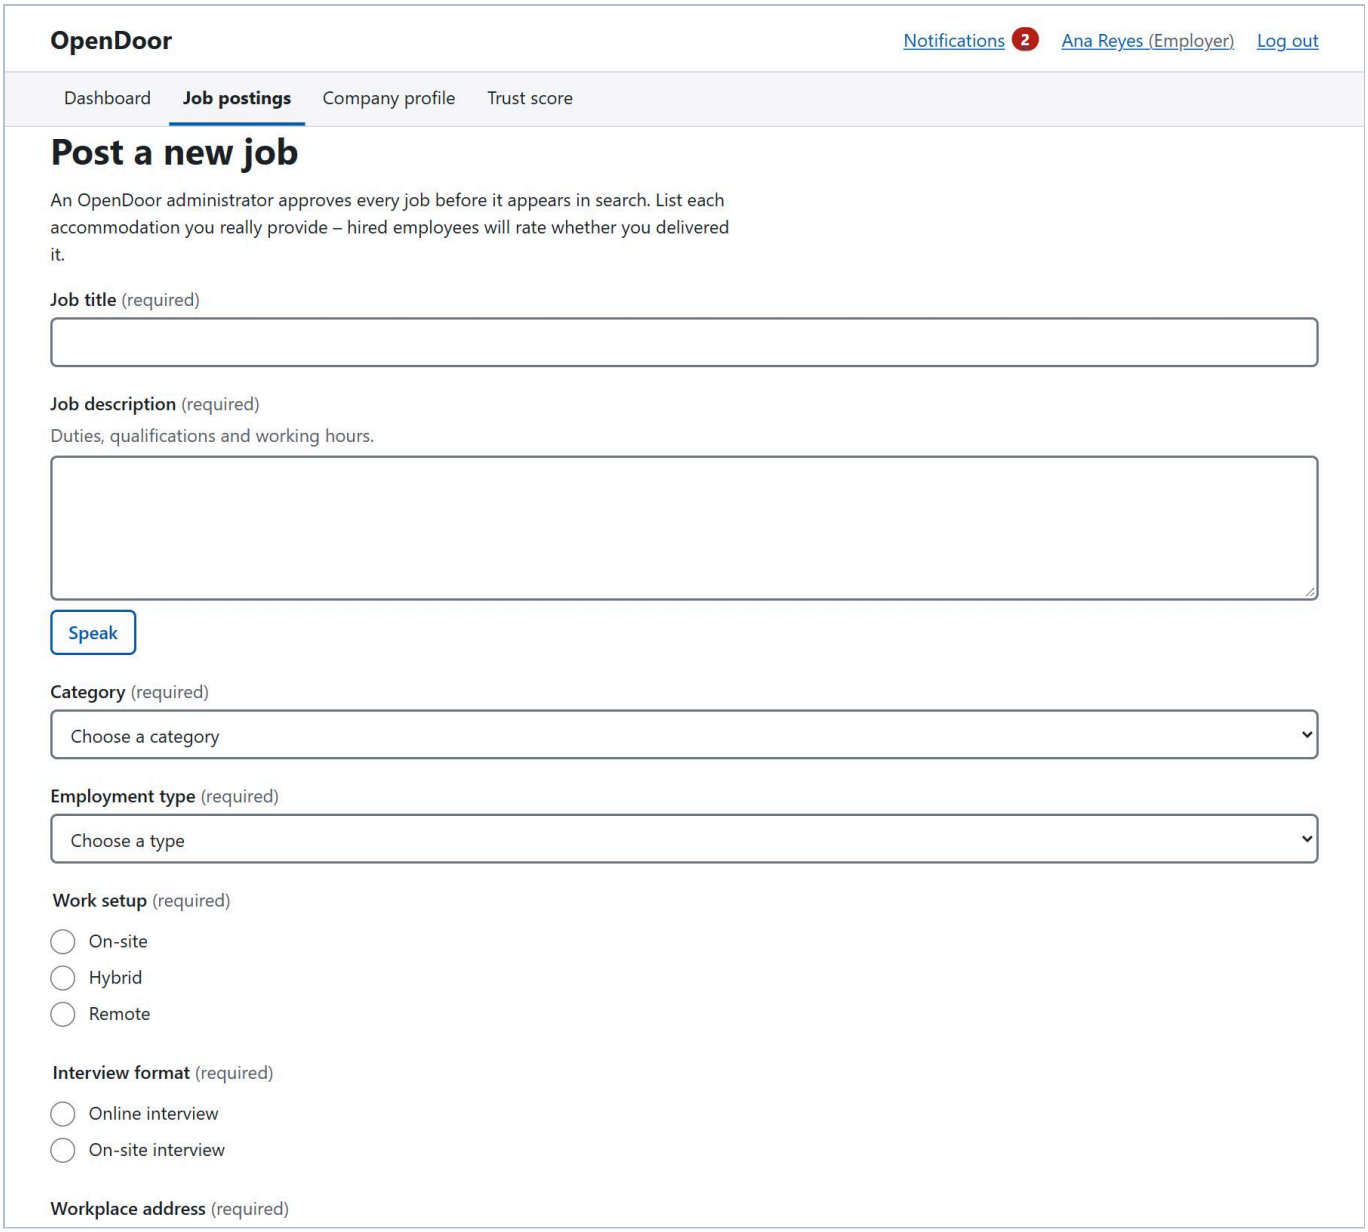

API

`POST /job-postings`

`PUT /job-postings/{id}`

`GET /job-postings/{id}`

`GET /categories, /accommodations`

Post a new job (empty) – part 1 of 3 `/employer/jobs/new`

Street and building. Used for the accessibility snapshot.

City or municipality

Choose the region first, then the city or municipality.

Region

Choose a region

Applications close on (required)

dd/mm/yyyy

Accommodations you provide

Choose every accommodation this job offers and add details where helpful.

None selected.

Physical access

- [ ] Wheelchair-accessible entrance
  Step-free entrance with a ramp or level access.
- [ ] Accessible restroom
  Restroom with grab bars, enough turning space and an accessible door.
- [ ] Elevator or ground-floor workspace
  The workspace can be reached without stairs.
- [ ] Accessible parking
  Reserved parking slot close to the entrance.

Communication

- [ ] Sign language interpreter
  Filipino Sign Language interpreter for interviews, meetings and training.
- [ ] Written or captioned meetings
  Meetings have captions, transcripts or written summaries.
- [ ] Screen-reader-compatible work tools
  Internal systems and documents work with screen readers.

Work arrangement

Post a new job (empty) – part 2 of 3 `/employer/jobs/new`

- [ ] Remote work
  The role can be done fully from home.
- [ ] Hybrid work
  Part of the week can be worked from home.
- [ ] Flexible hours
  Start and end times can be adjusted.
- [ ] Part-time schedule
  Reduced weekly hours are available.
- [ ] Modified duties
  Tasks can be adjusted to the employee's abilities.

Assistive technology

- [ ] Screen reader software provided
  The employer provides a licensed screen reader.
- [ ] Adjustable workstation
  Height-adjustable desk, ergonomic chair or alternative input devices.
- [ ] Assistive listening devices
  Hearing loops or personal amplifiers are available.

Support

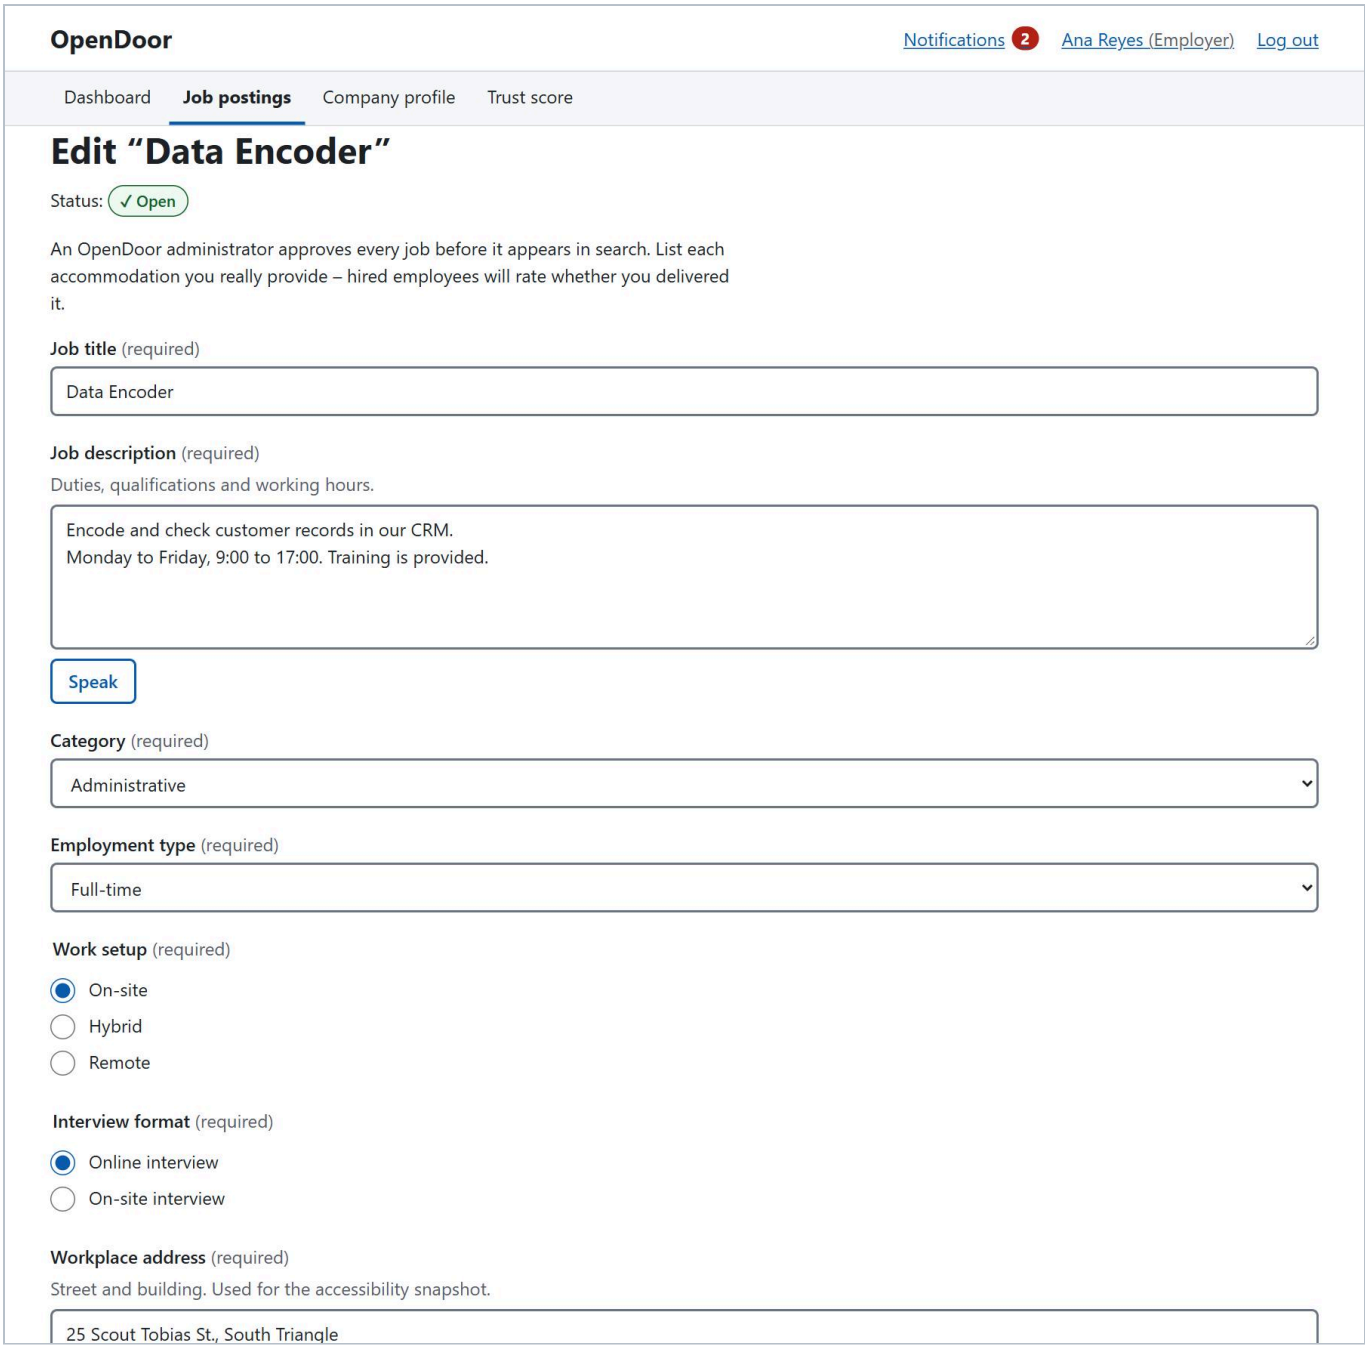

- [ ] Job coach or onboarding buddy
  A named person helps during onboarding and the first months.
- [ ] Service animal allowed
  Service animals are welcome at the workplace.
- [ ] Transportation assistance
  Shuttle service or a transport allowance is provided.

Submit for approval | Save as draft

Edit an open posting – part 3 of 3 `/employer/jobs/1/edit`

5.5 Applicants

Route	`/employer/jobs/{id}/applicants`
Who	Employer (own postings)
Purpose	Everyone who applied to one job.

ON THE SCREEN

- h1 "Applicants for “{job}””, "Back to job postings"
- "Show" select by status, announced count
- Table: Applicant (link) · Headline · Applied · Status

ACTIONS

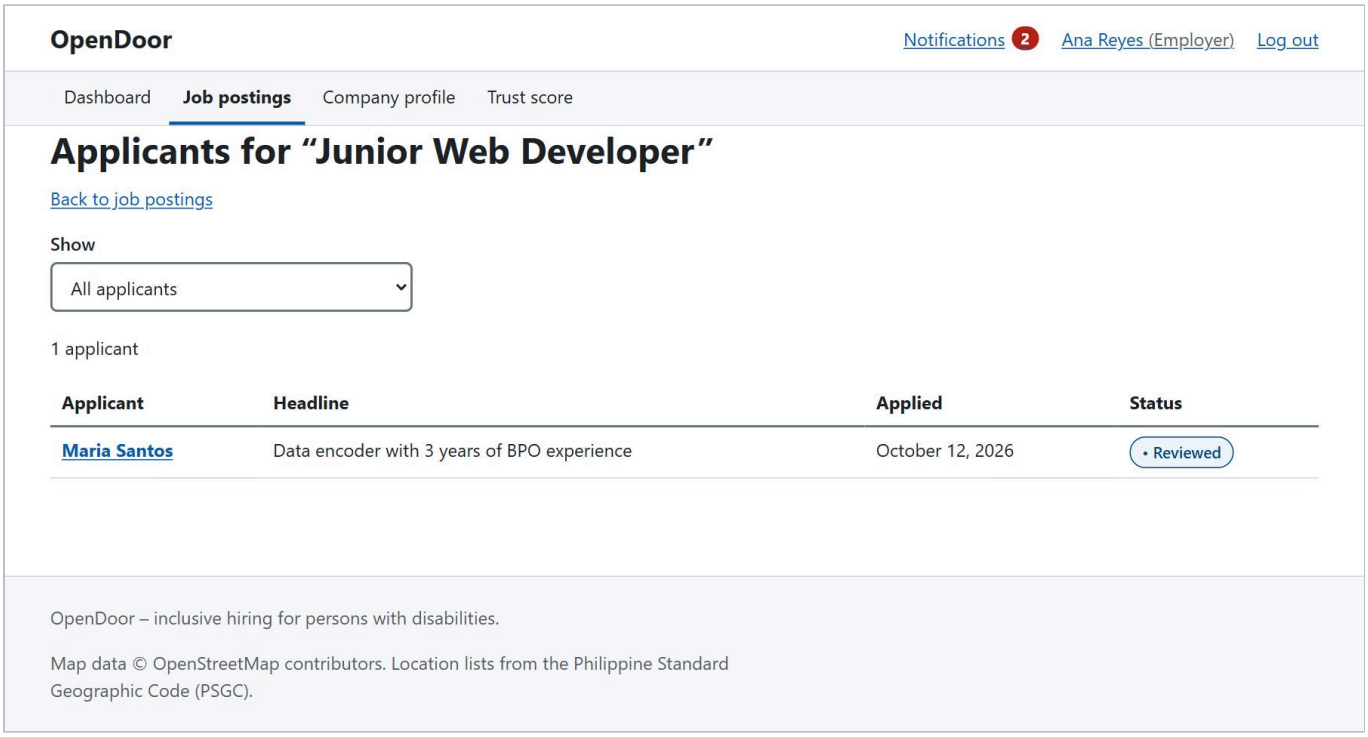

- Open an application

MESSAGES AND STATES

- "No applicants yet"

API

```
GET /applications?job_posting_id=&status=&page=
```

Screenshot `/employer/jobs/3/applicants`

5.6 Application review

Route	`/employer/applications/{id}`
Who	Employer (applications to own postings)
Purpose	Read one application and decide. Opening a Submitted application marks it Reviewed and tells the job seeker.

ON THE SCREEN

- h1 applicant name; "Applied for {job} on {date}"; status badge; headline
- Warning box "Interview accommodation requested" with the request
- "Accommodations this applicant needs": each need marked "✓ offered in your posting" or "! not listed in your posting"
- Cover note; "About the applicant": Skills, Work experience, Disability (only when the applicant chose to share it), Résumé link (secure link, new tab)

ACTIONS

- Reviewed only: "Mark as hired" (confirm: final; after 30 days the employee can rate) and "Not selected" (danger confirm: final; the applicant is notified)

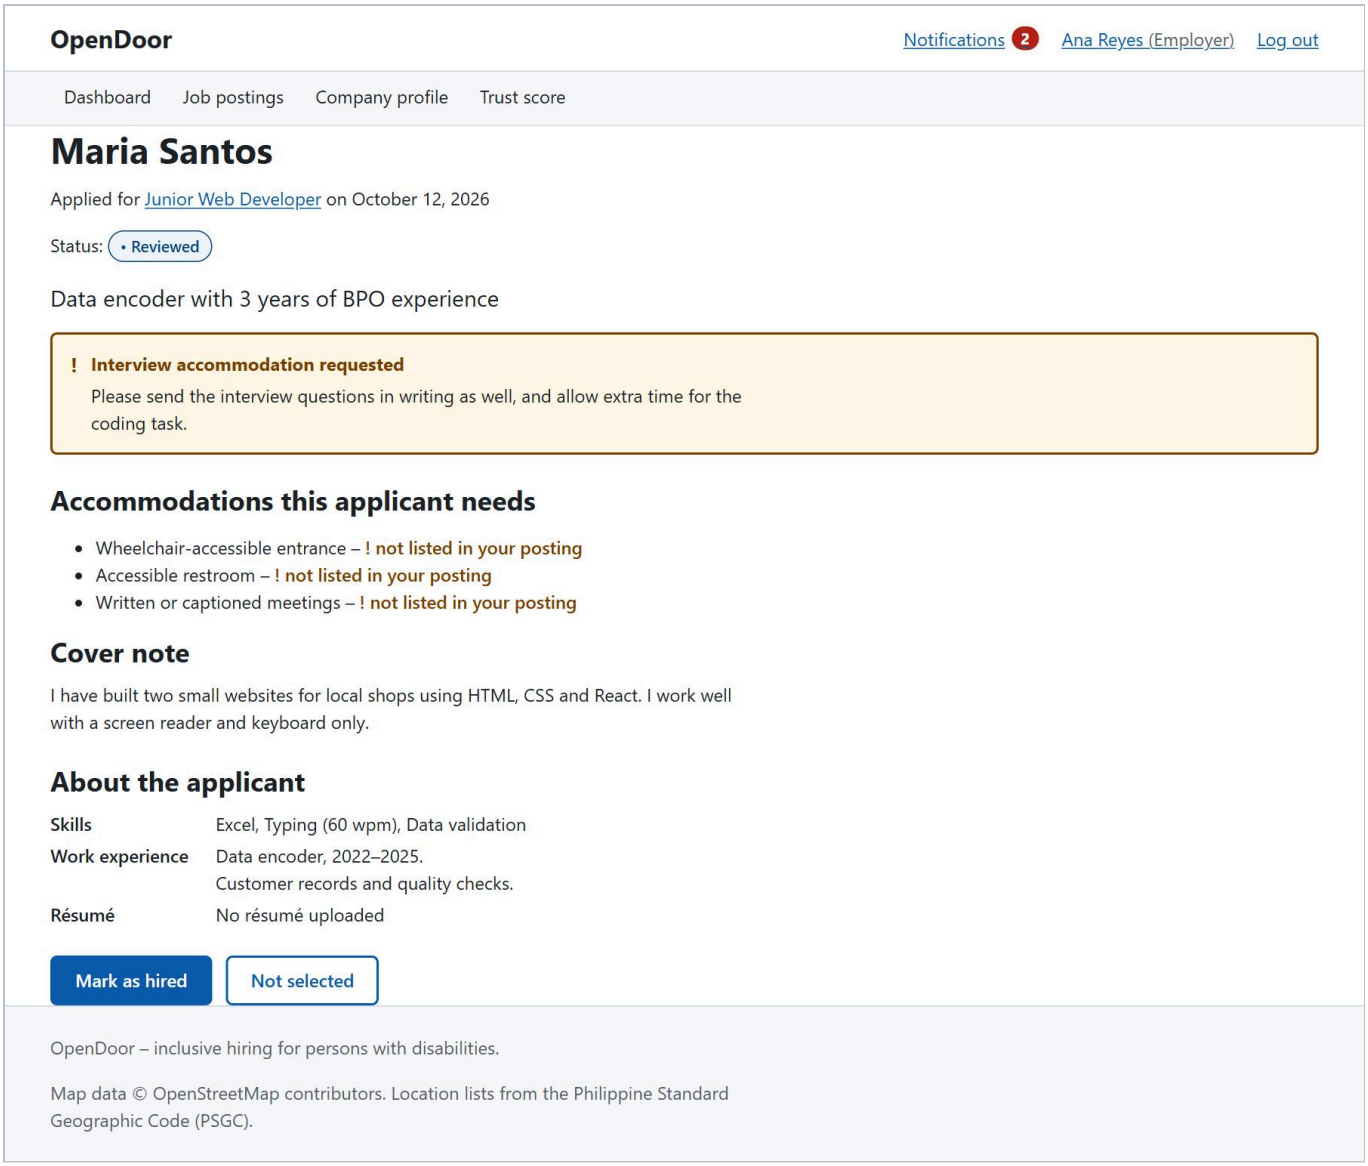

MESSAGES AND STATES

- "The applicant is marked as hired." / "...as not selected."

API

`GET /applications/{id}`

`PATCH /applications/{id}/status {hired|rejected}`

Screenshot `/employer/applications/7`

5.7 Trust score

Route	`/employer/trust-score`
Who	Employer
Purpose	The employer's own score: totals and per-accommodation counts, never individual answers.

ON THE SCREEN

- Explanation: rated 30 days after a hire; partly delivered counts as half; anonymous; published from 3 responses
- Trust score card with the full table
- Tip with a link to the job postings

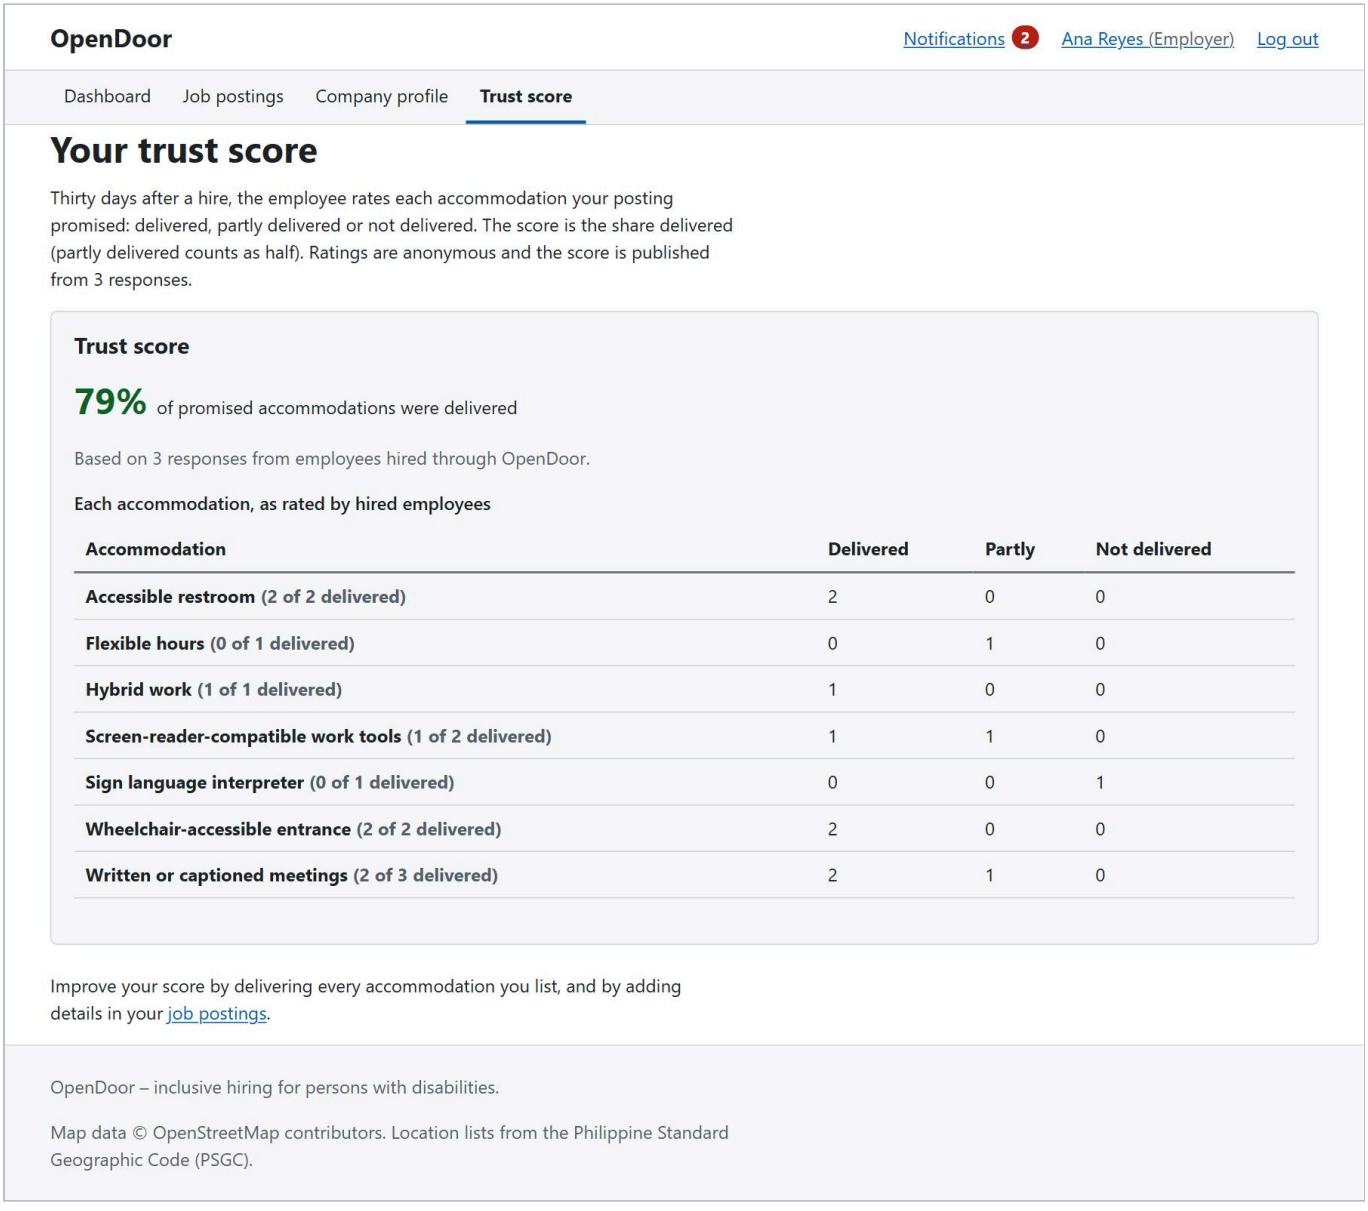

MESSAGES AND STATES

- "Your trust score could not be loaded" (e.g. no company yet)

API

`GET /employer/company`

`GET /employers/{id}/trust-score`

Screenshot `/employer/trust-score`

6 Administrator screens

Demo: OpenDoor Admin (`admin@opendoor.test`). Tabs: Dashboard · Employers · Postings · Users · Reports · Feedback · Master data. Administrators receive no notifications, so the header has no Notifications link.

6.1 Administration dashboard

Route	`/admin/dashboard`
Who	Administrator
Purpose	Work queues and platform numbers.

ON THE SCREEN

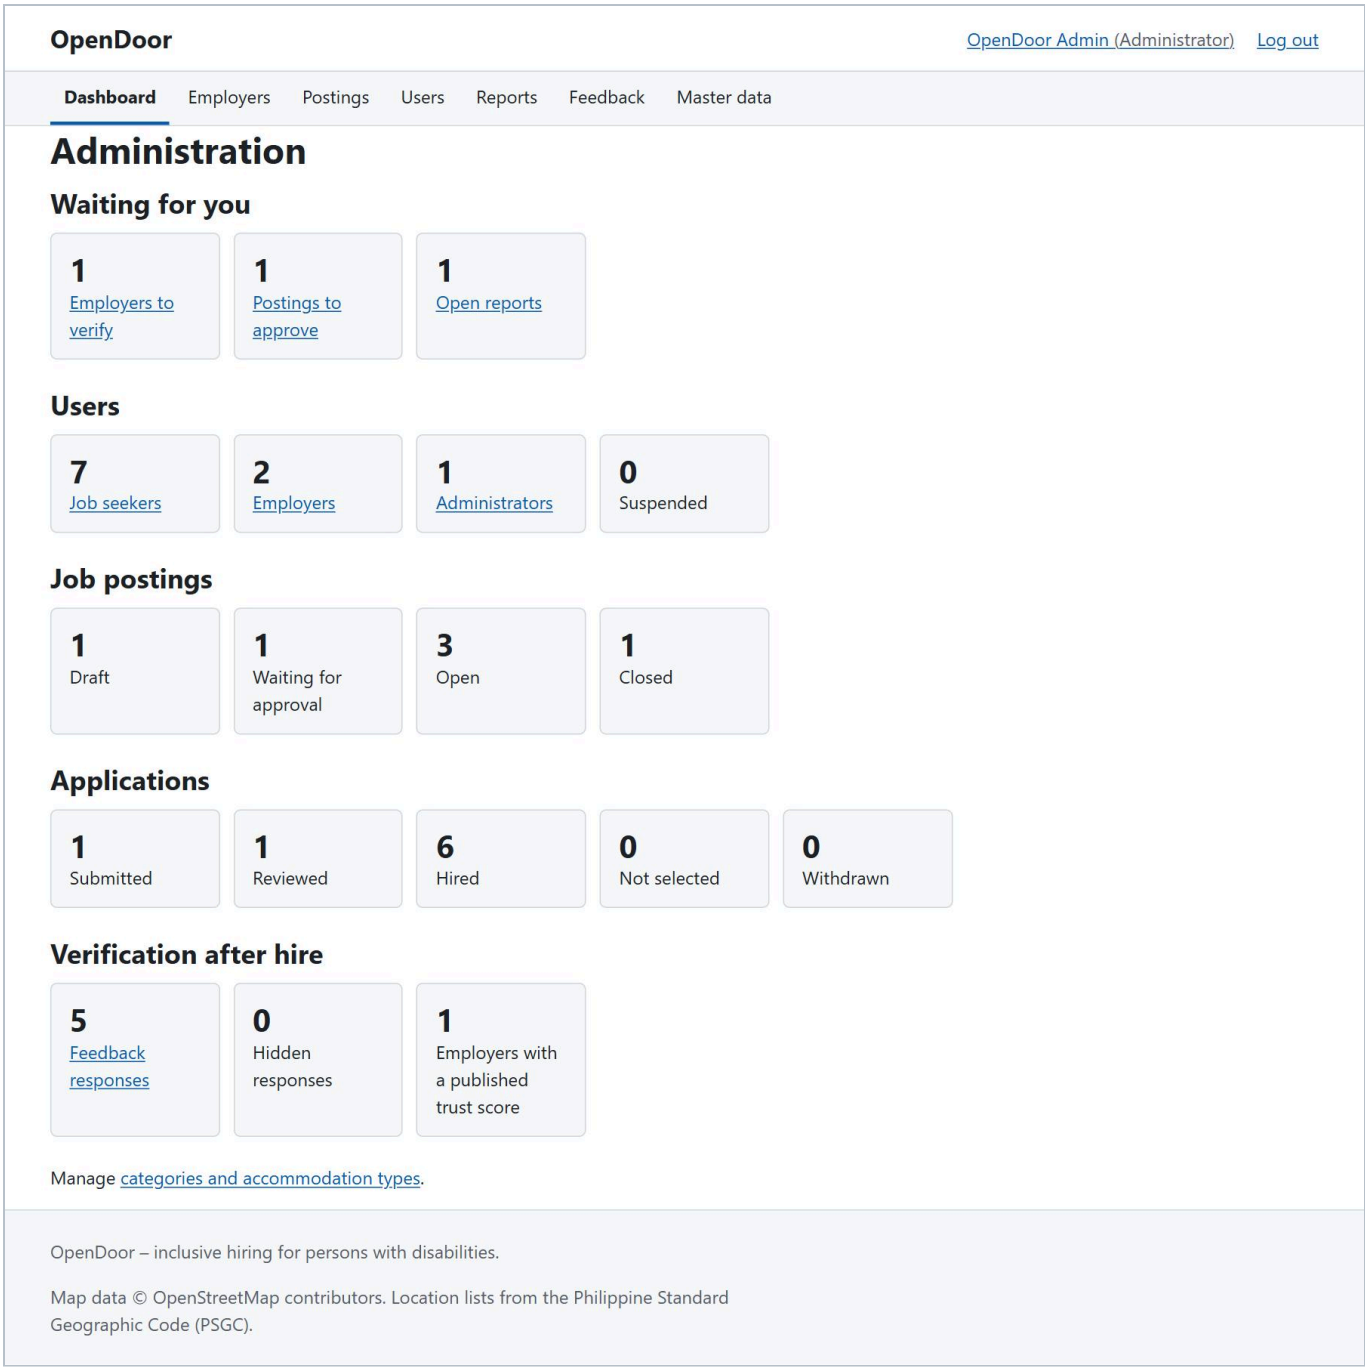

- h1 "Administration"
- "Waiting for you": Employers to verify, Postings to approve, Open reports (links to the queues)
- "Users": Job seekers, Employers, Administrators, Suspended
- "Job postings" and "Applications" by status
- "Verification after hire": Feedback responses, Hidden responses, Employers with a published trust score
- Link "Manage categories and accommodation types"

ACTIONS

- Open a queue

API

`GET /admin/dashboard`

Screenshot `/admin/dashboard`

6.2 Employers

Route	`/admin/employers`
Who	Administrator
Purpose	Verification queue and company list.

ON THE SCREEN

- Filter bar: "Show" (Waiting for verification – default, Verified, Not approved), "Company or registration number", "Search"
- Announced count
- Table: Company (link) · Registration (type + number) · Latest registry check (badge or "Not checked yet") · Account (email)

ACTIONS

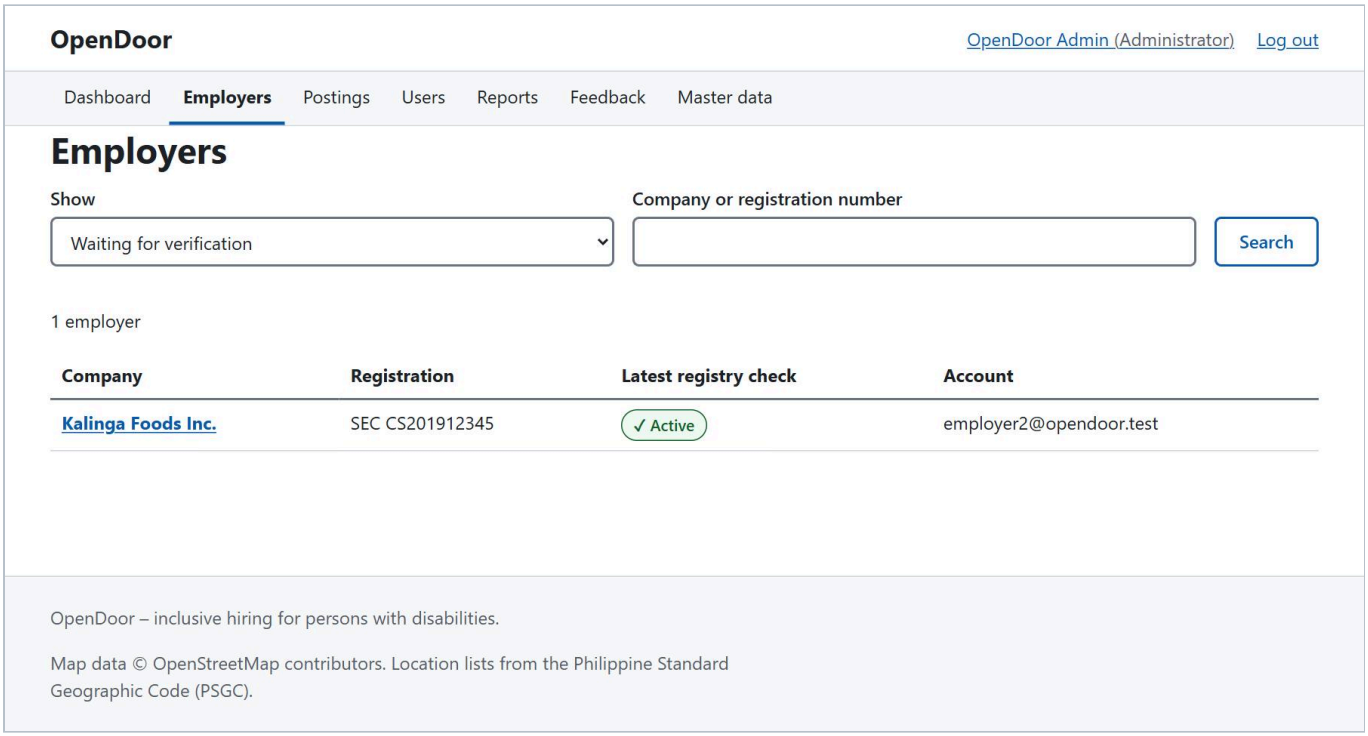

- Open an employer

MESSAGES AND STATES

- "No employers here"

API

```
GET /admin/employers?status=&q=&page=
```

Screenshot `/admin/employers`

6.3 Employer verification

Route	`/admin/employers/{id}`
Who	Administrator
Purpose	Check the registration with the (simulated) DTI/SEC SOAP registry, then decide.

ON THE SCREEN

- h1 company, "Back to employers", status line (Verified badge / "Waiting for verification" / "Not approved: {reason}")
- Details: Registered with, Registration number, Industry, Address, Account (name + email), Verified on
- Card "Business registry result": Status badge (Active, Expired, Cancelled, Not found, Check failed), Registered name, Name match %, Checked; warning "Check this carefully before approving" when not active or the name matches less than 80%
- Buttons "Check with the business registry", "Approve", "Do not approve" (or "Remove verification" when verified); hint "The registry result is advice only. You decide whether to approve."

ACTIONS

- Check → "The registry check is done."
- Approve → confirm "The employer gets the Verified badge…" (+ "No active registry result is on file." when relevant)
- Do not approve / Remove verification → reason dialog "Reason shown to the employer" → employer notified

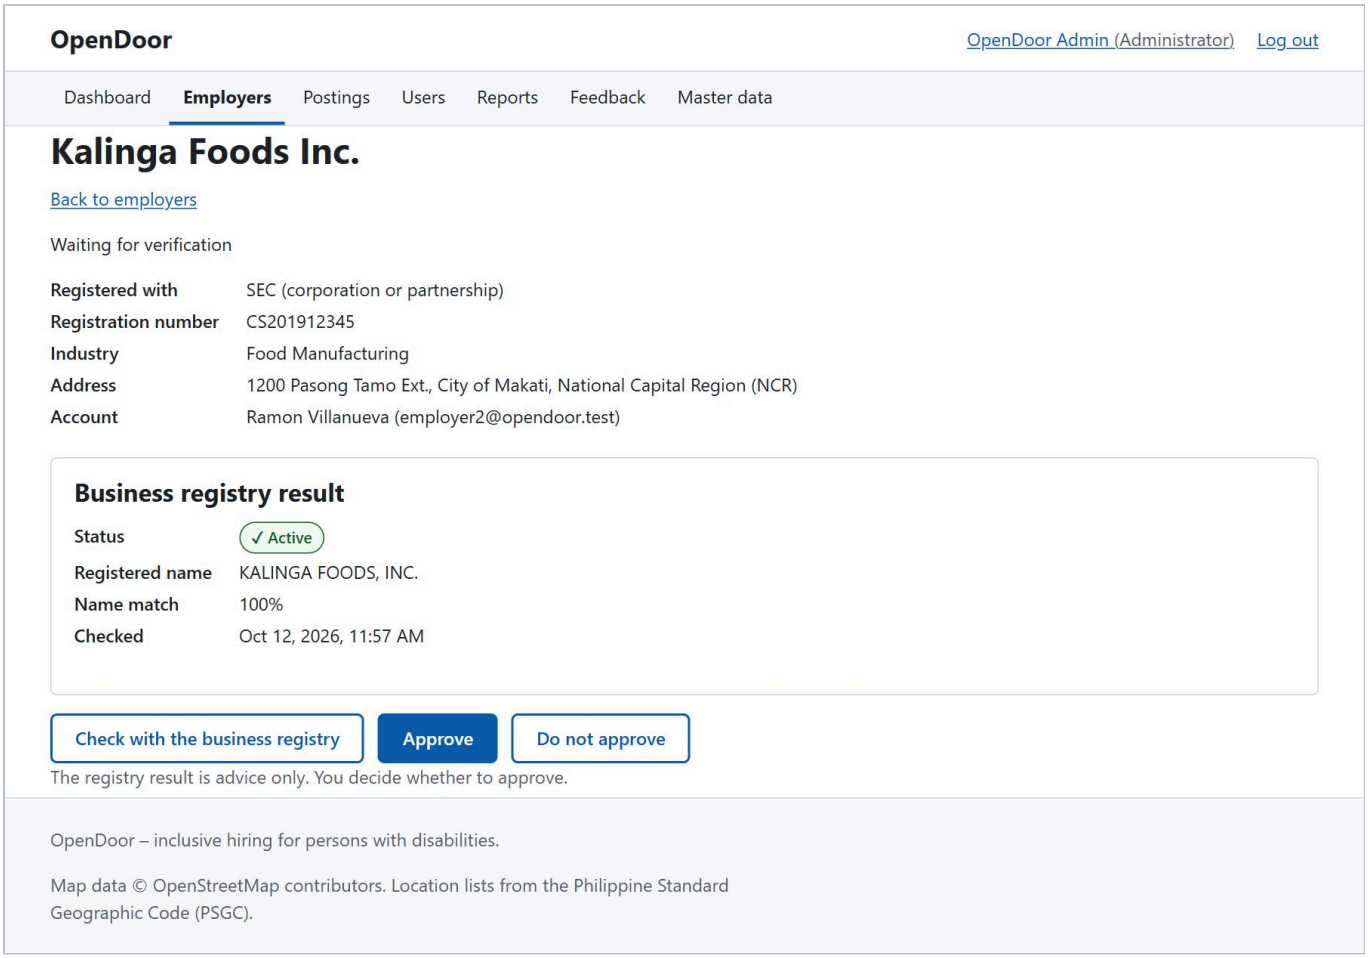

MESSAGES AND STATES

- "The business registry did not respond. You can try again later or decide manually."
- "OpenDoor could not sign in to the business registry…"
- "The registry rejected the registration details…"

API

`GET /admin/employers/{id}`

`PATCH /admin/employers/{id}/verify {action: check|approve|reject, reason}`

Screenshot `/admin/employers/2`

6.4 Job postings (approval)

Route	`/admin/job-postings`
Who	Administrator
Purpose	Approve new or edited postings; remove any posting.

ON THE SCREEN

- "Show" select (default Waiting for approval)
- Posting cards: title, company + Verified + status badges, "category · type · setup · closes {date}", disclosure "Description and accommodations"
- Buttons "Approve", "Do not approve" (waiting only) and "Remove" NEW

ACTIONS

- Approve → "“…” is approved and now open."
- Do not approve → reason (hint: "unclear working hours or a missing accommodation detail") → back to draft, employer notified
- Remove → reason (hint: "false accommodation claims or a duplicate posting") → posting disappears for everyone, applications kept, employer notified

MESSAGES AND STATES

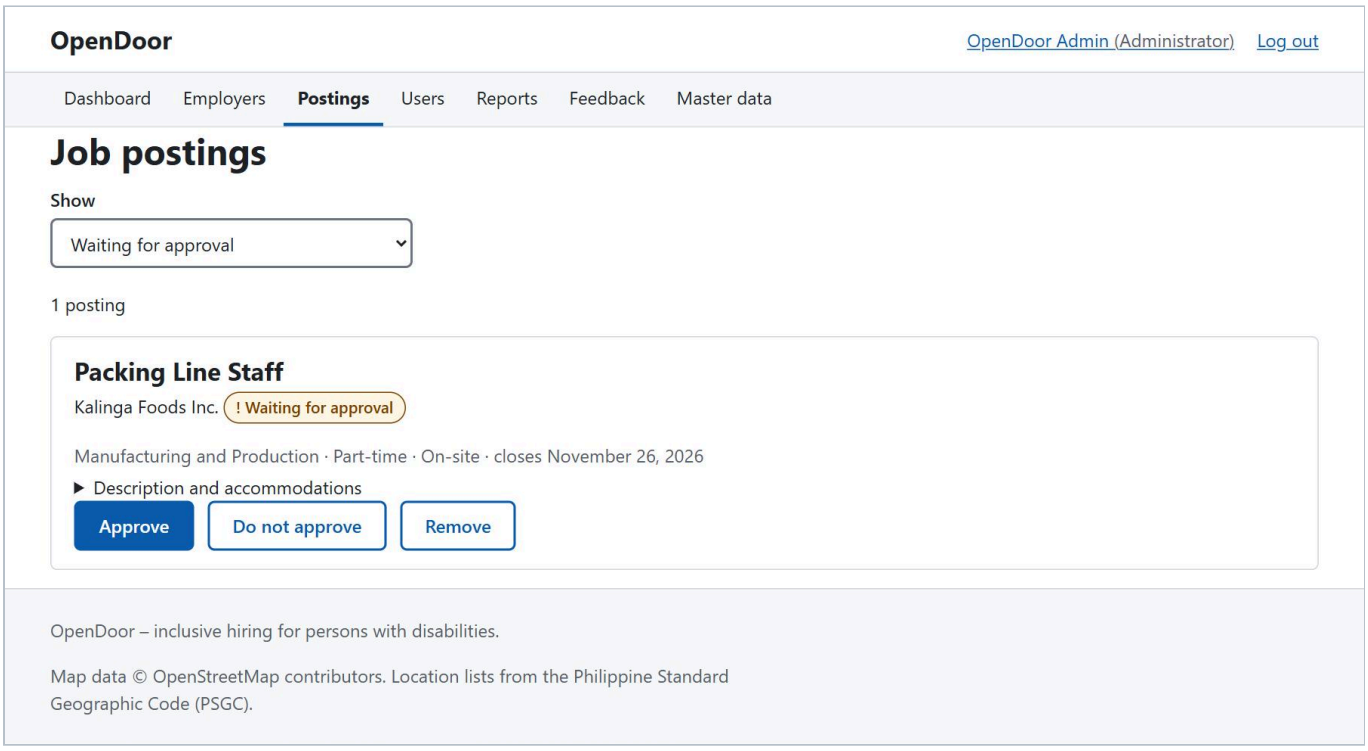

- "No postings are waiting for approval"

API

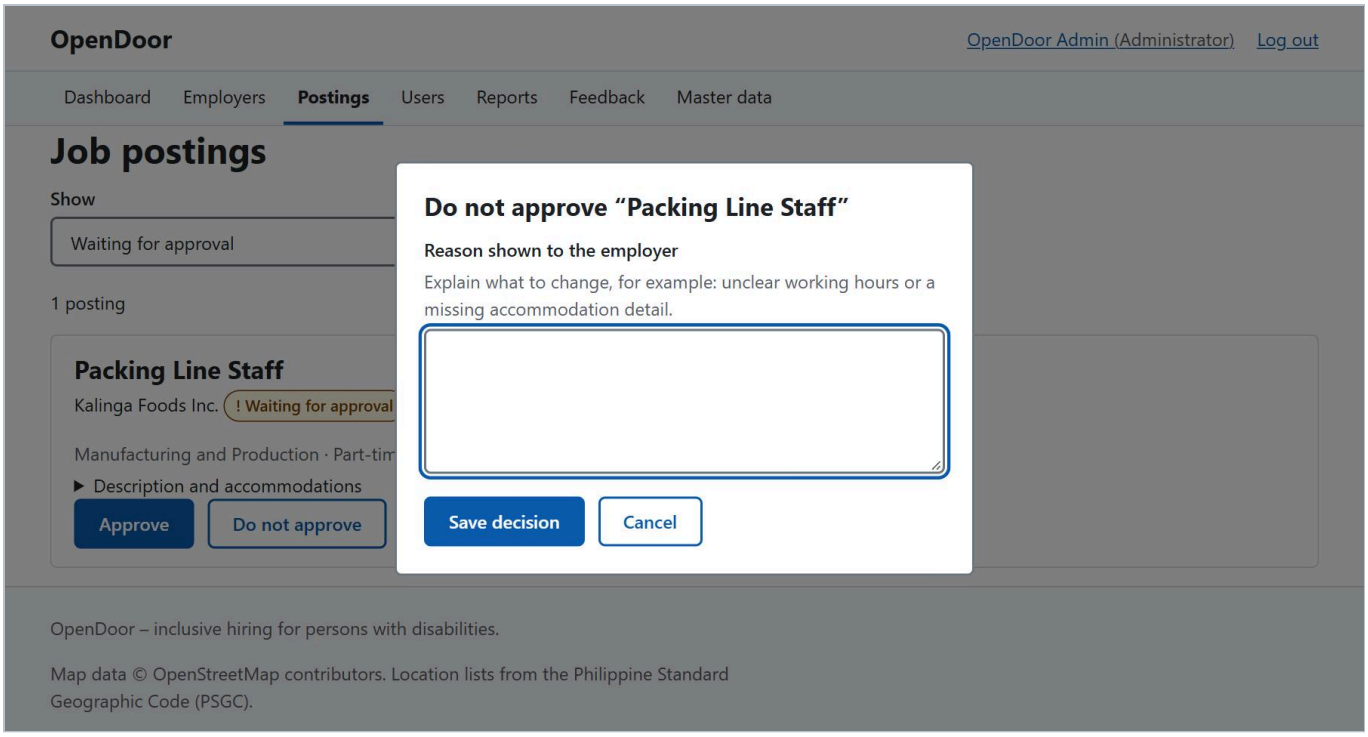

`GET /admin/job-postings?status=&page=`

`PATCH /admin/job-postings/{id}/approve {action, reason}`

`DELETE /admin/job-postings/{id} {reason}`

Screenshot `/admin/job-postings`

"Do not approve" reason dialog `/admin/job-postings`

6.5 Users

Route	`/admin/users`
Who	Administrator
Purpose	Find accounts; suspend or reactivate them.

ON THE SCREEN

- Filter bar: Role (All roles, Job seeker, Employer, Administrator), "Name or email", "Search"
- Table: Name · Email · Role · Status (Active / Suspended badge) · Action ("Suspend" / "Reactivate"; own row says "This is you")

ACTIONS

- Suspend → danger confirm: signed out on every device, cannot log in; for employers "Their job postings are hidden from candidates while the account is suspended. Nothing is deleted."
- Reactivate → confirm; employer postings are shown again

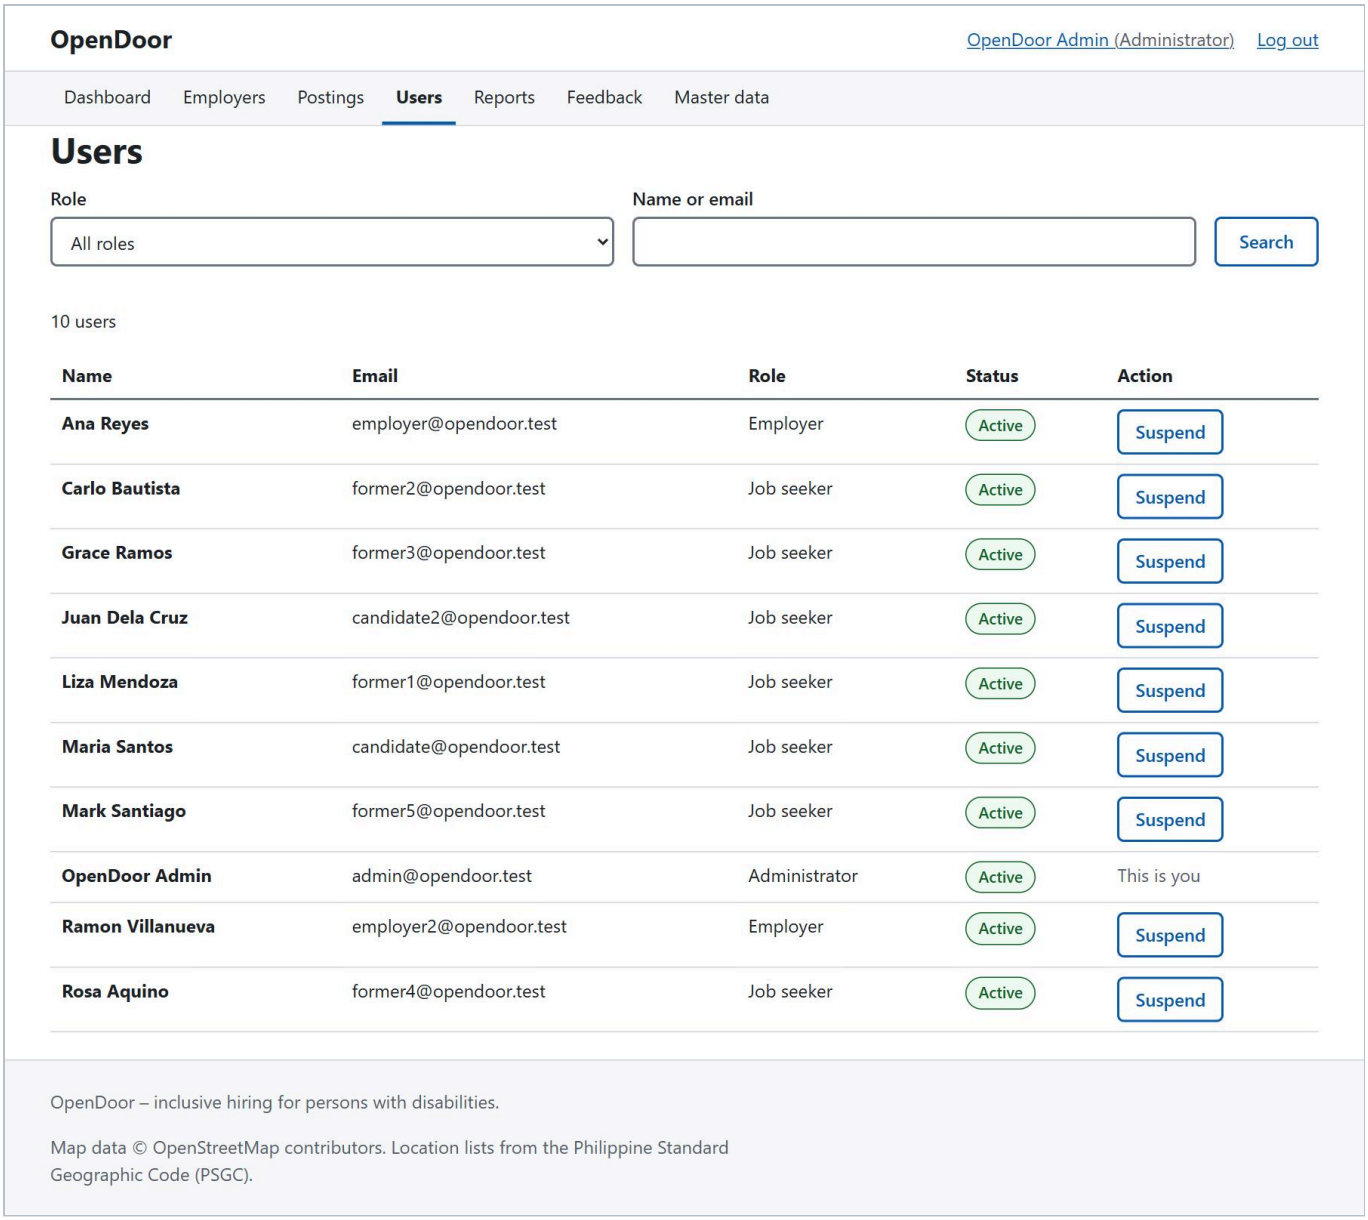

MESSAGES AND STATES

- "No users found"

API

`GET /admin/users?role=&q=&page=`

`PATCH /admin/users/{id}/suspend {suspended}`

Screenshot `/admin/users`

6.6 Reports

Route	`/admin/reports`
Who	Administrator
Purpose	Postings reported by job seekers.

ON THE SCREEN

- "Show" select: Open (default, oldest first), Dismissed, Action taken
- Report cards: posting title (link), company · "Reported {date}" · status badge, the reason as a quote; resolved cards add "Resolved {date} – note: …"
- Buttons "Dismiss" and "Take action" on open reports

ACTIONS

- Dismiss / Take action → dialog with an optional "Note" (hint for action: "posting closed, employer contacted") → "The report was dismissed." / "…marked as actioned."

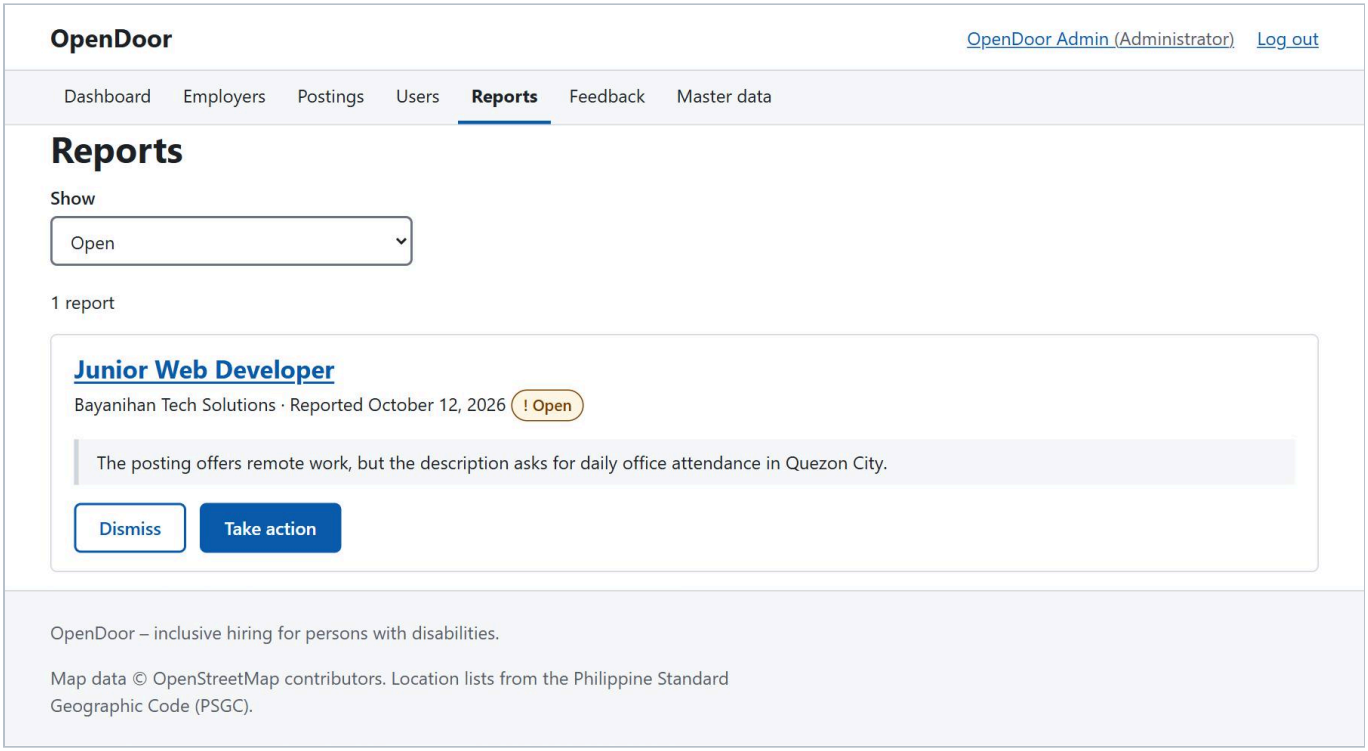

MESSAGES AND STATES

- "No reports here"

API

`GET /admin/reports?status=&page=`

`PATCH /admin/reports/{id} {status, note}`

Screenshot `/admin/reports`

6.7 Feedback responses

Route	`/admin/feedback`
Who	Administrator
Purpose	Moderate the anonymous ratings behind the trust scores.

ON THE SCREEN

- Intro: hide only abusive, off-topic or clearly false responses; the score is recalculated
- "Show": All responses, Counted in the score, Hidden
- Cards: "{company} – {job}", "Submitted {date}", Hidden badge, rating per accommodation, comment quote, button "Hide response" / "Show again"

ACTIONS

- Hide (danger confirm) / Show again → "The employer's trust score will be recalculated."

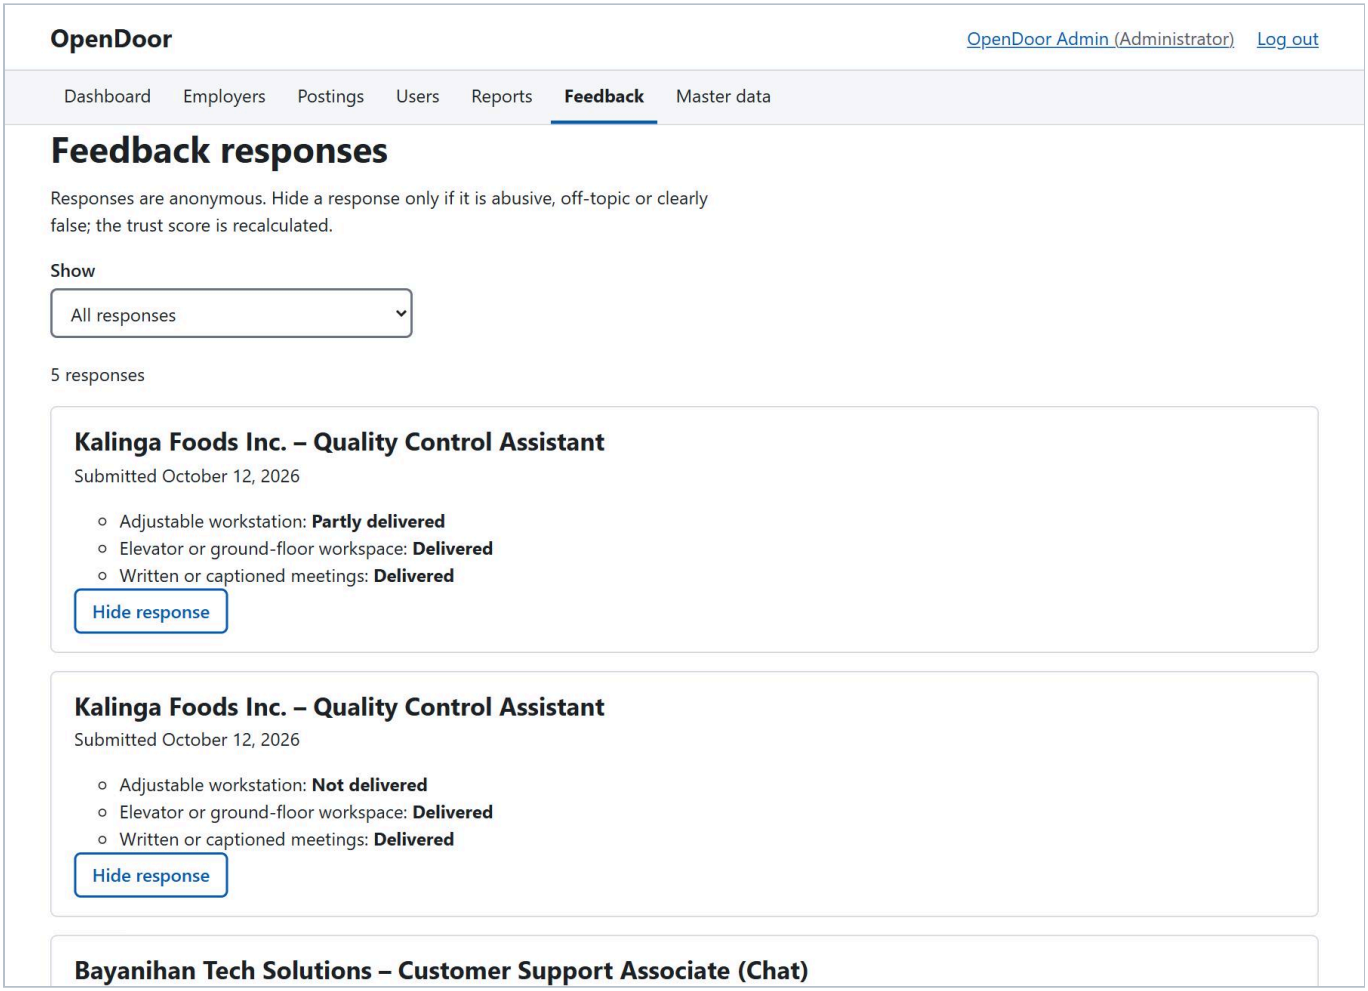

MESSAGES AND STATES

- "No feedback responses here"

API

`GET /admin/feedback?hidden=&page=`

`PATCH /admin/feedback/{id}/hide {hidden}`

Screenshot – part 1 of 2 `/admin/feedback`

Submitted October 12, 2026

- Flexible hours: **Partly delivered**
- Hybrid work: **Delivered**

Map data © OpenStreetMap contributors. Location lists from the Philippine Standard Geographic Code (PSGC).

Screenshot – part 2 of 2 `/admin/feedback`

6.8 Master data

Route	`/admin/master-data`
Who	Administrator
Purpose	Job categories and accommodation types used everywhere in the forms.

ON THE SCREEN

- Card "Job categories": list with "Rename" (dialog) and "Delete" per item; form "New category" + "Add category"
- Card "Accommodation types": table Name (+ description) · Group · Status (In use / Retired) · Actions (Edit, Delete or Restore); button "Add accommodation type" → dialog with Name, Group (5 groups), Description (optional, "One short sentence shown under the checkbox.")

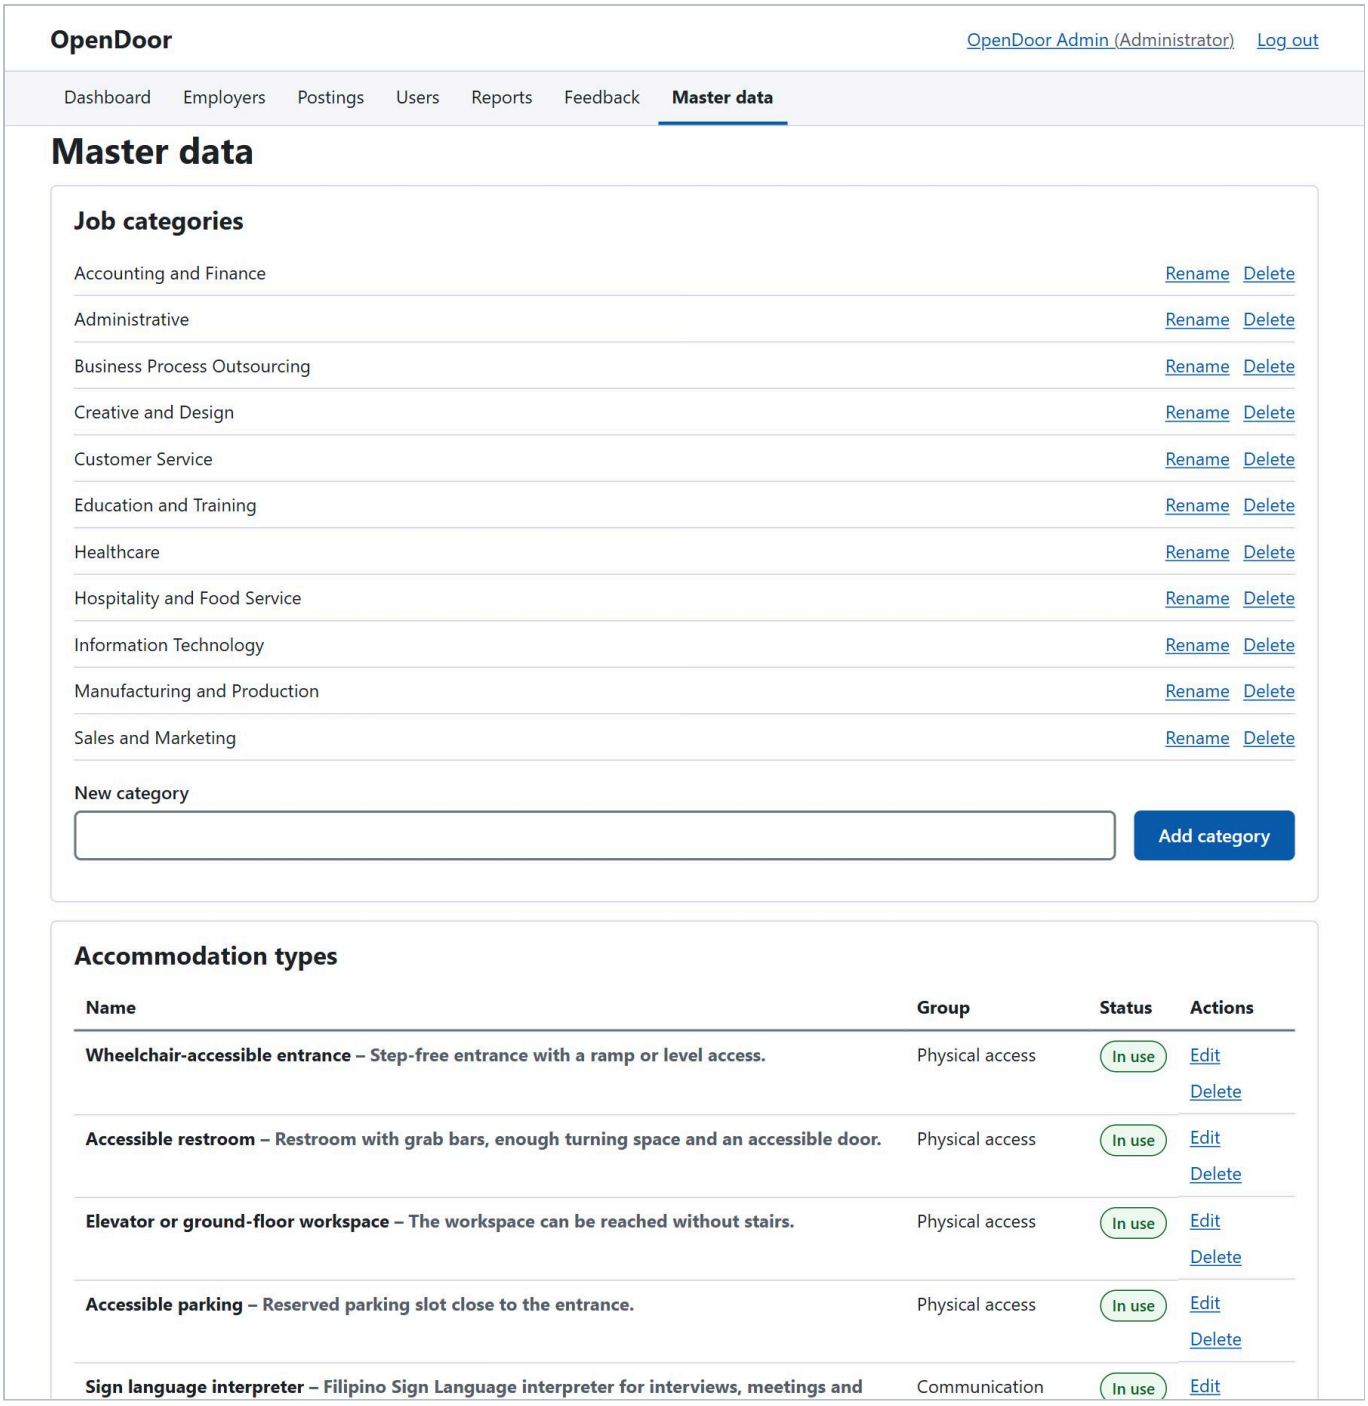

ACTIONS

- Delete a category in use → refused: "Categories used by job postings cannot be deleted. Rename them instead."
- Delete an accommodation in use → retired instead ("It no longer appears in forms."); Restore makes it available again

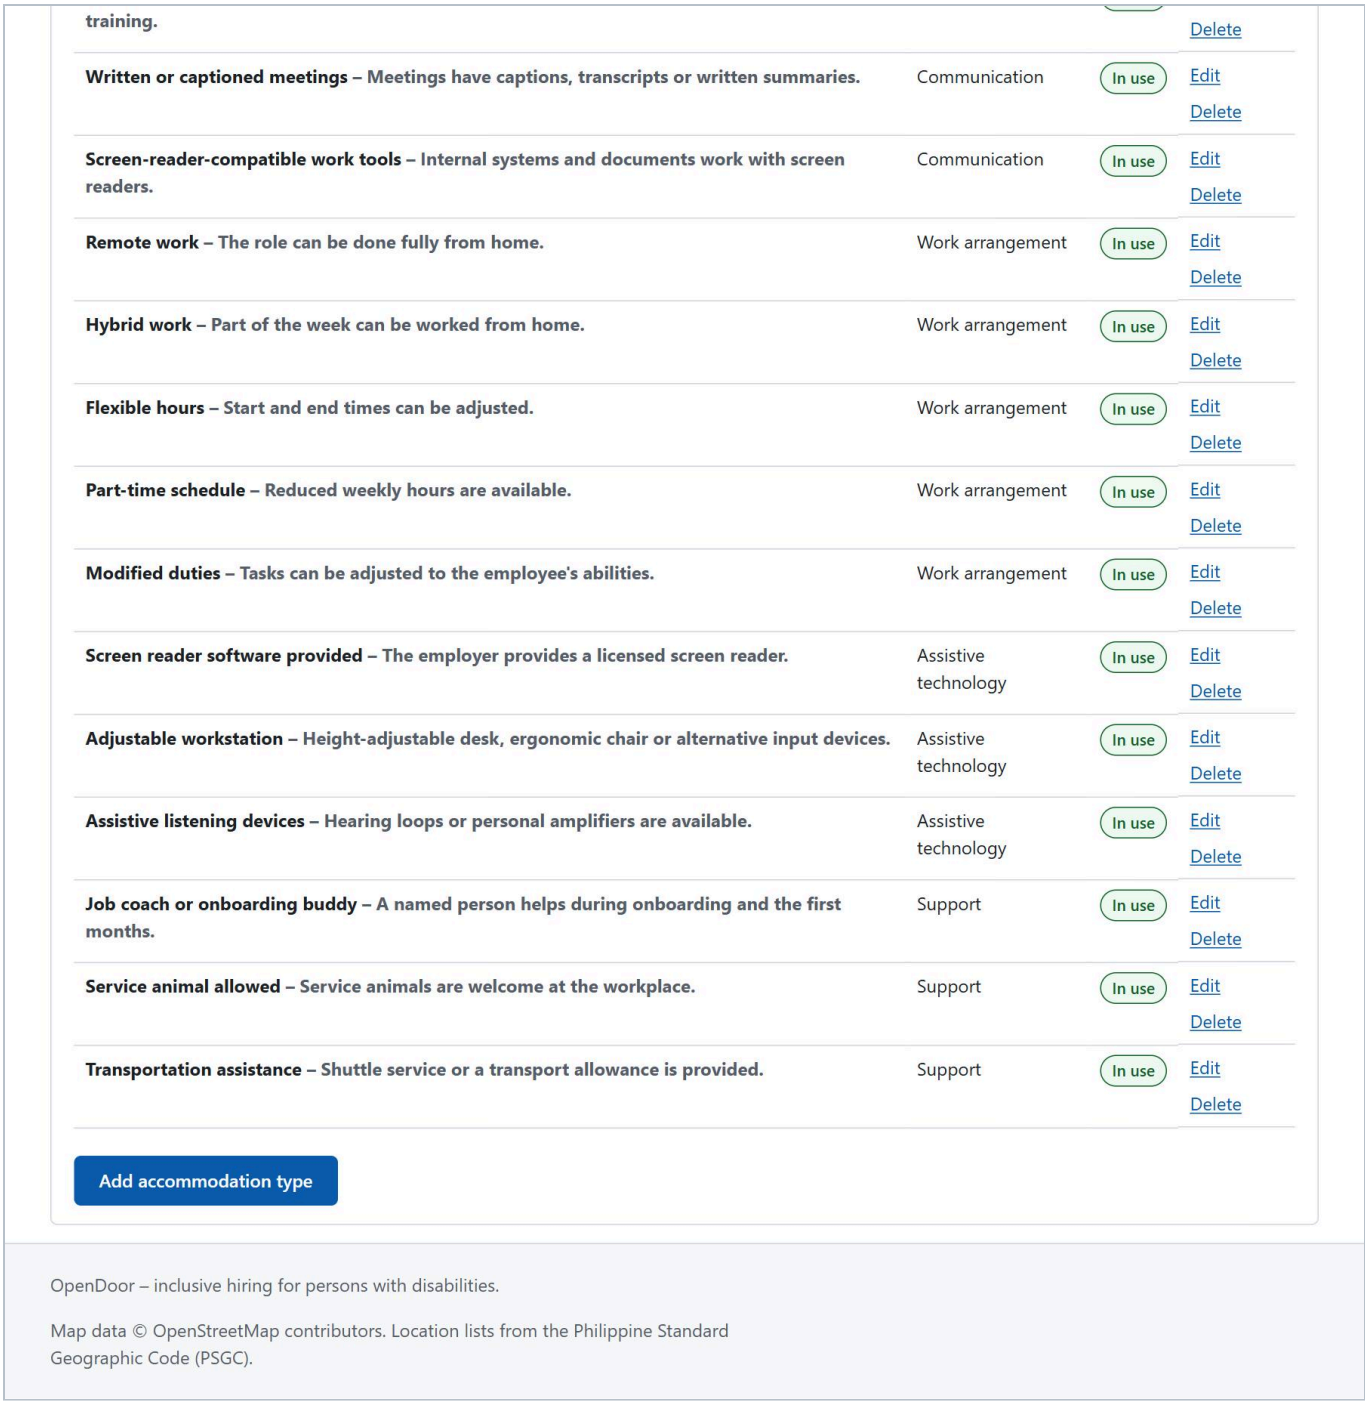

API

`GET /categories, POST/PUT/DELETE /admin/categories`

`GET/POST /admin/accommodations, PUT/DELETE /admin/accommodations/{id}`

Screenshot – part 1 of 2 `/admin/master-data`

Screenshot – part 2 of 2 `/admin/master-data`

7 Screens for every signed-in user

Reached from the header: the Notifications link (job seekers and employers) and the user name (Account settings).

7.1 Notifications

Route	`/notifications`
Who	Job seeker, Employer
Purpose	In-app notices, newest first (12 per page).

ON THE SCREEN

- Line "2 unread notifications" / "Everything is read." and button "Mark all as read"
- List: "New" badge on unread items, the message as a link to the related page, date and time; "Mark as read" for notices without a link
- Header link "Notifications" with a red count badge

ACTIONS

- Open a notice → its page, and it is marked read
- Mark all as read → "All notifications are marked as read."

MESSAGES AND STATES

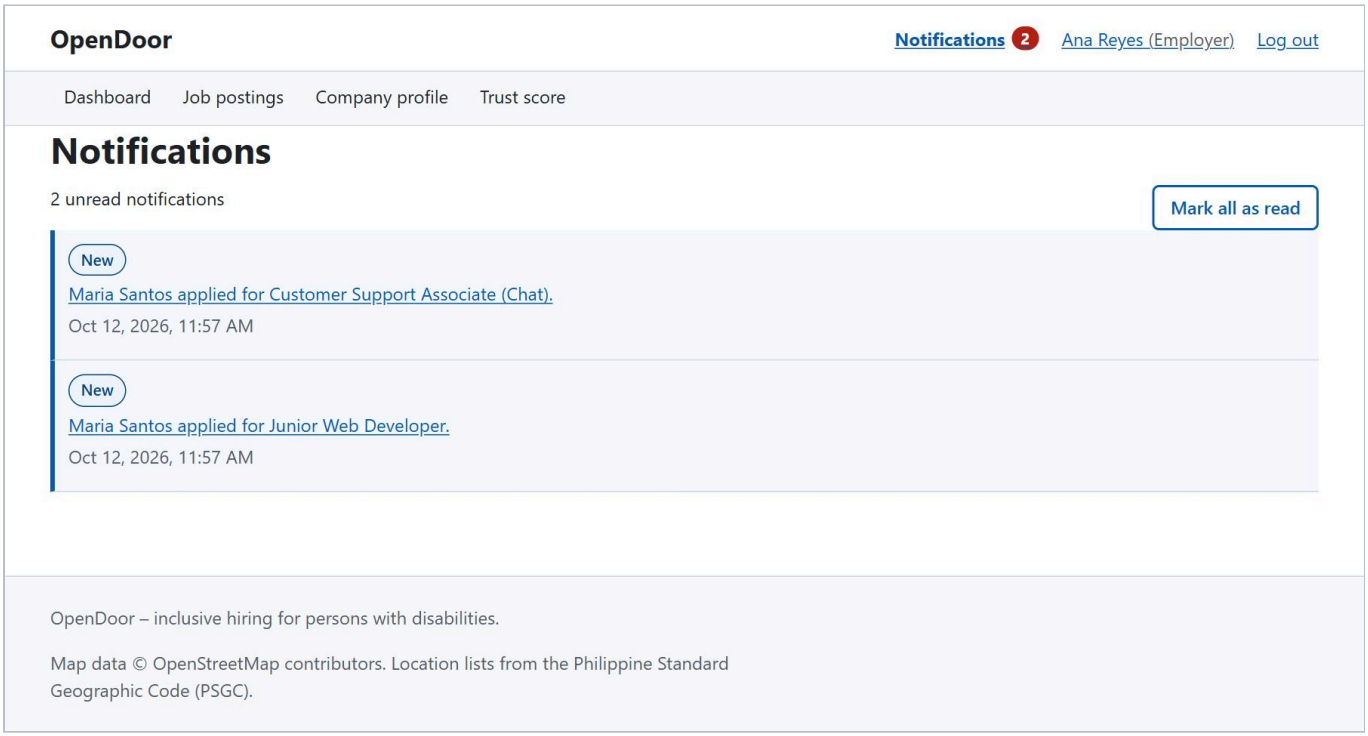

- "No notifications yet – You will be told here when an application or posting changes."

API

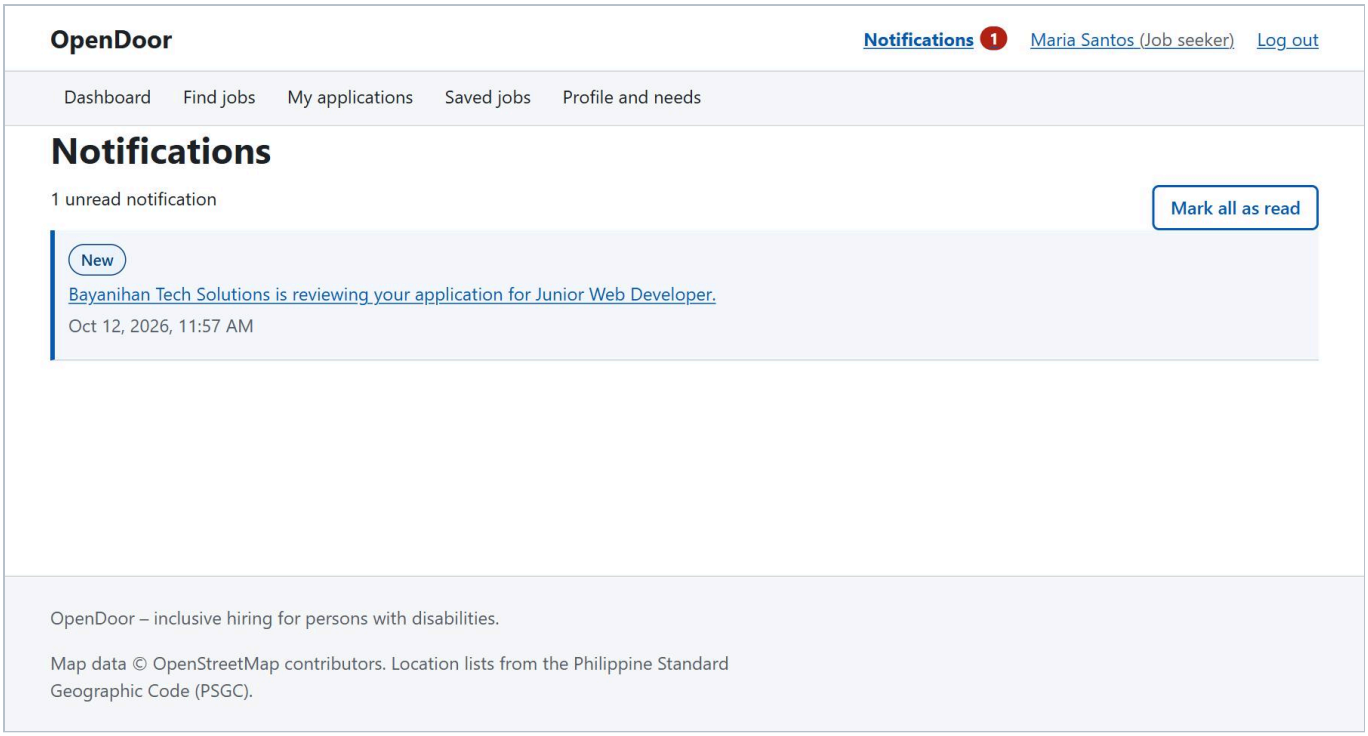

`GET /notifications?page=`

`PATCH /notifications/{id}/read`

`PATCH /notifications/read-all`

Employer `/notifications`

Job seeker `/notifications`

7.2 Account settings NEW

Route	`/account`
Who	All signed-in users
Purpose	Display settings and password.

ON THE SCREEN

- Line "{name} · {email} · {role}"
- Card "Display": "Changes apply immediately and are saved to your account…"; radio groups Text size (Standard, Large (125%), Extra large (150%)), Colours (Standard colours, High contrast), Motion (Allow animations, Reduce motion); status "Display settings applied and saved to your account."
- Card "Change password": Current password, New password ("At least 8 characters, different from the current one."), Confirm new password, button "Change password"
- PLANNED Card "Email notifications" (section 9)

ACTIONS

- A display change applies at once on this device and is saved to the account (other devices get it at the next login)
- Change password → "Your password is changed. You were signed out on your other devices."

MESSAGES AND STATES

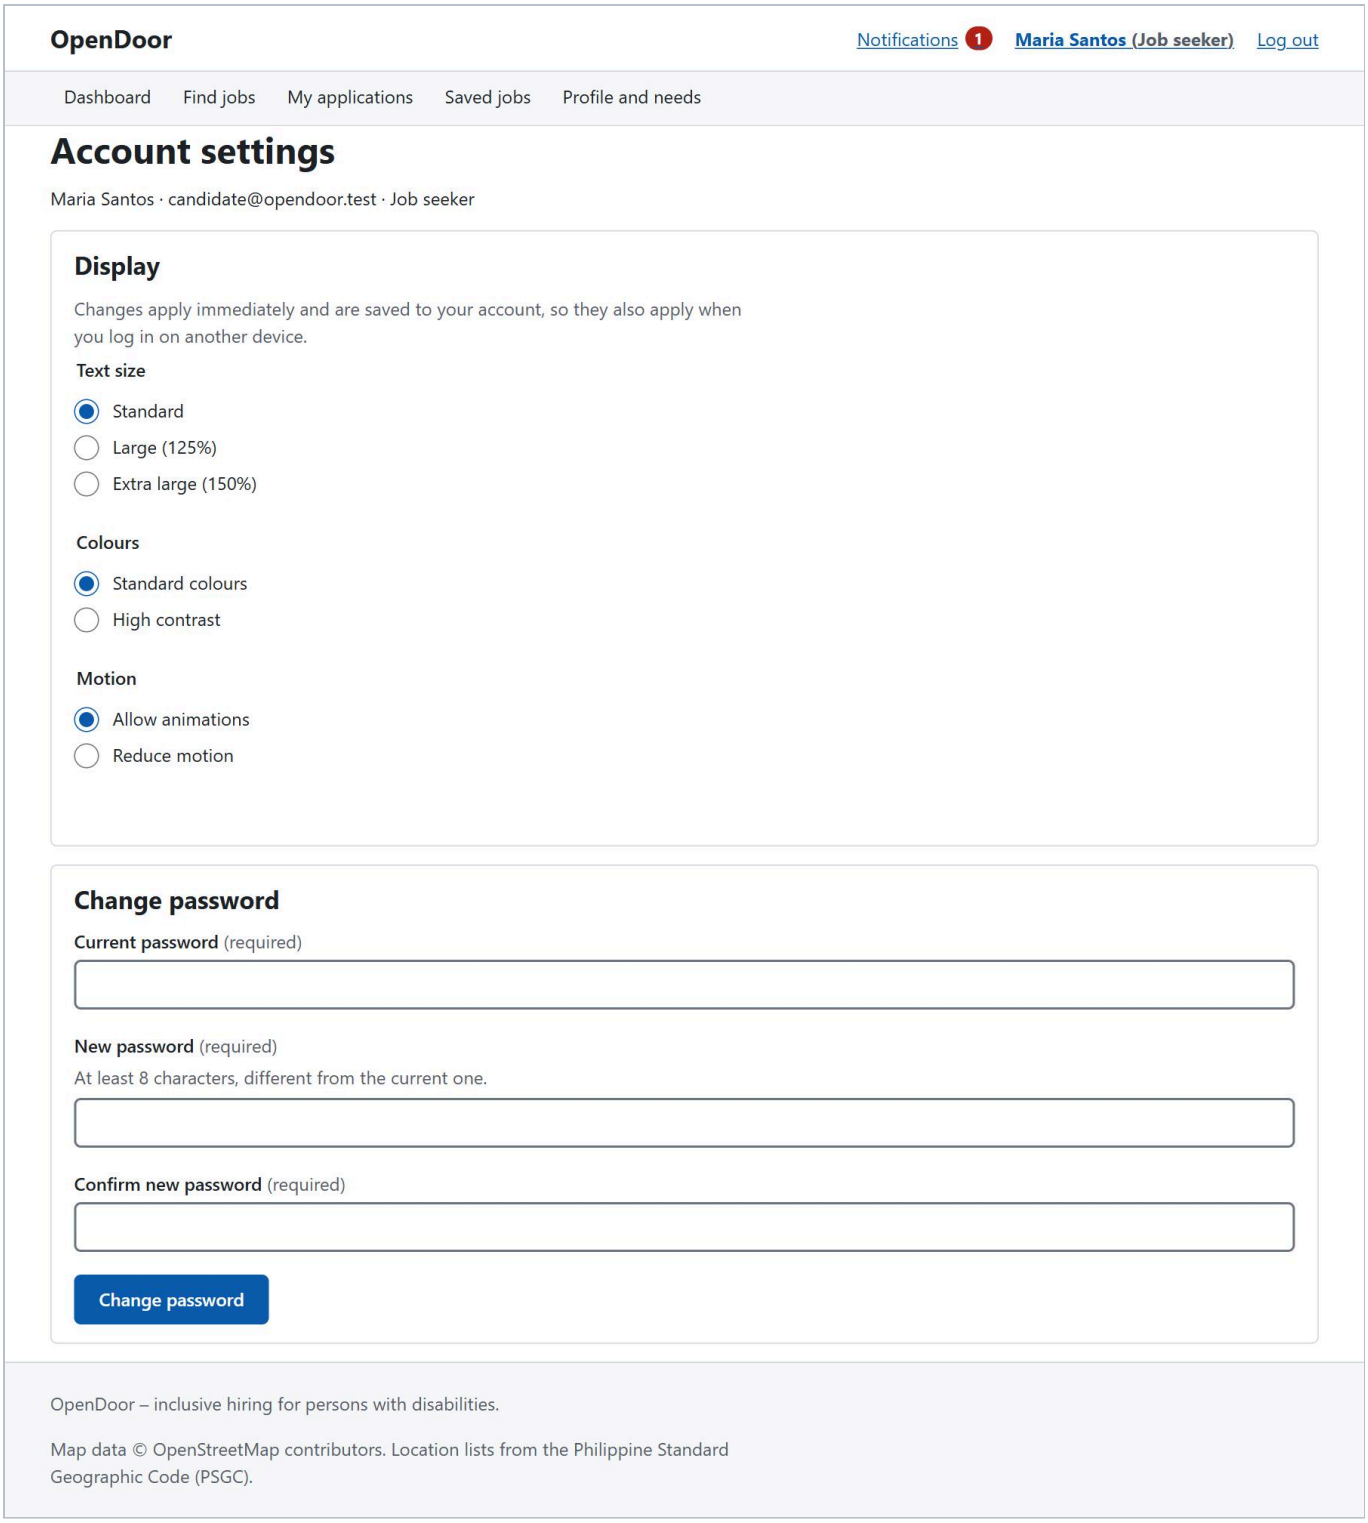

- Saving failed: "Display settings applied on this device, but not saved to your account. Change a setting to try again."

API

`PUT /me/display-prefs {text_size, contrast, motion}`

`PUT /me/password`

`Planned: PUT /me/email-notifications {enabled}`

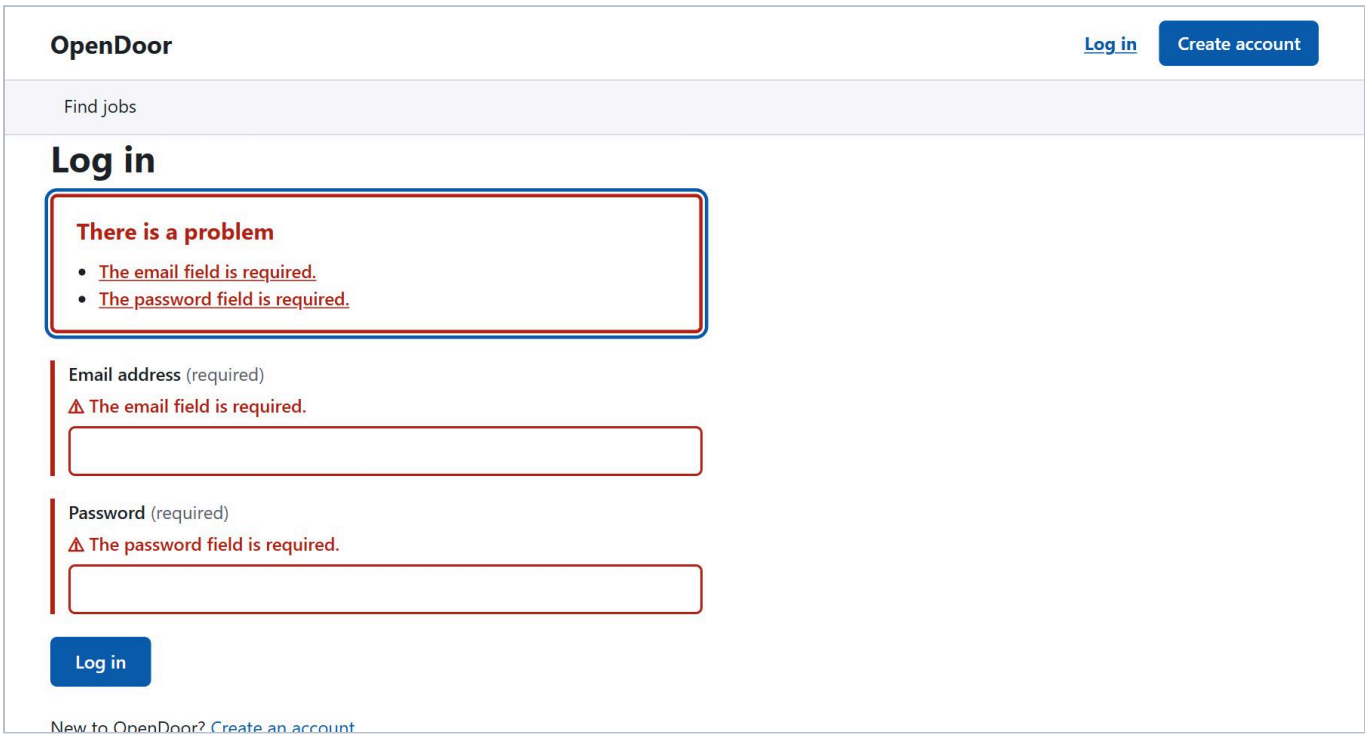

Screenshot `/account`

8 Dialogs, states and phone layout

Patterns the new UI must keep. Most of them already appear on the screen pages; here they are side by side.

8.1 Error summary after a failed submit

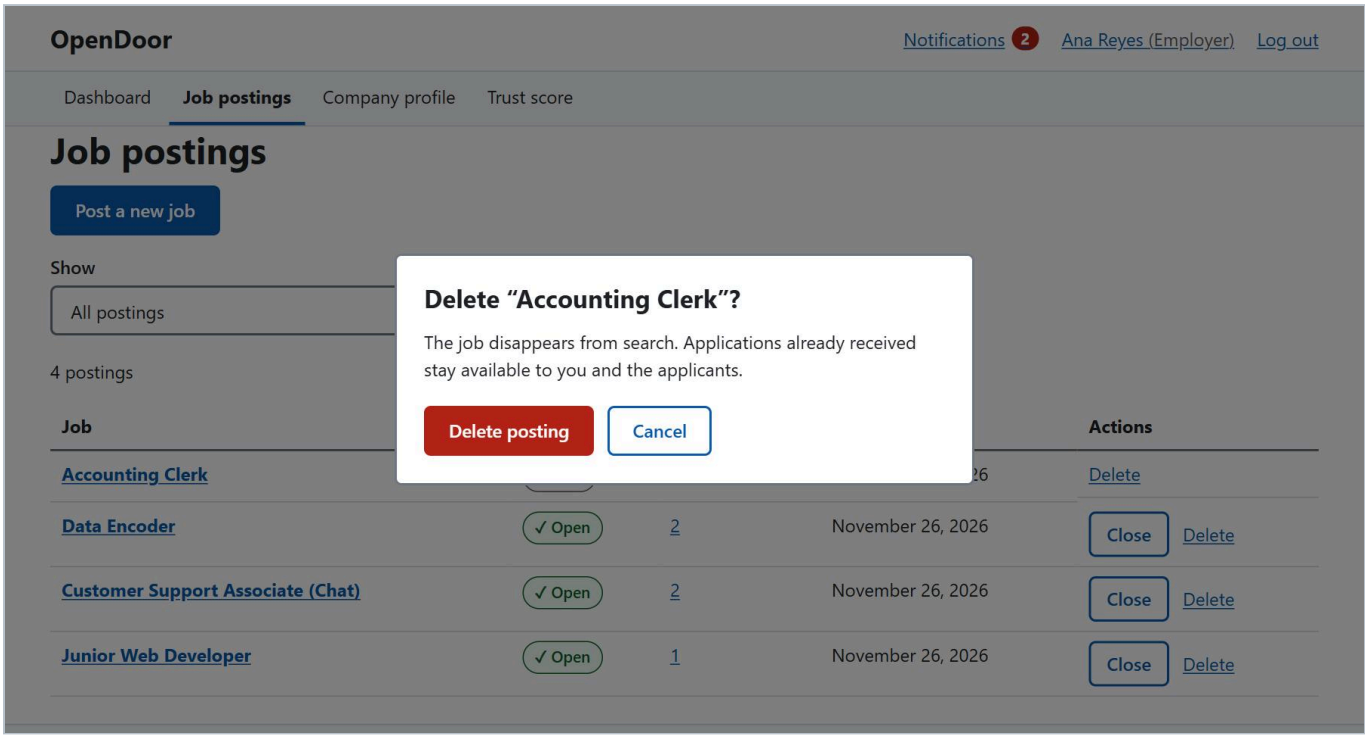

Focus moves to the summary; each line links to its field; each field repeats its error under the label with ⚠.

Screenshot `/login`

8.2 Confirm dialog (dangerous action)

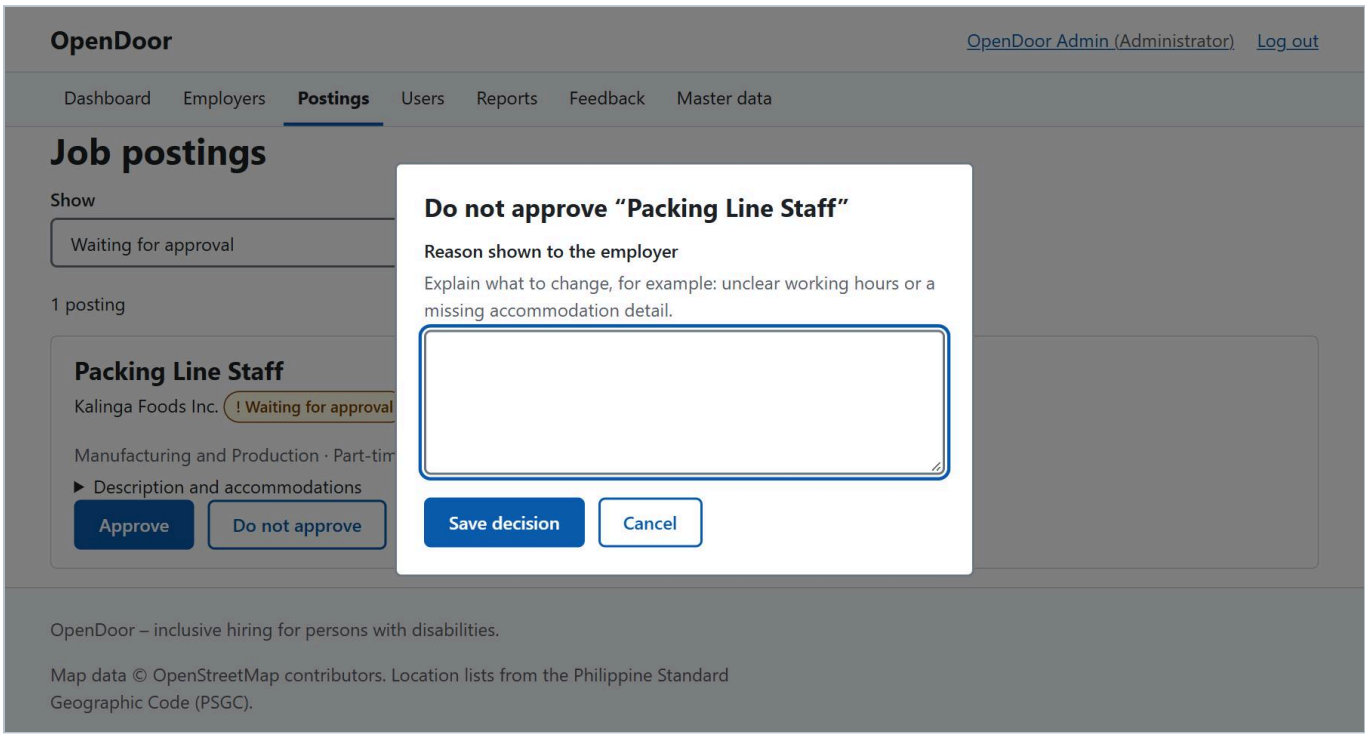

Red confirm button, focus starts on Cancel, Escape closes, focus returns to the button that opened it.

Screenshot `/employer/jobs`

8.3 Reason dialog

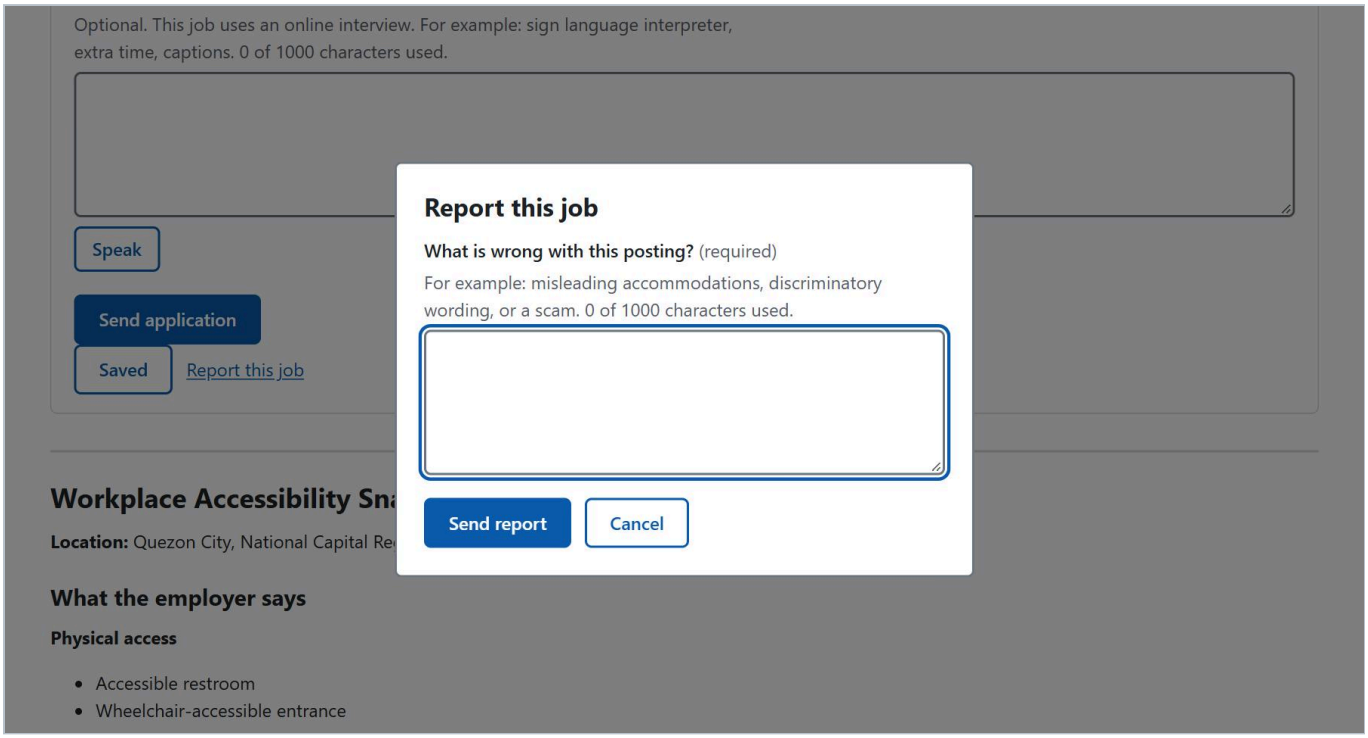

Required reason with an inline error "Enter a reason."; used for rejecting employers and postings, removing postings and resolving reports (optional note).

Screenshot `/admin/job-postings`

8.4 Form in a dialog

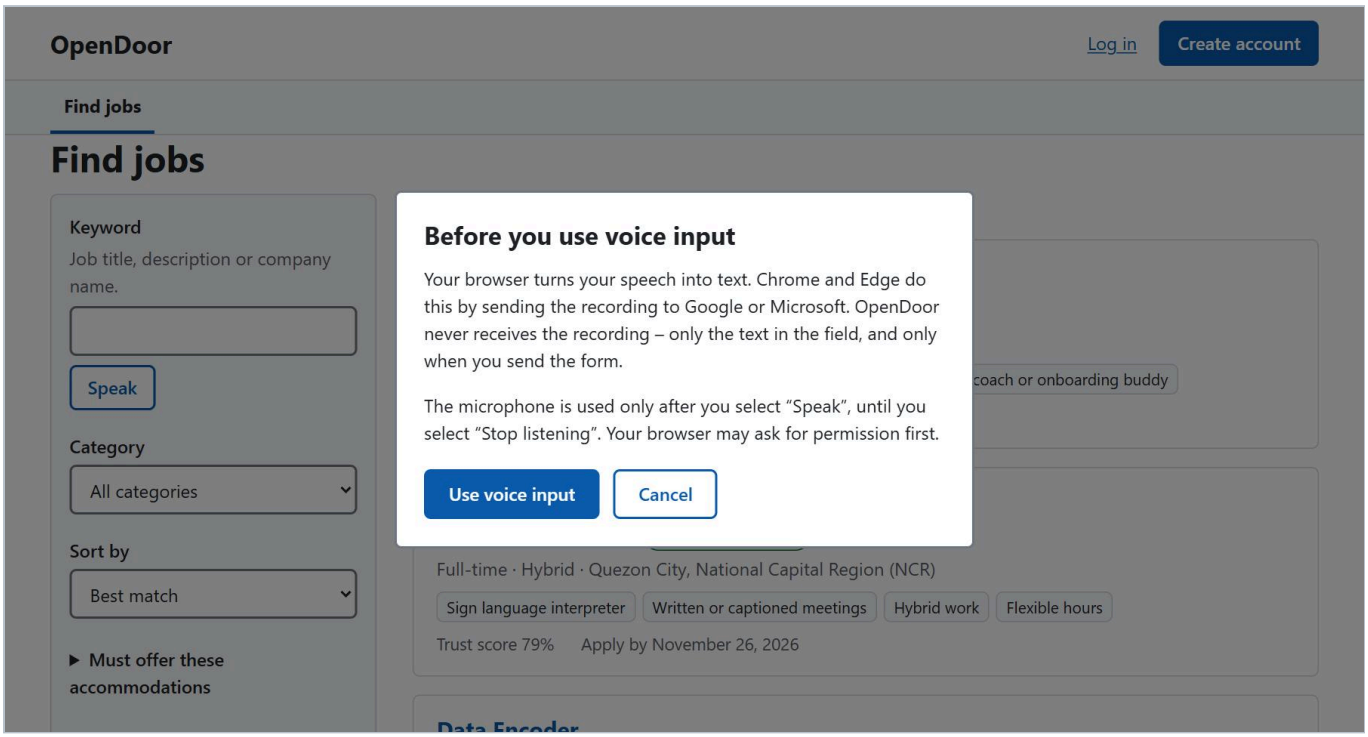

Report this job: required text area with counter and hint, "Send report" / "Cancel".

Screenshot `/candidate/jobs/1`

8.5 Voice input privacy notice

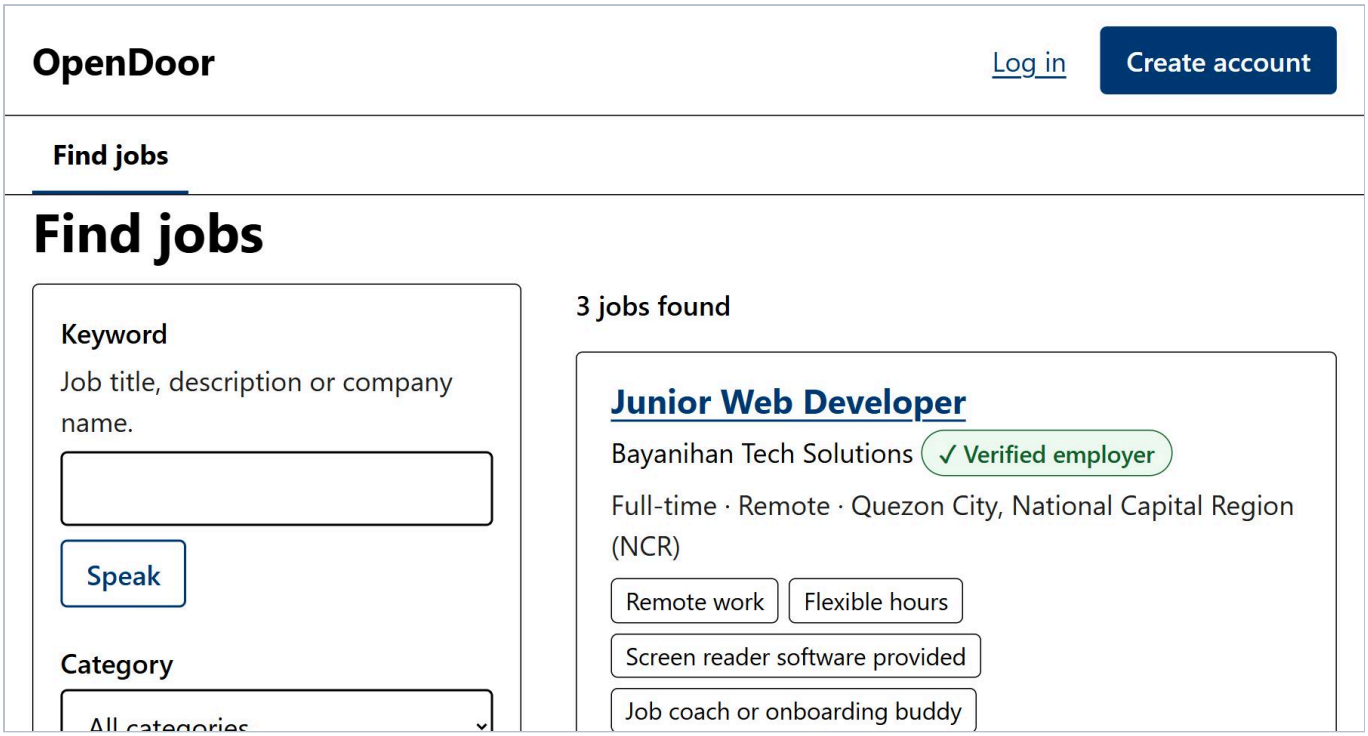

Shown once before the first use of "Speak": the browser (Chrome/Edge) sends the recording to Google or Microsoft; OpenDoor receives only the text.

Screenshot `/jobs`

8.6 High contrast and 150 % text

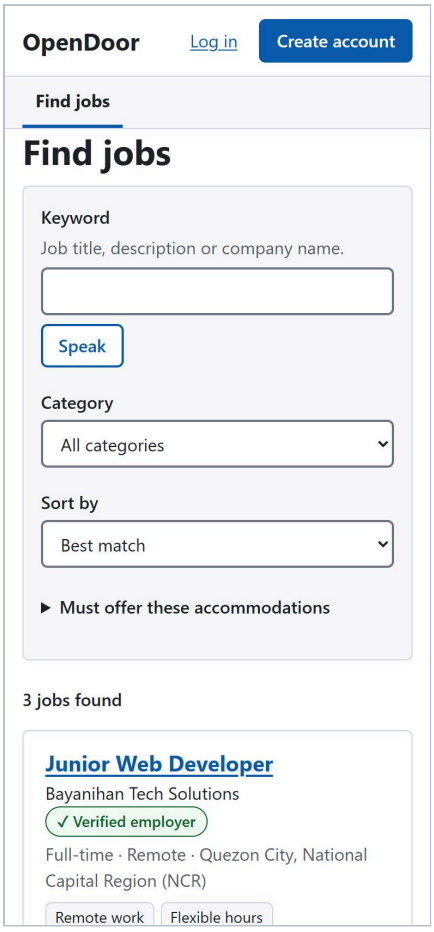

Account → Display. Black text and borders, darker blue, thicker focus ring and link underlines. Layout reflows; nothing is cut off.

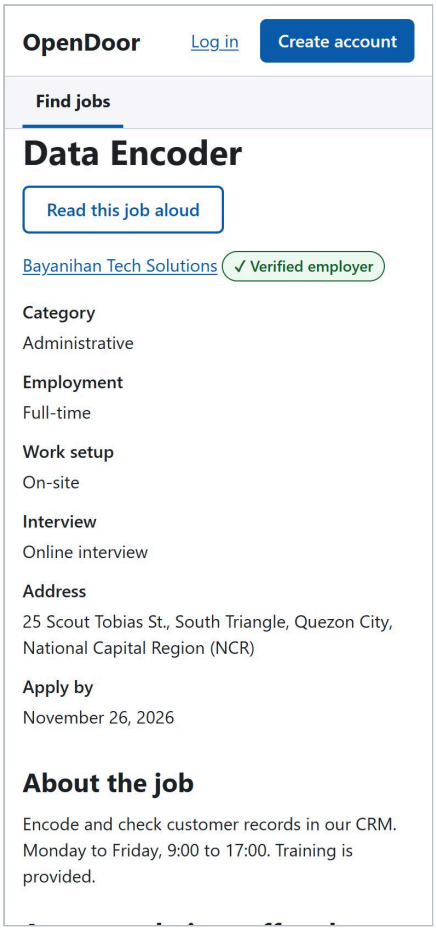

Screenshot `/jobs`

8.7 Phone width (390 px)

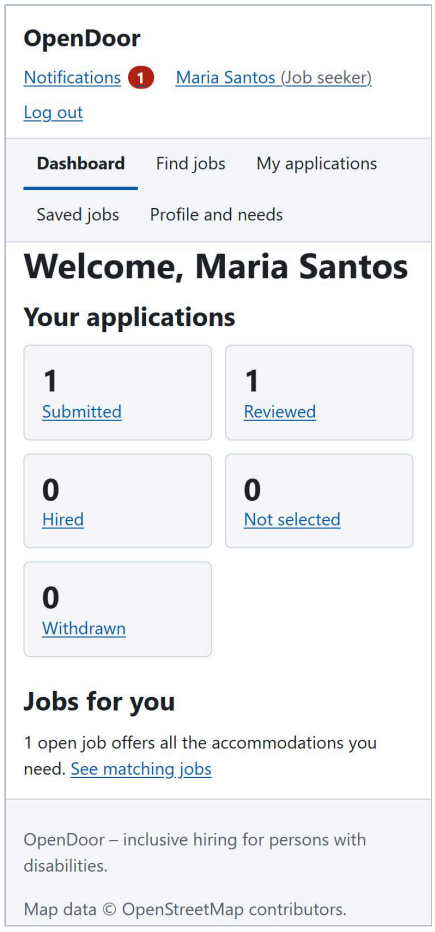

Header items wrap, tabs wrap onto two lines, the filter panel sits above the results, tiles form two columns.

Find jobs (guest)

Job details (guest)

Job seeker dashboard

9 Planned: email notifications PLANNED

The second half of M13. The user chose on October 12, 2026: email notifications are **on by default** and can be turned off in Account settings. The backend part is done; these screens are still to be designed and built.

Account settings – "Email notifications" card	A switch (checkbox) "Send me an email for each notification" for job seekers and employers only (administrators get no notices). It saves at once, like the display settings, with a status line such as "Email notifications are on." Current value: `email_notifications` in `GET /me` and the login response. Save: `PUT /me/email-notifications {"enabled": true|false}`.
Which emails	The same events as the in-app notices (Appendix C): new application (employer), status changed by the other side (job seeker or employer), employer verification decision and posting review or removal (employer, with the admin's reason). Suspended accounts get no email.
Email content	Subject such as "New application for Data Encoder" or "Your job posting Data Encoder was approved"; greeting with the name, the notice text, a button "Open in OpenDoor" to the same page as the in-app link, and a footer explaining how to turn the emails off in Account settings. No disability or accommodation-need details.
Rating reminder	New notice (in-app and email) to a hired job seeker on the day the feedback form opens (30 days after the hire), linking to "Rate your accommodations". The dashboard already lists these under "Ratings to give".

10 Design foundations

Current values from `frontend/src/index.css`. Contrast ratios are against white. A new visual design may change them, but must keep the contrast levels.

Colour tokens

	Token	Value	Use
	`--text`	`#1f2328`	Body text (15.8:1)
	`--text-muted`	`#57606a`	Hints, secondary text (6.4:1)
	`--bg`	`#ffffff`	Page background
	`--surface`	`#f6f8fa`	Cards, filter panel, footer, secondary nav
	`--border`	`#6e7781`	Input borders (4.6:1)
	`--divider`	`#d0d7de`	Decorative lines only
	`--primary`	`#0b5cad`	Links, primary buttons, focus ring (6.6:1)
	`--primary-dark`	`#08457f`	Hover, info badge text
	`--danger`	`#b42318`	Errors, danger buttons, count badge (6.5:1)
	`--danger-bg`	`#fef3f2`	Error alert / danger badge background
	`--success`	`#116329`	Success text and badges (7.4:1)
	`--success-bg`	`#effaf3`	Success alert / badge background
	`warning`	`#7a4100`	Warning text on #fff8e6 (7.7:1)
	`info bg`	`#eef5fc`	Info alert and info badge background

Type, layout and behaviour

Typography	System font stack (`system-ui, Segoe UI, Roboto, Arial`), base 16 px, line height 1.5, h1 2 rem, paragraphs at most 70 characters wide.
Layout	Content up to 72 rem (1,152 px) centred. Find jobs uses two columns (18 rem filters + results) from 56 rem (896 px); below that everything stacks. Detail lists turn into one column under 30 rem (480 px).
Shape and spacing	Corner radius 6 px; spacing unit 1 rem; cards have a 1 px divider border.
Buttons	Primary (filled blue), secondary (white with blue border), small, link-style and danger (red). Minimum height 44 px (40 px small) for touch. Busy buttons keep focus and say what is happening ("Saving…").
Status	Always text + icon + colour, never colour alone: badges `✓` success, `×` danger, `!` warning, `•` info/neutral, `–` muted.
Display settings	Text size 100 / 125 / 150 % (root font size), high contrast (black text and borders, darker blue, 4 px focus ring, thicker link underlines) and reduced motion. Applied as

	`data-text-size`, `data-contrast`, `data-motion` on `<html>`; the system "reduce motion" setting is also respected.
Responsive	Works at 360 px width and at 200 % text without sideways scrolling; only the trust-score table scrolls inside its own labelled box.

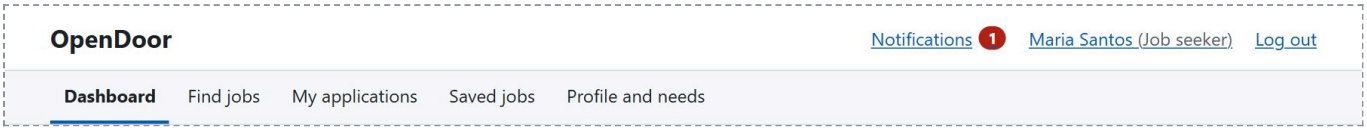

11 Shared components

Building blocks in `frontend/src/components`, reused across the screens. The pictures are cut from the screenshots at their real size.

AppLayout

Page frame: "Skip to main content" link, header with the OpenDoor brand (links to the role's dashboard), account navigation (Notifications with unread count, user name and role → Account settings, Log out; guests: Log in, Create account), role navigation tabs, main area, footer with OpenStreetMap and PSGC attribution.

Admins have no Notifications link. The active tab is bold with a blue underline.

Page

Every screen starts with one h1. Sets the browser tab title ("Find jobs – OpenDoor") and moves focus to the h1 after in-app navigation.

Where two pages share a heading, the tab title is made unique.

Button

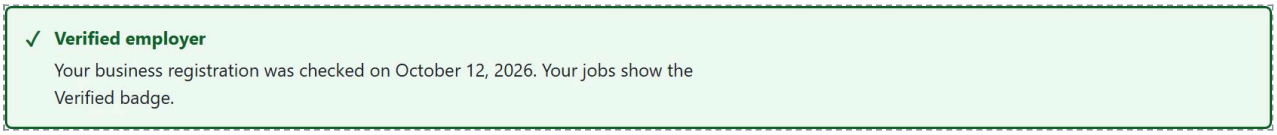

Button that stays focusable while unavailable (`aria-disabled` instead of `disabled`) and ignores repeated clicks while a request runs.

Variants: primary, secondary, small, link, danger.

Alert / ApiErrorAlert

Message box in four types (info ℹ, success ✓, warning !, error ⚠) with optional title. API errors show a plain-language message and a "Reference: …" request id for support.

Results are announced politely; blocking errors assertively.

ErrorSummary

Box "There is a problem" above a form after a failed submit, listing every error as a link to its field. It takes focus.

GOV.UK error-summary pattern; each field also shows its own error under the label.

Form fields

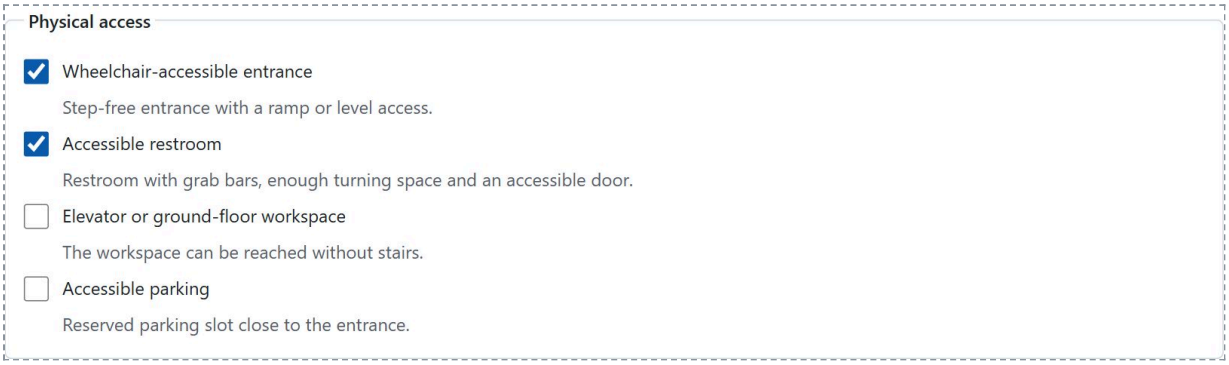

TextField, TextArea (with "N of M characters used" counter), SelectField, CheckboxField, RadioGroup (fieldset + legend, optional hint per option). Label above, then hint, then error, then the input. Required fields say "(required)" in text.

`voice` adds the Speak button (VoiceInput).

AccommodationPicker

Grouped checkboxes for the accommodation types (Physical access, Communication, Work arrangement, Assistive technology, Support) with short descriptions and a live "N selected." line. In job postings, each checked item gets an optional "Details for ..." input.

Used for needs, posting accommodations and the "must offer" search filter.

LocationPicker

Region → Province → City or municipality selects from the official PSGC lists (NCR has no provinces). Shows the saved place with a "Change location" link until the user edits it.

Lists come from the Insights Service; a failed list is announced.

JobCard

Search result: title link, company + Verified badge, "Full-time · Remote · Quezon City...", match badge, up to 4 accommodation tags (+N more), trust score or "not published yet", "Apply by" date.

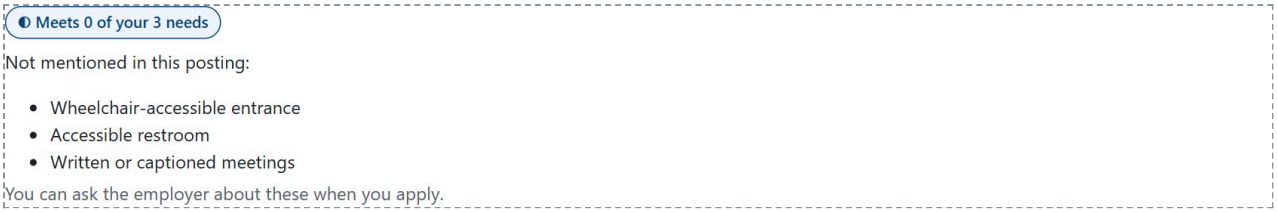

Also used on Saved jobs (with a Remove button) and the employer page.

MatchBadge

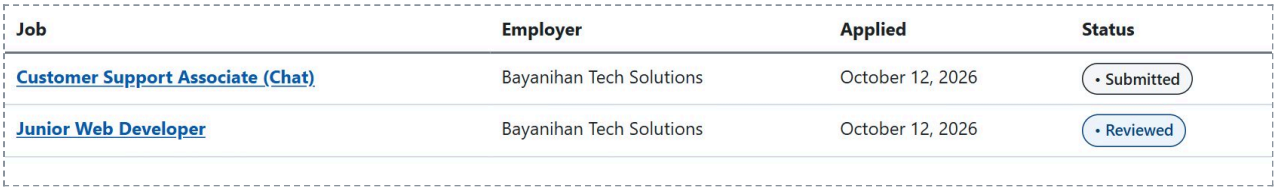

"★ Meets all 3 of your needs" (green) or "◐ Meets 1 of your 3 needs" (blue). On job details also lists the needs the posting does not mention.

Only for job seekers who saved needs.

StatusBadge / VerifiedBadge

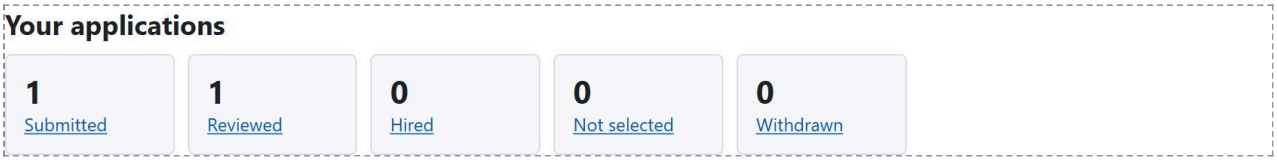

Pill-shaped status for applications, postings, registry checks and reports (see Appendix B). "✓ Verified employer" for checked companies.

StatCards

Dashboard numbers as a labelled list of tiles; the label links to the filtered list.

Grid of 9 rem+ tiles that wraps on small screens.

TrustScoreCard

"79% of promised accommodations were delivered – Based on 3 responses…", or "Not published yet … (1 of 3 so far)". Optional table per accommodation (Delivered / Partly / Not delivered).

Compact form inside the job page; full table on the employer and trust-score pages.

Trust score

79% of promised accommodations were delivered

Based on 3 responses from employees hired through OpenDoor.

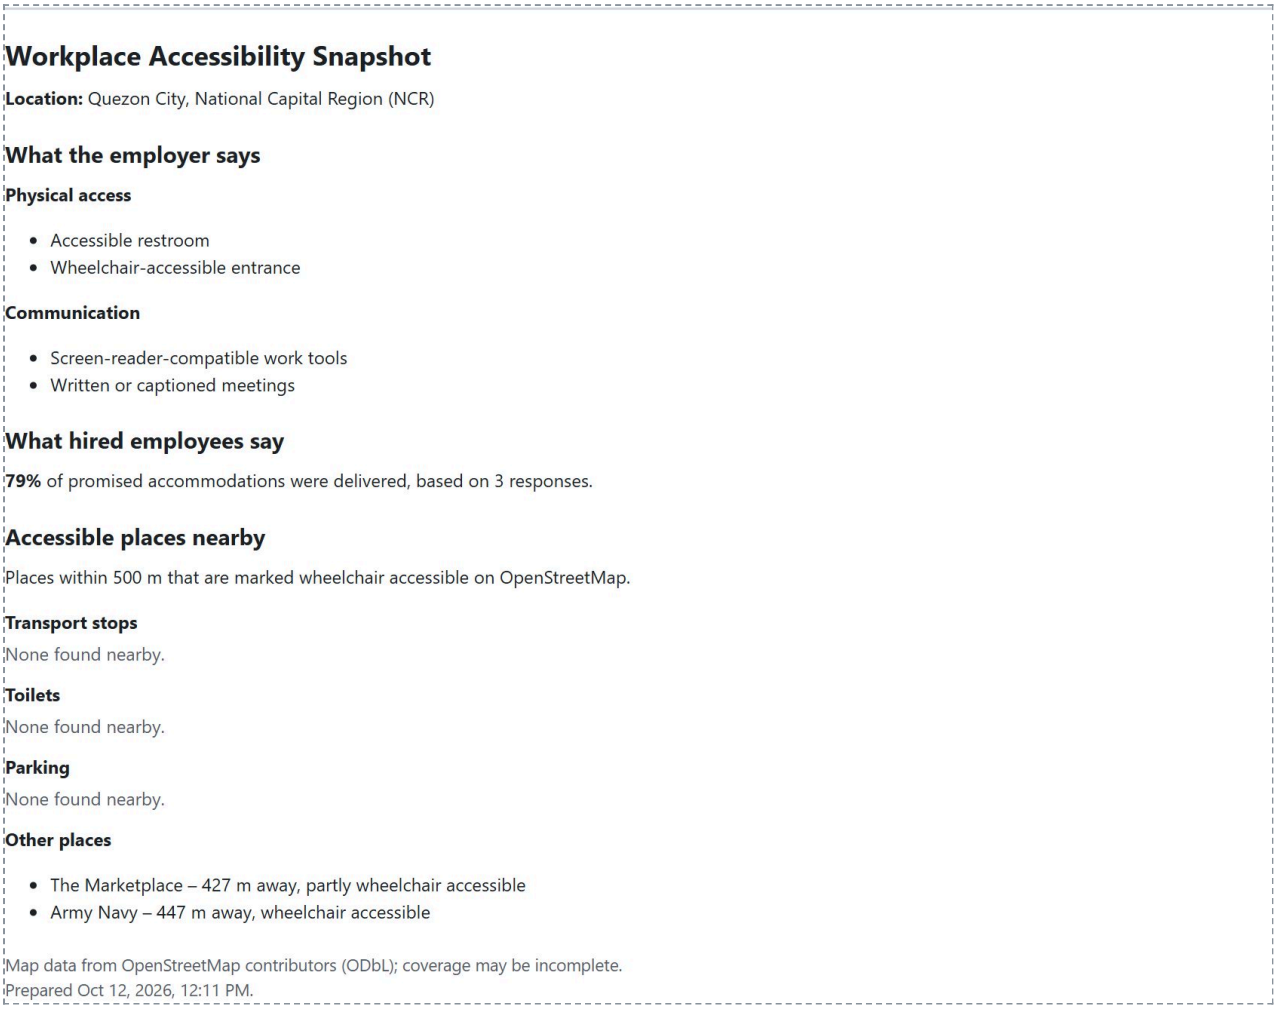

Each accommodation, as rated by hired employees

Accommodation	Delivered	Partly	Not delivered
Accessible restroom (2 of 2 delivered)	2	0	0
Flexible hours (0 of 1 delivered)	0	1	0
Hybrid work (1 of 1 delivered)	1	0	0
Screen-reader-compatible work tools (1 of 2 delivered)	1	1	0
Sign language interpreter (0 of 1 delivered)	0	0	1
Wheelchair-accessible entrance (2 of 2 delivered)	2	0	0
Written or captioned meetings (2 of 3 delivered)	2	1	0

AccessibilitySnapshot

Insights mashup on the job page: location, "What the employer says", "What hired employees say", "Accessible places nearby" (transport stops, toilets, parking, other places with distance and wheelchair status), source notes and disclaimer.

Loads by itself after the job; failures never block the job page.

Workplace Accessibility Snapshot

Location: Quezon City, National Capital Region (NCR)

What the employer says

Physical access

- Accessible restroom
- Wheelchair-accessible entrance

Communication

- Screen-reader-compatible work tools
- Written or captioned meetings

What hired employees say

79% of promised accommodations were delivered, based on 3 responses.

Accessible places nearby

Places within 500 m that are marked wheelchair accessible on OpenStreetMap.

Transport stops

None found nearby.

Toilets

None found nearby.

Parking

None found nearby.

Other places

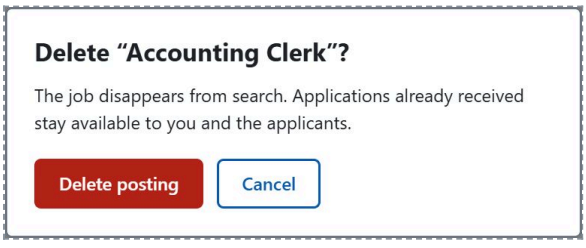

- The Marketplace – 427 m away, partly wheelchair accessible
- Army Navy – 447 m away, wheelchair accessible

Map data from OpenStreetMap contributors (ODbL); coverage may be incomplete.
Prepared Oct 12, 2026, 12:11 PM.

Dialog / ConfirmDialog / ReasonDialog

Modal on the native `<dialog>`: traps focus, Escape closes, focus returns to the button that opened it. ConfirmDialog asks yes/no; ReasonDialog asks for a (required or optional) reason or note.

Dangerous actions start with focus on Cancel and use a red confirm button.

NotificationsLink

Header link "Notifications" with a red count badge and hidden "unread" text; refreshes on every page change and after marking as read.

AsyncContent, Loading, EmptyState, ResultCount, Pagination, ActionFeedback

Shared states: "Loading …" status line; error with "Try again"; empty state with a title and next step; announced result count ("4 postings"); "← Previous page · Page 1 of 3 · Next page →" (12 items per page); success/error message after an action.

ReadAloud NEW

"Read this job aloud" button: reads the title and main content with the browser's own voice. While reading: "Pause reading" / "Resume reading" and "Stop reading".

Hidden when the browser cannot speak. Nothing leaves the device.

VoiceInput NEW

"Speak" button under a text field; adds what the user says to the field until "Stop listening". First use shows a notice that Chrome/Edge send the audio to their speech service.

Hidden where the browser has no speech recognition (e.g. Firefox).

A Route map

Signed-in users who open a page of another role are sent to their own dashboard; guests who open a protected page are sent to Log in and come back after logging in.

Route	Screen	Who
`/`	Home	Everyone
`/jobs`	Find jobs	Everyone
`/jobs/{id}`	Job details	Everyone
`/employers/{id}`	Employer page	Everyone
`/login`	Log in	Guests
`/register`	Create account	Guests
`/candidate/dashboard`	Dashboard	Job seeker
`/candidate/jobs`	Find jobs (match mode)	Job seeker
`/candidate/jobs/{id}`	Job details (apply, save, report)	Job seeker
`/candidate/applications`	My applications	Job seeker
`/candidate/applications/{id}`	Application details	Job seeker
`/candidate/applications/{id}/feedback`	Rate your accommodations	Job seeker

B Labels and statuses

API values and the words the user sees. Badge = icon and colour of the status badge.

Application

API value	Shown as	Badge
`pending`	Submitted	• neutral
`reviewed`	Reviewed	• blue
`hired`	Hired	✓ green
`rejected`	Not selected	– grey
`withdrawn`	Withdrawn	– grey

Job posting

API value	Shown as	Badge
`draft`	Draft	– grey
`pending_approval`	Waiting for approval	! amber
`open`	Open	✓ green
`closed`	Closed	– grey

Registry check

API value	Shown as	Badge
`ACTIVE`	Active	✓ green
`EXPIRED`	Expired	✕ red
`CANCELLED`	Cancelled	✕ red
`NOT_FOUND`	Not found	✕ red
`ERROR`	Check failed	! amber

Report

API value	Shown as	Badge
`open`	Open	! amber
`dismissed`	Dismissed	– grey
`actioned`	Action taken	✓ green

Feedback rating

API value	Shown as
`delivered`	Delivered
`partial`	Partly delivered (counts as half)
`not_delivered`	Not delivered

Employment type

API value	Shown as
`full_time`	Full-time
`part_time`	Part-time
`contract`	Contract
`internship`	Internship

Work setup

API value	Shown as
`onsite`	On-site
`hybrid`	Hybrid
`remote`	Remote

Interview format

API value	Shown as
`online`	Online interview
`onsite`	On-site interview

Accommodation group

API value	Shown as
`physical_access`	Physical access
`communication`	Communication
`work_arrangement`	Work arrangement
`assistive_technology`	Assistive technology
`support`	Support

Role

API value	Shown as
`candidate`	Job seeker
`employer`	Employer
`admin`	Administrator

C Notification texts

Each notice has a message and a link; the planned emails repeat the same text (section 9).

To	When	Message	Opens
Employer	A job seeker applies	"Maria Santos applied for Junior Web Developer."	Application review
Job seeker	Employer opens the application	"Bayanihan Tech Solutions is reviewing your application for Junior Web Developer."	Application details
Job seeker	Employer marks as hired	"Congratulations! … marked you as hired for {job}. You can rate the promised accommodations from {date}."	Application details
Job seeker	Employer marks as not selected	"… decided not to continue with your application for {job}."	Application details
Employer	Job seeker withdraws / confirms hire	"… withdrew the application for {job}." / "… confirmed being hired for {job}."	Application review
Employer	Admin approves or rejects the company	"{company} is now verified. Candidates see the Verified badge on your postings." / "{company} was not verified: {reason}. Update your company profile to be checked again."	Company profile
Employer	Admin approves, rejects or removes a posting	"Your posting {job} was approved and is now open to candidates." / "…was not approved: {reason}. Edit it and submit it again." / "…was removed by an administrator: {reason}."	Job page / edit form / Job postings
Job seeker	PLANNED Feedback form opens (day 30)	Rating reminder	Rate your accommodations

D Accessibility rules to keep

OpenDoor targets WCAG 2.1 AA (audit October 11, 2026: axe found 0 violations on 33 pages; Lighthouse 100 on the public pages). Any new UI must keep these behaviours.

- One h1 per screen; after moving to another screen, focus goes to its h1 and the browser tab title changes ("Saved jobs – OpenDoor").
- "Skip to main content" link first in the page; landmarks: header, two navigations ("Account", "Main"), main, footer.
- Every input has a visible label; hints and errors sit between the label and the input and are linked to it; required fields say "(required)" in text.
- After a failed submit show the error summary at the top and move focus to it.
- Status is never shown by colour alone (text + icon + colour). Contrast at least 4.5:1 for text and 3:1 for borders and focus rings.
- Buttons stay focusable while busy or unavailable; they say what is happening ("Saving…", "Please wait…").
- Dialogs: focus inside, Escape closes, focus returns to the opener; dangerous confirmations start on Cancel.
- Announce results and saves without moving focus: result counts ("3 jobs found", also "0"), "Your needs are saved.", "Saved. Find it under Saved jobs."
- If the focused element disappears (a deleted row), focus goes back to the page h1 instead of the top of the document.
- Touch targets at least 44 px; works at 360 px width, 200 % zoom and with the 125/150 % text setting without sideways scrolling.
- Dates in Philippine time, written out ("October 12, 2026"); distances as text ("427 m away"), never only on a map.
- Read aloud and Voice input appear only where the browser supports them and never start on their own.

E Demo accounts

Seeded by `php artisan migrate:fresh --seed`. All use the password in `DEMO_PASSWORD` (Core `.env`, not written here).

Email	Name	Shown in the screenshots as
`admin@opendoor.test`	OpenDoor Admin	Administrator
`candidate@opendoor.test`	Maria Santos	Job seeker with 3 saved needs
`candidate2@opendoor.test`	Juan Dela Cruz	Job seeker, hired, can rate
`employer@opendoor.test`	Ana Reyes	Bayanihan Tech Solutions – verified, trust score 79%
`employer2@opendoor.test`	Ramon Villanueva	Kalinga Foods Inc. – waiting for verification

Rebuilding this document

- Start the stack on a freshly seeded Core database (a copy such as `opendoor_core_test` keeps the main local data untouched).
- In `tests/a11y`: `node ui-reference/capture.mjs` (needs `DEMO_PASSWORD`; adds a few demo actions, then takes the screenshots), then `node ui-reference/build.mjs`.
- Screen texts live in `tests/a11y/ui-reference/content.mjs`.
